## a mind at ease

Once in their doctor's care, what most patients seek above all else is the comfort and peace of mind that comes from his understanding of their problem . . . like the calm and composure that follows safe, dependable medication with a Lilly barbiturate—'Tuinal' 3 grs., universally accepted as an ideal hypnotic; 'Sodium Amytal' 1 gr., widely prescribed for gentle, reliable, daytime sedation.

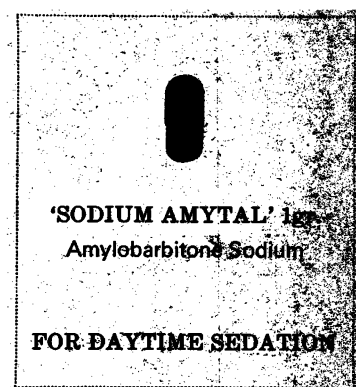

### *Recent testimony on barbiturates*

*"In any consideration of hypnotics the barbiturates must take pride of place. They have been in clinical use for about 50 years and in the vast majority of cases they are safe, reliable drugs which, when properly used, will ensure a good night's sleep."*

# At last! A really palatable flavoured PAS

Pasinah-D is the first PAS preparation in which the taste of Sodium PAS is successfully disguised when in solution. It dissolves completely in cold water to make a clear, pleasantly-flavoured, easy-to-take drink. Only two doses daily are required, and flavours may be alternated to give variety and lessen the danger of defaulting. Pasinah-D is very well tolerated and is specially acceptable to children.

# The importance of simplicity in the treatment of diabetes

The diabetic is condemned to a life-time of medication to control his condition. In few other conditions is simplicity and ease of administration so important.

The introduction of the sulphonylureas eight years ago relieved one group of diabetics from the burden of daily injections. The extensive use of Rastinon in oral antidiabetic therapy for over two million patients has shown that it is not only one of the safest drugs available, but also one of the

most effective in controlling diabetes when the condition is first discovered at middle age. Rastinon is the standard oral treatment of dia-

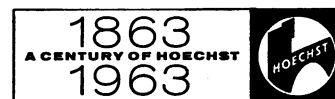

betes, and it is remarkable for its

# THE DISTILLERS COMPANY LIMITED

The 86th Annual General Meeting of the Distillers Company Limited will be held in the North British Hotel, Edinburgh, on Thursday, the 12th day of September, 1963, at 12.15 p.m. The following are excerpts from the Statement by the Chairman, Mr. Ronald S. Cumming, T.D., which has been circulated with the Report and Accounts for the year ended 31st March, 1963.

## GENERAL OBSERVATIONS ON TRADING

The Group as a whole experienced more competitive conditions in the various industries in which it operates. Despite this, turnover increased and the sales of the Group totalled £287m.

This year the proportion of profits attributable to our Scotch Whisky and Gin interests was 86%.

The Accounts for the year show a profit for the Group after depreciation of £33,781,441 compared with £31,941,151 last year, an increase of £1,840,290. Most sections of the Company's business contributed to the increase in profit but the most significant feature was the substantial improvement in the results of our Plastic Subsidiaries as a whole.

The profit after tax is £16,752,534, of which Subsidiaries have retained £2,670,296, making the balance available for appropriation £14,055,238.

Your Directors have transferred £4,000,000 to general reserve and propose that a final dividend on the ordinary capital be declared at the rate of 8½% making 14½% for the year, compared with 13½% last year.

During the course of the year under review, as has already been widely reported, the Company sold to Eli Lilly and Company Limited its Biochemical business. The transaction, which became effective on January 1, 1963, took the form of a sale of assets. The personnel employed in the business were either retained by us or obtained employment with Lilly.

It was announced at the Annual General Meeting last year that it had been decided that the Company should allocate the sum of £250,000 for the express purpose of general research into the incidence and causes of congenital abnormality and related purposes. Following consultation with leading members of the medical profession, it was decided to make this sum available to the University of Edinburgh.

A number of Writs in respect of the sale of thalidomide products have been served on The Distillers Company (Biochemicals) Limited, which remains a subsidiary of the Company. As legal proceedings are pending, it would not be appropriate to comment further on this matter.

## SCOTCH WHISKY

I am glad to say that our Malt and Grain distilleries have been operated most efficiently throughout the year and that productivity has been increased.

The Industry stocks, which at March 31, 1963, amounted to 361 million proof gallons, showed an increase over the previous year of approximately 34 million proof gallons. Production throughout the Industry continues at an unprecedentedly high level, and during the year to September 30, 1962, a total of approximately 76 million proof gallons of Grain and Malt Whisky was produced.

The total sales of the Industry in Home and Export markets amounted to approximately 38 million proof gallons.

World sales have doubled in the past eight years, and it is obvious that a very high degree of confidence, and indeed optimism, still prevails in the Industry.

Although the sales of the Industry in the Home Market increased by 5% last year, it is still a matter of concern that, despite the very much higher general standard of living achieved in this country, and the increase in the population, sales were not much higher than in the last pre-war year, whereas export shipments over the same period have almost quadrupled.

Undoubtedly the successive increases in the rates of duty imposed by the Chancellors of the Exchequer during and since the War have handicapped the expansion of sales in this country.

It was inevitable that, after the end of a long period of shortage of supplies of mature Scotch Whisky, competition should become keener in the Home Market. Our Scotch Whisky Companies are well-equipped to meet this challenge. They offer to the public a wide choice of distinctive and well-known brands whose quality is assured by the large stocks of first-class Scotch Whiskies held within the Group—stocks which, both as regards volume and quality, are unsurpassed in the Industry. I am glad to say that in spite of this competition, our sales in the Home Market have been well maintained.

Our export sales showed a small increase for the year. Industry shipments to the United States continued to increase, but a substantial proportion of the increase was represented by shipments in bulk form.

From the point of view of the Industry, while only a modest increase has been secured in the Home Trade, the position over all is still satisfactory and there seems no reason to doubt that further increases will be recorded during the present year, in which we expect to share.

## GIN

In the Home Market trading conditions were adversely affected by the duty position, as already referred to under the heading "Scotch Whisky." The retarding effect of this, coupled with the exceptionally severe weather in the last quarter of the Financial Year, resulted in our sales being slightly lower than for the previous year.

With regard to exports, although our shipments were slightly smaller, the position was satisfactorily compensated by larger sales in overseas markets where our brands are being manufactured locally.

Our total world sales for the year were higher than the year before and in the U.S.A. particularly the increase was substantial.

## VODKA

The home sales of "Cossack" Vodka for the year ended March 31, 1963, were fully up to our expectations and it is anticipated that the succeeding year will show further growth.

## FOOD GROUP

For the first time for a number of years home sales of bakers' yeast showed a small increase, but the rate of increase in dried yeast sales slackened slightly. Sales of other foodstuffs marketed by The United Yeast Company Limited and its subsidiaries also increased.

The Peerless Refining Company (Liverpool) Limited, which manufactures edible oils and fats, has greatly improved its position as suppliers to the baking and confectionery industries in the United Kingdom.

The Group as a whole once again increased its profits.

## INDUSTRIAL GROUP

In my predecessor's last statement he referred to the difficult conditions encountered on the industrial side of the Company. In almost all sectors there had been excessive pressure on prices and, except in petroleum chemicals, only small increases in volume. This had resulted in a serious reduction in profitability, particularly in polyvinyl chloride.

CHEMICALS AND PLASTICS GROUP. Last summer we started a programme of progressive reorganization and streamlining and decided, in view of the increasing interdependence of chemicals and plastics, to amalgamate the separate Chemicals and Plastics Groups into a single organization. In a year when there was only slight improvement in trading conditions, financial results have been substantially improved, particularly in the case of our plastics companies where results were previously unsatisfactory.

CHEMICALS. With industrial activity remaining rather stagnant, sales of our general chemicals stayed obstinately at last year's level for most of the period and selling prices continued to fall. It was, however, possible to compensate for the latter to some extent by reduction in raw material costs and to a greater extent by reduction in operating costs. There has been a steady increase in sales so far in 1963 and the current outlook is improved.

Carbon dioxide, with its wider spread of uses, once more recorded an increase in sales, though here again margins were reduced during the year. An increased development and technical service effort is being made to keep up the momentum of increasing diversity of sales outlets.

During the year a 49% interest has been purchased in Synthite Limited who are the largest U.K. manufacturers of formaldehyde, an important intermediate used in the manufacture of plastics and adhesives.

PLASTICS. British Geon Limited, which is mainly concerned with the production of polyvinyl chloride, has again had a difficult year, but has registered a substantial improvement over the previous year. Plans are in hand which will result in further reduction of costs which should place this Company in a more competitive position.

Distrene Limited, which is concerned with polystyrene, has had a good year and will bring into operation increased capacity in September. Polystyrene, long established in such applications as moulded toys and refrigerator linings, is finding increasing use in the building industry as an insulating material and in packaging.

British Resin Products Limited has added new products to its range. Sales of water soluble resins for paints and industrial finishes, which have been developed in our laboratories at Barry, continue to make good progress.

BRITISH HYDROCARBON CHEMICALS LIMITED. This Company and its subsidiaries, Forth Chemicals Limited and Grange Chemicals Limited, have had a very satisfactory year in spite of the general over-production of petroleum chemicals in the Western world, with resulting heavy pressure on prices. Record production was achieved for most products and with the first full production year for ethylene dichloride (for polyvinyl chloride) and methanol, total tonnage sales showed a large increase on last year.

During the year the capacity of the Rigidex high-density polyethylene plant was increased by 25% and phenol capacity by over 50%, in both cases by improved operating techniques and relatively minor capital expenditure. A further 50% expansion of Rigidex capacity has been authorized as this high-density polyethylene has a vigorously growing field of use extending to such diverse applications as cable sheathing, fishing nets, and bottles.

MURGATROYD'S SALT AND CHEMICAL COMPANY LIMITED. Murgatroyd's (manufacturers of chlorine and caustic soda) has had a satisfactory year in which production increased by approximately 10%.

BAKELITE XYLONITE LIMITED. The Company and Union Carbide Corporation of the U.S.A. announced the formation of a 50/50 joint company to be called Bakelite Xylonite Limited. This company has acquired our 100% interest in The British Xylonite Company Limited, all the ordinary shares in Bakelite Limited and the low-density polyethylene plant previously owned by Union Carbide Limited. The formation of this Company has been too recent for us yet to reap the benefit of integration. The past months have, however, shown every indication that there should be a very considerable future for such a large and broadly based company, particularly in the fields of polyethylene resin and plastics fabrication.

BORDER CHEMICALS LIMITED. In April we, with The British Petroleum Company Limited and Imperial Chemical Industries Limited, announced the formation of a new Company (in which each partner would have a one-third share) to construct a 40,000-ton plant for the production of acrylonitrile, an important raw material for synthetic fibres and plastics. The new Company will operate the process evolved by our own Research Department. This will be the largest acrylonitrile plant in Europe.

AUSTRALIA. The profits of our associate company, C.S.R. Chemicals Pty. Limited, have been slightly improved, although trading remains keenly competitive.

SOUTH AFRICA. National Chemical Products Limited, our associate company in South Africa, has had a record year for sales and profits. Indications are that the current year's operations will continue to produce satisfactory results.

TECHNICAL DEVELOPMENT. The Development and Engineering Divisions have continued to give excellent service to operating companies throughout the Group.

## PERSONNEL

I should like to convey the thanks of the Board to all our employees both at home and overseas for their hard work and loyal support during an exacting year.

## FUTURE PROSPECTS

The continued progress of our Scotch Whisky companies will depend on stable world trade, and that of our other interests on the prosperity of this country. Provided these conditions are fulfilled in reasonable measure I have every confidence in the future success of the Company's operations.

FOR MAXIMUM IRON  
WITH MINIMUM  
SIDE EFFECTS

Time and again you'll have listened to complaints of discomfort and gastric upset from patients undergoing treatment for iron-deficiency anaemia. The reason — iron intolerance; the cause—the action of the usual ferrous sulphate tablets resulting in unpleasant side effects. But ferrous sulphate is probably the most efficient form of iron; and as you know, it should be taken on an empty stomach for maximum effect. How then to reduce or prevent discomfort in anti-anaemia therapy?

#### IRON IN TIMED RELEASE

From Abbott comes the answer—the Ferro-Gradumet, the one-a-day oral haematinic in a plastic matrix that slowly leaches out its full day's dose of ferrous sulphate (525 mg, equivalent to 105 mg of elemental iron) in a predetermined pattern over a number of hours; and, thanks to its unique GRADUMET presentation, does not disintegrate in the stomach, where ferrous sulphate is most irritant and least well absorbed. Here at last is an efficient treatment for iron-deficiency anaemia that permits a day's requirements of iron to be taken in a single tablet, pleasantly and with a minimum of side effects.

**FERRO-GRADUMETS** are supplied in bottles of 30 or 100 tablets each containing 525 mg ferrous sulphate (in exsiccated form), equivalent to 105 mg elemental iron.

## The problem of the dirty mouth

Even in 1963 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

## SERVICES

## A PRACTICE AS WIDE AS THE WORLD

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

### GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and certain allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.I.), (HN53K), 1 Tavistock Square, London, WC1.

Many patients visit their doctors each year for treatment of a painful condition of the limbs or trunk. This is often caused by an accident at home or at work and the condition can be acute and incapacitating.

*Norgesic* can dramatically shorten the period of incapacity in painful muscular conditions.

*Norgesic* combines in a single tablet the properties of a highly effective skeletal muscle relaxant, orphenadrine

citrate, and a well-tolerated analgesic, paracetamol. It reduces local pain and the pain of muscle spasm, relieves stiffness, restores mobility and speeds recovery.

Each tablet contains:

orphenadrine citrate 35 mg.  
and paracetamol 450 mg.

Dosage is two tablets three times daily.
