# THIAVER

a new Riker antihypertensive

with great potential  
in general practice

*Thiaver* is particularly valuable in general practice for that large group of hypertensive patients who are not adequately controlled by milder agents and their combinations. *Thiaver* provides an alternative to adrenergic or ganglion-blocking agents whose use is often limited by the side-effects they produce.

**Potent yet suitable for prolonged use** *Thiaver* combines the hypotensive properties of *Veriloid*, one of the few effective centrally-acting antihypertensives, with those of epithiazide, a new potent diuretic/hypotensive, to provide smooth but positive control of blood pressure with gradual onset of effect. Outstanding advantages of *Thiaver* are that it does not cause postural hypotension nor does tolerance develop.

**Very simple dosage** Treatment with *Thiaver* is free from the need for frequent and critical dosage adjustment. Satisfactory control of blood pressure is obtained in most patients with two or three tablets daily. Each tablet contains *Veriloid* (standardised alkaloids of *Veratrum viride*) 4 mg. and epithiazide 4 mg.

**D**EFICIENT intestinal bulk is one of the main causes of constipation. In such cases Andrews is particularly useful. It swells the bowel content by osmosis and stimulates peristalsis. In this perfectly natural way, Andrews induces a mild aperient action that does not irritate the intestine.

Andrews relieves constipation arising from decreased food intake during illness or restricted diet. It is also mildly antacid and relieves gastric discomfort; it helps to check biliousness and sick headaches. Andrews is readily acceptable because of its pleasant taste and refreshing effervescence.

# Psoriasis

All the time fresh evidence is received of Alphosyl's effectiveness in cases of psoriasis, even in those which have defied all other treatment for years.

**Excellent clinical trials.** In a recent controlled study<sup>1</sup> of 62 cases of psoriatic lesions, 29 were completely cleared after use of Alphosyl and altogether 55 obtained between 75% and 100% clearance. In no case was the condition less than 50% cleared.

Patients observed included those with total scalp-to-toe psoriasis, psoriasis of many years' duration, psoriasis involving tender areas and psoriasis refractory to all previous treatment. These results confirm others obtained under comparable conditions.

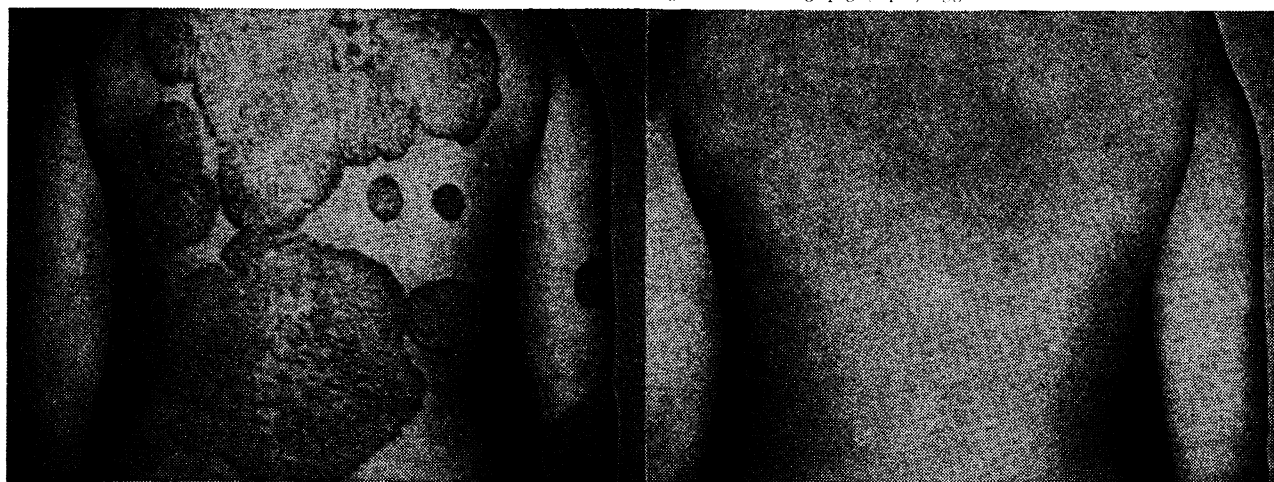

**Why Alphosyl is so successful.** In Alphosyl allantoin and a special refined coal tar extract are presented together for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales,<sup>2</sup> while the keratoplastic effect of coal tar is well known.<sup>2</sup> Alphosyl is non-greasy and non-staining and vanishes on application.

**Freedom from side effects.** Alphosyl is notably safe,<sup>2,3</sup> being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis, for which it is so widely prescribed.

# 'ILOSONE' the decisive move

when infection poses problems

'Ilosone', brand Erythromycin Estolate B.P., gives quicker, surer and more effective treatment of common bacterial infections than any other oral form of erythromycin.

'Ilosone' is more stable than either erythromycin base or erythromycin stearate, particularly in the presence of gastric acid. This results in consistently higher and more prolonged serum concentrations, and accounts for the quick response of most respiratory tract and other common bacterial infections, to the decisive control of 'Ilosone'.

Side-effects are rare; very occasionally a reversible jaundice occurs, but no residual toxic effects have been authenticated.

#### Average Adult Dose

250 mg. every six hours (1 G. daily), increased to 2 G. daily in severe infections.

# CRYSTAPEN G

INJECTION · TABLETS · SYRUP

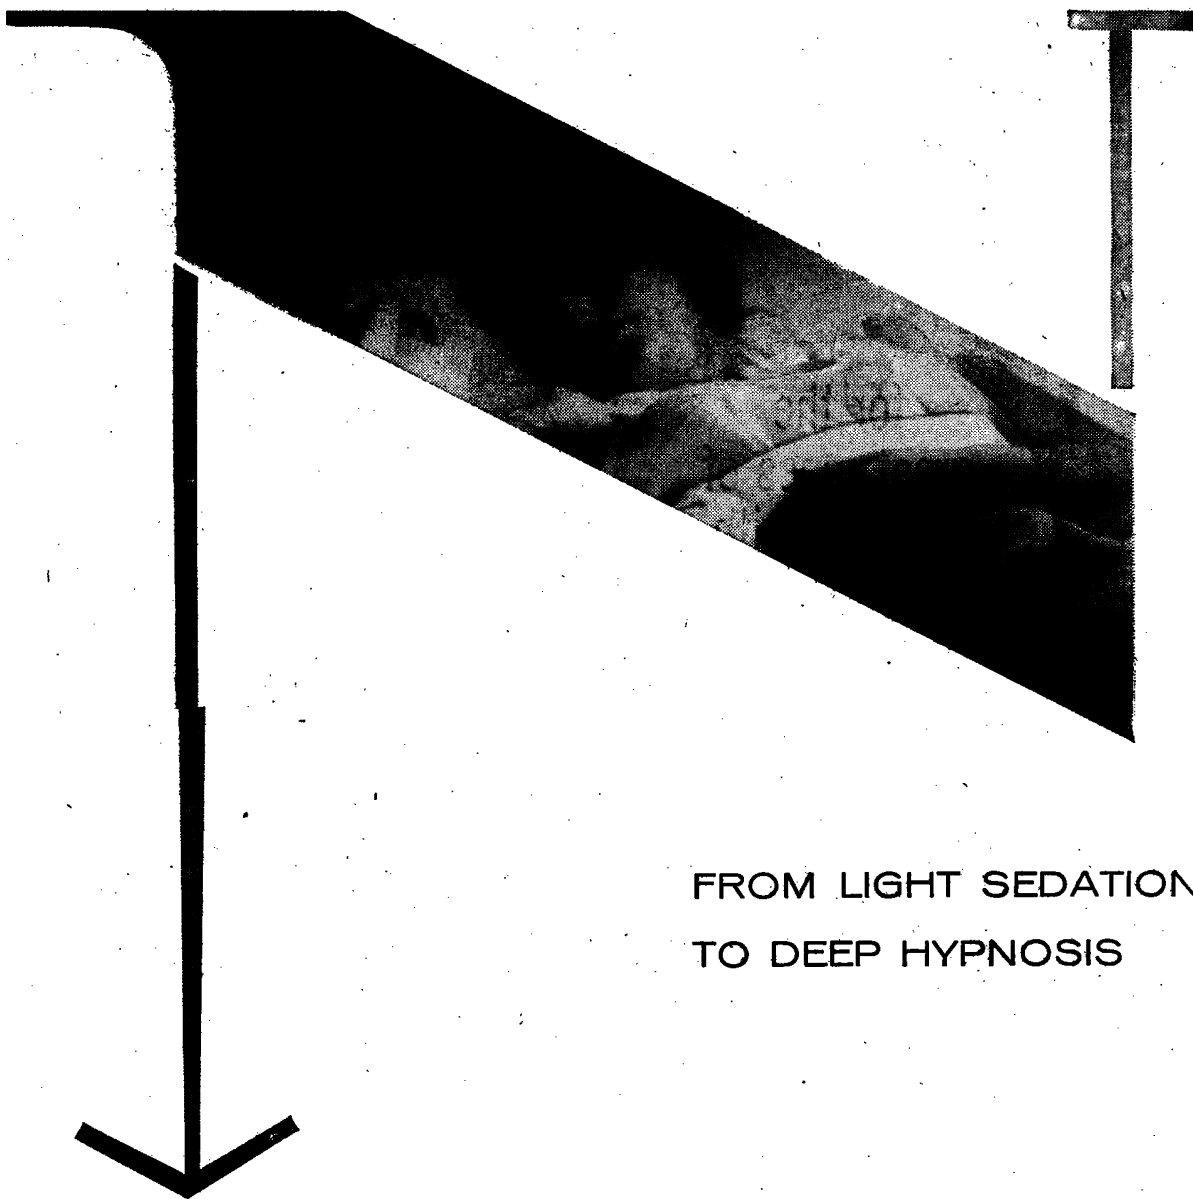

Despite the very many antibiotics now available penicillin G remains the first choice for the treatment of the majority of acute septic infections. It is generally agreed that other substances are used only if bacteriological or other factors indicate specific need or if the administration of penicillin G in full dosage fails to produce response.

The early treatment of boils, carbuncles, abscesses and other soft tissue infections is essential if treatment is to be effective. Crystapen (soluble sodium penicillin G Glaxo) with its rapid bactericidal action, is a logical first choice for the treatment of such conditions. It is also cheap to use and frequently costs only a quarter as much as alternative antibiotics.

# THE BRITISH HEART FOUNDATION

## *Its composition and its purpose*

The British Heart Foundation is appealing for nation-wide support in the cause of heart research. Direct approaches already made to certain leading organisations and generous friends have raised the sum of over £1,250,000—a magnificent start towards the goal of £3,500,000.

The British Heart Foundation, under the Patronage of H. R. H. Prince Philip, and with Field-Marshal the Rt. Hon. Earl Alexander of Tunis as its President, has been created through the efforts of physicians and surgeons specialising in diseases affecting the heart and circulation. It has the support of the Royal College of Physicians of England, the Royal College of Surgeons of England, the Royal College of Physicians of Edinburgh, the Royal College of Physicians and Surgeons of Glasgow, the British Post-graduate Medical Federation and the College of General Practitioners. The Foundation is the first, and only, body of its kind in this country to concern itself ex-

clusively with the problem of heart disease. The funds of the Foundation will be used, through grants, fellowships and other such channels, to support and originate research in Great Britain into every aspect of the causes and treatment of diseases of the heart and circulation.

We appeal for your support, not only in donations or subscriptions, but also in bringing the Foundation to the notice of all those who are especially interested in the problem of heart diseases.

The Foundation has a Membership scheme that provides an opportunity for personal participation. Full details of Membership, and information about the Foundation and its Committees are available from the address below.

**HOMES****ST. ANDREW'S HOSPITAL,  
NORTHAMPTON****FOR NERVOUS AND MENTAL DISORDERS**

President: The Earl Spencer

Medical Superintendent: D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fifteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

**WANTAGE HOUSE**

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

**MOULTON PARK**

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.

**WYKE HOUSE, ISLEWORTH**

A private hospital, established in 1826, for the individual treatment and care of a limited number of psychiatric patients. Apply Resident Physician T-1 ISL 7000.
