'Eskornade' provides comprehensive and long-acting treatment in nasal congestion, by its combination of a drying agent, a decongestant, and an antihistamine, in sustained-release capsule presentation. being washed away in nasal secretions. Each 'Eskornade Spansule' capsule contains isopropamide 2.5 mg., phenylpropanolamine hydrochloride 50 mg. and diphenylpyraline hydrochloride ('Histryl') 5 mg.

'Eskornade' is also available as a palatable syrup, which is especially suitable for treating nasal congestion in children.

**ORBENIN** is indicated for immediate use in known or suspected resistant staphylococcal infections, and in mixed Gram-positive infections (e.g. infected burns) where resistant staphylococci may be present.

- Orbenin is stable to staphylococcal penicillinase and highly effective against 'resistant' staphylococci. Its activity is four times that of methicillin.
- Orbenin is also highly effective against other Gram-positive organisms, including streptococci, pneumococci and 'penicillin-sensitive' staphylococci.

All non-barbiturate hypnotics—like all houses—are not necessarily safe; but Serenesil (ethchlorvynol, Abbott) has a record of six years' safe usage.

**Serenesil is safe.** It is not contra-indicated by renal or hepatic impairment, or by pulmonary disease. The incidence of side effects is low, and they are transient and largely of a minor character. Patients have been revived without lasting ill-effects even after taking as much as fifty times the normal dose, and there is no evidence of any chronic toxicity.

**Serenesil is effective.** Many of the patients who complain that they cannot sleep do not need anything as potent as a barbiturate, upon which they might become dependent. They need only the gentle persuasion that Serenesil gives. Just one 500 mg capsule induces sleep in most cases of simple insomnia due to anxiety, though a second capsule may be taken in case of need.

When an effective dosage is attained, ALDOMET produces a smooth, maximal effect in most patients in 12 to 24 hours.

Dosage is simple, flexible and easily established.

The duration of action is short and hypertensive rebound does not occur on stopping treatment.

There is a general lack of severe side effects.

ALDOMET is a first choice for the treatment of all cases of essential hypertension.

The 20 mg. tablets of 'Daptazole' which are used concurrently with morphine in the management of terminal disease have been withdrawn and in their place it is suggested that 50 mg.—half a scored 'Daptazole 100' tablet—be used, adjusting the frequency of administration as necessary.

It is suggested that to avoid confusion prescriptions for the new form of 'Daptazole' clearly specify 'Daptazole 100', though chemists have been advised that, where 'Daptazole' tablets (dose unspecified) are prescribed, 'Daptazole 100' should be dispensed.

one by one - one by one - one by one - one by one

One-by-one. That is the secret of the accuracy of this revolutionary instrument for counting and sizing blood cells. One hundred times as many cells are counted by a Coulter Counter as by visual methods, ensuring far greater accuracy, in a fraction of the time, and it can be operated by junior technicians.

The high-numerical count taken results in a reduction of statistical error by a factor of 10 compared with visual counting. Human errors are completely eliminated.

Complete size distribution curves can be obtained in a matter of minutes and this speed alone makes it possible to save, solely in man hours, the cost of the Coulter Counter within one year.

## Come, fill the case...

Breadless, wineless, sadly songless in an unpoetic wilderness known as "the dog house". Such poetic justice may well descend upon that dream-filled head of yours. For if you scatter your quatrains to the four corners of the living-room, don't feign surprise when you're hauled onto the carpet—Persian or otherwise—and faced with a wife waxing anything but lyrical. The gist of her few-thousand-word sermon being: "The proper place for books is a bookcase". Who can deny it?

Minty have specialised for years in making superb bookcases that house your many-splendoured books in dust-free distinction behind very elegant sliding glass doors. Easy on the eye—and the pocket—they allow you to go your merry way reading books, buying books—for Minty bookcases are *sectional* and may be started for as little as £12.19.0—on deferred terms if you prefer. Only at the Minty Centres shown below can you see and buy Minty bookcases (and furniture). The Centres are so placed that Minty furniture is within reasonably easy reach of most people. If, however, for any reason you can't call, Minty will be glad to send you a catalogue and particulars of post ordering. Write to Dept. B.25, Minty Ltd., 44-45 High Street, Oxford.

### BREATHING EXERCISES FOR BRONCHITIS

A helpful leaflet for distribution to patients by physicians and physiotherapists. It explains the effects of bronchitis on breathing; describes "normal" breathing; gives exercises designed to help relaxation, to help empty the lungs of excess air, and to encourage the use of the diaphragm in breathing. The leaflet has been prepared by a chest physician and a physiotherapist at a chest hospital and the exercises are illustrated by diagrams.

first British quadruple vaccine

# QUADRILIN

Quadrilin is unique. It gives protection simultaneously against the four most dangerous childhood diseases:

**pertussis**  
**diphtheria**  
**tetanus and**  
**poliomyelitis**

the name Quadrilin is a Glaxo trade mark

Laboratory and clinical trial<sup>1,2</sup> has confirmed that Quadrilin is a highly potent vaccine that produces an adequate response to all components.

By simplifying immunisation, Quadrilin can help to multiply considerably the number of children being protected in the critical early months of life. Because of the extremely high potency of the poliomyelitis fraction of Quadrilin (especially the Type 1 component) it can be given as early as three months of age to fit in with the Ministry of Health Schedule P.

In boxes of 1ml single dose ampoules.
