

# The go-ahead OPPORTUNITY that is ROYAL NAVY

## you find it as a MEDICAL OFFICER

As a Medical Officer, you have complete clinical freedom and a widely varied medical experience. Your practice is among 100,000 Naval men and women. Ashore or afloat, it can take you anywhere in the world from Malta to Singapore; and, when you have a shore appointment abroad, your family can be with you. Go-ahead, too, is your opportunity to specialize: not only in traditional categories, but in the modern sciences of aviation and nuclear medicine.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your initial pay is considerably higher than that of a civilian hospital registrar.

You can enter by one of three ways: as a Registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission.

For fullest details of your Royal Navy life as a Medical Officer, write, mentioning your own qualifications and age to:

The Medical Director-General of the Navy,

LOWERS BLOOD PRESSURE

Eutonyl (pargyline hydrochloride, Abbott) is a potent new antihypertensive agent. A large majority of patients with moderate to severe essential hypertension (even those resistant to other drugs) achieve significantly reduced systolic and diastolic pressure in the standing position, and often in the sitting and lying positions as well. The addition of Enduron (methyclothiazide, Abbott) permits a lower dosage, with fewer side effects. Eutonyl has a beneficial side effect in countering the depression which is often associated with hypertension, and in this respect alone offers a useful advance over other antihypertensive drugs, some of which themselves produce depression. Comprehensive literature is available on all aspects of this important new agent: dosage, side effects, precautions and the wide measure of agreement on its clinical efficacy even in the most difficult cases.

Eutonyl and Enduron are Registered Trade Marks.

Eutonyl tablets (25 mg pargyline hydrochloride) and Eutonyl-Ten tablets (10 mg pargyline hydrochloride) are supplied in bottles of 100.

# Synadrin<sup>®</sup> for the patient with angina pectoris

Regd. Trade Mark

Synadrin is a specific coronary vasodilator, and is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments<sup>11-17</sup> and it has been tested in over 1,000 patients<sup>1-10</sup>. Results of trials so far reported have been promising and Synadrin has been described as "an effective drug for treating angina pectoris."<sup>1</sup>

## Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

## Dosage

Treatment may be initiated with 2 tablets, three times daily, reducing after three days to a maintenance dosage of 1 tablet two or three times daily.

## Presentation

Synadrin is presented as tablets, each containing 15 mg. of prenylamine lactate in bottles of 30 and 150 at basic NHS prices of 8/8d. and 34/8d. (subject to P.T.). Synadrin is known in some other countries as Segontin.

# BETNOVATE

produced and proved in Britain

Betnovate is betamethasone valerate, an entirely new steroid ester produced by Glaxo. It was one of over 50 compounds evaluated by a new method, the vasoconstrictor test<sup>1,2</sup>. This demonstrated that, of all the products examined, Betnovate had the greatest activity when applied to human skin.

The promising laboratory findings were confirmed clinically by extensive controlled trials carried out at a number of dermatological centres in Britain. In these studies Betnovate was used for the treatment of large series of patients with inflammatory derma-

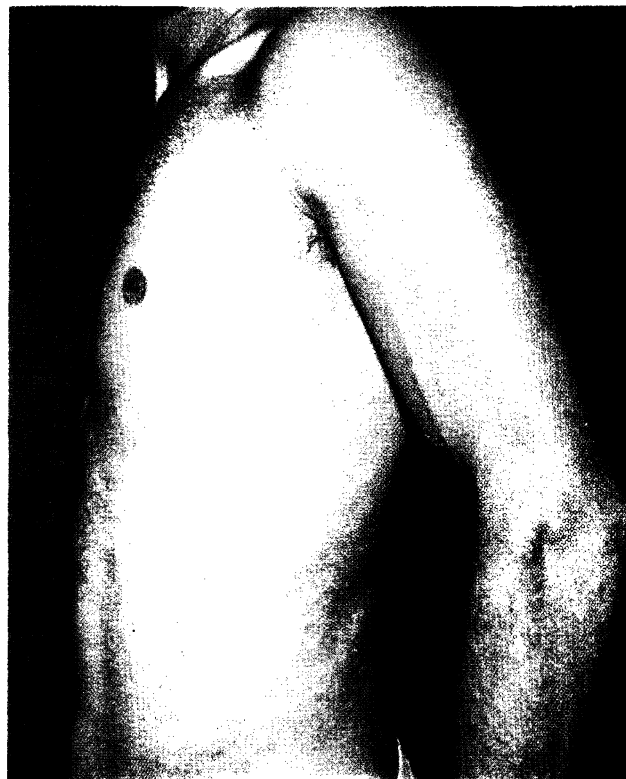

toses of all types, acute and chronic. The effect of the new compound, with and without occlusive dressing, was also assessed against fluocinolone acetonide, triamcinolone acetonide, flurandrenolone, betamethasone phosphate and hydrocortisone by the double-blind technique. Clinically, Betnovate was outstanding in the speed and intensity of its action, notably in psoriasis. Analysis of the results\* shows that in a statistically significant number of cases superior responses were often achieved with Betnovate.

Strikingly swift **anti-inflammatory** action against Psoriasis and other severe skin conditions

Psoriasis of four years' duration. Numerous previous treatments included tar, ultraviolet light and non-occluded topical steroids. Treatment was begun with Betnovate Ointment and Cream.

After three days' treatment. Occluded Betnovate Ointment on trunk; open Betnovate Cream on arm. Whole condition cleared completely in three weeks.

*British Medical Journal*, November 30, 1963

## one strength simplicity

Prescribing of Betnovate is quite straightforward. Simply specify the name and the presentation required: ointment, cream or lotion. Each presentation

is in one size only. If concurrent antibacterial therapy is indicated, add the suffix —N to the name and Betnovate containing neomycin will be supplied.

## a new economy in topical steroid prescribing

Betnovate is substantially lower in price than most of the newer topical steroid preparations. Moreover, because of its greater activity, Betnovate can produce

swifter and more decisive responses, achieving a significant saving in cost and treatment time. Betnovate gives a *new* economy in price and performance.

## PRESENTATION TO USE

### OINTMENT (Greasy)

Dry, scaly lesions

### CREAM (Non-greasy)

Weeping or acute oedematous lesions of limited extent, especially on the face

### LOTION (Water-miscible)

Widespread weeping or acute oedematous conditions and lesions on hairy areas, e.g. Psoriasis of the scalp

## APPLICATION

The patient should apply a small quantity of the chosen presentation on to the affected area once or twice daily. When the condition is under control the interval between applications may be extended. For lichenified or scaly lesions of the tough skin, it is advantageous to apply Betnovate under a simple occlusive dressing.

# 'ILOSONE' the decisive move

when infection poses problems

'Ilosone', brand Erythromycin Estolate B.P., gives quicker, surer and more effective treatment of common bacterial infections than any other oral form of erythromycin.

'Ilosone' is more stable than either erythromycin base or erythromycin stearate, particularly in the presence of gastric acid. This results in consistently higher and more prolonged serum concentrations, and accounts for the quick response of most respiratory tract and other common bacterial infections, to the decisive control of 'Ilosone'.

Side-effects are rare; very occasionally a reversible jaundice occurs, but no residual toxic effects have been authenticated.

#### Average Adult Dose

# HAYGEN & BRONCHAGEN

HAYGEN and BRONCHAGEN are the logical outcome of research by the Bencard Allergy Unit in the field of specific desensitising vaccines. This has led to the development of two new standard vaccines, one for the effective treatment of hay fever and the other for allergic asthma and perennial rhinitis. Clinical experience has shown that the allergens incorporated in Haygen and Bronchagen are responsible for symptoms in more than 80% of 'classical' hay fever and at least 70% of allergic asthma patients. With this simplified treatment based on the case history alone, patients may expect substantial relief or even complete freedom from symptoms.

## Why does a micro-dose make such a difference in anaemia of pregnancy?

In pregnancy, routine administration of oral iron has long been established. But hitherto, folic acid deficiency has only been treated when specifically diagnosed, and then with high doses of folic acid.

Recent investigations indicate that prophylactic **micro-doses** of folic acid should be prescribed for all pregnant patients for their value in combating anaemia of pregnancy. Such micro-doses of folic acid both ensure increased response to oral iron and provide comprehensive prophylactic treatment of anaemia of pregnancy due to iron and folic acid deficiencies **without masking a true pernicious anaemia.**

**Folaemin** has been introduced to meet this need. **Folaemin** contains iron aminoates and microgramme amounts of folic acid. No other preparation currently available contains the micro-dose of folic acid now provided by **Folaemin** — the micro-dose that makes the big difference in anaemia of pregnancy.

**Composition** each tablet contains iron aminoates 350 milligrammes (equivalent to 35 mg. elemental iron) and folic acid 50 microgrammes.\*

**Dosage:** One tablet three times daily, preferably between meals. **basic NHS price:** Bottles of 100 tablets 7/-

\*One microgramme equals one thousandth of a milligramme, or 10<sup>-6</sup> gramme.

**SERVICES****A PRACTICE AS WIDE AS THE WORLD**

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

**GRADUATES AND MEDICAL STUDENTS**

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and certain allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.I.), (HN 53T), 1 Tavistock Square, London, WC1.

CYANAMID OF GREAT BRITAIN LTD

SHERRY comes from the area surrounding Jerez, Spain. All Sherry has a characteristic bouquet and taste that is found in no other wine.

There are, however, varying degrees of sweetness in the grapes used in making Sherries. Hence, you can buy Sherries that vary in taste and body from extremely pale and dry types to the sweet full-bodied wines.

Domecq Sherries are grown and aged in Jerez, Spain, and are among the finest in the world, being acknowledged as such through the centuries. We would suggest that you try some of the others listed below. They are arranged in order from the very dry to the extremely sweet. One of them will suit every drinking occasion.

**Special Standard Sherries.**

## WELSH DRAGON TRUST

### Investment through Endowment Assurance

A loan in conjunction with an Endowment Policy, with or without profits, provides a first-class opportunity to purchase a substantial block of Units in Welsh Dragon Trust. A deposit of only 15% is required. £1,000 is the minimum loan available, and £1,500 p.a. the minimum qualifying income. The interest rate on the loan is 6%. The dividend on the total Units is payable half yearly.

For further details of the Investment through Endowment plan write to

## Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, the entire Vitamin B Complex should always be administered concurrently.

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

● Aluzyme is not advertised to the public and may be prescribed under J.S.C. Classification Category "S."
