The 'mano cornuta' and other gestures of a similar nature have been considered potent specifics against the Evil Eye since time out of mind. Just ask anybody south of, say, Naples, and they'll tell you that it's a wise precaution.<sup>†</sup> The Evil Eye may not be a major problem among your patients, but chronic bronchitis surely is. Of course, it can be treated with ordinary tetracycline, but always with the attendant risk of fungal overgrowth with such commonly occurring symptoms as sore mouth, thrush, diarrhoea and pruritus ani due to *Candida albicans*. For this reason *'it is a wise precaution to administer an antifungal compound with the broad-spectrum antibiotic.'*\* Costing no more than the ordinary tetracycline and even less than oxytetracycline **MYSTECLIN** provides this 'wise precaution'.

CAUTION  
AIR BRAKES

# DYTIDE FOR OEDEMA

does not **just** give you enhanced diuresis—  
it puts an effective brake on potassium loss too

- ample diuretic action
- no potassium problem
- well tolerated—few side effects
- rapid onset of effect
- short duration—for easier control

DYTIDE produces diuresis without depletion—the potassium is conserved—the problem of drug-induced electrolyte imbalance is minimized.

Literature containing prescribing information is available on request.

Each capsule of DYTIDE contains 50 mg. 'Dytac' (brand of triamterene) and 25 mg. benzthiazide. In packs of 30 and 250.

# Synadrin<sup>®</sup> for the patient with angina pectoris

Regd. Trade Mark

Synadrin is a specific coronary vasodilator, and is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments<sup>11-17</sup> and it has been tested in over 1,000 patients.<sup>1-10</sup> Results of trials so far reported have been promising and Synadrin has been described as "an effective drug for treating angina pectoris."<sup>1</sup>

## Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

## Dosage

Treatment may be initiated with 2 tablets, three times daily, reducing after three days to a maintenance dosage of 1 tablet two or three times daily.

## Presentation

Synadrin is presented as tablets, each containing 15 mg. of prenylamine lactate in bottles of 30 and 150 at basic NHS prices of 8/8d. and 34/8d. (subject to P.T.). Synadrin is known in some other countries as Segontin.

## What is the Protein Gap?

The protein gap is the difference between a person's actual, and optimum, protein intake. While calorie requirements may change, an adult's protein requirements remain approximately constant. Hence, the protein gap occurs whenever the total diet is reduced and the proportion of protein in the diet is not correspondingly raised. This happens especially in old age, when the need for calories has diminished but not the need for protein. Unless old people are able to increase the proportion of protein in their diet, the protein gap that occurs will make them debilitated and prone to infection.

### PROTEIN SUPPLEMENTATION

Protein deficiency can occur in old age, chronic illness, convalescence, and during periods of active growth such as adolescence and pregnancy. In all these states, supplementation of the diet with additional protein of high biological value is required.

#### *The complete food*

Lloyd's High Protein Food is designed to meet these requirements. The scientists responsible for its formulation were concerned to produce a food which was palatable, digestible, and nutritionally complete in all respects. Lloyd's High Protein Food contains 48% of a blend of animal and

vegetable protein, a far higher percentage of protein than any other whole food on the market; 23.8% of carbohydrates; 19.8% of fat, most of which is unsaturated; and all the vitamins, minerals, and trace elements required according to the recommendations of the B.M.A. Committee on Nutrition.

Lloyd's High Protein Food is sold only through chemists. The price is 5/9d per half-pound jar. Hospital prices will be sent on request.

*Lloyd's Research Limited has recently produced a study, "The Role of Protein in Nutrition," which sets out up-to-date views on the important subject of dietetics. A copy will be sent to any doctor on application.*

*Research in the Service of Medicine*

G. D. Searle & Co. Ltd. are privileged to release to the medical profession a new, potent, oral progestin, ethynodiol diacetate. Widely known to clinical investigators throughout the world over the past several years by the research designation, sc-11800, this new compound has undergone thorough and extensive clinical testing over a wide range of dosage levels. Many leading authorities have confirmed the

merit of sc-11800, combined with the well established oestrogen, mestranol, in the fields of conception control and gynaecology. For the convenience of physician and patient, sc-11800 is now made available under different names to distinguish between its two areas of clinical application; OVULEN for conception control, and METRULEN for gynaecological disorders requiring progestational therapy.

## Which would you recommend for patients with arterial disease?

In planning diets for patients with arterial disease and coronary heart disease, many doctors recommend the substitution of a vegetable fat to aid in lowering the patient's serum cholesterol level. Look carefully at the two bottles above: which would you recommend to a patient? **ANSWER:** They are identical. The bottle on the right contains Mazola Corn Oil, labelled with its fatty-acids percentages. The bottle on the left contains *exactly the same oil*, and bears the label under which it is sold in thousands of grocery stores throughout the country. (Where your patients can buy it easily and inexpensively.) Mazola Pure Corn Oil: 3/7 for 16 fluid ounces.

## SIDROS—a new name in Iron Therapy

In the treatment of iron-deficiency anaemia many iron salts are capable of producing the desired increase in haemoglobin level. Some also have a tendency to produce side-effects, and there can be a high element of non-absorption.

**SIDROS** is designed to overcome the known disadvantages and to provide a *reliable treatment for iron-deficiency anaemia*. It contains ferrous gluconate which produces a highly satisfactory clinical response and is

very well tolerated. Sidros also contains ascorbic acid which is known to aid the absorption of iron. Its action in Sidros is to maintain iron in the reduced state for absorption. Sidros is presented as tablets, each containing *ascorbic acid (stabilized) 30 mg and ferrous gluconate 300 mg* at a basic N.H.S. price of 2/8 for 100 tablets as dispensed from 1000 tablet bottle. Samples of Sidros are available on request.

an infection  
consider  
**ERYTHROCIN<sup>®</sup>**  
first

**E**rythrocin (erythromycin, Abbott) merits the physician's first consideration for the treatment of infections of the upper respiratory tract—and of other infections, for 80 per cent of cases of infection seen in the surgery can be expected to respond to adequate dosage of Erythrocin.

**ERYTHROCIN IS EFFECTIVE**

All the bacterial species that are at all commonly met in upper respiratory infections—staphylococci, streptococci, pneumococci and haemophilus—are sensitive to this important general-purpose antibiotic. Resistant strains, even amongst the staphylococci, are exceptional. The bacterial spectrum of Erythrocin includes most of the common pathogens, excludes most of the normal commensals.

**ERYTHROCIN IS SAFE**

Erythrocin is the least toxic of all the commonly used antibiotics. All other antibiotics have occasional serious toxicities; but more than ten years' clinical use has gone to show that such possibilities are negligible with Erythrocin.

**ERYTHROCIN IS ECONOMICAL**

If economy is regarded as a function of cost and performance, Erythrocin stands out as one of the most economical of antibiotics.

Erythrocin is available as Filmstab<sup>®</sup> tablets and granules for suspension; and it is also available in forms for intramuscular and intravenous injection.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. This organism itself forms an antibiotic which may contribute to its rapid preponderance over other species.<sup>1, 2</sup>

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3, 4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

# The go-ahead OPPORTUNITY that is ROYAL NAVY

## you find it as a MEDICAL OFFICER

As a Medical Officer, you have complete clinical freedom and a widely varied medical experience. Your practice is among 100,000 Naval men and women. Ashore or afloat, it can take you anywhere in the world from Malta to Singapore: and, when you have a shore appointment abroad, your family can be with you. Go-ahead, too, is your opportunity to specialize: not only in traditional categories, but in the modern sciences of aviation and nuclear medicine.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your initial pay is considerably higher than that of a civilian hospital registrar.

You can enter by one of three ways: as a Registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission.

For fullest details of your Royal Navy life as a Medical Officer, write, mentioning your own qualifications and age to:

The Medical Director-General of the Navy,  
Medical Department (HN12/D), The Admiralty,  
Empress State Building, London, S.W.6.

**MEDICAL OFFICER**

Applications are invited for a full-time appointment in the medical services of a Unilever Company operating in Commonwealth West Africa. Candidates should preferably be not more than 35 years of age, and should have had good experience since qualifying.

The scope of the work done by the Company's medical services varies from place to place in West Africa, but in general may be said to cover the health supervision of working communities and their dependants. In many cases this involves taking charge of a small hospital. There is also considerable opportunity for the practice of preventive medicine, public health and industrial medicine in the widest sense.

While each Doctor is administratively responsible to his local manager, his professional links are with the Assistant Principal Medical Adviser, Unilever Limited, to whom applications should be made at Unilever House, Blackfriars, London E.C.4, where the appointment will be made following a personal interview.

The starting salary, with allowances for overseas service, will not be less than £3,000 per annum, and in accordance with age, qualifications and experience. The length of tour in West Africa is approximately 15 months, followed by generous leave on full pay. There is a contributory pension fund, mid-tour passages are arranged, and education allowances paid for children under education in the United Kingdom.

Those preferring a short-term appointment with similar terms of service will also be considered, and in such cases an end of tour gratuity would be payable. (8623)

## in diuretic therapy and in many antihypertensive regimes

# HydroSALURIC-K the diuretic with potassium

Hydrochlorothiazide and potassium chloride REGD

Whenever a thiazide diuretic is indicated, the administration of HydroSALURIC-K will provide

- the short duration of action of hydrochlorothiazide, giving uninterrupted nights
- a reasonable safeguard against the development of thiazide-induced hypotassaemia and its sequelae.

In addition, HydroSALURIC-K is often valuable in antihypertensive therapy. Occasionally effective alone, it is particularly useful by virtue of its potentiating effect on the actions of reserpine, the ganglion and adrenergic blocking agents and methyldopa (ALDOMET).

HydroSALURIC-K is supplied as pink, sugar-coated tablets containing 25 mg hydrochlorothiazide and 572 mg potassium chloride (equivalent to 300 mg potassium). The potassium chloride is enclosed in a reliable enteric coating to avoid nausea and vomiting

Detailed information on indications, dosage, administration, precautions and bibliography is available on request. ALDOMET is a registered trademark.

patient  
with  
persistent  
bronchospasm

easy breathing for hours

# Medihaler-bron

*Medihaler-bron* adds a new dimension to the treatment of bronchospasm—prolongation of relief. *Medihaler-bron* contains isoprenaline sulphate and atropine methonitrate. Each measured dose of micronised particles gives immediate relief—onset within seconds—and relief is prolonged for hours.

Isoprenaline sulphate produces the full primary bronchodilation which is the patient's first need. Atropine methonitrate prolongs and sustains the all-important initial relief given by isoprenaline.

The widely recognised advantages of *Medihaler* treatment, now with the added benefit of prolonged effect, make *Medihaler-bron* a product with particular clinical advantages for the patient with persistent bronchospasm.

*Medihaler-bron* is supplied with a new-style plastic oral adapter, which will also shortly be available with *Medihaler-epi*, *Medihaler-iso*, and *Medihaler-iso Forte*.

*Medihaler-bron*, available in vials of 300 doses, contains a suspension of isoprenaline sulphate 5mg./ml. and atropine methonitrate, 2mg./ml., each dose contained in 0.05 ml. of suspension.
