FIGHT CANCER

When you are consulted about bequests for medical work that deserves support, please remember the work of the Imperial Cancer Research Fund. This pioneer body in Cancer Research was founded by the Royal Colleges of Physicians and Surgeons specially to undertake this vital work in its own laboratories. It has no official grants and is entirely supported by voluntary contributions. Please help us when you can.

Suggested wording for Bequests

'I hereby bequeath the sum of pounds free of duty to the Imperial Cancer Research Fund, Lincoln's Inn Field's, WC2 for the purpose of scientific research, and I direct that the receipt of the Honorary Treasurer shall be a good discharge for such legacy'.

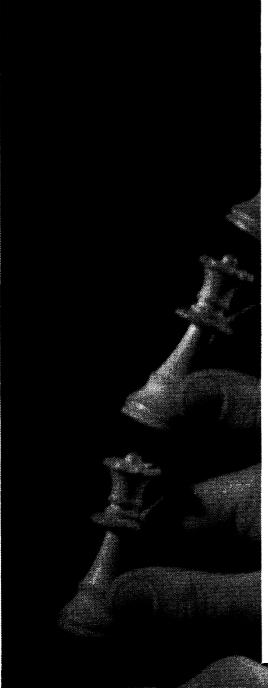

Patron: Her Majesty The Queen

'ILOSONE' the decisive move

when infection poses problems

'llosone', brand Erythromycin Estolate B.P., gives quicker, surer and more effective treatment of common bacterial infections than any other oral form of erythromycin.

'Ilosone' is more stable than either erythromycin base or erythromycin stearate, particularly in the presence of gastric acid. This results in consistently higher and more prolonged serum concentrations, and accounts for the quick response of most respiratory tract and other common bacterial infections, to the decisive control of 'Ilosone'.

Side-effects are rare; very occasionally a reversible jaundice occurs, but no residual toxic effects have been authenticated.

Average Adult Dose

250 mg. every six hours (1 G. daily), increased to 2 G. daily in severe infections.

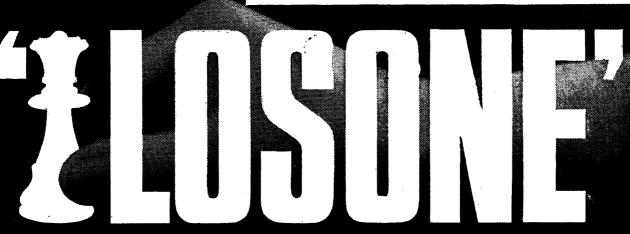

Presentation

'Pulvules' 125 mg. and 250 mg. Suspension 125 mg. per 5 ml. Bottles to make 60 ml.

Manufacturer's Information

New Product

Oral Contraception

Brand Name Active Ingredients

OVULEN

Ethynodiol diacetate 1 mg. and mestranol o.1 mg. Ethynodiol diacetate is widely known under the research designation SC-11800.

Indication

Ovulen has been designed to give simple, reliable, trouble-free, oral contraception.

Dosage

One tablet daily for 20 days starting on the 5th day of the menstrual cycle (counting the first day of bleeding as Day 1).

Contraindications

There are no contraindications to the use of Ovulen in normal healthy women. Ovulen should not be given to women with carcinoma of the breast.

Side-effects

The great majority of women experience no side effects of any kind with Ovulen. As with other oral contraceptives, nausea may be encountered by a minority of women in the first cycle. Nausea and other reactions which may occur are usually transient and mild and confined to the first few days. Ovulen produces no effects other than those which may be produced by administration of the naturally occurring progesterone in combination with oestrogen.

Availability

Ovulen is supplied as uncoated white pentagonal tablets in wallets containing 20 tablets. Each wallet contains full directions for use.

References

A complete bibliography, together with full details of clinical experience and pharmacology, are contained in the Ovulen New Product Brochure, available on request.

Dosage

Wide Spectrum Mood Enhancer

Brand Name Active Ingredient **Indications**

'AVENTYL'

Nortriptyline.

Depression (endogenous and reactive).

Psychoneuroses.

Psychosomatic disorders (particularly gastro-intestinal).

Behaviour disorders in children.

Senile psychoses.

As a supplement to other treatment in mental retardation and

schizophrenia.

Usual recommended dosage (in divided doses).

Adults, 20-100 mg. daily.

Children, 10-75 mg. daily (1-2 mg./kg. bodyweight).

Although the dose should be adjusted to the needs of the individual patient, most adults respond well to 25 mg. three times daily. In mildly anxious or depressed patients, and in psychosomatic conditions, 10 mg. three or four times daily has been found satisfactory.

Contraindications

'Aventyl' exhibits anticholinergic activity and should be used cautiously in patients with glaucoma or a tendency towards urinary retention, and with sympathomimetic drugs. Aventyl' should not be given with or immediately following any of the monoamine oxidase inhibitor group, because of the well-known danger of the latter when used in combination with other drugs. The MAO inhibitor should have been discontinued for 10-21 days before commencing treatment with 'Aventyl.'

Side-effects

Availability

References

No single side-effect can be considered as occurring frequently and most are mild and reversible, e.g., dry mouth, drowsiness, constipation, dizziness, etc.

PLEASE REMEMBER CANCER!

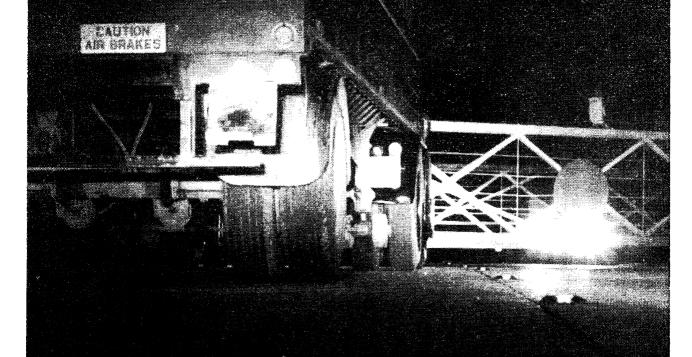

You may be asked from time to time to suggest a deserving cause as the subject of a bequest. Please remember that every year the British Empire Cancer Campaign for Research has to find more and more money for cancer research work not only in this country but in many parts of the Commonwealth. All this money must come from voluntary donations and bequests. The appropriate words to use in a will are: "I bequeath to the British Empire Cancer Campaign for Research the sum of \mathfrak{L}" or "I devise and bequeath the residue of my estate to the British Empire Cancer Campaign for Research".

For further information please write to Sir Joseph Lockwood, Hon. Treasurer, British Empire Cancer Campaign for Research, Dept. BM(L1). 11 Grosvenor Crescent, London SW1.

DYTIDE FOR OEDEMA

does not just give you enhanced diuresis—
it puts an effective brake on potassium loss too

- ample diuretic action
- no potassium problem
- well tolerated—few side effects
- rapid onset of effect
- short duration—for easier control

DYTIDE produces diuresis without depletion the potassium is conserved—the problem of drug-induced electrolyte imbalance is minimized.

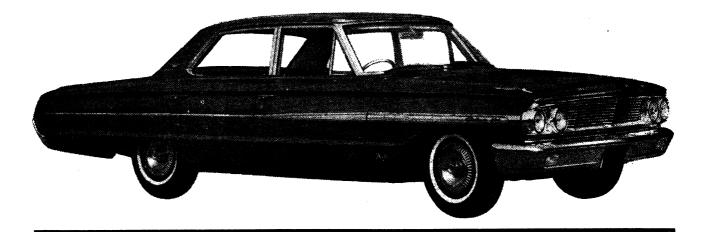

Literature containing prescribing information is available on request.

Each capsule of DYTIDE contains 50 mg. 'Dytac' (brand of triamterene) and 25 mg. benzthiazide. In packs of 30 and 250.

CICATRIN

accelerates healing rates by 25-50%*

Prolonged and expensive treatment of chronic ulcers may be avoided by the use of Cicatrin, the leading amino-acid/antiblotic preparation for topical application.

Further evidence of the efficacy of Cicatrin is provided by a recent controlled clinical trial to evaluate the influence of various topical applications on the healing rates of stasis ulcers. This trial shows that Cicatrin with its combination of selected amino-acids and antibiotics accelerates the healing rates by 25-50%.

It is also significant that in one group where the main difference between the two preparations was that one contained amino-acids and antibiotics (Cicatrin) and the other antibiotics only, the healing time in the Cicatrin treated group was shortened considerably both in bed rest and ambulatory cases.

PRESENTATION: POWDER/CREAM 15 gramme and 5 gramme.

FORMULA: Each gramme contains:Neomycin Sulphate 5 mg. Zinc Bacitracin 250 units.
dl-Threonine 1 mg. I-Cysteine 2 mg. Glycine 10 mg.

Fentazin

A Major Tranquilliser

which resolves disabling anxiety and tension in 2 **new** forms

A comprehensive Physicians' Handbook is available on request. 'Fentazin' and 'Duolet' are registered trade marks

ALLEN & HANBURYS LTD LONDON E.2

Fentazin DUOLETS

timed release for extended control for 8 to 12 hours. Dosage: One DUOLET (6 mg perphenazine) twice daily. Supplied in bottles of 50 and 250 Duolets.

Fentazin SYRUP

flavoured SYRUP for easy oral intake if swallowing is an added problem.

Dosage: One teaspoonful (5 ml) four times daily. Supplied in bottles of 5 fl oz and 2 litres syrup, (3 mg perphenazine per 5 ml).

Fentazin DUOLETS and Fentazin SYRUP have been designed to facilitate controlled, sustained, low-dosage therapy especially in the domiciliary patient.

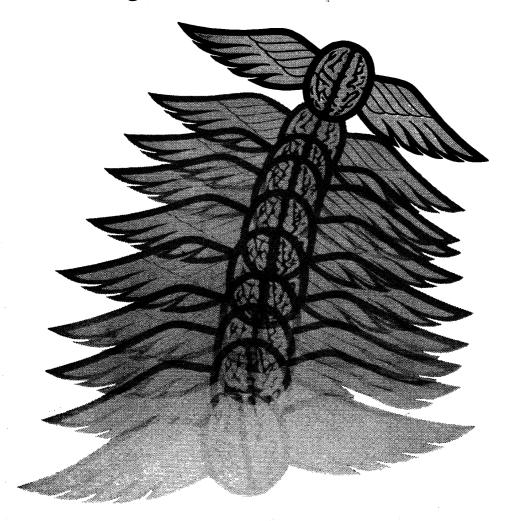

Management is rapidly obtained in the treatment of anxiety states, psychosomatic disorders, nausea and vomiting.

NEW WIDE SPECTRUM 'Aventy!'* MOOD ENHANCER

brand Nortriptyline

Lends wings to troubled minds

'Aventyl', synthesized in the Lilly Research Laboratories, at one stroke broadens the doctor's power to relieve troubled and disturbed patients. 'Aventyl' is not a combination of an anti-depressant with a tranquillizer. Instead, 'Aventyl' is a single entity that has been shown to be clinically effective over a constellation of symptoms associated with depression as well as

with anxiety and psychosomatic disturbances. Indeed, 'Aventyl' has an unusually wide spectrum of action in psychiatric disorders.

'Aventyl' is not a monoamine oxidase inhibitor.

Presentation: 'Pulvules' of 10 mg. and 25 mg. Liquid containing 10 mg. per 5 ml. teaspoonful, in bottles of 120 and 480 ml.

A. H. Robins Co. Ltd., Horsham, Sussex:

ALLEGRON may be described as a truly multi-phasic psychotrope, embodying anti-depressant, anti-anxiety and anti-hostility* activity in a single substance, to a degree of effectiveness comparing favourably with other drugs. Of some 2,000 patients reported on by 150 clinical investigators, almost four out of five showed satisfactory response, and of these, almost four out of five by the end of the second week. ALLEGRON is suitable for patients in and out of hospital. It has also shown particular power to relieve anxiety and depressive symptoms associated with many medical disorders and in childhood and old age. It is a valuable adjunct in psychotherapy.

*In common with drugs to which it is related, ALLEGRON does not counteract hostility in the same way as it controls such symptoms as depression and anxiety. While it may, in some cases, increase hostility, it usually mobilizes or re-directs the hostility in a manner that is therapeutically desirable.

Side effects with ALLEGRON are relatively infrequent and usually mild. As with all potent psychotropic drugs, however, certain precautions should be observed. Full information has been or is being made available to all members of the medical profession. Please inquire if you have not yet received it.

Dosage:

Usual recommended dosages (in divided doses) are 20-100 mg. daily for adults,

10-75 mg. daily for children (1-2 mg. per kg. of body weight)

eating is a serious business...

Heinz have all day to take care of a baby's meals

No mother could take more trouble over a baby's meals than Heinz. More important, no mother can spare so much time! But Heinz have all day to plan, prepare and cook for the nursery. And the well-balanced diet they serve up covers so many of the essentials a baby needs: the nourishment, the proteins, the good fresh tastes.

Heinz, above all, give a baby an exceptionally varied diet. (There are now over 57 different Baby Foods—Strained and Junior.) Sun-

ripened fruits and vegetables. Juicy tomatoes. Best cuts of meat. Plump farm chickens. Fish, eggs, cheese, butter, milk . . . What mother could cherish her child with wonderful summery foods like this all year round? Only a Heinz mother! Which is why a Heinz mother and baby get the best of all worlds.

If you would like further information about Heinz Strained and Junior Foods, please write to: Food Science Advisory Service, H. J. Heinz Co. Ltd., Harlesden, London, N.W.10.

FOR THE PREVENTION AND TREATMENT OF CHILBLAINS

Two factors which predispose to chilblains are defective peripheral circulation and diminished coagulability of the block. ADAPRIN counteracts both these defects with a combination of nicotinamide and acetomenaphthone. Nicotinamide improves peripheral circulation without the unpleasant side effects which rapid vasodilatation with nicotinic acid often produces. Acetomenaphthone, Vitamin K analogue, corrects hypoprothrombinaemia and restores the coagulation to normal. ADAPRIN is non-toxic, and may safely be given to both children and adults over long periods for prevention of chilblains. Literature and professional samples on request from Ward, Blenkinsop & Co. Ltd., Fulton House, Empire Way, Wembley, Middx. Telephone: WEMbley 8686

The convalescent Mackeson

Dark beers have long been regarded as a valuable aid in building up strength after illness.

Mackeson (or Mackeson Stout, as it was long called) has a high reputation in this tradition. The makers of Mackeson recognise that only the individual practitioner can decide when such a beer can most effectively be used. For the convenience of doctors, therefore, they set out below an analysis of its nutritional properties.

Mackeson differs from other dark beers in one important respect: it is more acceptable to invalids and conva-

lescents because of its taste. Instead of having the bitter taste usually associated with this type of beer, it is smooth, and mild in flavour.

It provides an invaluable source of energy through

its calorific value (276 calories per pint, essentially that of three-quarters of a pint of milk). Because its most important ingredient in this respect is Lactose Sugar, Mackeson is easily digested, quickly assimilated—by even a weakened digestive system.

Nitrogenous matter is also present, mainly as protein break-down products, e.g. peptides and amino acids. It also contains valuable water-soluble members of the B groups of vitamins.

In short, Mackeson is a drink rich in energising properties, and at the same time bland, non-bitter and pleasant in flavour.

When a dark beer is contemplated as a help to speedy convalescence, it may be borne in mind that Mackeson will be more acceptable to patients

who find a slightly bitter drink not to their taste.

Why does a micro-dose make such a difference in anaemia of pregnancy?

In pregnancy, routine administration of oral iron has long been established. But hitherto, folic acid deficiency has only been treated when specifically diagnosed, and then with high doses of folic acid.

Recentinvestigations indicate that prophylactic micro-doses of folic acid should be prescribed for all pregnant patients for their value in combating anaemia of pregnancy. Such micro-doses of folic acid both ensure increased response to oral iron and provide comprehensive prophylactic treatment of anaemia of pregnancy due to iron and folic acid deficiencies without masking a true pernicious anaemia.

Folaemin has been introduced to meet this need. Folaemin contains iron aminoates and microgramme amounts of folic acid. No other preparation currently available contains the micro-dose of folic acid now provided by Folaemin—the micro-dose that makes the big difference in anaemia of pregnancy.

Composition each tablet contains iron aminoates 350 milligrammes (equivalent to 35 mg. elemental iron) and folic acid 50 microgrammes.*

Dosage: One tablet three times daily, preferably between meals. **basic NHS price:** Bottles of 100 tablets 7/-

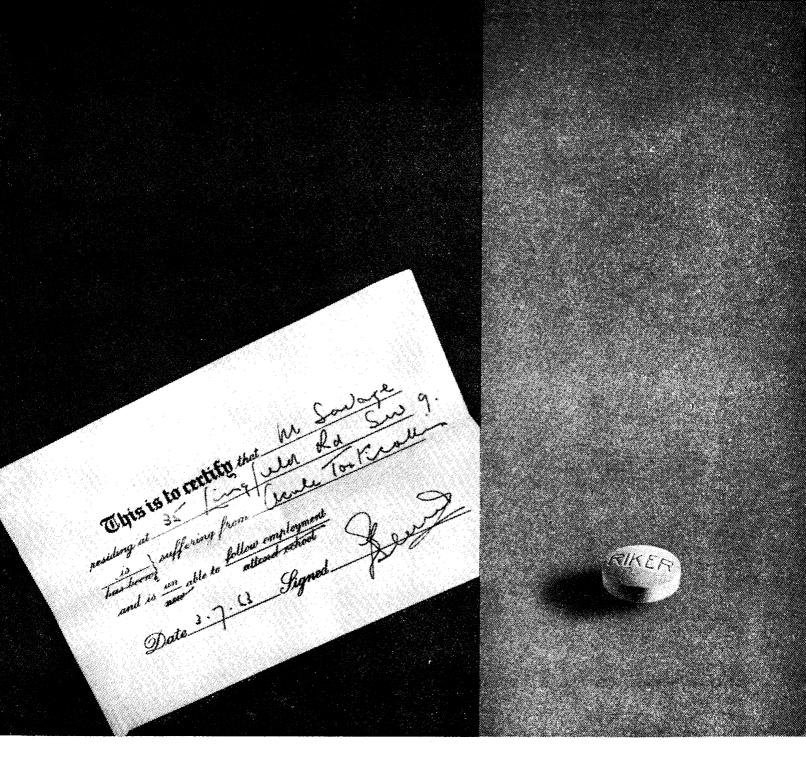

*One microgramme equals one thousandth of a milligramme, or 10 gramme.

BRITISH HEART **FOUNDATION**

scientific activities

The foundation recently made awards totalling £181,000 to 34 research workers.

- The names of those selected to undertake programmes of scientific work were announced in the British Medical Journal (November 16th).
- These research projects cover a large part of the heart field including Physiology, pathology and biochemistry in connection with arterial sclerosis, hypertension, pulmonary and congenital heart disease, "strokes" and cardiomyopathy. .

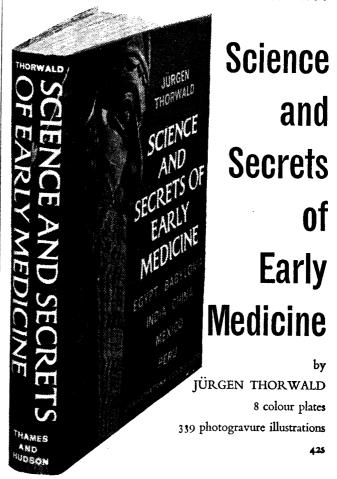

Research work is now being carried out in London, Birmingham, Bristol, Cardiff, Dundee, Edinburgh, Glasgow, Leeds, Portsmouth, Stoke-on-Trent, and Lagos (Nigeria).

- Further awards will be made in the Spring of 1964.
- The above research activities depend entirely upon the success of the Heart Appeal for which an initial target of three and a half million pounds has been set. The eventual aim is to provide for expenditure of half a million pounds per annum—the minimum required to finance an adequate research programme.

Life Membership of the Foundation is open for a single payment of £100 (or more), (or £10 per annum on a seven-year Covenant). Ordinary Members are welcome at 5 gns. per year (£3.5.0d on a seven-year Covenant).

Information and forms of application for research grants may be obtained from the Secretary of the British Heart Foundation, (B.M) Tavistock House, Tavistock Square, London WC99

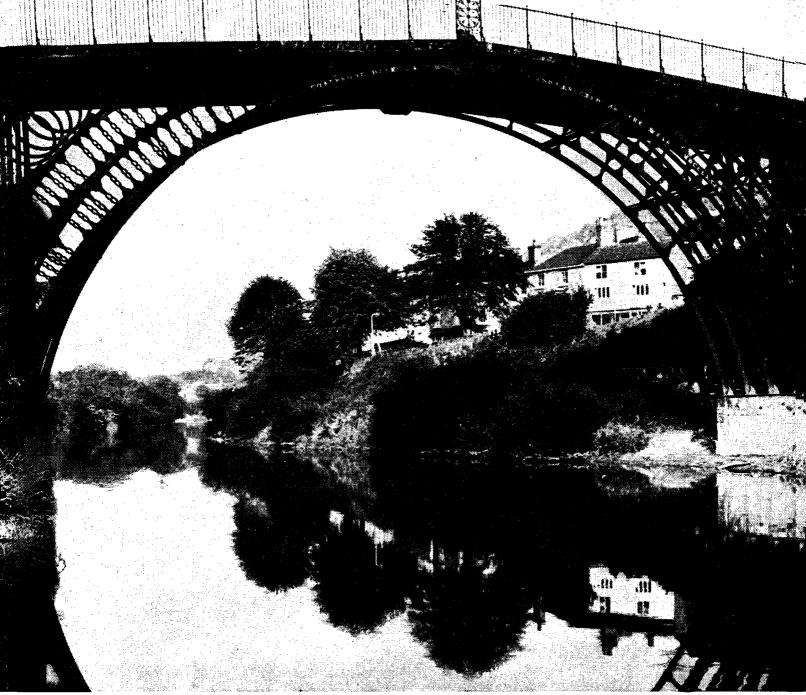

Brain surgery... skin grafts... eye operations... the ancient peoples knew them all

Vividly and absorbingly, Jürgen Thorwald discovers — in the mummies of Egypt, the pharmacology of India and China, the surgical ceramics and instruments of Mexico and Peru-the early practice of immunization, drugs that foreshadowed our antibiotics, fantastic feats of surgery ranging from plastic reconstruction to trepanning and the removal of cataracts. His colourful survey examines the medical history of six ancient civilizations, tracing the diseases and afflictions of mankind and their methods of treatment—and in each he reveals hitherto unsuspected achievements that rival those of modern science.

SIDROS—a new name in Iron Therapy

In the treatment of iron-deficiency anaemia many iron salts are capable of producing the desired increase in haemoglobin level. Some also have a tendency to produce sideeffects, and there can be a high element of non-absorption.

SIDROS is designed to overcome the known disadvantages and to provide a reliable treatment for iron-deficiency anaemia. It contains ferrous gluconate which produces a highly satisfactory clinical response and is

very well tolerated. Sidros also contains ascorbic acid, which is known to aid the absorption of iron. Its action in Sidros is to maintain iron in the reduced state for absorption. Sidros is presented as tablets, each containing ascorbic acid (stabilized) 30 mg and ferrous gluconate 300 mg at a basic N.H.S. price of 2/8 for 100 tablets as dispensed from 1000 tablet bottle. Samples of Sidros are available on request.

The importance of simplicity in the

treatment of diabetes

The diabetic is condemned to a life-time of medication to control his condition. In few other conditions is simplicity and ease of administration so important. The introduction of the sulphonylureas eight years ago relieved one group of diabetics from the burden of daily injections. The extensive use of Rastinon in oral antidiabetic therapy for over two million patients has shown that it is not only one of the safest drugs available, but also one of the most effective in controlling

diabetes when the condition is first discovered at middle age. Rastinon is the standard oral treatment of diabetes, and it is remarkable for its

OLBUTAMIDE B.P. and effectiveness.

Abbott present a major new antihypertensive

Eutonyl (pargyline hydrochloride, Abbott) is a potent new antihypertensive agent. A large majority of patients with moderate to severe essential hypertension (even those resistant to other drugs) achieve significantly reduced systolic and diastolic pressure in the standing position, and often in the sitting and lying positions as well. The addition of Enduron (methyclothiazide, Abbott) permits a lower dosage, with fewer side effects. Eutonyl has a beneficial side effect in countering the depression which is often associated with hypertension, and in this respect alone offers a useful advance over other antihypertensive drugs, some of which themselves produce depression. Comprehensive literature is available on all aspects of this important new agent: dosage, side effects, precautions and the wide measure of agreement on its clinical efficacy even in the most difficult cases.

Eutonyl tablets (25 mg pargyline hydrochloride) and Eutonyl-Ten tablets (10 mg pargyline hydrochloride) are supplied in bottles of 100.

In pharyngitis and tonsillitis

STREPSILS RESTORE COMFORT IN SWALLOWING

The inability to swallow in comfort is one of the most common and distressing symptoms in these conditions. Strepsils provide safe, effective local relief in infections of the mouth and throat. Strepsils contain neither anti-biotic nor local anaesthetic; the sensitising potential is thus very low and bacterial resistance does not develop. The two powerful antiseptics in Strepsils act quickly against a wide range of organisms. The sugar base dissolves slowly, enabling the antiseptics to exert a prolonged effect.

Formula: Each lozenge contains 1.2 mg of Dybenal, (2,4-dichlorobenzyl alcohol) and 0.6 mg of amyl-meta-cresol, in a special base.

Basic N.H.S. Price; 1 5 per tin of 24 lozenges.

BOOTS PURE DRUG COMPANY LIMITED . STATION STREET . NOTTINGHAM

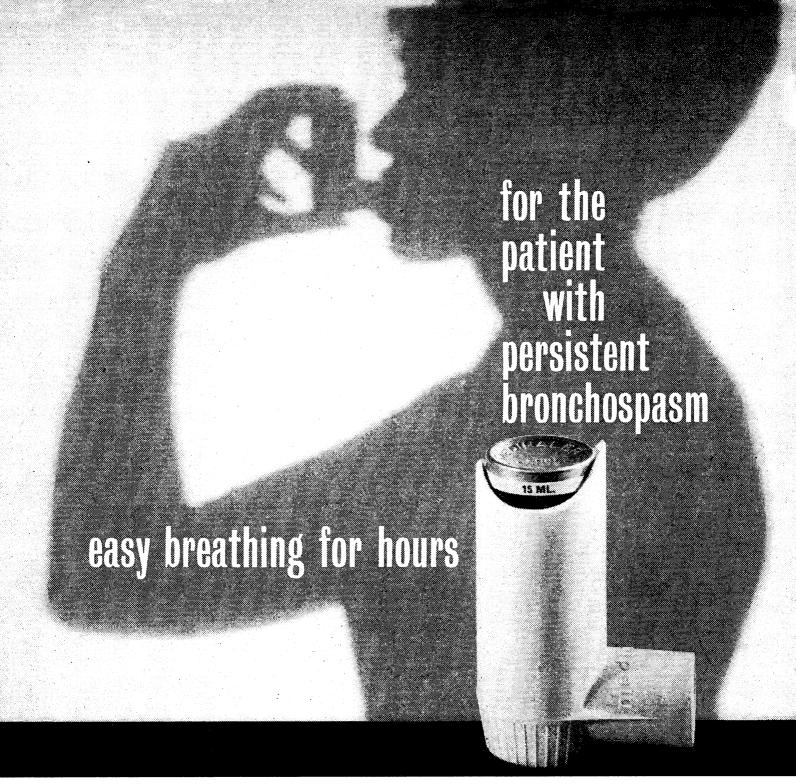

for the patient who WHEEZES

Alupent's potent bronchodilator action is valuable, both to treat the acute attack and as a prophylactic. Published evidence 1-2-3, has shown that Alupent tablets will provide effective prophylaxis of wheezing in chronic bronchitis and asthma, and these reports suggest an optimum dose of 20 mg. four times a day in these conditions. This dosage can be given more conveniently and economically by using the new ALUPENT 20 mg. tablet which is now available.

For routine use as a prophylactic against wheezing in chronic bronchitis, Alupent is of proven effectiveness

 Therapiewoche, 1961, 11, 545.

Medihaler-bron

Medihaler-bron adds a new dimension to the treatment of bronchospasm-prolongation of relief. Medihaler-bron contains isoprenaline sulphate and atropine methonitrate. Each measured dose of micronised particles gives immediate relief—onset within seconds—and relief is prolonged for hours.

Isoprenaline sulphate produces the full primary bronchodilation which is the patient's first need. Atropine methonitrate prolongs and sustains the all-important initial relief given by isoprenaline.

The widely recognised advantages of *Medihaler* treatment, now with the added benefit of prolonged effect, make *Medihaler-bron* a product with particular clinical advantages for the patient with persistant bronchospasm.

Medihaler-bron is supplied with a new-style plastic oral adapter, which will also shortly be available with Medihaler-epi, Medihaler-iso, and Medihaler-iso Forte.

Medihaler-bron, available in vials of 300 doses, contains a suspension of isoprenaline sulphate smg./ml. and atropine methonitrate, 2mg./ml., each dose contained in 0.05 ml. of suspension.

Basic NHS Prices - Complete 17/8. Refill 15/4 Medihaler-epi, Medihaler-iso, Medihaler-bron: registered trade marks.

'MILLIOWN' IS A REGISTERED TRADE MARK *BRITISH PAT. NO. 751,440

Carnation Milk IS BEST FOR BOTTLE-FED BABIES

• Because Carnation Milk is nutritionally adequate for all baby's needs with the advantages of homogenised butterfat and flocculent curd.

 $\it Because$ Carnation babies are contented. They sleep well at night and therefore so do the parents.

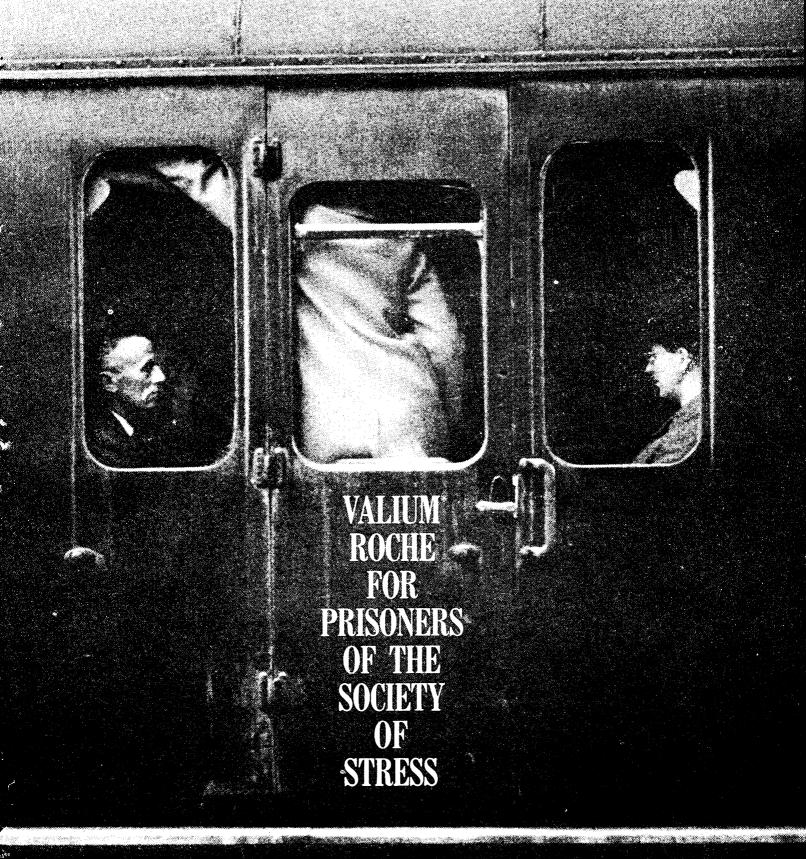

Because Carnation Milk is liquid, feed preparation is both simple and quick. Carnation is widely distributed throughout Great Britain.

Because Carnation Milk combines flexibility with safety. Feeds may be prepared to any strength by the simple addition of water. The milk has been sterilised in the sealed can.

Carnation Milk is processed from Scottish milk in our Condensery at Dumfries. Literature including reprints of clinical studies will be sent on request.

The use of Dulcolax, tablets or suppositories, or these in combination, may help to restore normal bowel function in any patient, young or old. Dulcolax is a contact laxative which, given by mouth on a full stomach, can be relied upon to bring about a motion within 10 to 12 hours. A suppository produces a motion within an hour, usually within 20 minutes. Once the bowel is retrained Dulcolax may be discontinued without difficulty.

The 'mano cornuta' and other gestures of a similar nature have been considered potent specifics against the Evil Eye since time out of mind. Just ask anybody south of, say, Naples, and they'll tell you that it's a wise precaution.† The Evil Eye may not be a major problem among your patients, but chronic bronchitis surely is. Of course, it can be treated with ordinary tetracycline, but always with the attendant risk of fungal overgrowth with such commonly occurring symptoms as sore mouth, thrush,

diarrhoea and pruritus ani due to Candida albicans. For this reason 'it is a wise precaution to administer an antifungal compound with the broad-spectrum antibiotic.'* Costing no more than the ordinary tetracycline and much less than oxytetracycline MYSTECLIN provides this 'wise precaution'.

† The Evil Eye - studies in the folklore of vision (1958) * Practitioner 189, 364, September 1962

Lyndiol is a new oral contraceptive developed and produced by Organon. Its reliability has been shown in closely supervised studies in several parts of the world. Lyndiol has been approved by the Council for the Investigation of Fertility Control. Lyndiol produces an exceptionally well controlled cycle and is remarkably free

Research in the Service of Medicine

G. D. Searle & Co. Ltd. are privileged to release to the medical profession a new, potent, oral progestin, ethynodiol diacetate. Widely known to clinical investigators throughout the world over the past several years by the research designation, sc-11800, this new compound has undergone thorough and extensive clinical testing over a wide range of dosage levels. Many leading authorities have confirmed the

merit of sc-11800, combined with the well established oestrogen, mestranol, in the fields of conception control and gynaecology. For the convenience of physician and patient, sc-11800 is now made available under different names to distinguish between its two areas of clinical application; ovulen for conception control, and METRULEN for gynaecological disorders requiring progestational therapy.

SERVICES

A PRACTICE AS WIDE AS THE WORLD

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and certain allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.I.), (HN 53V), I Tavistock Square, London, WCI.

THE UNIVERSITY OF EXETER

THE UNIVERSITY OF EXETER Postgraduate Medical Institute

Postgraduate Medical Institute
A full-time postgraduate course, lasting
ten weeks, will begin on January 15, 1964.
The course will include instruction in
general medicine, pacdiatrics, preventive
medicine, pathology, psychiatry, general
surgery and orthopsedics. The programme
will be planned so that students wishing to
specialize in a particular clinical subject
will be given facilities to do so, while
other students will receive teaching in each
of the main clinical departments in turn.
The fee for the course is £40.
Further particulars and application forms
are obtainable from the Director, the Postgraduate Medical Institute, c/o the Academic Registrar, the University, Exeter.

CYANAMID OF GREAT BRITAIN LTD

Depriving the obese patient of the satisfactions of eating by prescribing appetite depressants alone often leads to failure of the weight-reducing programme. Durophet-M controls the appetite and at the same time relieves the stresses that find their outlet in overeating. Durophet-M contains the most effective appetite depressant available today, Durophet (laevo- and dextro-amphetamine in a ratio of 1:3), and methaqualone, a calmative which helps alleviate the patient's underlying tensions and frustrations. Capsules are available in two strengths, stated in terms of the Durophet content, 12½ mg. or 20 mg. and each strength contains 40 mg. methaqualone.
