Almost every week fresh evidence is received of Alphosyl's success in even those cases of Psoriasis which have defied all other treatment of years.

The most recent controlled study showed that in 55 cases out of 62—89% of the group—psoriatic lesions were cleared by 75% to 100% and nearly half of them were completely cleared after use of Alphosyl.

In Alphosyl allantoin and a specially refined coal tar extract are presented together for the first time. This combination not only causes a rapid clearance

of the condition but positively stimulates the healing process. Alphosyl is particularly safe. The fact that potentially hazardous measures—arsenicals, mercury, corticosteroids, x-rays—need not be used, further commends the medication. It can be confidently employed for scalp to toe psoriasis in even the most tender parts of the body. It is non-greasy and non-staining; it vanishes on application and thus is acceptable cosmetically especially for use on the scalp, face, hands or any parts of the body which may be exposed.

## Even obstinate cases of Psoriasis yield to Alphosyl—75% to 100% clearance overall

Completely cleared in 6 months: Adult male. Alphosyl therapy initiated 7th June. Marked improvement by 4th August, progressing until skin cleared of all lesions by 6th December.

The perfect appearance and fit of our Stockings is due to the unique elastic net weave, which gives strong but equal support in all directions, and no measure.

Please give exact measurements of limb. We make all correct allowances for compression. Measurements taken from old stockings are not suitable. Measurements should preferably be taken before rising, as the leg is then in a more normal state. Please note that measurements "F" should be taken immediately above the ankle bone and not around it. # FURAMIDE

**EFFECTIVE** Cure rates of 75% to 80% in the acute stage, and 90% to 100% in the chronic condition may be expected.

**CONVENIENT** No injections, no enemas, no special diet. Furamide is very suitable for ambulant patients.

**SIMPLE** Dosage is simple—1 tablet three times daily for ten days in patients of average weight.

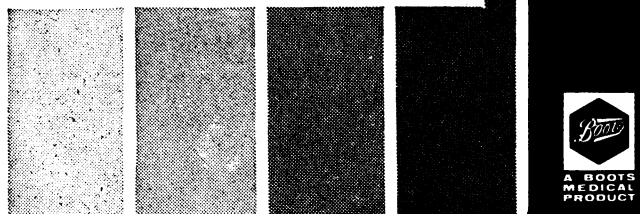

**SAFE** Side-effects are unlikely. The toxicity of Furamide is very low.

**ECONOMICAL** Hospitalization is not normally necessary so that treatment with Furamide is cheaper than the older forms of therapy.

Extensive clinical trials in many tropical and sub-tropical countries have borne out these claims. A list of references and detailed literature will gladly be sent on request.

**FURAMIDE** Each tablet contains 0.5 G of Entamide (diloxanide) furoate. Packed in bottles of 15 and 250 tablets.

## information on oral contraception

The research carried out by Searle during the last eight years into oral contraception has led to a considerable number of publications in the world medical press.

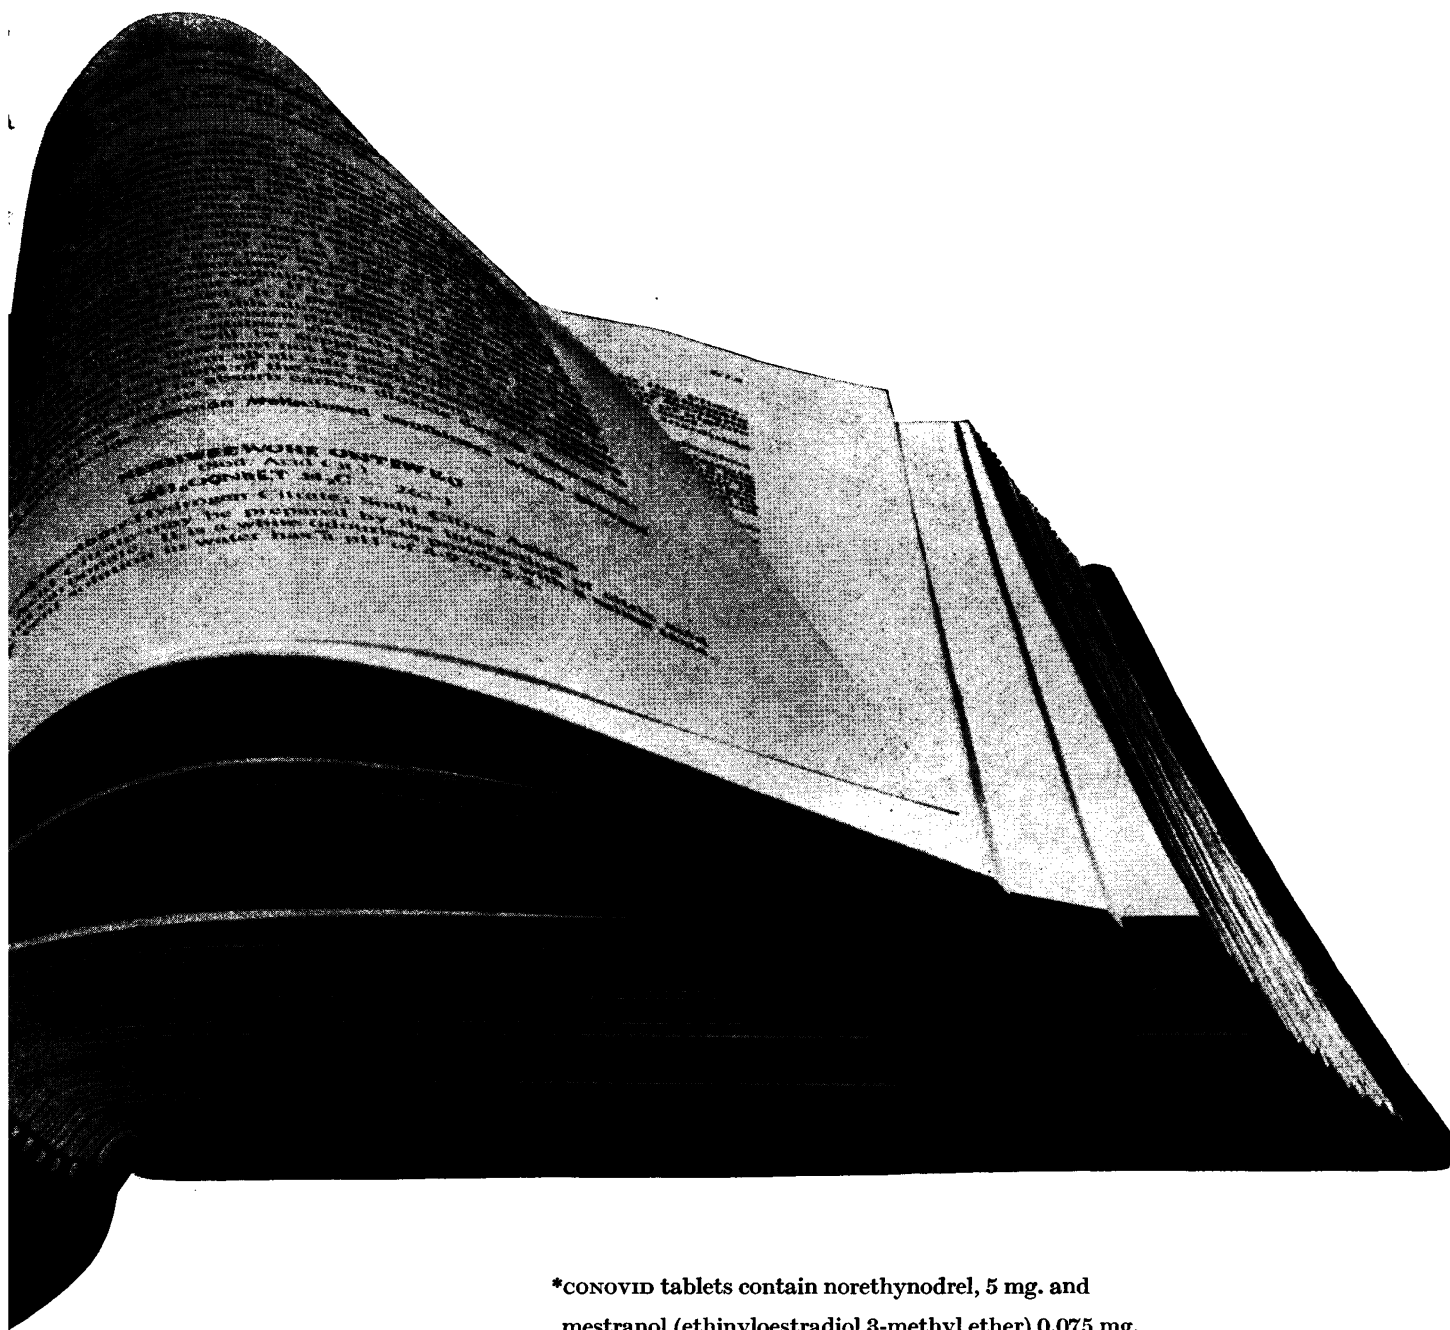

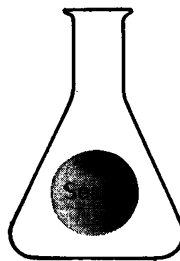

Many of these publications deal specifically with the two Searle oral contraceptive products, CONOVID\* and CONOVID-E† and are the basis of an information service available to the medical profession on request. This consists of fully documented reference manuals on CONOVID and CONOVID-E, a booklet in question and answer form dealing with many of the inquiries received regarding the use of the two products, and a booklet for patients available in quantity to the medical profession for distribution to their patients.

# QUADRILIN

Quadrilin is unique. It gives protection simultaneously against the four most dangerous childhood diseases:

**pertussis**  
**diphtheria**  
**tetanus and**  
**poliomyelitis**

the name Quadrilin is a Glaxo trade mark

Laboratory and clinical trial<sup>1,2</sup> has confirmed that Quadrilin is a highly potent vaccine that produces an adequate response to all components.

By simplifying immunisation, Quadrilin can help to multiply considerably the number of children being protected in the critical early months of life. Because of the extremely high potency of the poliomyelitis fraction of Quadrilin (especially the Type 1 component) it can be given as early as three months of age to fit in with the Ministry of Health Schedule P.

# The 4 features of Elastoplast

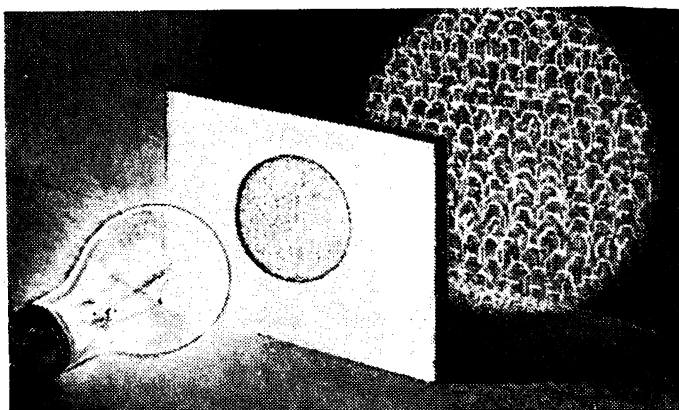

TRY THESE TESTS FOR YOURSELF

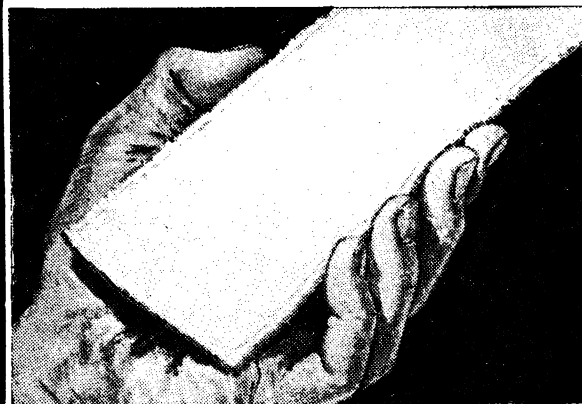

**2 STRETCH AND REGAIN** Stretch a marked length of Elastoplast bandage. It will extend by 75% with little effort and return almost to its original length. This critical stretch and regain is at its maximum in Elastoplast.

**1 POSITIVE ADHESION** You will be surprised how long you can suspend a pair of heavy scissors from a length of Elastoplast. The powerful adhesive sticks with very little pressure and keeps Elastoplast firmly in position during the longest treatment.

**3 EVEN, ALL-OVER POROSITY** Project images of the filament of a clear electric lamp through the pores of stretched Elastoplast on to a white surface. See how even the filament pattern is. Elastoplast leaves no occluded patches of skin even when there is more than one layer.

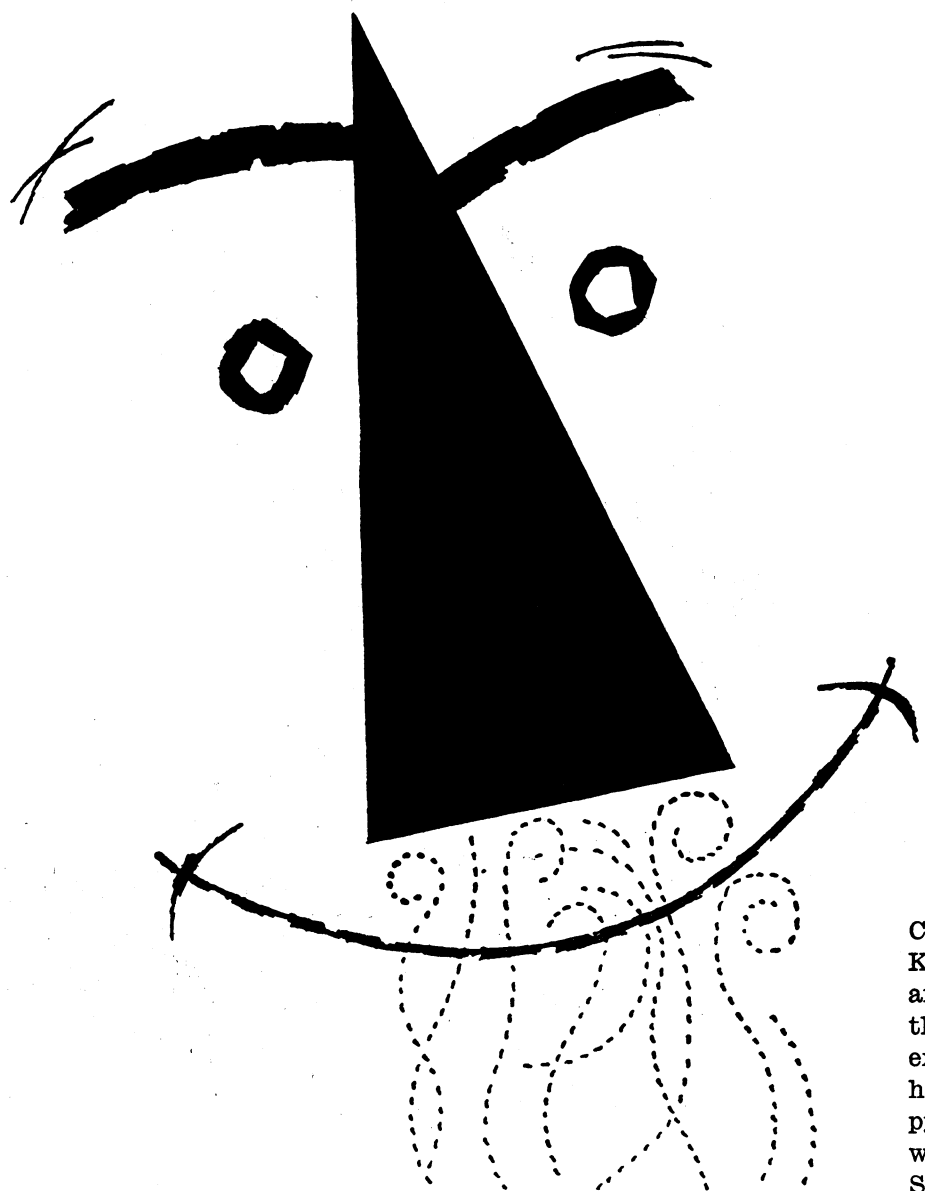

**4 SOFT, NON-ADHESIVE EDGES** Feel the softness of the selvedge of an Elastoplast bandage. It does not cut nor mark the skin. The edges are free from adhesive so that Elastoplast cannot stick to clothing nor ruck during wear.

## Only Elastoplast has all four advantages

The outstanding advantage of both PRESSURISED ISO-BROVON and PRESSURISED BROVON Inhalant is that the units and their tough shatter-proof plastic covering are transparent. *immediate and sustained relief

## ◀ PRESSURISED ISO-BROVON INHALANT COMPOSITION:

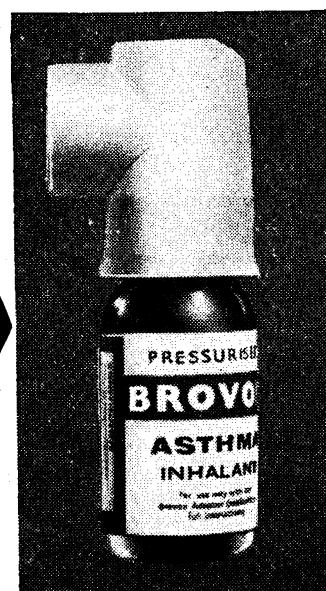

Isoprenaline Hydrochloride.....0.25%  
Atropine Methonitrate.....0.14%  
in an inert propellant

This inhalant combines the alternative powerful broncho-dilator, isoprenaline hydrochloride, for rapid action, with atropine methonitrate to provide sustained relief.

## PRESSURISED BROVON INHALANT COMPOSITION:

Adrenaline.....0.50%  
Atropine methonitrate.....0.14%  
Chlorbutol.....0.50%  
in an inert propellant

This inhalant combines the rapid broncho-dilatory action of adrenaline, to give immediate relief, with the prolonged action of atropine methonitrate, which ensures sustained relief.

## HIGH PRODUCTION OF UTILISABLE AEROSOL

By the incorporation of a new and unique device in PRESSURISED ISO-BROVON and PRESSURISED BROVON Inhalants, about 80% of the particles yielded are within the optimum range for penetration into the finest ramifications of the bronchial tree, and for absorption there.

## HIGH SPEED OF ACTION

Using a manually-operated inhaler, inhalation occupies 2 to 3 minutes. Using PRESSURISED ISO-BROVON and PRESSURISED BROVON Inhalants, inhalation is completed in a few seconds, thus diminishing the risk of emphysema, or of an attack proving fatal.

## COMPLETE SAFETY

PRESSURISED ISO-BROVON and PRESSURISED BROVON Inhalants are entirely safe and non-toxic.

# Synadrin

Regd. Trade Mark

## A new compound for the treatment of patients with angina pectoris

Synadrin is a specific coronary vasodilator, and is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments<sup>11-17</sup> and it has been tested in over 1,000 patients<sup>1-10</sup>. Results of trials so far reported have been promising and Synadrin has been described as "an effective drug for treating angina pectoris."<sup>1</sup>

### Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

## A Combined Effort

The Russian troika, pulled by the combined effort of three horses, was a popular and safe means of transport. In antibacterial therapy, too, the combined effort of three sulphonamides is more effective and safe than that of a single sulphonamide, which accounts for the popularity of 'Sulphatriad' over the past fifteen years.

In 'Penitriad', the combined effort of three sulphonamides is enhanced by that of penicillin V-K, 'Penitriad' being effective against infections caused by both sulphonamide- and penicillin-susceptible organisms.

## TRANSVASIN RELIEVES MUSCLE SPASM

Muscle spasm caused by physical injury or rheumatic lesions is rapidly relieved by the application of Transvasin. The esters of nicotinic, salicylic and p-amino benzoic acids penetrate the skin and are concentrated at the point of injury. Transvasin is an effective and economical therapy.

*Transvasin contains ethyl and n-hexyl nicotinate, ethyl p-aminobenzoate, 2% each and tetrahydrofurfuryl salicylate 14%. The N.H.S. price of the 30g. tube is 2/6d and the cost of an average application of the cream is under 1d.*

# Safety *with efficiency* in antiseptics

Long and comprehensive experience has fully demonstrated the value of Dettol in general practice, obstetrics and surgery.

**It is well-tolerated on the skin and tissues in high concentrations.**

**It is an efficient bactericide :—**

Dettol will destroy the following organisms in 10 minutes at 20 degrees C. in the dilutions given:—

Staph. aureus:	.....	.....	.....	1 in 200
S. typhi:	.....	.....	.....	1 in 350
Strept. pyogenes:	.....	.....	.....	1 in 500
Bact. coli:	.....	.....	.....	1 in 250
Ps. pyocyanea:	.....	.....	.....	1 in 40
Myco. tuberculosis:	.....	.....	.....	1 in 200
Sh. shigae:	.....	.....	.....	1 in 400

Different strains can vary widely in resistance, but the figures quoted are representative.

**Dettol efficiency is well maintained in the presence of organic material.**

A dilution of 1 in 50 will kill Staph. aureus in the presence of 25% blood in 5 minutes.

**It is compatible with soap.**

"Unlike the other antiseptics, Dettol appeared to have its activity increased by the presence of soap, and against Staph. pyogenes the effect was one of true synergism." (British Medical Journal, 28th July, 1956.)

**It is non-poisonous.**

**It does not stain linen, etc.**

**It is stable in solution.**

*Surgical Dettol, Orange, Blue or colourless — For pre-operative skin preparations.*

**hours of relief from one dose**

because *Pholtex* contains *pholcodine* and *phenyltoloxamine* as ion-exchange resin complexes to give smooth and prolonged effect — up to ten hours in many cases.

**more complete relief of unproductive cough**

because the cough depressant action of *pholcodine* is potentiated and reinforced by the antihistaminic and antispasmodic activity of *phenyltoloxamine*.

**economy of treatment**

because a 2 oz. bottle of *Pholtex* contains sixteen doses — enough for one week's treatment.

**dosage**

One teaspoonful (4 ml.) at minimum intervals of eight hours — *for children*: half to full adult dosage according to age.

**composition**

Each teaspoonful (4 ml.) contains *pholcodine* 15 mg. and *phenyltoloxamine* 10 mg. as resin complexes in a pleasantly flavoured thixotropic vehicle.

- ▶ **Effective treatment of depression**
- ▶ **Prompt relief of associated anxiety and tension**

TRYPTIZOL is available as 25 mg. and 10 mg. tablets and as an injection. Detailed information on dosage, administration, indications, precautions and bibliography is available on request.

TRYPTIZOL is effective in all forms of depression. It is particularly useful when depression is accompanied or even masked by anxiety and tension.

TRYPTIZOL is well tolerated and has a wide margin of safety. It is not a monoamine oxidase inhibitor and neither jaundice, parkinsonism nor blood dyscrasias have been recorded following its use.

# DANDRUFF?

Dandruff is a chronic nuisance. Yet strangely enough, few patients will think to ask you about it. They don't seem to realize their dandruff is a medical problem. Instead they simply endure their discomfort, or turn to their barber or hairdresser. That's why they'll appreciate a word from you when you spot signs of scalp trouble.

With the aid of SELSUN, Abbott's selenium sulphide suspension, you can relieve most cases of dandruff—promptly and pleasantly. SELSUN controls symptoms in 81 to 87% of seborrhoeic dermatitis cases, and in 92 to 95% of simple dandruff cases. After symptoms are controlled, one SELSUN application keeps the scalp healthy up to four weeks. The patient applies SELSUN like a shampoo, rinses it off five minutes later. That's all there is to it. SELSUN is available in 1, 2 and 4 fl. oz. bottles, complete with easy to follow directions.

... the incidence of frank vitamin deficiency diseases is very low. But there are many circumstances in which sub-clinical deficiency may occur. A vitamin C supplement is generally needed, for example, during growth in prenatal life and infancy.

## ***Ribena***

The simplest and most pleasant way of ensuring an adequate vitamin C intake in such cases is by giving Ribena. This natural product contains 45% of pure blackcurrant juice and provides not less than 20 milligrams of vitamin C per fluid ounce. The energy value is 83 Calories per fluid ounce.

# THE ROYAL NAVY offers you MORE

YOU CAN SERVE almost anywhere in almost any field of Naval activity, combining your calling as a doctor with the stimulus of a life as a commissioned officer in the Royal Navy. You could serve in almost any vessel from a frigate to an aircraft carrier, sail with the fleet to the Far East or work with a squadron in the West Indies. You could apply your care to Royal Marines Commandos, among parachutists, frogmen or rock climbers. You could fly with the Fleet Air Arm as a specialist in aviation medicine or investigate the problems of deep diving and advanced submarine development. You could work in a laboratory, hospital or medical school; serve at home or abroad, on shore or afloat; or study any one of a variety of subjects ranging from radio-biology to tropical diseases. And throughout your service as a Naval Medical Officer you would be working with the finest equipment in complete clinical freedom — and perhaps a greater opportunity to exercise your versatility than would ever be possible in civilian life.

**YOU CAN ENTER BY ONE OF THREE METHODS** All schemes lead to Short Service Commissions of 3-5 years' duration. Holders of such commissions can apply for permanent commissions after one year following appointment as Surgeon Lieutenant.

# GET THE NEW DUNLOP GRIP ON WINTER ROADS

Here is the tyre that so many people are talking about... the tyre that gives you a totally new road grip as well as new steering control. You can actually feel the extra security as you corner, brake or accelerate in wet, slippery conditions!

## THE FACTS BEHIND THE NEW SAFETY

To drive on Dunlop 'Gold Seal C41' is to enjoy a completely new experience in road-holding and steering control.

● For this 'Gold Seal' has no less than three revolutionary features. (1) The sensational *road-hug* rubber invented and developed by Dunlop for international motor racing; (2) the unique *safety shoulder* and (3) the *safety tread* from the world-famous Dunlop 'Road Speed' tyre.

● The results are well known to *thousands* with cars already fitted with the 'C41 Gold Seal'. Cornering is far more sure

and secure in the wet. Braking is better, emergency-stop distances are shorter.

● More, you enjoy a new, accurate steering control over raised white lines, cat's eyes, road-joints, tram line ruts and the like. Squeal is virtually eliminated and tread life increased.

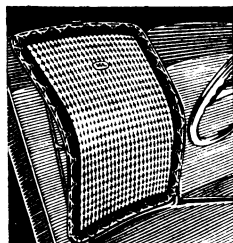

● This is in every respect the finest, *safest* tyre ever produced for the everyday motorist.

● Give yourself and your family 'Gold Seal' safety from now on. It costs no more! 'Gold Seal C41' is available in black or with slim white sidewalls.

## THE JAMES SMELLIE BURSARIES

A Charitable Trust has been founded by Mrs. H. K. Smellie in memory of her husband, the late Professor J. M. Smellie, Professor of Paediatrics and Child Health in the University of Birmingham from 1946 to 1958. Throughout his life Professor Smellie taught and practised the attitude of human approach to clinical paediatrics, and the purpose of the Trust is to encourage this attitude in doctors in training by giving them the opportunity of increased experience in the art of personal doctoring and a more intimate acquaintance with the patient's environment.

Three Bursaries will be awarded annually. Details of these bursaries are as follows:

- Two Bursaries to the value of 75 guineas each will be awarded to Senior Registrars or Registrars in Paediatrics. The holder will be required to work for one month in one or more of the following ways:
  - In the practice of an approved practitioner.
  - In a Health Centre working in close collaboration with a Local Authority.
  - In the Almoner's Department of an approved hospital.
  - In any other way approved by the Advisory Committee for the Trust for the study of human problems in relation to Paediatrics and Child Health.

The work of a holder of a Bursary should ordinarily be undertaken in a centre other than the one in which such holder is training. Each holder of a Bursary will be expected to submit a short account of his or her experience.

- One Bursary will be awarded annually to the value of 50 guineas to an experienced registered medical practitioner who shall practise at the Birmingham Children's Hospital for two weeks in order to enable him to give special emphasis to the teaching of the human and social aspects of child health. This Bursary will be awarded by selection and invitation of the Advisory Committee to the Trust.

Applications for the award of the James Smellie Bursaries should be sent before December 31, 1962, to Professor D. V. Hubble, Department of Paediatrics and Child Health, The Children's Hospital, Ladywood Road, Birmingham 16. Applications should be supported by two referees and should include a scheme of studies for approval by the Advisory Committee. (9587)
