Medihaler-bron

Medihaler-bron adds a new dimension to the treatment of bronchospasm-prolongation of relief. Medihaler-bron contains isoprenaline sulphate and atropine methonitrate. Each measured dose of micronised particles gives immediate relief—onset within seconds—and relief is prolonged for hours.

Isoprenaline sulphate produces the full primary bronchodilation which is the patient's first need. Atropine methonitrate prolongs and sustains the all-important initial relief given by isoprenaline.

The widely recognised advantages of *Medihaler* treatment, now with the added benefit of prolonged effect, make *Medihaler-bron* a product with particular clinical advantages for the patient with persistant bronchospasm.

Medihaler-bron is supplied with a new-style plastic oral adapter, which will also shortly be available with Medihaler-epi, Medihaler-iso, and Medihaler-iso Forte.

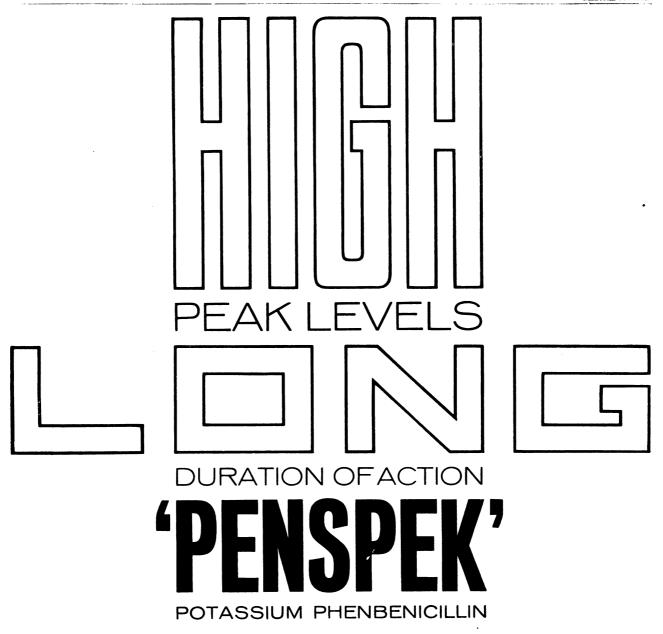

Medihaler-bron, available in vials of 300 doses, contains a suspension of isoprenaline sulphate 5mg./ml. and atropine methonitrate, 2mg./ml., each dose contained in 0.05 ml. of suspension.

BIOGASTRONE

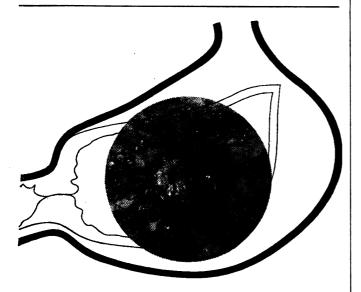

disodium salt of 3-0-(β-carboxypropionyl)-11-oxo-18β-olean-12-en-30-oic acid

Amajor advance in the treatment of gastric ulcers

Following successful clinical trials over the past four years, Biogastrone is now available for general use. It has proved effective in a significantly high proportion of cases of gastric ulcer, yet causes few side effects. Biogastrone is the drug of choice in the treatment of early or chronic gastric ulcers.

Dosage: One or two tablets (50 mg.) three times daily after meals for four weeks.

Packings: Boxes of 24 and 100 tablets.

"... promotes the healing of gastric ulcers"

'Clinical trial of a triterpenoid liquorice compound in gastric and duodenal ulcer': Lancet (1962), ii: 793

Detailed information is available on request from

Biogastrone is a trade mark

BR 5/J.249

- 1 "It appears that diloxanide furoate and paromomycin are at least as effective in the treatment of amoebiasis as is E.B.I. The first has the advantage of being cheaper and much better tolerated."
- 2 "... an effective amoebicide useful in both acute amoebic dysentery and chronic amoebic colitis".
- 3 "Tolerance of the drug was good in 100% of the subjects . . . No special precautions were taken during treatment, and the patients were all ambulant".

REFERENCES 1. Trans. roy. Soc. trop. Med., 1962, 56, 400. 2. Amer. J. trop. Med., 1962, 11, 330. 3. Antioquia med., 1962, 12 43.

FURAMIDE is the simplest treatment for amoebiasis, requiring no injections, enemas or special diets. Cure rates are high—75% to 80% in the acute stage and up to 100% in the chronic condition. Side effects are unlikely, and hospitalization is not normally required, making treatment cheaper than the older forms of therapy. Extensive clinical trials in many tropical and sub-tropical countries have borne out these claims.

Dosage is simple—1 tablet three times daily for ten days in patients of average weight.

Each Furamide tablet contains 0.5G of Entamide (diloxanide) furoate B.P. Both Entamide and Furamide are products of Boots research.

Packed in bottles of 15 and 250 tablets.

The convalescent Mackeson

Dark beers have long been regarded as a valuable aid in building up strength after illness.

Mackeson (or Mackeson Stout, as it was long called) has a high reputation in this tradition. The makers of Mackeson recognise that only the individual practitioner can decide when such a beer can most effectively be used. For the convenience of doctors, therefore, they set out below an analysis of its nutritional properties.

Mackeson differs from other dark beers in one important respect: it is more acceptable to invalids and convalescents because of its taste.

Instead of having the bitter taste usually associated with this type of beer, it is smooth, and mild in flavour.

It provides an invaluable source of energy through

its calorific value (276 calories per pint, essentially that of three-quarters of a pint of milk). Because its most important ingredient in this respect is Lactose Sugar, Mackeson is easily digested, quickly assimilated—by even a weakened digestive system.

Nitrogenous matter is also present, mainly as protein break-down products, e.g. peptides and amino acids. It also contains valuable water-soluble members of the B groups of vitamins.

In short, Mackeson is a drink rich in energising properties, and at the same time bland, non-bitter and pleasant in flavour.

When a dark beer is contemplated as a help to speedy convalescence, it may be borne in mind that Mackeson will be more acceptable to patients

who find a slightly bitter drink not to their taste.

CALMS THE TENSE AND ANXIOUS PATIENT

The outstanding effectiveness and record of safety with which 'MILTOWN' (meprobamate) relieves anxiety and tension states has been clinically authenticated time and again during the past eight

years. This, undoubtedly, is why physicians still prescribe meprobamate more than any other tranquilliser.

Indications: 'Miltown' (meprobamate*, Wallace) is indicated in anxiety and tension states, and all conditions in which anxiety and tension are symptoms.

Dosage: The usual adult dose of 'Miltown' is one or two 400 mg. tablets three times

daily. The recommended starting dose with children is 100 or 200 mg, two or three times daily.

Availability: 400 mg. scored tablets, 200 mg. sugar-coated tablets; bottles of 50 and 250. Detailed information on request.

RECORD THE FACTS AT THE

PS $m{83}$ portable dictation machine

The new Philips 83 is extremely light and really portable for on-the-spot recording anywhere. It is simple to operate. It can be used even in noisy surroundings: the special microphone cancels background noise. When recording observations, the 83 Portable allows full concentration because you need never look away from the patient or X-ray film—and hands can be left free for examination or for adjusting equipment. It runs on ordinary torch batteries. The easy-to-load cassettes eliminate tape threading and record for a full 40 minutes. Completely compatible with Philips 82 mains-operated Dictation Machines.

55 GNS complete with microphone and carrying case.

Be sure to ask your local office equipment dealer for a demonstration of this superb Philips Machine

compulsive eaters need more

NEW

Durophet-M

controls the appetite relieves the stresses that find their outlet in overeating

One capsule a day makes weight-loss certain

Depriving the obese patient of the satisfactions of eating by prescribing appetite depressants alone often leads to failure of the weight-reducing programme.

Something more is needed to help the patient combat the emotional stresses which previously found their outlet in overeating.

Durophet-M contains the most effective appetite depressant available today, Durophet (laevo-and dextro-amphetamine in a ratio of 1:3), and methaqualone, a calmative which helps alleviate the patient's underlying tensions and frustrations. Capsules are available in two strengths, stated in terms of the Durophet content, $12\frac{1}{2}$ mg. and 20 mg. and each strength contains 40 mg. methaqualone.

The prescribing of

ELASTIC HOSIERY

* SIMPLIFIED

CONDITION: Medium varices

* PRESCRIPTION: Scholl standard elastic yarn stockings.

Available in thigh length stockings or below-knee stockings.

They have four prime features:-

1 Correct compression throughout the entire length and girth, including the important area of the malleoli.

2 Avoidance of constriction by means of the Soft-Grip ribbed nylon extremities of the stockings.

3 Comfort for the patient: cool, light and well ventilated.

4 Cosmetic acceptance: seamless, they pass unnoticed under dress hose.

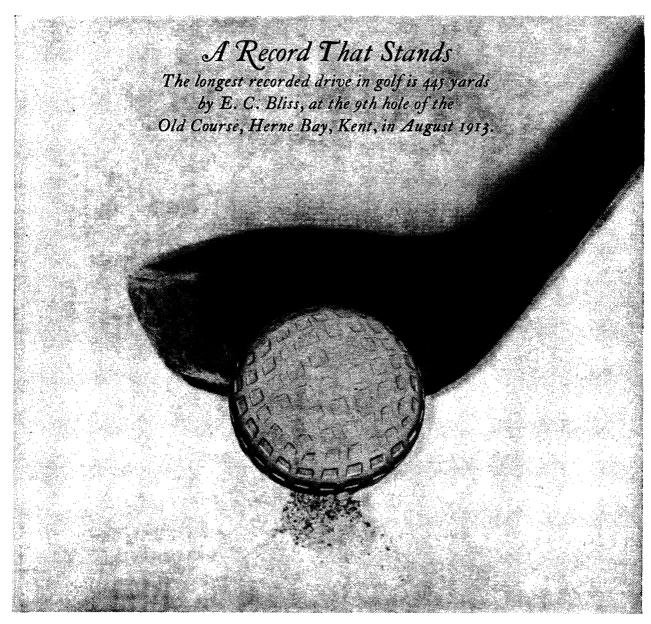

CONDITION: Early or mild varices

* PRESCRIPTION: Nylastik lightweight elastic yarn stockings. Full-footed, thigh length: Nylastik are indiscernible in wear and they provide a degree of support quite remarkable for such light stockings. They are widely applicable for prophylaxis during pregnancy.

*PRESCRIBABLE ON N.H.S.

A portfolio for quick reference in the surgery, containing specimens of both types of stockings will be sent on request to:

THE SCHOLL MFG. CO. LTD., 182-204 ST. JOHN STREET, LONDON, EC1.

Synadrin for the patient with angina pectoris

Synadrin is a specific coronary vasodilator, and is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments 11-17 and it has been tested in over 1,000 patients. 1-10 Results of trials so far reported have been promising and Synadrin has been described as "an effective drug for treating angina pectoris."1

Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

Dosage

Treatment may be initiated with 2 tablets, three times daily, reducing after three days to a maintenance dosage of 1 tablet two or three times daily.

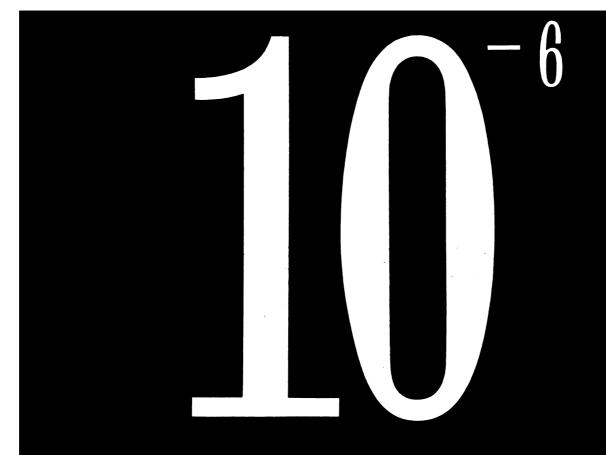

Synadrin is presented as tablets, each containing 15 mg. of prenylamine lactate in bottles of 30 and 150 at basic NHS prices of 8/8d. and 34/8d. (subject to P.T.). Synadrin is known in some other countries as Segontin.

HOECHST PHARMACEUTICALS LIMITED

Portland House, Stag Place, Victoria, London, S.W.1

Why does a micro-dose make such a difference in anaemia of pregnancy?

In pregnancy, routine administration of oral iron has long been established. But hitherto, folic acid deficiency has only been treated when specifically diagnosed, and then with high doses of folic acid.

Recentinvestigations indicate that prophylactic micro-doses of folic acid should be prescribed for all pregnant patients for their value in combating anaemia of pregnancy. Such micro-doses of folic acid both ensure increased response to oral iron and provide comprehensive prophylactic treatment of anaemia of pregnancy due to iron and folic acid deficiencies without masking a true pernicious anaemia.

Folaemin has been introduced to meet this need. Folaemin contains iron aminoates and microgramme amounts of folic acid. No other preparation currently available contains the micro-dose of folic acid now provided by Folaemin—the micro-dose that makes the big difference in anaemia of pregnancy.

Composition each tablet contains iron aminoates 350 milligrammes (equivalent to 35 mg. elemental iron) and folic acid 50 microgrammes.*

Dosage: One tablet three times daily, preferably between meals. **basic NHS price:** Bottles of 100 tablets 7/-

*One microgramme equals one thousandth of a milligramme, or 10⁻⁶ gramme.

SORE THROAT PRISTACIN BACTERICIDAL CHEWING GUM

Pristacin is a simple and effective first choice treatment of sore throat because:—

- (a) It is bactericidal
- (b) It increases salivation, rather than inhibiting it
- (c) It contains neither antibiotics nor sulphonamides
- (d) It contains no local anaesthetics

Pristacin is a chewing gum containing 4 mg. cetyl pyridinium chloride in each piece. With chewing, this ingredient is slowly released and bathes the affected area in a concentration sufficient to inhibit the growth of most Gram-positive and Gram-negative organisms. Pristacin does not contain any antibiotics nor does it have any anaesthetic action. It is not contra-indicated during systemic therapy.

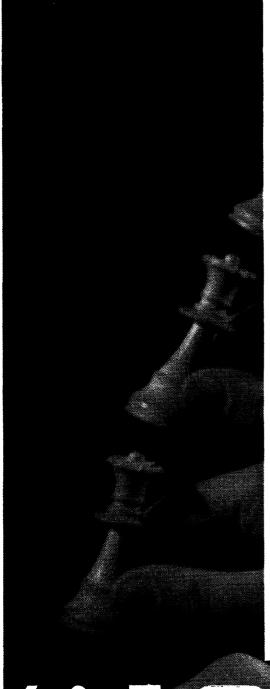

The packet of 12 pieces costs 1/8—basic NHS price—and the recommended dose is 3 to 4 pieces daily, each piece to be chewed for as long as possible.

FOR ALL SORE THROATS

HORLICKS LIMITED, PHARMACEUTICAL DIVISION, SLOUGH, BUCKS

'ILOSONE' the decisive move

when infection poses problems

'llosone', brand Erythromycin Estolate B.P., gives quicker surer and more effective treatment of common bacterial infections than any other oral form of erythromycin.

'llosone' is more stable than either erythromycin base or erythromycin stearate, particularly in the presence of gastric acid. This results in consistently higher and more prolonged serum concentrations, and accounts for the quick response of most respiratory tract and other common bacterial infections, to the decisive control of 'llosone'.

Side-effects are rare; very occasionally a reversible jaundice occurs, but no residual toxic effects have been authenticated.

Average Adult Dose

250 mg. every six hours (1 G. daily), increased to 2 G. daily in severe infections.

Presentation

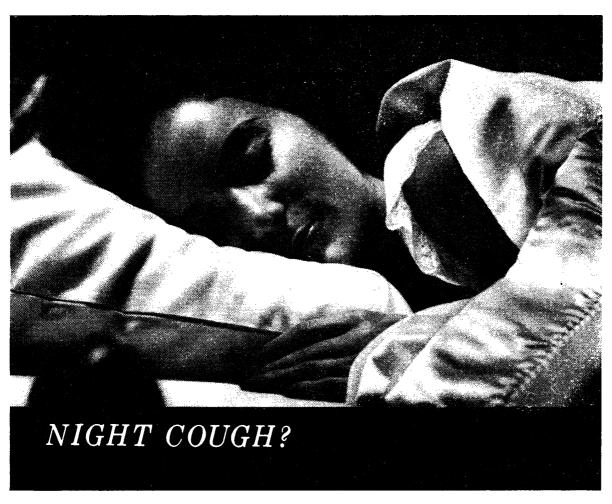

'Pulvules' 125 mg. and 250 mg. Suspension 125 mg. per 5 ml. Bottles to make 60 ml.

CALCIDRINE Syrup

(CALCIUM IODIDE, EPHEDRINE CODEINE AND NEMBUTAL, ABBOTT)

Because Calcidrine combines a sedative (Nembutal*) with an expectorant and an antispasmodic, it is especially useful when night cough prevents rest. Calcidrine permits uninterrupted sleep by quickly controlling the cough, loosening mucus, aiding respiration, soothing the throat, and calming the cougher.

Each fluid ounce contains:

Pentobarbitone Sodium B.P.—to calm nervous tension	gr.
Ephedrine Hydrochloride B.P.—to relieve bronchial spas:::	gr.
Codeine Phosphate B.P.—to depress the cough reflex3	gr.
Calcium Iodide B.P.C. 1934—to help clear air passages	gr.

All carefully blended into a good-tasting syrup that patients readily take. Supplied in 120 ml. bottles.

^{*} TRADE MARK FOR PENTOBARBITONE, SODIUM B.P.

Efficient antisepsis with Dettol

"If the antiseptic is to be of any value at all in most of these situations it must not only kill organisms that are dry and probably embedded in films of some kind but it must act rapidly before it is removed by evaporation, gravity or washing."

> "Efficiency of Antiseptics When Acting on Dried Organisms" Brit. Med. 7. 1963 1, 499.

According to the evidence Dettol meets these two important provisions of Rapidity of Action and Compatibility with Soap.

Rapidity of Action

Dettol kills Staph. aureus, including phage type 80/81 and Ps. pyocyanea in less than $2\frac{1}{2}$ minutes (vide Brit. Med. J. 1963 1, 498).

Compatibility with Soap

"Unlike the other antiseptics, Dettol appeared to have its efficiency increased by the presence of soap, and against Staph. pyogenes the effect was one of true synergism."

"Antiseptics in Midwifery" Brit. Med. J. 1956 2, 200.

Dettol is non-poisonous and is well-tolerated. Its efficiency is well maintained in the presence of organic materials and it is stable in solution.

Surgical Dettol

A tincture for pre-operative skin disinfection available in orange, blue and colourless varieties.

Dettol Cream

An antiseptic cream for surgical, medical and obstetric uses.

Instrument Dettol

For the disinfection and storage of surgical instruments and appliances.

Each teaspoonful (5 ml.) contains

ORAL PENIDURAL 'top-of-the-form' when infection strikes

The child at school is always open to infection, particularly during the winter months and illness thus resulting, often means a spell at home for recovery. Oral Penidural* acts fast enabling your young patient to return to his lessons with the minimum of delay. Palatable, fruit-flavoured Penidural is reliably absorbed, its simple 6-8 hourly dosage scheme ensuring minimum patient disturbance particularly at night. Supplied in bottles of 60 ml. Each 5 ml. contains 250 mg. Benzathine Penicillin B.P. (equivalent to 300,000 units Penicillin G). * trade marks. John Wyeth and Brother Limited, Taplow, Maidenhead, Berkshire.

Impaired appetite in the elderly is both cause and result of failing energy and vitality. Orabolin provides a simple solution to this problem by ensuring full use of such nitrogen as is available in the food, thus counteracting body protein loss. Renewed vigour and appetite lead to added independence and gain in weight.

Orabolin is well tolerated, free from liver toxicity or other harmful effects, and is effective in doses as low as 0.05 mg. per kilo body weight.

DOSAGE 1 to 2 tablets daily

FORM AND Scored tablets containing: 2 mg. ethylestrenol.

PACKS Bottles of 25 and 100

BRITISH MEDICAL ASSOCIATION

ASSISTANT SECRETARY

The Council of the British Medical Association invites applications from registered medical practitioners for the post of Assistant Secretary. Preferential consideration will be given to candidates not over the age of 40.

The sa.ary will be £2,365, rising by nine annual increments to a maximum of £3,648 per annum. The Association's Superannuation Scheme will apply on substantive appointment. appointment.

The appointment will be for a probationary period of six months in the first instance and thereafter may be terminated by six months' notice on either side. notice on either side.

Applications, giving details of qualifications and experience, and accompanied by the names of three persons to whom reference may be made, should be addressed to the Secretary of the Association at B.M.A. House, Tavistock Square, London W.C.1, and must be received not later than December 21.

BRITISH MEDICAL ASSOCIATION

APPOINTMENT OF ASSISTANT SCOTTISH SECRETARY

Applications are invited from Applications are invited from registered medical practitioners for the appointment of Assistant Scottish Secretary. The post is full-time and the duties are to assist the Association's Scottish Secretary in the work of the Association in Scotland Scotland.

The salary is £2,365, rising by nine annual increments to £3,648 nine annual increments to £3,648 per annum, and the Association's Superannuation Scheme is applicable to the post. The appointment will be for a probationary period of six months in the first instance and terminable thereafter by six months' notice on either side. The successful applicant will be expected to take up office in April, 1964, or as soon thereafter as can be arranged. arranged.

Applications should give particu-lars of qualifications, experience, age, etc., and the names of three persons to whom reference may be made. They should be submitted not later than December 7, 1963, to the Scottish Secretary, B.M.A. Scottish House, 7 Drumsheugh Gardens, Edinburgh 3, from whom further particulars may be had on request.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent \star testimonials with short statement of experience and appointments held. Applications should be sent at once if no closing date is given. House Officers should submit a separate application for each post for which they captle.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.). * SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

SERVICES

A PRACTICE AS WIDE AS THE WORLD

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and certain allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.I.) (HN53S.) I Tavistock Square, London, WCI.

Dosage: 250mg. 6 hourly

Penbritin is a product of British research at

BEECHAM RESEARCH LABORATORIES LIMITED

Calcium-sandoz Effervescent Tablets

in osteoporosis

of postmenopausal

or senile origin

Calcium-Sandoz Effervescent Tablets (orange flavoured): calcium gluconogalactogluconate (equivalent to 4 g. calcium gluconate) and 20 mg. ascorbic acid

2 to 5 effervescent tablets daily

"Studies are reported here which suggest that calcium deficiency is an important factor

in many cases of postmenopausal and senile osteoporosis. Many patients with these forms of osteoporosis absorb and retain calcium abnormally avidly when on a high calcium intake in the form of supplements (calcium gluconate Sandoz), and moreover may continue to retain it avidly for at least three and a half years. Symptoms of the disease are relieved and no further fractures take place."

Lancet (1961) 1, 1015
