Garrod's Inborn Errors of Metabolism

Reprint of the first edition with a Supplement by H. HARRIS

This classical monograph has long been out of print, and in view of the dramatic advances in human biochemical genetics made during the past few years it is appropriate that it should once more be made available. The Supplement contains a reprint of an important paper Garrod published in 1902, a bibliography of his writings, and a new section by Professor Harry Harris on 'the inborn errors today'. This book is the first of a series on medical genetics to be published under the general editorship of Dr. J. A. Fraser Roberts.

The Medical Care of Children

Edited by S. D. M. COURT

Eleven paediatricians working in a teaching hospital have collaborated in the writing of this book which attempts to relate their experience to the needs as they meet them of doctors in family practice. It does so by taking a selection of the common and important paediatric problems at each stage of childhood and showing, with the help of case histories, how they were dealt with. The book is addressed primarily to young doctors in family practice, but it will also appeal to students and paediatric residents in hospital.

Epidemiology

Edited by JOHN PEMBERTON

This book is based on the papers read at the Third Scientific Conference of the International Epidemiological Association held at Korcula, Yugoslavia, in 1961. Thirty-five papers have been selected and these have been extensively revised, and some entirely rewritten to bring them up to date; the authors were selected on an international basis. The book is divided into eight main sections: cancer; diarrhoeal diseases; arterial pressure; occupational diseases and accidents; neurological disease, anaemia, and nephropathy; standardization of diagnostic techniques; health services; and recent developments in the teaching of social medicine.

Pathology and Treatment of Sexual Deviation

Edited by ISMOND ROSEN

This volume provides a detailed study of the major technical and theoretical approaches in current use in the pathology and treatment of sexual deviation. The methodologies range from the standpoint of biology, ethology, general psychiatry and psychoanalysis to psychology and sociology. The sixteen contributors are all leading authorities with practical experience in either the clinical or experimental aspects. Though written for the psychiatrist and other workers in this field the subject matter is broad enough to be of interest to the general medical reader.

WALTER PAGEL, F. A. H.
SIMMONDS, N. MACDONALD,
and E. NASSAU

The text of this new edition has been extensively revised and many chapters have been entirely rewritten. In the pathology section two new chapters have been added, one giving the essentials in simple terms and the other on healing in tuberculosis. A new chapter on bacteriological diagnosis has been included in the clinical section and the chapter on chemotherapy has been considerably expanded. The section on epidemiology and prevention has been entirely rewritten and gives an up-to-date picture of the disease in different parts of the world.

All the evidence points to COLOMYCIN

"A clinical and bacteriological study of forty patients has demonstrated that colistin methane sulphonate ('Colomycin') is effective in the treatment of infections with *Pseudomonas pyocyanea*. In the dosage employed, there were no serious toxic effects."

Lancet (1962) 2, 738.

"Two infants with meningococci and meningitis, one infected with *Ps. pyocyanea* and the other with *Esch. coli* were included. Both these patients rapidly responded to intramuscular treatment with elimination of the infecting organism."

Lancet (1962) 2, 741.

"It ('Colomycin') is clinically effective in the treatment of infections due to *Ps. pyocyanea* and is thought to be the best antibiotic so far available for this purpose. The development of resistance to 'Colomycin' and toxic side-effects were insignificant."

Brit. Med. J. (1962) 2, 161.

"... colistin, with its great efficacy against pseudomonas and klebsiella, is a valuable addition to the antibiotic armoury."

Lancet (1962) 2, 741.

"In view of the absence of toxic or other side effects during the course of this investigation and the bacteriological evidence of its action against *Sh. sonnei* in man, it is concluded that colistin ('Colomycin') is a useful addition to the drugs already available for the treatment of Sonne dysentery."

Clinical Medicine (1963) Vol.70, No.1, 76.

in infections due to *Ps. pyocyanea* and coliform organisms.

Clinical reports on COLOMYCIN clearly show that it is a valuable addition to the antibiotic armamentarium in treating infections due to Gram-negative organisms. It is of outstanding value in the treatment of gastroenteritis, urinary tract and other systemic infections, as these references from recently published medical papers demonstrate.

THIAVER

with great potential
in general practice

Thiaver is particularly valuable in general practice for that large group of hypertensive patients who are not adequately controlled by milder agents and their combinations. *Thiaver* provides an alternative to adrenergic or ganglion-blocking agents whose use is often limited by the side-effects they produce.

Potent yet suitable for prolonged use *Thiaver* combines the hypotensive properties of *Veriloid*, one of the few effective centrally-acting antihypertensives, with those of epithiazide, a new potent diuretic/hypotensive, to provide smooth but positive control of blood pressure with gradual onset of effect. Outstanding advantages of *Thiaver* are that it does not cause postural hypotension nor does tolerance develop.

Very simple dosage Treatment with *Thiaver* is free from the need for frequent and critical dosage adjustment. Satisfactory control of blood pressure is obtained in most patients with two or three tablets daily.

Each tablet contains *Veriloid* (standardised alkaloids of *Veratrum viride*) 4 mg. and epithiazide 4 mg.

The importance of simplicity in the treatment of diabetes

The diabetic is condemned to a life-time of medication to control his condition.

In few other conditions is simplicity and ease of administration so important.

The introduction of the sulphonylureas eight years ago relieved one group of diabetics from the burden of daily injections. The extensive use of Rastinon in oral antidiabetic therapy for over two million patients has shown that it is not only one of the safest drugs available, but also one of the

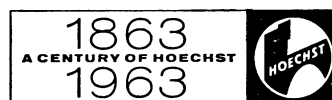

most effective in controlling diabetes when the condition is first discovered at middle age. Rastinon is the standard oral treatment of diabetes, and it is remarkable for its

For patients with marked involvement of
trunk and abdominal muscles

Spencer

IS the support of choice

Spencer Supports are therapeutically effective as treatment aid in convalescent and chronic poliomyelitis, especially where there is involvement of trunk and abdominal muscles. The patient pictured at left is a typical example. This female child is shown 16 months following acute poliomyelitis. Note residual paralysis of abdominal muscles, scoliosis, and marked lordosis. Treatment for this patient included Spencer Spinal Support (as shown) to help maintain and correct body alignment and to help prevent further development of deformity. A Spencer abdominal Spring Pad* was incorporated in the support to aid respiration and to compensate for paralysed abdominal muscles.

Spencer is the support of choice because: each Spencer Support is *individually designed, cut, and made* according to the medical indications for each patient.

Come, fill the case...

Breadless, wineless, sadly songless in an unpoetic wilderness known as "the dog house". Such poetic justice may well descend upon that dream-filled head of yours. For if you scatter your quatrains to the four corners of the living-room, don't feign surprise when you're hauled onto the carpet—Persian or otherwise—and faced with a wife waxing anything but lyrical. The gist of her few-thousand-word sermon being: "The proper place for books is a bookcase". Who can deny it?

Minty have specialised for years in making superb bookcases that house your many-splendoured books in dust-free distinction behind very elegant sliding glass doors. Easy on the eye—and the pocket—they allow you to go your merry way reading books, buying books—for Minty bookcases are *sectional* and may be started for as little as £12.19.0—on deferred terms if you prefer.

Only at the Minty Centres shown below can you see and buy Minty bookcases (and furniture). The Centres are so placed that Minty furniture is within reasonably easy reach of most people. If, however, for any reason you can't call, Minty will be glad to send you a catalogue and particulars of post ordering. Write to Dept. B.29, Minty Ltd., 44-45 High Street, Oxford.

Which would you recommend for patients with arterial disease?

In planning diets for patients with arterial disease and coronary heart disease, many doctors recommend the substitution of a vegetable fat to aid in lowering the patient's serum cholesterol level. Look carefully at the two bottles above: which would you recommend to a patient? **ANSWER:** They are identical. The bottle on the right contains Mazola Corn Oil, labelled with its fatty-acids percentages. The bottle on the left contains *exactly the same oil*, and bears the label under which it is sold in thousands of grocery stores throughout the country. (Where your patients can buy it easily and inexpensively.) Mazola Pure Corn Oil: 3/7 for 16 fluid ounces.

IN CARDIAC OEDEMA AND HYPERTENSION **APRINOX** IS THE IDEAL ORAL DIURETIC

Single daily doses of 5 to 10 mg. reliably clear oedema, while similar doses twice or thrice weekly maintain the oedema-free state. In hypertension, doses of 2.5 to 5 mg. daily lower the elevated blood-pressure and enhance the hypotensive effects of reserpine and ganglion-blocking agents. Aprinox is inexpensive—the basic NHS cost of 25 x 5 mg. Aprinox tablets is 3/9, (ex 500 pack).

BENDROFLUAZIDE NOW IN THE B.P. Bendroflumazide, the active ingredient of Aprinox is included in the new edition of British Pharmacopoeia (July 1963)—official recognition of its value as a therapeutic agent.

BANK LOANS A special personal service

When you
need a
little
extra . . .

If you are a Doctor living in the British Isles, Lombard Banking offers you the full advantages of a Confidential and Personal Bank Loan. With a Lombard Personal Bank Loan you simply pay by cheque for holidays, clothing, home improvements, car repairs, medical bills, moving expenses, shopping bargains, travel, hospital bills, education, business expenses, insurance payments, dental expenses, children's needs, or for whatever other purpose you have decided to borrow. This means that you may draw from £50 to £500 in multiples of £5, according to your requirements. With a Lombard Bank Loan you may claim valuable tax relief on all interest charged. Repayments on your loan can be made over periods from six months up to thirty-six months, whichever suits you best. Therefore you always know, well ahead, exactly what your commitments are going to be. For further details about this invaluable Personal Service, please write to the Manager, Personal Bank Loans Department (BM).

STANDARDIZED SENNA

RE-EDUCATES THE BOWEL TO NORMAL FUNCTION

"Trials of this standardized preparation have been prosecuted in many hospitals throughout Great Britain upon subjects aged 3-86 years, with results that show it to be a valuable ally in the cure of chronic constipation..."

Brit. Ency. Med. Pract. Cum. Suppl., (1962), p. 197

"...this standardized senna derivative, as predicted on experimental grounds, acts in a way almost indistinguishable from the normal physiologic mechanism, and...rehabilitates and re-educates the constipated bowel toward resumption of normal reflex activity."

Quart. Rev. Surg. Obstet. Gynec., (1957), 14, 196

HERE'S A NEW ANTACID THAT'S FAR MORE ACCEPTABLE . . . AND MORE EFFICIENT

Glymaxil—the first soluble buffer antacid—is a solution of an entirely new chemical compound, an antacid chelate. ■ Glymaxil is presented as a clear liquid, attractive to the eye and pleasant to take. It is ideal for both short and long term therapy. ■ Glymaxil neutralises faster and will buffer more acid in the ideal pH range of 3 to 5 than the traditional mixtures, without constipating or laxative effect.

Glymaxil (sodium glucaldrate) is a product of British research at

CREMOSTREP

'Sulfasuxidine', Streptomycin, Kaolin Suspension

CREMOSTREP brings swift symptomatic relief to most cases of diarrhoea. It contains two agents, 'Sulfasuxidine' and streptomycin, known to be very effective against most intestinal pathogens. Kaolin is included for its soothing adsorbent properties. CREMOSTREP is usually well tolerated and the relatively low dosage makes treatment economical (adult dosage, 4 teaspoonfuls two to four times per day).

CREMOSTREP Suspension contains, in each 100 ml., 10 G. 'Sulfasuxidine',* 1 G. streptomycin (as the sulphate), and 10 G. kaolin. It is supplied in 3 fl. oz. bottles.

Detailed information on indications, dosage, administration and precautions is available on request.

GLAXO LABORATORIES LIMITED

a new antacid palatable effective economical

Alcin is a new antacid offering several important advantages. It provides safe and effective treatment of symptoms associated with gastric hyperacidity and peptic ulceration.

Palatability Having an absence of chalkiness and an agreeable flavour, Alcin is non-nauseating.

Buffering Activity Alcin not only rapidly neutralises excess acid, but at the same time its sustained buffering activity maintains the level of acidity of the gastric contents within the desired range.

Safety Alcin is safe for prolonged administra-

tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

No Digestive tract ill-effects Alcin has no known laxative or constipating effects.

Economy Alcin is economical in use. The basic N.H.S. cost of 50 tablets is 1/9½d.

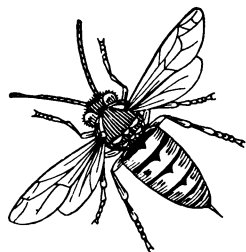

Composition: Each tablet contains 360 mg. anhydrous co-prepared sodium magnesium aluminium silicate and basic magnesium aluminate.

Samples available on request to *Reckitt & Sons Limited, Pharmaceutical Department, Hull.*

clears infected ears

The modern method of treatment in otitis externa, chronic suppurative otitis media, and infected mastoid cavities, is 'Otosporin' brand Drops. 'Otosporin' is an aqueous suspension containing both neomycin and polymyxin B sulphate which are together effective against practically all the bacteria found in ear infections. They are unlikely to induce bacterial resistance or skin sensitisation, and neither of them gives rise to cross-resistance or cross-sensitisation to penicillin and other antibiotics. Their effectiveness is visibly enhanced by the hydrocortisone in 'Otosporin': this, by reducing inflammation, not only relieves pain, but provides greater access for the antibiotics

information on oral contraception

The research carried out by Searle during the last eight years into oral contraception has led to a considerable number of publications in the world medical press. Many of these publications deal specifically with the two Searle oral contraceptive products, CONOVID* and CONOVID-E† and are the basis of an information service available to the medical profession on request. This consists of fully documented reference manuals on CONOVID and CONOVID-E, a booklet in question and answer form dealing with many of the inquiries received regarding the use of the two products, and a booklet for patients available in quantity to the medical profession for distribution to their patients.

the diuretic with potassium

Whenever diuretic therapy is indicated, the administration of HydroSALURIC-K will provide:

- the short duration of action of hydrochlorothiazide, giving uninterrupted nights
- a reasonable safeguard against the development of thiazide-induced hypopotassaemia and its sequelae.

The supplement of potassium chloride is enclosed in a reliable enteric coating to avoid nausea and vomiting.

HydroSALURIC-K is supplied as pink, sugar-coated tablets containing 25 mg. hydrochlorothiazide and 572 mg. potassium chloride. Detailed information on indications, dosage, administration, precautions and bibliography is available on request.

Durex Gossamer and the post-partum period

The new, pre-lubricated protective—Durex Gossamer—is advocated by many gynaecologists and obstetricians, as an important adjunct to the treatment of certain abnormal vaginal conditions.

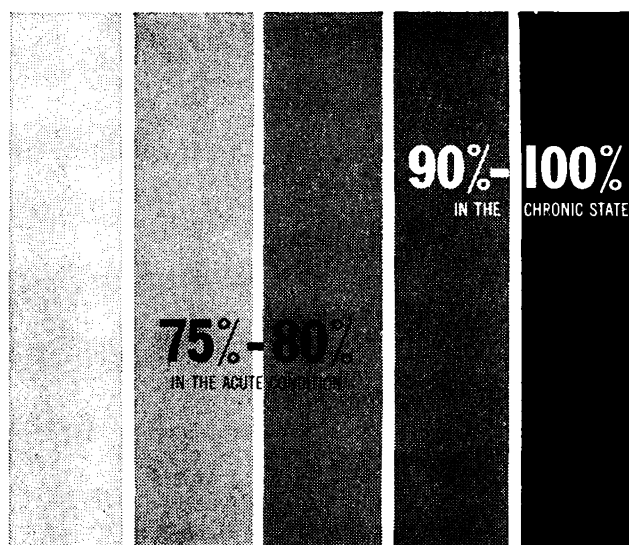

A most important application of the Durex Gossamer is in preventing an exacerbation—*during coitus*—of the inflammation and discomfort which frequently accompanies the post-partum period, vaginitis and leucorrhea. Furthermore, this type of protective is recommended where insufficient vaginal secretion is manifest, as in early marriage, frigidity and menopausal atrophy.

Where there is risk of transferring infection, Durex Gossamer has been shown to reduce the incidence of vaginal infection during the post-partum period.

But the outstanding advantage of Durex Gossamer is the confidence it instils, and the comfort it provides during the post-partum period. The physician and patient know it to be an effective and reliable contraceptive.

THESE ARE THE CURE RATES WHICH
MAY BE EXPECTED IN THE
TREATMENT OF AMOEBIASIS WITH

FURAMIDE

EFFECTIVE Cure rates of 75% to 80% in the acute stage, and 90% to 100% in the chronic condition may be expected.

CONVENIENT No injections, no enemas, no special diet. Furamide is very suitable for ambulant patients.

SIMPLE Dosage is simple—1 tablet three times daily for ten days in patients of average weight.

SAFE Side-effects are unlikely. The toxicity of Furamide is very low.

ECONOMICAL Hospitalization is not normally necessary so that treatment with Furamide is cheaper than the older forms of therapy.

Extensive clinical trials in many tropical and sub-tropical countries have borne out these claims. A list of references and detailed literature will gladly be sent on request.

FURAMIDE Each tablet contains 0.5 G of Entamide (diloxanide) furoate. Packed in bottles of 15 and 250 tablets.

THE CAR THAT ALWAYS COMES SECOND

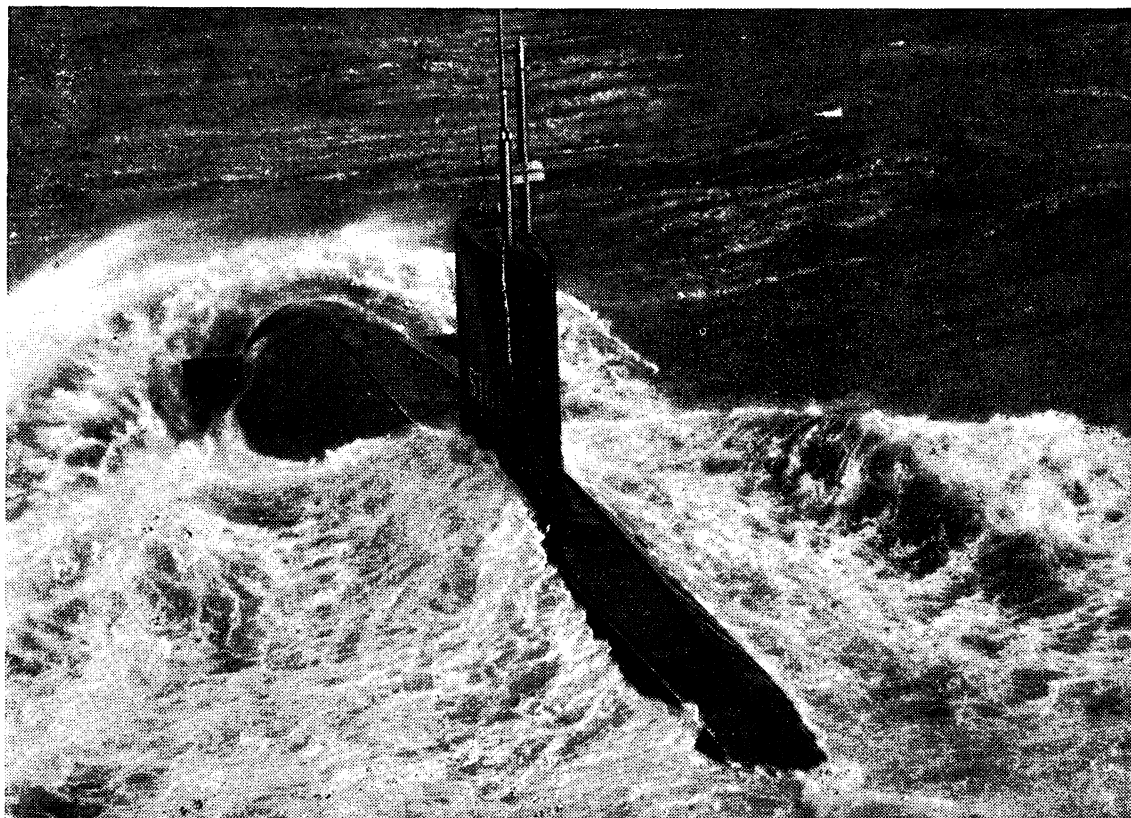

There's one thing we consider more important than a Volkswagen. ☐ Did you know, for example, that you can't buy a Volkswagen in this country until there are enough spares to replace every single part on your particular car? ☐ Did you know that Volkswagen dealers all over the country employ factory-trained mechanics, experienced people who know every inch of your car, who can correct faults quickly and efficiently from a full quota of spares they are required to carry? ☐ Yes, you've probably guessed it. It's the Volkswagen Service that comes first. The service that makes a Volkswagen driver a confident man—everywhere.

The go-ahead
OPPORTUNITY
that is ROYAL NAVY

you find it as a
MEDICAL OFFICER

As a Medical Officer, you have complete clinical freedom and a widely varied medical experience. Your practice is among 100,000 Naval men and women. Ashore or afloat, it can take you anywhere in the world from Malta to Singapore: and, when you have a shore appointment abroad, your family can be with you. Go-ahead, too, is your opportunity to specialize: not only in traditional categories, but in the modern sciences of aviation and nuclear medicine.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your

initial pay is considerably higher than that of a civilian hospital registrar.

You can enter by one of three ways: as a Registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission.

For fullest details, write, mentioning your own qualifications and age to: The Medical Director General of the Navy, Medical Dept. (HN/8), The Admiralty, Empress State Building, London, S.W.6.

ARE YOUR HYPERTENSIVES PLAGUED BY **DEPRESSION ?**

Presented are notes from three clinical studies. Harmony! was used as sole agent of therapy by 343 mixed hypertensives, and patients with mild functional/psychiatric disorders. Only eight reported mild depression concurrent with therapy—an incidence of 2.33%.

Study No. 1. Two hundred and eighty-three patients treated in private practice, at hospital outpatient clinics, and in office psychiatric practice. Average initial dosage of Harmony! was 0.1 mg. to 0.25 mg. three or four times daily. No patient received more than 6 mg. daily. Eight reports of mild depression.

Study No. 2. Eighty patients with benign essential hypertension were studied via 'double-blind' method. Mean daily dosage of Harmony! was 0.25 mg., with a minimum dosage of 0.1 mg. and a maximum of 0.5 mg. daily. No reports of depression in the group of 20 on Harmony! therapy.

Study No. 3. Forty patients with hypertension and anxiety neurosis . . . from mild to moderately severe. Half of the group had received other anti-hypertensive agents at one time or another; these were discontinued before and throughout the study. Usual dosage of Harmony! was 0.1 mg. three times daily after meals. Sometimes an additional dose was taken at bedtime. No reports of depression associated with this therapy. Other investigators have found so little indication of depression with Harmony! therapy that they do not record it as a significant side-effect.

SERVICES

A PRACTICE AS WIDE AS THE WORLD

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and certain allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.I.), (HN53G), 1 Tavistock Square, London, WC1.
