more than
a curb on appetite
Durophet-M

Depriving the obese patient of the satisfactions of eating by prescribing appetite depressants alone often leads to failure of the weight-reducing programme. *Durophet-M* controls the appetite and at the same time relieves the stresses that find their outlet in overeating. *Durophet-M* contains the most effective appetite depressant available today, *Durophet* (laevo- and dextro-amphetamine in a ratio of 1:3), and methaqualone, a calmative which helps alleviate the patient's underlying tensions and frustrations. Capsules are available in two strengths, stated in terms of the *Durophet* content, 12½ mg. or 20 mg. and each strength contains 40 mg. methaqualone.

Provides a complete and balanced picture of these two important subjects in one volume, thus avoiding the overlap which occurs when the subjects are treated in separate books. The author reviews many different forms of treatment, achieving a remarkable coverage of recent and past literature.

The section on Gynaecology includes: Disorders of Reproduction; Traumatic, Infective and Neoplastic

Disorders of the Female Genital Tract; Endocrinology. The section on Obstetrics includes: Physiology and Pathology of Pregnancy, Labour and the Puerperium; Diseases and Infections of the Newborn; Mental Disturbances in Pregnancy and the Puerperium. The last chapter in each section gives a full description of operations. 1,000 pp., 24 pp. halftones and 2 coloured plates. 90s. net

AN OUTLINE OF BACTERIOLOGY AND IMMUNITY**Second Edition 1963****Ronald Hare**

In the revised edition of this well-known textbook, the chapters dealing with the transmission of infection and the bacteriophages have been rewritten and sections on bacterial genetics and routine immunization have been included. In addition, the author has re-cast the chapters on antigens and antibodies, the mechanisms involved in

recovery from infection and methods employed for the dispersal of infections. Lastly, because of increasing interest in mycology, a separate chapter has been allotted to the fungi, and a great deal of revision has been incorporated in the chapter on viruses. 488 pp., halftones and diagrams. 40s. net

BUTTERWORTHS

The Encyclopaedia of General Practice

Edited by

G. F. Abercrombie,

and

R. M. S. McConaghey,
M.D.

*Past-President, College of General
Practitioners*

*Editor, The Journal of the College of
General Practitioners*

GENERAL PRACTITIONERS will welcome THE ENCYCLOPAEDIA OF GENERAL PRACTICE. This comprehensive reference work deals with all the conditions they are likely to meet.

The contributors are themselves general practitioners or consultants who have had experience in general practice, and the editors have ensured that each article is authoritative and relevant to general practice. Where emergency conditions are discussed, prominence is given to the role of the general practitioner and his course of action, and, when a condition passes into the realm of a specialist, a general outline is given to show how specialist advice, investigation and treatment may help. In each case practical details of treatment are given, including dosage, route of administration, frequency of dosage and duration of drug treatment.

Articles are arranged alphabetically, with grouping of conditions where this will help the doctor in his use of the work; and complete articles are devoted to important symptoms as well as to disease states.

THE ENCYCLOPAEDIA OF GENERAL PRACTICE is the result of long and detailed planning, and will serve as a complete reference library for many years. In his foreword, Lord Cohen of Birkenhead writes: "I have been privileged to read several of the contributions and I have no doubt that my trusted general practitioner will feel grateful that for the first time an Encyclopaedia has been published which is specifically designed to meet his needs, and in such full measure succeeds in doing so."

First two volumes to be published in SEPTEMBER

TEXTBOOK OF MEDICINE**

The W. B. Saunders Company are pleased to announce the publication of this new edition of Cecil's Medicine, edited this time by Paul B. Beeson of Yale and Walsh McDermott of Cornell.

There are 67 new contributors to this edition, new emphasis on pathological physiology, new disease entities discussed—but the basic philosophy of this classic textbook remains unchanged. Its aim, as in previous editions, is to provide students and practitioners with accurate and detailed descriptions of the disease entities they will encounter in the broad compass of internal medicine.

Other changes in this new (11th) edition include: a completely new section on genetics and genetic diseases—significant expansion in the section on viral diseases—reorganization and expansion of the sections on bronchopulmonary disease and gastroenterology—a brilliant new foreword on nucleic acids, genes, viruses and immunity. Cecil-Loeb's Textbook of Medicine, by 173 American Authorities. Edited by Paul B. Beeson, Ensign Professor of Medicine, Yale University; and Walsh McDermott, Livingston Farrand Professor of Public Health, Cornell University. Available either as a single volume or two-volume set.

Single volume £6 16s. 6d. Two-volume set £8 4s. 6d.

New (2nd) Edition**DISEASES OF THE CHEST**

By H. Corwin Hinshaw, M.D., *Clinical Professor of Medicine*; and L. Henry Garland, M.B., B.Ch., M.D., *Clinical Professor of Radiology, University of California School of Medicine, San Francisco.*

This new edition, completely re-written, delineates the management of a wide range of chest diseases. It gives step-by-step details of diagnosis and treatment. The up-to-date and authoritative information results from the collaboration of an internist and a radiologist. For each disease there is information on: aetiology, pathology, clinical manifestations, radiological appearance, treatment, complications and mortality, with indications and contraindications for surgery.

798 pages, 743 illustrations on 308 figures. £7 0s. 0d.

A MANUAL OF DENTAL and ORAL RADIOGRAPHY

by
S. Blackman and H. G. Poyton

An indispensable book for all radiographers during training and afterwards. All techniques are discussed in detail and the approach throughout is essentially practical. The authors lay special emphasis upon the diagnostic value of X-rays, radiation hazards and protection, the latest developments in the subject, and faulty radiography. The text is lavishly illustrated with photographs of apparatus and specimen reproductions of radiographs.

The Medical Care of Children

Edited by S. D. M. COURT

James Spence Professor of Child Health in the University of Durham

Eleven paediatricians working in a teaching hospital have collaborated in the writing of this book which attempts to relate their experience to the needs as they meet them of doctors in family practice. It does so by taking a selection of the common and important paediatric problems at each stage of childhood and showing, with the help of case histories, how they were dealt with. The book is addressed primarily to young doctors in family practice, but it will also appeal to students and paediatric residents in hospital.

REPORTS ON RESEARCH AND TEACHING 1962

Edited by JOHN PEMBERTON

Professor of Social and Preventive Medicine, Queen's University of Belfast

This book is based on the papers read at the Third Scientific Conference of the International Epidemiological Association held at Korcula, Yugoslavia, in 1961. Thirty-five papers have been selected and these have been extensively revised, and some entirely rewritten, to bring them up to date; the authors were selected on an international basis. The book is divided into eight main sections: cancer; diarrhoeal diseases; arterial pressure; occupational diseases and accidents; neurological disease, anaemia, and nephropathy; standardization of diagnostic techniques; health services; and recent developments in the teaching of social medicine.

An Introduction to Human Physiology

J. H. GREEN

Reader in Physiology, University of London at the Middlesex Hospital Medical School

This book, which provides a completely up-to-date introduction to human physiology together with a brief introduction to biochemistry, has been specially written for medical students who are just starting their course and who already have some knowledge of chemistry, physics, and biology, up to 1st M.B. standard. It should also prove useful to dental students, physiotherapy students and as a textbook for a short course in physiology.

The book gives, in a clear and concise manner, the basic concepts of human physiology unobscured by controversy and provides a framework to which additional knowledge may be added by the attendance at systematic lectures and by consulting the larger textbooks, reviews and original papers. A brief guide to this additional reading is given at the end of each chapter.

RELIEVES SYMPTOMS,

PROMOTES A SENSE OF WELL-BEING

It has been found that practically every ptotic patient experienced relief of symptoms, increased energy and sense of well-being following application of proper support.

The doctor can rely upon Spencer for *proper support* because each Spencer is individually designed, cut, and made for each patient from detailed measurements and a complete description of that patient's body and posture.

With a Spencer, the co-relation of abdominal and back support induces correct posture, modifies an unfavourable tilt. Ptosed organs are lifted to normal position to improve circulation. Better digestion, elimination, respiration often result.

Wright's Coal Tar Soap has been in continuous use by the Medical Profession for nearly a century. Its world-wide use is largely due to professional approval of its quality, and to the fact that it contains the original 'Liquor Carbonis Detergens'. Even in 1882 this ingredient was described by the B.M.J. as "by no means a new preparation".

To maintain this front-rank position has not been easy. It has called for unremitting effort, continuous improvements in technique, ever higher analytical standards, and a record of service in which we take modest pride.

CICATRIN

**accelerates healing
rates by 25-50%***

Prolonged and expensive treatment of chronic ulcers may be avoided by the use of Cicatrin, the leading amino-acid/antibiotic preparation for topical application.

Further evidence of the efficacy of Cicatrin is provided by a recent controlled clinical trial to evaluate the influence of various topical applications on the healing rates of stasis ulcers. This trial shows that Cicatrin with its combination of selected amino-acids and antibiotics accelerates the healing rates by 25-50%.

It is also significant that in one group where the main difference between the two preparations was that one contained amino-acids and antibiotics (Cicatrin) and the other antibiotics only, the healing time in the Cicatrin treated group was shortened considerably both in bed rest and ambulatory cases.

CRYSTAPEN G

INJECTION · TABLETS · SYRUP

Despite the very many antibiotics now available penicillin G remains the first choice for the treatment of the majority of acute septic infections. It is generally agreed that other substances are used only if bacteriological or other factors indicate specific need or if the administration of penicillin G in full dosage fails to produce response.

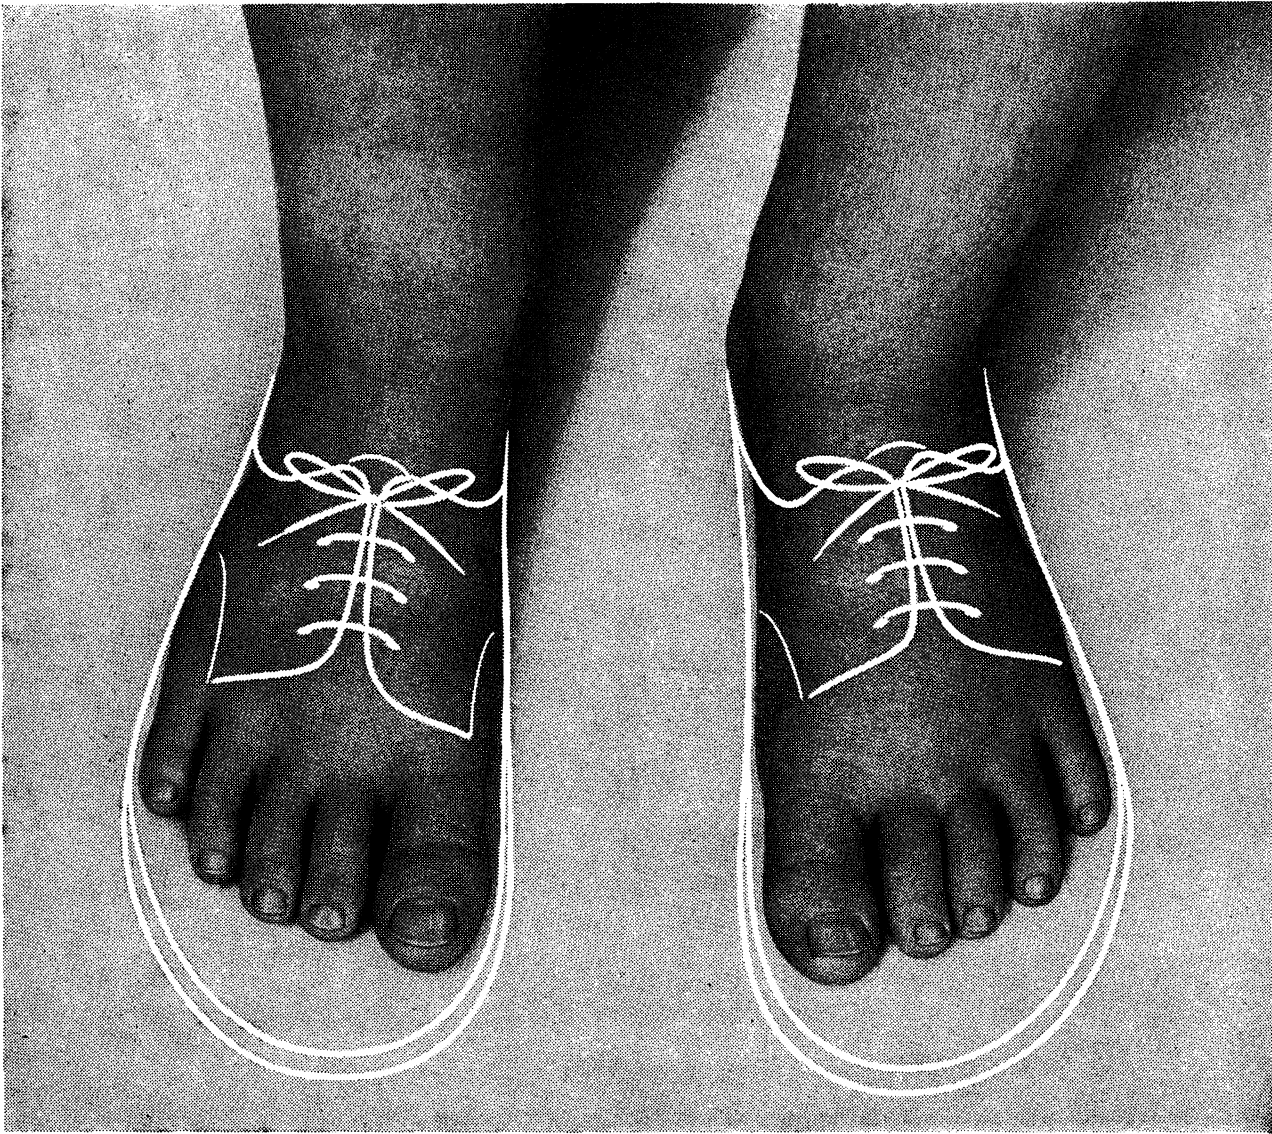

The early treatment of boils, carbuncles, abscesses and other soft tissue infections is essential if treatment is to be effective. Crystapen (soluble sodium penicillin G Glaxo) with its rapid bactericidal action, is a logical first choice for the treatment of such conditions.

It is also cheap to use and frequently costs only a quarter as much as alternative antibiotics.

TRANSVASIN RELIEVES MUSCLE SPASM

Muscle spasm caused by physical injury or rheumatic lesions, including osteo or rheumatoid arthritis, is rapidly relieved by the application of Transvasin. The esters of nicotinic, salicylic and p-aminobenzoic acids penetrate the skin and are concentrated at the point of injury. Transvasin is an effective and economical therapy.

Transvasin contains ethyl and n-hexyl nicotinate, ethyl p-aminobenzoate, 2% each, and tetrahydrofurfuryl salicylate 14%. The N.H.S. price of the 30g. tube is 2/6d and the cost of an average application of the Cream is under 1d.

ADVANTAGES

BENEFITS TO THE PATIENT

'Aldomet' usually reduces blood pressure in the lying (and sitting) as well as the standing position.

Hypertension is under control throughout day and night, awake or asleep.

Postural hypotension is less of a problem than is the case with other potent antihypertensive agents. Exertional hypotension is rare.

'Aldomet' allows the patient a more normal and active life. Dizziness is rare.

Diurnal variation in blood pressure rarely occurs.

Control of hypertension is smooth and even throughout the 24 hours without excessive swings of pressure.

Dosage is simple, flexible and easily established. Side effects are seldom a serious problem.

'Aldomet' is generally very well tolerated and the patient is therefore cooperative.

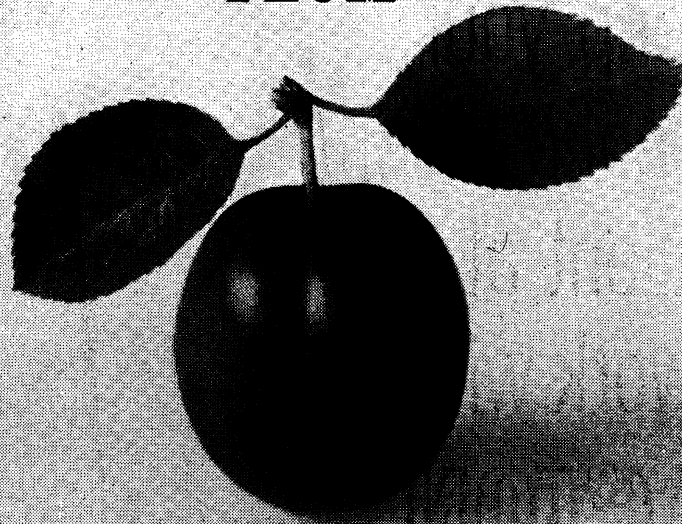

a fuller life for the hypertensive patient

'Aldomet' is supplied as yellow, film-coated tablets containing 250 mg methyldopa. For the treatment of acute hypertensive crises, 'Aldomet' is also available as an injection, supplied in 5 ml ampoules containing, per ml, 50 mg methyldopate hydrochloride. 'ILOSONE' the decisive move

when infection poses problems

'Ilosone', brand Erythromycin Estolate B.P., gives quicker, surer and more effective treatment of common bacterial infections than any other oral form of erythromycin.

'Ilosone' is more stable than either erythromycin base or erythromycin stearate, particularly in the presence of gastric acid. This results in consistently higher and more prolonged serum concentrations, and accounts for the quick response of most respiratory tract and other common bacterial infections, to the decisive control of 'Ilosone'.

Side-effects are rare; very occasionally a reversible jaundice occurs, but no residual toxic effects have been authenticated.

Average Adult Dose

250 mg. every six hours (1 G. daily), increased to 2 G. daily in severe infections.

'Actomol', a new and powerful inhibitor of monoamine oxidase, has been on extensive clinical trial since 1960.

Experience has shown that it is:

- A highly effective drug in the treatment of depressive episodes.
- Quick-acting, providing relief in 7-14 days.

'Actomol' is indicated, either alone or as an adjuvant to E.C.T., in the treatment of all forms of depressive illness.

NOTE: Monoamine oxidase inhibitors in general have been shown to potentiate the actions of many drugs. The risk of combining 'Actomol' with other drugs should, therefore, be borne in mind.

Durex Gossamer and the post-partum period

The new, pre-lubricated protective—Durex Gossamer—is advocated by many gynaecologists and obstetricians, as an important adjunct to the treatment of certain abnormal vaginal conditions.

A most important application of the Durex Gossamer is in preventing an exacerbation—*during coitus*—of the inflammation and discomfort which frequently accompanies the post-partum period, vaginitis and leucorrhea. Furthermore, this type of protective is recommended where insufficient vaginal secretion is manifest, as in early marriage, frigidity and menopausal atrophy.

Where there is risk of transferring infection, Durex Gossamer has been shown to reduce the incidence of vaginal infection during the post-partum period.

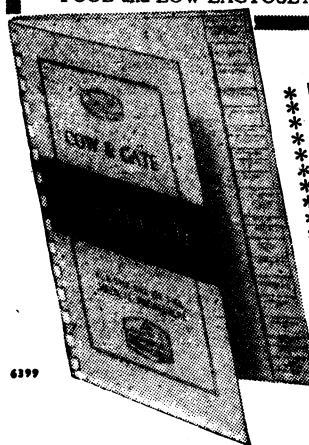

But the outstanding advantage of Durex Gossamer is the confidence it instils, and the comfort it provides during the post-partum period. The physician and patient know it to be an effective and reliable contraceptive.

QUESTIONS, PLEASE?

Women doctors acclaim the advantages of tampons

Q Many female patients say the real "curse" in their menstrual periods is the soggy, smelly, bulky pad they have been wearing. Is recommending "Tampax" a worthwhile solution?

A The male physician can get a good idea of the real value and importance of menstrual tampons from his women colleagues, several of whom have published subjective reactions. A woman doctor writes: "Only those who have experienced the misery of having to play games and do gymnastics hampered by the chafing of a soaking and malodorous sanitary towel can appreciate how very unpleasant it is."¹ She compares the wearing of a soaked menstrual pad with the effects of urinary incontinence, and adds: "... I very much doubt whether any man would tolerate such discomfort if any alternative offered."

Another woman doctor says, "I feel that tampons are a tremendous advantage to women for many reasons, including comfort, ease of carrying spares and of disposal, and for the psychological advantages,"² and a third adds her enthusiasm in a statement which affirms that millions of women appreciate the comfort and other advantages of internal tampons.³

Once a Tampax is inserted, it lies in "the great silent area of the pelvis".⁴ Your patient will neither feel it nor will she be bothered or embarrassed by the odour that inevitably accompanies the use of an external pad. Indeed, the use of Tampax may very well improve her entire attitude toward menstruation.⁵ Available in Regular and Super absorbencies to meet varying needs.

The Scottish Postgraduate Medical Association is constituted by the Universities of St. Andrews, Glasgow, Aberdeen and Edinburgh and by the Royal College of Physicians of Edinburgh, the Royal College of Surgeons of Edinburgh, and the Royal College of Physicians and Surgeons of Glasgow.

The object of the Association is to develop postgraduate medical education in Scotland by means of co-operative endeavour and co-ordinated planning.

All the requirements of postgraduate medical education are available in Scotland and the Postgraduate Deans and Directors in Edinburgh, Glasgow, Dundee and Aberdeen are prepared to organise integrated courses of training for postgraduate students.

General enquiries should be directed to Professor R. B. Hunter, Secretary of the Scottish Postgraduate Medical Association, Department of Pharmacology and Therapeutics, Queen's College, Dundee, from whom further information can be obtained.

The go-ahead
OPPORTUNITY
that is ROYAL NAVY

you find it as a
MEDICAL OFFICER

As a Medical Officer, you have complete clinical freedom and a widely varied medical experience. Your practice is among 100,000 Naval men and women. Ashore or afloat, it can take you anywhere in the world from Malta to Singapore: and, when you have a shore appointment abroad, your family can be with you. Go-ahead, too, is your opportunity to specialize: not only in traditional categories, but in the modern sciences of aviation and nuclear medicine.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your

initial pay is considerably higher than that of a civilian hospital registrar.

You can enter by one of three ways: as a Registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission.

For fullest details, write, mentioning your own qualifications and age to: The Medical Director General of the Navy, Medical Dept. (HN12/A), The Admiralty, Empress State Building, London, S.W.6.

UNIVERSITY OF LONDON

THE INSTITUTE OF PSYCHIATRY

IN ASSOCIATION WITH
THE BETHLEM ROYAL HOSPITAL AND THE MAUDSLEY HOSPITAL

The Institute provides advanced training in psychiatry covering all branches of the subject and leading to the Diploma in Psychological Medicine.

Research appointments and research and higher degree facilities for work on clinical problems, various aspects of the pathology of mental disease, and in psychology are also available.

Paid appointments on the Joint Hospital staff are open to postgraduate students and give opportunities of clinical experience and research.

For further particulars apply to the Dean, Institute of Psychiatry, The Maudsley Hospital, Denmark Hill, London, S.E.5. Telephone: Rodney 6333.

BRITISH POSTGRADUATE MEDICAL FEDERATION
UNIVERSITY OF LONDON

THE INSTITUTE OF LARYNGOLOGY AND OTOTOLOGY

330-332 Gray's Inn Road, London, W.C.1

IN ASSOCIATION WITH
THE ROYAL NATIONAL THROAT, NOSE, AND EAR HOSPITAL

The Institute is organized to provide instruction in this Specialty for the whole period of training necessary to reach full consultant standard. There are ample clinical and research facilities and teaching is carried on continuously daily throughout the year.

There are full-time courses of lectures and demonstrations suitable for those intending to take the D.L.O.(R.C.P.&S.Eng.), and the Final F.R.C.S. examinations in Otolaryngology. There are also short courses for senior students in aural surgery, pathology, and in the treatment of the deaf child.

A number of paid appointments, which are open to postgraduate students in the different stages of training, give opportunities of clinical experience and research.

Further information may be obtained from the Dean.

OXFORD UNIVERSITY CLINICAL SCHOOL

The School is based on the Radcliffe Infirmary, the Churchill Hospital, and the special hospitals in Oxford. There are five University Chairs in clinical subjects in the teaching hospital group with active research departments.

The United Oxford Hospitals (1,300 beds) serves both as the Area Hospital receiving the acute sick of the neighbourhood in great variety and also as a Regional Centre with special departments serving a wider population. The range of clinical material is exceptional for a teaching hospital and clinical firms are small. The tutorial system continues throughout the clinical course.

The clinical departments, the laboratories division and the research units provide excellent opportunities for postgraduate training and for training in scientific research.

Students who are admitted from other universities may read for the medical degree of their own university. Preference is given to honours graduates, who may apply to transfer to the Oxford B.M. examinations.

Osler House and its garden provide attractive premises for the clinical students' club. The sports ground is at Headington.

Enquiries about admission, scholarships, etc., should be addressed to the Secretary of the Medical School, Osler House, 43 Woodstock Road, Oxford.

Deduction of £255 per annum for compulsory residence, £300 per annum for voluntary residence.

(b) **SENIOR REGISTRAR.** Posts obtained normally not less than three years after full registration and held normally for four years: £1,710 by £115 to £1,940 in the third year; by £110 to £2,050 in the fourth year; thereafter, £2,165 in the fifth and sixth years; £2,280 in the seventh and eighth years; £2,395 in the ninth and any subsequent years. Deduction of £295 per annum for compulsory residence; £325 per annum for voluntary residence.

Other Grades, Whole-time

(a) **HOUSE OFFICERS.** Each post in this grade shall be tenable for six months.

£770 per annum for the first post held; deduction of £175 per annum for compulsory residence or £220 per annum for voluntary residence; £855 per annum for the second post held; deduction of £180 per annum for compulsory residence or £220 for voluntary residence.

£940 per annum for the third and any subsequent posts held; deduction of £190 per annum for compulsory residence or £220 per annum for voluntary residence.

provided that the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that the remuneration of any officer holding his first post in the National Health Service as a House Officer shall be £855 per annum if they are satisfied that the officer has held at least one hospital post outside, or not less than six months' duration, involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff; provided further that where a House Officer has previously held two such outside posts the employing authority (subject in the case of a Hospital Management Committee to the consent of the Regional Hospital Board) shall have discretion to determine that his remuneration shall be £940 per annum. Any House Officer who on first appointment is paid at the appropriate rate to the second or third post held in accordance with the above provisions shall be paid at the third post rate for any subsequent appointments in this grade.

(b) **SENIOR HOUSE OFFICERS.** Posts obtained by fully registered medical practitioners and held normally for one year only: £1,195 on appointment at age 27 or under; £1,255 on appointment at age 28 or over. Deduction of £210 per annum for compulsory residence or £255 per annum for voluntary residence.

(c) **JUNIOR HOSPITAL MEDICAL OFFICERS.** Officers who have held house appointments but who are not registrars who have less responsibility than other hospital officers of non-consultant status, and who have been appointed for a limited or indefinite period, not less than one year after full registration as a medical practitioner: £1,255 by £65 (3) to £1,450 by £70 (5) to £1,800. Deduction of £255 per annum for compulsory residence or £300 per annum for voluntary residence.

Allowances at rates of up to £115 per annum shall be payable to house officers, senior house officers, junior hospital medical officers, and registrars occupying posts approved for such allowances in peripheral hospitals.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

The above revised rates of salary, payable as from April 1, 1963, were notified to employing authorities on July 2, and advertisements quoting salaries at the old rates are accepted on the assumption that the new rates will apply.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff. (9/7/63)

ADROYD

restores positive nitrogen balance

ADROYD* (oxymetholone Parke-Davis) with its potent anabolic action and minimal androgenic activity promotes the retention of nitrogen and other elements essential for rebuilding body tissues. It stimulates appetite, promotes weight gain and a sense of well-being, thereby accelerating recovery. ADROYD is indicated in convalescence after illness, in weight loss and asthenia, before and after surgery and as an adjunct to the treatment of burns. ADROYD is supplied as 5 mg. scored tablets in bottles of 30, 100 and 250.

SERVICES

A PRACTICE AS WIDE AS THE WORLD

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and certain allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.T.), (HN53L), 1 Tavistock Square, London, WCI.

TRAINING IN PSYCHIATRY AT McGILL UNIVERSITY

The Department of Psychiatry, McGill University, Montreal, has a limited number of openings for training and applications are now being considered for July 1, 1964. Applicants must have graduated from an approved medical school and have had a general internship of one year.

The four-year Diploma Course provides general basic preparation during the first two years. The last two years provide special patterns of instruction for those: (a) Planning to enter the field of general hospital, community, or university psychiatry; (b) Preparing themselves for a career in child psychiatry; (c) Intending to enter the field of research psychiatry.

Credit may be allowed for previous training. Shorter periods of instruction may be arranged, as well as instruction in special fields.

Training in psychoanalysis also may be undertaken within the Department of Psychiatry by suitably prepared candidates. Separate application for this training is required.

The Department of Psychiatry of McGill University is granted full recognition in respect of the two years' experience required by the regulations for admission to the Diploma in Psychological Medicine, in England.

All those accepted for training are assigned to one of the eight teaching centres in Montreal. These positions carry with them board and lodging or, in lieu of lodging, a living-out allowance, together with an honorarium ranging from \$175 to \$300 per month, depending upon the clinical position to which the applicant is assigned. For those in the advanced years of the Course, clinical positions carrying higher salaries are often available. In several centres, additional emoluments of \$2,400 a year are available, mainly in the form of bursaries, these being issued subject to certain conditions, information of which will be given on request.

Applications should be sent, by December 10, to: Chairman, Department of Psychiatry, McGill University, Montreal, Canada. (8274)

GROOM BROS. LTD.,
(5), Spalding, Lincs.

MANY OF OUR PROFESSIONAL friends say that growing orchids is an occupational hazard. Even if this were the case, all orchid growers would agree that this hobby is rewarding, fascinating, and peaceful. We recommend: The Cool house Selection (45" x 55") easy to grow. Twelve orchids, £20 inclusive. The Intermediate Selection (50" x 55") easy to grow. Sixteen orchids, £30 inclusive. Mature plants in variety. Cultural notes included.—Neville and Orchids Limited, Glastonbury, Somerset.

WALLACE AND BARR'S BULBS. THE first BARR catalogue of bulbs was published in 1862, just over 100 years ago. The present catalogue, fully illustrated in colour and containing many useful cultural notes, consists of 108 pages and contains one of the most comprehensive and up-to-date collections of Spring-flowering Bulbs obtainable anywhere today, backed by knowledge, experience, and tradition. This catalogue also contains over 50 varieties of modern Tall Bearded Flag Iris. We shall be very happy to send a copy on receipt of 6d. to defray postage charges on request. Wallace and Barr Ltd., The Nurseries, Marden, Kent.
