

HERE'S A NEW ANTACID THAT'S FAR MORE ACCEPTABLE . . . AND MORE EFFICIENT

Glymaxil—the first soluble buffer antacid—is a solution of an entirely new chemical compound, an antacid chelate. ■ Glymaxil is presented as a clear liquid, attractive to the eye and pleasant to take. It is ideal for both short and long term therapy. ■ Glymaxil neutralises faster and will buffer more acid in the ideal pH range of 3 to 5 than the traditional mixtures, without constipating or laxative effect.

FERRO-GRADUMET
TRADE MARK

FOR MAXIMUM IRON
WITH MINIMUM
SIDE EFFECTS

Time and again you'll have listened to complaints of discomfort and gastric upset from patients undergoing treatment for iron-deficiency anaemia. The reason — iron intolerance; the cause—the action of the usual ferrous sulphate tablets resulting in unpleasant side effects. But ferrous sulphate is probably the most efficient form of iron; and as you know, it should be taken on an empty stomach for maximum effect. How then to reduce or prevent discomfort in anti-anaemia therapy?

IRON IN TIMED RELEASE

From Abbott comes the answer—the Ferro-Gradumet, the one-a-day oral haematinic in a plastic matrix that slowly leaches out its full day's dose of ferrous sulphate (525 mg, equivalent to 105 mg of elemental iron) in a predetermined pattern over a number of hours; and, thanks to its unique GRADUMET presentation, does not disintegrate in the stomach, where ferrous sulphate is most irritant and least well absorbed. Here at last is an efficient treatment for iron-deficiency anaemia that permits a day's requirements of iron to be taken in a single tablet, pleasantly and with a minimum of side effects.

FERRO-GRADUMETS are supplied in bottles of 30 or 100 tablets each containing 525 mg ferrous sulphate (in exsiccated form), equivalent to 105 mg elemental iron.

A Brilliant New (11th) Edition
of the world famous
CECIL AND LOEB'S
TEXTBOOK OF MEDICINE

The W. B. Saunders Company are pleased to announce the publication of this new edition of Cecil's Medicine, edited this time by Paul B. Beeson of Yale and Walsh McDermott of Cornell.

There are 67 new contributors to this edition, new emphasis on pathological physiology, new disease entities discussed—but the basic philosophy of this classic textbook remains unchanged. Its aim, as in previous editions, is to provide students and practitioners with accurate and detailed descriptions of the disease entities they will encounter in the broad compass of internal medicine.

Other changes in this new (11th) edition include: a completely new section on genetics and genetic diseases—significant expansion in the section on viral diseases—reorganisation and expansion of the sections on bronchopulmonary disease and gastroenterology—a brilliant new foreword on nucleic acids, genes, viruses and immunity. Cecil-Loeb's Textbook of Medicine, by 173 American Authorities. Edited by Paul B. Beeson, Insign Professor of Medicine, Yale University; and Walsh McDermott, Livingston Farrand Professor of Public Health, Cornell University. Available either as a single volume or two-volume set.

Single volume £6 16s. 6d. Two volume set £8 4s. 6d.

TB patients feel at home with **INAPASADE**

British Patent No. 885,455

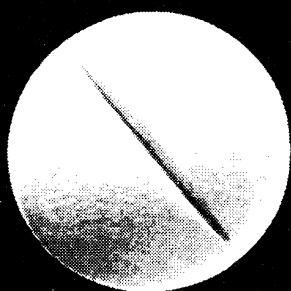

INAPASADE—EASILY SWALLOWED, PALATABLE GRANULES OF PAS-INH—has taken the drudgery out of tuberculosis therapy and is rapidly being accepted as standard combined treatment. In hospital, supervision is simplified; at home, treatment fits unobtrusively into the daily routine—no need to carry drugs to work or swallow them in public. One dose, one swallow; one with breakfast, one with supper. Inapasade is the answer to skipped or forgotten doses. It is the simplest and most acceptable of all treatments for tuberculosis.

Two doses a day provide sodium aminosalicylate B.P. 12 G. and isoniazid B.P. 300 mg.
Tins of 60 packets (1 month's supply) and 120 packets (2 months' supply) containing simple, illustrated instructions to the patient.

NORGESIC

Many patients visit their doctors each year for treatment of a painful condition of the limbs or trunk. This is often caused by an accident at home or at work and the condition can be acute and incapacitating.

Norgesic can dramatically shorten the period of incapacity in painful muscular conditions.

Norgesic combines in a single tablet the properties of a highly effective skeletal muscle relaxant, orphenadrine

citrate, and a well-tolerated analgesic, paracetamol. It reduces local pain and the pain of muscle spasm, relieves stiffness, restores mobility and speeds recovery.

Each tablet contains:
orphenadrine citrate 35 mg.
and paracetamol 450 mg.

Dosage is two tablets three times daily.

for the removal of EAR WAX

Cerumol avoids discomfort to the patient, inconvenience to the doctor and saves time for both.

Cerumol is now routinely used in most hospitals and general practices throughout the country.

Satisfactory results confirm that it is the most efficient agent yet introduced for the purpose and that it is exceptionally reliable and safe.

In 10-30 minutes the softened or disimpacted wax can usually be wiped out with a probe tipped with cotton wool, or by gentle syringing.

Patients can readily be instructed to instil the drops themselves and, in many cases, the loosened wax will run out of its own accord, rendering further attendance at the surgery unnecessary.

ergotamine alone is **not** enough

To combat an incipient attack of migraine, oral ergotamine alone is inadequate. It needs the potentiating effect of caffeine. **Above all, it needs a rapidly acting anti-emetic to counter its main defect as well as the vomiting resulting from migraine itself.**

'Migril' contains every one of the necessary ingredients—ergotamine tartrate, caffeine, and the proven anti-emetic cyclizine hydrochloride. 'Migril', the ever-present companion of thousands of migraine sufferers, is their reliable insurance against an attack.

griseofulvin
treatment

GRISOVIN-FP

fine particle
griseofulvin for
greater absorption

DURATION OF TREATMENT

Treatment should be continued for at least four weeks, but it must vary with the site and nature of infection. Thus treatment should be extended for infections involving the nails or where the keratin layer is thickened as in the soles of the feet; in such cases, it is best continued for at least two weeks after clinical symptoms have disappeared. Griseovin-FP given orally exerts its activity systemically, and endows newly formed keratin with the power to resist fungal attack. The time taken for this resistant barrier to reach the surface completely will vary with the different structures, e.g. thin body skin, thickened palms and soles, hair and nails etc.

Cure is demonstrably complete when it is no longer possible to see the fungus microscopically or by culture, but the infected skin in most cases shows a rapid and remarkable improvement in a very short time.

CLINICAL USE

Grisovin-FP given by mouth, has remarkable activity against dermatophyte (tinea) infections of the skin, hair and nails. Accurate diagnosis and selection of cases is desirable, and it should be recognised that minor superficial fungal infections can often be successfully treated by topical remedies.

DOSAGE

The significance of griseofulvin blood levels and their duration in relation to therapeutic effectiveness is not yet clearly established. However, as judged by comparative ability to produce blood levels, the dosage of Griseovin-FP usually employed for adults is likely to be four tablets (500 mg) daily. Higher dosage may be needed in some cases to produce full therapeutic effect and in such instances up to eight tablets (1.0 gram) or more daily, may be given, at least for a period. Correspondingly, dosage for children usually will be two or three tablets (250 or 375 mg) daily.

...do you recommend an external wedge on the shoes?

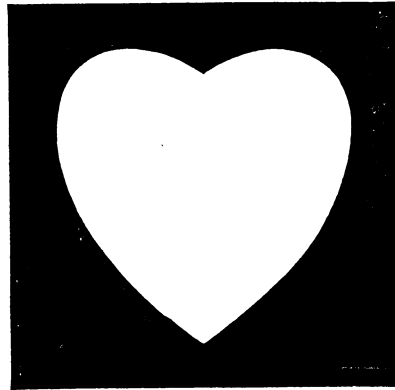

But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

THE BRITISH HEART FOUNDATION

Its composition and its purpose

The British Heart Foundation is appealing for nation-wide support in the cause of heart research. Direct approaches already made to certain leading organisations and generous friends have raised the sum of over £1,250,000—a magnificent start towards the goal of £3,500,000.

The British Heart Foundation, under the Patronage of H. R. H. Prince Philip, and with Field-Marshal the Rt. Hon. Earl Alexander of Tunis as its President, has been created through the efforts of physicians and surgeons specialising in diseases affecting the heart and circulation. It has the support of the Royal College of Physicians of England, the Royal College of Surgeons of England, the Royal College of Physicians of Edinburgh, the Royal College of Physicians and Surgeons of Glasgow, the British Post-graduate Medical Federation and the College of General Practitioners. The Foundation is the first, and only, body of its kind in this country to concern itself ex-

clusively with the problem of heart disease. The funds of the Foundation will be used, through grants, fellowships and other such channels, to support and originate research in Great Britain into every aspect of the causes and treatment of diseases of the heart and circulation.

We appeal for your support, not only in donations or subscriptions, but also in bringing the Foundation to the notice of all those who are especially interested in the problem of heart diseases.

The Foundation has a Membership scheme that provides an opportunity for personal participation. Full details of Membership, and information about the Foundation and its Committees are available from the address below.

SERVICES**A PRACTICE AS WIDE AS THE WORLD**

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and certain allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.I.), (HN55H), 1 Tavistock Square, London, W.C1.

Kaitiaki Hospital, Kaitiaki.
Applications are invited from qualified medical practitioners for the position of part-time Visiting Anaesthetist at the Kaitiaki Hospital, Kaitiaki, on the basis of three sessions of up to 10½ hours per week. Payment will be on the basis of 3/10ths of the appropriate nominal whole-time salary and will be either £590, £700 or £744, according to the number of years since the appointee qualified and higher qualifications held.

Special training in the giving of anaesthetics is necessary, but a higher qualification is not essential.

The township of Kaitiaki is the centre of a large rural district, and opportunity for private general practice in the area is excellent.

Further details may be obtained from the Medical Superintendent-in-Chief, Whangarei Base Hospital, Whangarei, or the Secretary, P.O. Box 742, Whangarei, New Zealand. (5720)

UNIVERSITY AND RESEARCH APPOINTMENTS

COUNCIL OF EUROPE MEDICAL FELLOWSHIPS 1964

A small number of Fellowships for study abroad will be awarded in 1964 by the Council of Europe to registered medical practitioners, dental practitioners, State registered nurses, and other professional personnel engaged in the health services, for education or medical research in U.K.
Fellowships are tenable normally for a period of two to six months. The Council will pay Fellows a monthly allowance of approximately £80 to £1,000 New French francs (£60 to £74 approximately), according to the country to be visited, together with travelling expenses.
Applicants should be of at least five years standing in their profession and of sufficient experience in their field of study to be able to assess critically the value of science abroad and to utilize it for the benefit of the health services of the United Kingdom. They will be expected to continue in the health services of the United Kingdom for at least three years after the completion of a Fellowship.
Applications, giving full particulars of qualifications, experience, proposed field of study and duration of study, and accompanied by the names of two referees, should be sent to:
By those resident in Scotland to The Secretary, Scottish Home and Health Department, St. Andrew's House, Edinburgh 1.
By those resident in Northern Ireland The Secretary, Ministry of Health and Local Government, Stormont, Belfast.
By others to The Secretary, Ministry of Health, Alexander Fleming House, Elephant and Castle, S.E.1.
Applications should be marked "Council of Europe Fellowships."
Applications must be received on or before August 23, 1963. (5773)

TRYPTIZOL

Azilitriptyline hydrochloride

REGD

TRYPTIZOL is supplied as tablets of 25 mg. and 10 mg. and as an injection. Detailed information on indications, dosage, administration, precautions and bibliography is available on request.

TRYPTIZOL is an outstanding antidepressant, particularly valuable for its tranquillising effect on the anxiety and insomnia—characteristically early morning awakening—which so often accompany depression. TRYPTIZOL is indicated in all forms and presentations of depression. Other symptoms which respond well include functional somatic complaints, loss of interest, loss of appetite, feelings of guilt. TRYPTIZOL is singularly free of serious toxic side reactions. It is not a monoamine oxidase inhibitor.

“Studies are reported here which suggest that calcium deficiency is an important factor in many cases of postmenopausal and senile osteoporosis. Many patients with these forms of osteoporosis absorb and retain calcium abnormally avidly when on a high calcium intake in the form of supplements (calcium gluconate Sandoz), and moreover may continue to retain it avidly for at least three and a half years. Symptoms of the disease are relieved and no further fractures take place.”
