HAYGEN & BRONCHAGEN

HAYGEN and BRONCHAGEN are the logical outcome of research by the Bencard Allergy Unit in the field of specific desensitising vaccines. This has led to the development of two new standard vaccines, one for the effective treatment of hay fever and the other for allergic asthma and perennial rhinitis. Clinical experience has shown that the allergens incorporated in Haygen and Bronchagen are responsible for symptoms in more than 80% of 'classical' hay fever and at least 70% of allergic asthma patients. With this simplified treatment based on the case history alone, patients may expect substantial relief or even complete freedom from symptoms.

BUTTERWORTHS**MODERN OPHTHALMOLOGY***Edited by Arnold Sorsby, M.D., F.R.C.S.**In Four Volumes*

The therapeutic revolution, which during the past thirty years has caused so many changes in medicine, has emphasized the importance of an aetiological diagnosis. The editor and authors of the textbook have been particularly aware of this progress.

In the first volume, which deals with the basic sciences, little departure from established texts has been possible, but important aspects of pharmacology are discussed and there is a chapter on the aetiology of eye diseases. The second volume, based on the editor's well-known book, *Systemic Ophthalmology*, considers the recognized general diseases which underlie some eye disorders. The third and fourth volumes represent the greatest departure from current textbooks. Topical ophthalmology is discussed, as far as is feasible, in terms of aetiology, with sections devoted to mal-developmental defects, tumours, injuries, infections, diseases of multiple or indefinite origin, and functional anomalies of the eye.

Modern Ophthalmology is the most complete, authoritative and up-to-date textbook on eye diseases. Its position as the standard work of reference is assured.

ALDOMET

Methyldopa

REGD

for more normal blood pressure throughout the 24 hours—at work, at ease or asleep

The advantages of 'Aldomet' allow the hypertensive patient many benefits

ADVANTAGES

Blood pressure is usually controlled in the lying (and sitting) as well as the standing position.

Postural hypotension is less of a problem than is the case with other potent antihypertensive agents. Exertional hypotension is rare.

Diurnal variation in blood pressure is rare. Morning hypotension can usually be avoided without loss of control of afternoon blood pressure, by dosage adjustment.

Dosage is simple, flexible and easily established. Side effects are seldom a serious problem.

BENEFITS FOR THE PATIENT

'Aldomet' controls hypertension throughout day and night, whether the patient is awake or asleep.

'Aldomet' allows the patient to undertake more normal activities, with a low risk of dizziness.

'Aldomet' gives smooth and even control of hypertension without excessive swings of blood pressure.

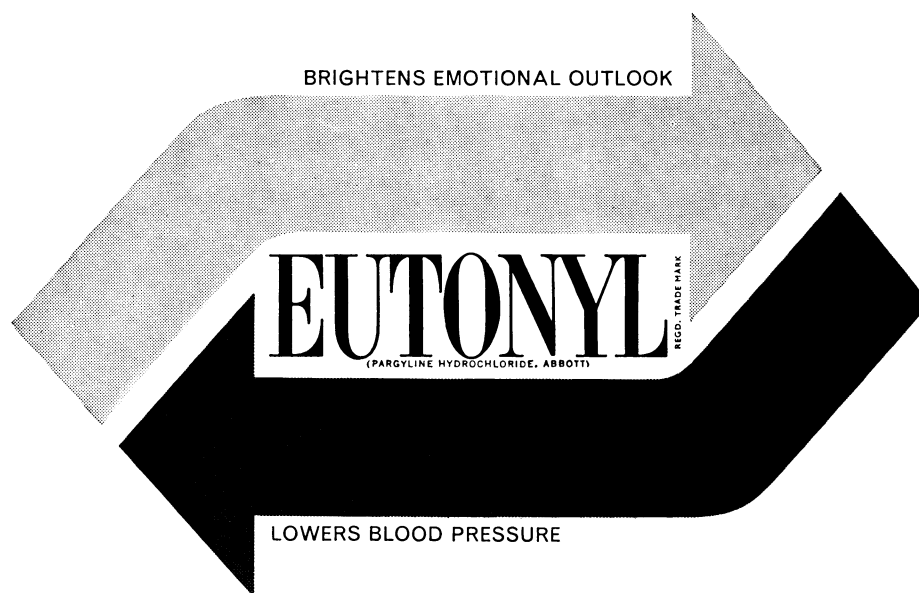

'Aldomet' is generally well tolerated and the patient is therefore fully cooperative.

'Aldomet' is supplied as yellow, film-coated tablets containing 250 mg methyldopa. For the treatment of acute hypertensive crises, 'Aldomet' is also available as an injection, supplied in 5 ml ampoules containing, per ml, 50 mg methyldopate hydrochloride. Detailed information on indications, dosage, administration, precautions and the very extensive bibliography is available on request.

MERCK SHARP & DOHME LIMITED, HODDESDON, HERTS

A major new antihypertensive agent from Abbott

Eutonyl* is an important new drug for the treatment of moderate to severe essential hypertension. Most hypertensive patients respond to Eutonyl therapy with a reduction of both systolic and diastolic blood pressures in the standing position, and many also experience significant reductions in other positions.

Many hypertensive patients have been impressed by an improved sense of well-being; and while the use of Eutonyl in the treatment of depression is still being evaluated, in this respect alone it offers a useful advance over other antihypertensive agents.

Eutonyl is a unique non-hydrazine chemical substance with monoamine oxidase inhibiting properties. Extensive laboratory and clinical studies have so far shown no serious toxicities, though suitable precautions should be

observed as with all new drugs. The side effects of Eutonyl therapy are relatively infrequent and mild if dosage is adjusted to prevent orthostatic hypotension. The combination of a thiazide diuretic such as Enduron* (methyclothiazide, Abbott) with a reduced dosage of Eutonyl further reduces side effects and also enhances the antihypertensive response in the sitting and lying positions.

Eutonyl is supplied in two strengths as Eutonyl (25 mg pargyline hydrochloride) and Eutonyl-Ten (10 mg pargyline hydrochloride) Filmtabs*, in bottles of 100.

Comprehensive literature is available on all aspects of this important new agent: dosage, side effects, precautions and the wide measure of agreement on its clinical efficacy even in the most difficult cases.

a new antacid palatable effective economical

Alcin is a new antacid offering several important advantages. It provides safe and effective treatment of symptoms associated with gastric hyperacidity and peptic ulceration.

Palatability Having an absence of chalkiness and an agreeable flavour, Alcin is non-nauseating.

Buffering Activity Alcin not only rapidly neutralises excess acid, but at the same time its sustained buffering activity maintains the level of acidity of the gastric contents within the desired range.

Safety Alcin is safe for prolonged administra-

tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

No Digestive tract ill-effects Alcin has no known laxative or constipating effects.

Economy Alcin is economical in use. The basic N.H.S. cost of 50 tablets is 1/9½d.

'ILOSONE' the decisive move

when infection poses problems

'Ilosone', brand Erythromycin Estolate B.P., gives quicker, surer and more effective treatment of common bacterial infections than any other oral form of erythromycin.

'Ilosone' is more stable than either erythromycin base or erythromycin stearate, particularly in the presence of gastric acid. This results in consistently higher and more prolonged serum concentrations, and accounts for the quick response of most respiratory tract and other common bacterial infections, to the decisive control of 'Ilosone'.

Side-effects are rare; very occasionally a reversible jaundice occurs, but no residual toxic effects have been authenticated.

Average Adult Dose

"It is certainly true that in the age-old struggle of mankind against poverty and destitution, whenever it has been possible to raise the standard of living above the level of bare subsistence, there has been a rapid improvement in health which is usually associated with an increased consumption of protein. THE ROLE OF PROTEIN IN NUTRITION

"The Role of Protein in Nutrition" is the title of a study prepared by the nutrition division of Lloyd Hamol Limited as the result of research undertaken in connection with the formulation of a new high protein food. In the course of this work much information was collected and many modern views examined with regard to protein and its place in nutrition.

Practising doctors, who have little time to keep up to date with their technical reading, should find this comprehensive document both interesting and stimulating to read. It is available free of charge on application.

Despite the very many antibiotics now available penicillin G remains the first choice for the treatment of the majority of acute septic infections. It is generally agreed that other substances are used only if bacteriological or other factors indicate specific need or if the administration of penicillin G in full dosage fails to produce response. The early treatment of boils, carbuncles, abscesses and other soft tissue infections is essential if treatment is to be effective. Crystapen (soluble sodium penicillin G Glaxo) with its rapid bactericidal action, is a logical first choice for the treatment of such conditions. It is also cheap to use and frequently costs only a quarter as much as alternative antibiotics.

Indications

There are very many conditions met with in general practice in which corticosteroids are indicated—ranging from diseases of comparatively minor severity to major, life-threatening conditions. Those in which systemic steroid treatment can be of definite value include:

Allergic states

(asthma, hay fever, anaphylactic oedema, serum sickness, drug sensitisation)

Inflammatory dermatoses

Rheumatoid arthritis

Shock and overwhelming infections

Chronic bronchitis

The diabetic is condemned to a life-time of medication to control his condition.

In few other conditions is simplicity and ease of administration so important.

The introduction of the sulphonylureas eight years ago relieved one group of diabetics from the burden of daily injections. The extensive use of Rastinon in oral antidiabetic therapy for over two million patients has shown that it is not only one of the safest drugs available, but also one of the

most effective in controlling diabetes when the condition is

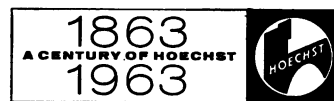

first discovered at middle age. Rastinon is the standard oral treatment of diabetes, and it is remarkable for its

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. This organism itself forms an antibiotic which may contribute to its rapid preponderance over other species.^{1, 2}

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3, 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

A career for doctors in the R.A.M.C.

GOOD GENERAL PRACTICE

Professional standards in the Royal Army Medical Corps are high. The R.A.M.C. is responsible for the welfare not only of serving officers and men but also for many of their dependants; there is thus great scope for good general practice. An illustration of this is the fact that over 12,000 babies were born in military hospitals during, for example, 1961. There are thirty well-equipped hospitals at home and overseas, as well as field medical units to provide medical care for the Army in its active role.

Accommodation is provided for all married and single officers. Well-equipped surgeries with medical assistants are provided, allowing you to do your best work, and devote more time to the care of your patients. Consultant opinion is available to you, and, as a general practitioner, you are welcome in the hospital to follow up your cases.

PAY, ALLOWANCES AND LEAVE

The range of pay varies from not less than £2,000 for the young married medical officer up to £5,000 for the senior consultant; and you will be offered employment up to the age of 65. Annual allowances of up to £185 for the first, up to £225 for the second, and up to £260 for the third and all subsequent children, may be granted to assist in the education of children who are sent to boarding schools in the United Kingdom. These allowances are untaxed when serving outside the United Kingdom.

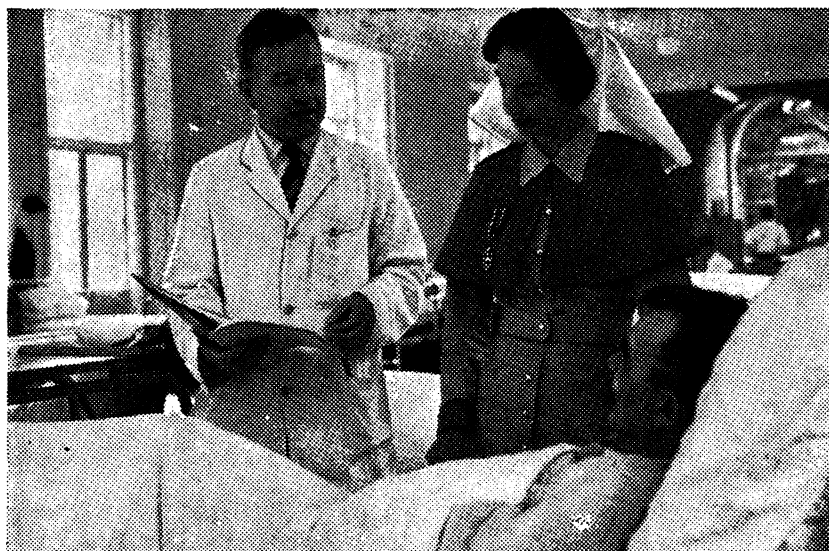

Six weeks' leave is given each year, and you are not responsible for finding or paying your relief.

SPECIALISATION

Doctors granted permanent commissions may apply for training in any of fourteen specialities, and those selected are given ample time and opportunity for obtaining their higher qualifications. Senior specialists may be awarded consultant grading directly comparable with civilian standards. Extra pay for specialists ranges between £109 and £584 a year.

POST-GRADUATE STUDY AND RESEARCH

Great importance is attached to post-graduate study for permanent officers engaged in general practice, as well as specialists. General practitioners are expected to take diplomas, such as D.C.H., D. Obst. R.C.O.G.,

An officer in the R.A.M.C. visits a patient, accompanied by a member of Queen Alexandra's Royal Army Nursing Corps.

and refresher courses are arranged for both specialists and general practitioners at the Royal Army Medical College and other post-graduate centres.

Research is an increasingly important aspect of the work of the R.A.M.C. Several officers are engaged either wholly or in part in clinical and physiological research, their work covering a wide range of subjects.

GENERAL CONDITIONS

Previous service in the Armed Forces counts for pay and promotion, and an antedate of up to seven years may be granted for civilian experience.

Short service commissions are for 3 to 5 years with terminal tax-free gratuities of £1,500 and £3,000 respectively. A short service commission can lead to a permanent commission. For permanent officers, there is an initial taxable grant of £1,500 and a terminal tax-free grant of three times the annual pension. The pension scheme is non-contributory. The upper age limit for permanent commissions is forty, and for short service commissions, fifty.

PRE-REGISTRATION COMMISSIONS

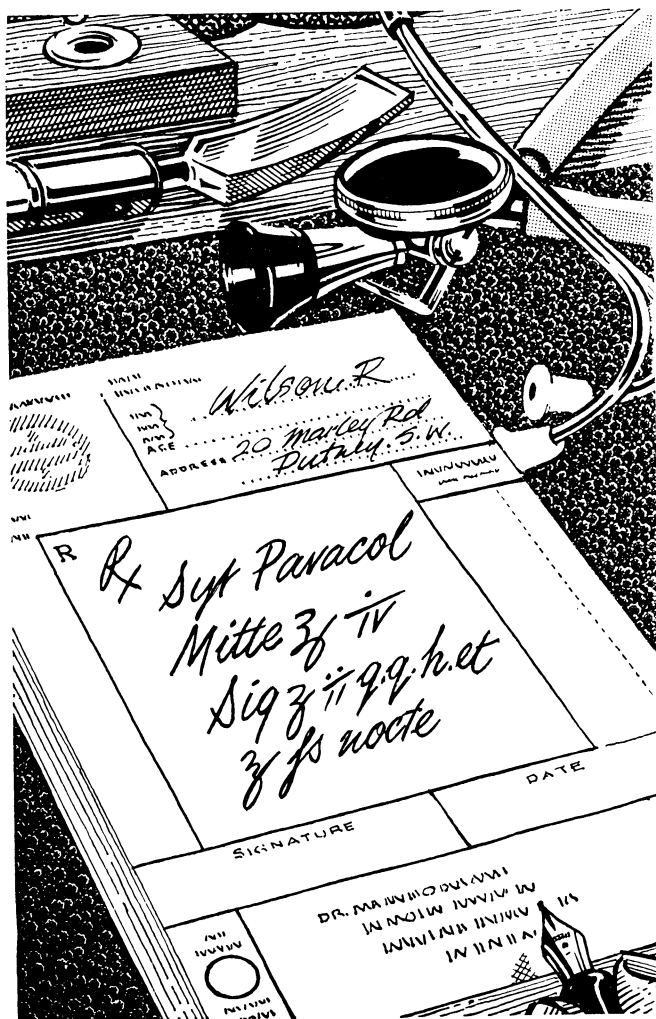

Medical graduates may be accepted for short service commissions of 3 or 5 years at any time before full registration.

Age limit is 32 years. Pre-registration appointments may be done in N.H.S. hospitals of choice, or in selected military hospitals. Board and accommodation are free, and salary is £876 for a married man; £1,065, if over 25 years. The short service commissions carry a terminal gratuity. In addition, a gratuity of £200 is payable in respect of the pre-registration year's service.

MEDICAL CADETSHIPS

A limited number of cadetships is open to male medical students who have passed their 2nd M.B. or equivalent examination. Tuition fees are paid from Army funds, and books and instruments are issued on loan. The age limit is 28 years: the salary for a single man is £930.

Service with the R.A.M.C. is for a minimum period of five years after full registration; this service carries a terminal gratuity. A booklet, 'A Career for Doctors in the Royal Army Medical Corps,' containing details of pay, gratuities, pensions and conditions of service, may be obtained from: The Director-General, Army Medical Services, The War Office, (HNR/36/C) (AMD 2B), London S.W.1, Tel: GRO 8040, Ext. 602, or you may care to come and discuss your application personally.

PAVACOL

an economical prescription
for effective treatment of
Coughs and Bronchitis

ECONOMY: The cost of Pavacol at the dispensing pack rate to chemists is only 7d. per fluid ounce.

DUAL ACTIVITY: Pavacol relieves Cough by acting in two ways:—

- 1 The pholcodine content exhibits a cough suppressant effect comparable with that of Heroin but without the latter's disadvantages in being addictive and constipating;
- 2 The Papaverine content relaxes plain muscle by direct action and the resultant bronchodilatation makes it easier for the patient to cough up sputum.

DIABETIC SYRUP ALSO AVAILABLE—Pavacol Diabetic contains the same ingredients as ordinary Pavacol Syrup but carbohydrates are omitted: Indications, dosage and price are identical.

Lends wings to troubled minds

'Aventyl'*
brand Nortriptyline

NEW WIDE SPECTRUM
MOOD ENHANCER

'Aventyl', synthesized in the Lilly Research Laboratories, at one stroke broadens the doctor's power to relieve troubled and disturbed patients. 'Aventyl' is not a combination of an anti-depressant with a tranquillizer. Instead, 'Aventyl' is a *single* entity that has been shown to be clinically effective over a *constellation of symptoms* associated with depression as well as with anxiety and psychosomatic disturbances. Indeed, 'Aventyl' has an unusually wide spectrum of action in psychiatric disorders.

'Aventyl'*

brand Nortriptyline

provides these important advantages

1 'Aventyl' not only has its marked anti-depressant activity, but also a valuable concurrent anti-anxiety and hostility-channelling effect. In agitated depressed patients, this tranquillizing action often appears first.

2 'Aventyl' has shown an over-all response rate close to 80% in approximately 2,000 cases with widely diverse symptoms.

3 'Aventyl' produces improvement in one week in 50% of the patients who respond to it, and in almost 80% by the end of the second week.

4 'Aventyl' is not a monoamine oxidase inhibitor. Side-effects appear to be milder and less frequent than those produced by other psychotropic drugs.

5 'Aventyl' has not been observed to give potentiation or increased incidence of side-effects when used with tranquillizers, stimulants, sedatives or other standard drugs used for primary medical disorders.

6 'Aventyl' appears to be effective in allaying psychosomatic complaints in such fields as gastro-enterology, urology, dermatology, cardiology, allergy and paediatrics.

7 'Aventyl' helps some patients to overcome undesirable psychic inhibitions and gain insight and awareness of their illness, thus enabling them to cope with it more effectively. This is especially valuable with concurrent psychotherapy.

COMMERCIAL APPOINTMENTS**HEAD OF MEDICAL DEPARTMENT**

A well-qualified medical practitioner, preferably of senior registrar status, is required as Head of Medical Department to a progressive British pharmaceutical company.

This is an important appointment carrying a high salary. The responsibilities of the Head of Medical Department can briefly be divided under the following headings:

1. Arranging, supervising, and assessing all clinical trials of the Company's new or existing therapeutic agents.
2. General supervision of the work of the Medical Department covering:
 - (a) preparation of medical briefs on all products for marketing and other purposes.
 - (b) general liaison with outside clinicians, and official bodies on the medical aspects of the Company's products.
 - (c) the provision of medical information and advice.
 - (d) the medical aspects of the training of representatives.

This is a key appointment calling for a medical practitioner who can bring real enthusiasm and skilled judgment to the task of assessing the clinical efficacy and value of possible new and original therapeutic agents.

The Head of the Medical Department will be supported by the appropriate staff, some of whom will also be qualified medical practitioners. Conditions of service are excellent, including membership of contributory pension schemes.

All applications will be dealt with in strict confidence and should be sent to Box 4201, B.M.J.

GOVERNMENT OF KENYA

Applications are invited for ten posts in the grade of

MEDICAL OFFICER Candidates must possess qualifications registrable in the United Kingdom, and should be nationals of and permanently resident in the United Kingdom or the Republic of Ireland. Possession of a D.P.H. is desirable but not essential.

The duties on which officers will be employed include Public Health, Clinical Medicine and Hospital Administration. Kenya is a country at present in a dynamic state of evolution and the opportunities for doctors possessing initiative and imagination are considerable.

Appointments will be on contract for two tours each of 21 to 27 months, in the salary scale £1,617 to £2,664 a year. Initial salary will be determined by qualifications and approved experience. On satisfactory completion of service the officer will be eligible for a gratuity (taxable) of 25% of salary. Free passages for the officer, his wife, and dependent children on appointment and on leave after each tour. Government quarters with heavy furniture usually available at a rental varying from £50 to £115 a year. Approximately fourteen weeks home leave on full pay after each tour; local leave of sixteen days in each tour also granted. N.H.S. Superannuation rights may be safeguarded.

It is considered that doctors contemplating a career in the public health service will find such an appointment an opportunity for gaining valuable experience in the developing field of public health where the problems are thrown into sharper relief than in a more developed community.

Application should be made (giving full name) to Department of Technical Co-operation, Room 404, Eland House, Stag Place, Victoria, London S.W.1. Please quote RC.205/80/03. (5622)

MENTAL HEALTH RESEARCH FUND STUDENT PRIZES AND TRAVELLING FELLOWSHIP IN PSYCHIATRY

The Mental Health Research Fund awards annually to medical students and doctors in their pre-registration year three monetary prizes and a travelling fellowship as the result of an essay competition on a subject relating to mental health, and a subsequent interview.

Applicants gaining the top three places in the essay competition will be given prizes of £100, £50 and £25 respectively.

The travelling fellowship, tenable in a psychiatric or other department abroad for up to six months, will be awarded as the result of an interview combined with consideration of the candidate's undergraduate record. Persons interviewed will be chosen from the top ten in the essay competition. The travelling fellowship will normally be taken up at the end of the pre-registration year or, in the event of it being awarded to a medical student, may be taken up after qualification.

The subject for the essay this year is "What objectively verified contributions to the understanding and treatment of psychiatric disorder have been made by (a) learning theory and (b) psychoanalysis?"

The Panel of Examiners consists of two members of the Research Committee of the Mental Health Research Fund and one member of the Association of Teachers of Psychiatry in Undergraduate Medical Schools.

Essays should be sent, before March 1, 1964, to the Secretary, Research Committee, Mental Health Research Fund, 38 Wigmore Street, London W.1 (Tel.: WELbeck 4103), from whom further details may be obtained. (5215)

HOMES**ST. ANDREW'S HOSPITAL NORTHAMPTON****FOR NERVOUS AND MENTAL DISORDERS**

President: The Earl Spencer.

Medical Superintendent

D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fifteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre known as Gloucester House has been opened recently which includes an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

WANTAGE HOUSE

This is a separate reception unit which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.
