

ASTHMA

EFFECTIVE AND ECONOMICAL TREATMENT

RYBARVIN Inhalant used in the hand-operated RYBAR INHALER, having stood the test of time, continues to be most effective in the treatment of bronchial spasm.

ECONOMY

The very small amount of inhalant often necessary to relieve an attack is worthy of note. Therapeutically this is of benefit to the patient in avoiding any side effects which might be brought about by taking too frequently a full measured dose. ECONOMICALLY the very low cost of treatment by Rybarvin, over 1500 average doses ($\frac{1}{2}$ minute) for 6/4d (1oz. bottle) i.e. 1/20d per dose, must be of interest to both patient and doctor.

RYBAREX INHALANT similar to and the same price as RYBARVIN, has expectorant properties which makes it the inhalant of choice when Bronchitis or Bronchial Catarrh complicate the asthma.

RYBAR LABORATORIES appreciate the convenience of the unobtrusive PRESSURISED PACK particularly on social occasions and have produced RYSPRAY for prescription where doctors feel this type of pack to be more suitable.

RYSPRAY is a powerful bronchodilator giving rapid and sustained relief in asthma and bronchitis.

It is a great convenience to the patient that the amount of inhalant in the bottle can be seen.

EVERED ELECTRALIFT hospital bed

**Chosen for
Moscow Exhibition**

The Electralift PD701, the only motorised hospital bed of its type manufactured by a British company and the first bed ever to incorporate a motorised lifting backrest on a short wheelbase, has been selected by the Council of Industrial Design for the exhibition being held in Moscow publicising "The Role of the Industrial Designer in British Industry". The PD701 hospital bed with its highly functional yet streamlined appearance has proved a major breakthrough in intensive care nursing. Operating at the touch of a button the PD701 eliminates all manual effort. Quiet-running motors gently raise and lower the bed chassis.

Other important features

- Head and foot tilt • Adjustable backrest • Hand Control for use by Patient
- Built-in provision for transfusion pole, lifting pole and cot sides • Low voltage operation

“Doctor,
I feel awful”

Once she might have been diagnosed as “anxiety state”. Today, you know she might be a depressive, but it doesn’t seem as simple as all that. The truth of the matter is that patients don’t always fit neatly into diagnostic categories. They may suffer from such diverse symptoms as depression, agitation, loss of appetite and tension-fatigue at the same time.

The great strength of ‘Aventyl’ is that its beneficial actions range widely over the symptoms which plague these

problem patients. ‘Aventyl’ is not merely an anti-depressant, nor is it a combination of drugs. It is a *single substance* which relieves a constellation of mental and emotional symptoms embracing depression, anxiety and their effects on awareness and mood.

‘Aventyl’ is not a monoamine oxidase inhibitor, and no serious side-effects have been reported at the recommended dosage.

‘AVENTYL’TM lightens the troubled mind

SIDROS—FOR THE PATIENT DEFICIENT IN IRON

well tolerated iron compound plus reducing agent to aid absorption

In the treatment of iron-deficiency anaemia many iron salts can produce the desired increase in haemoglobin level. Some also have a tendency to produce side-effects, and there can be a great deal of wastage through non-absorption.

SIDROS is designed to overcome these disadvantages, and provides a reliable treatment for iron-deficiency anaemia.

Ferrous gluconate Each Sidros tablet contains 300 mg of ferrous gluconate which produces a highly satisfactory clinical response and is very well tolerated.

Ascorbic acid Sidros also contains stabilized ascorbic acid (30 mg per tablet) which is known to aid absorption by maintaining iron in the reduced state.

The basic NHS price of 100 Sidros tablets is 2/8 as dispensed from 1000 tablet bottle. Samples of Sidros are available on request.

SIDROS is effective, well absorbed, well tolerated and economical

Betnesol the corticosteroid tablets patients drink

Betnesol is a water soluble tablet of betamethasone phosphate which when given in this fluid form represents oral corticosteroid therapy in its most rapidly absorbed form.

A much better tolerance and less risk of gastric disturbance result because no solid steroid particles reach the stomach.

Betnesol offers rapid and maximum absorption, the most constant therapeutic effect and in some cases, allows reduction of dosage.

CONSIDER ERYTHROPED FIRST

TRADE MARK

Erythrocin® (erythromycin, Abbott) has an important part to play in summer, as in winter. Children still get bacterial throat infections, and Erythrocin can be considered first against these complaints. It is usually the antibiotic of choice, for it gives excellent activity against the cocci (and also certain of the Gram-negative pathogens), and is probably the safest of all effective antibiotics.

Erythroped (Erythrocin paediatric presentation) is a palatable cherry-flavoured form of erythromycin which is readily absorbed and free from potential toxicities, at a price which compares very favourably with other liquid antibiotic preparations.

. . . AGAINST CHILDREN'S INFECTIONS

ERYTHROPED Dosage: $\frac{1}{2}$ -1 tsp 4-6* hourly.

* While Erythroped should be taken at 4-hourly intervals if optimal therapeutic blood levels are to be maintained, the more convenient 6-hourly schedule may be prescribed in milder infections.

Presentation: 60 ml bottle (24 doses of 100 mg).

Each 5 ml teaspoonful contains 200 mg Erythrocin ethyl succinate.

Erythrocin (erythromycin, Abbott) is also available as film-coated tablets of 100 and 250 mg Erythrocin stearate (adult dosage, 1-2 Gm/day); as Erythrocin I.M. (Erythrocin ethyl succinate) for intramuscular injection; and as Erythrocin lactobionate for intravenous injection.

Imferon replaces iron tablets...by quickly replacing the body's iron reserves as well

IMFERON, intramuscular iron-dextran complex, goes straight to the root of iron deficiency—and does much more than just raise the haemoglobin level. The body iron stores cannot be replaced by oral iron unless therapy is maintained continuously for many months. IMFERON simultaneously replenishes essential iron stores and the haemoglobin level, with rapidity and efficiency thus preventing early relapse into an anaemic state. Complete treatment of iron deficiency is vital in pregnancy for the safety of mother and child. In all other cases of established iron deficiency, IMFERON provides a calculated and complete treatment. Remember IMFERON corrects *total* iron deficiency, not just iron deficiency anaemia alone.

FURAMIDE

- 1 "It appears that diloxanide furoate and paromomycin are at least as effective in the treatment of amoebiasis as is E.B.I. The first has the advantage of being cheaper and much better tolerated."
- 2 "... an effective amoebicide useful in both acute amoebic dysentery and chronic amoebic colitis".
- 3 "Tolerance of the drug was good in 100% of the subjects ... No special precautions were taken during treatment, and the patients were all ambulant".

FURAMIDE is the simplest treatment for amoebiasis, requiring no injections, enemas or special diets. Cure rates are high—75% to 80% in the acute stage and up to 100% in the chronic condition. Side effects are unlikely, and hospitalization is not normally required, making treatment cheaper than the older forms of therapy. Extensive clinical trials in many tropical and sub-tropical countries have borne out these claims.

Dosage is simple—1 tablet three times daily for ten days in patients of average weight.

Each Furamide tablet contains 0.5G of Entamide (diloxanide) furoate B.P. Both Entamide and Furamide are products of Boots research.

INTERESTING READING

It has been said of a certain famous daily newspaper that its front page is not news. This can possibly be said of many journals! It may even be said of the *B.M.J.*'s final pages.

These, of course, are devoted to a miscellany of small announcements. Many deal with appointments in practice and hospitals (at home and overseas) and educational programmes.

However, there is always a nicely balanced variety of doctors' Personal Notices, Hotels, Consulting Rooms, Commercial advertisements of all types, Cruises and Tours and sometimes an item to tickle the palate under Bon Appetit or one to appeal to the outdoor enthusiast under Sailing.

As a reader you will find these classified advertisement pages a source of real interest or, as an advertiser, something to be used to advantage.

In painful muscular conditions, Norgesic restores normal activity . . . quickly

Because *Norgesic* goes to work in two ways it can dramatically reduce the period of incapacity resulting from acute or chronic painful muscular conditions. *Norgesic* provides the complementary actions of the highly effective skeletal muscle relaxant, orphenadrine citrate, and the analgesic, paracetamol, to relieve both the local pain and the pain and stiffness of muscle spasm. *Norgesic* quickly restores mobility and speeds recovery.

NORGESIC

registered trade mark

Each tablet contains : orphenadrine citrate 35mg. and paracetamol 450mg.
Dosage is two tablets three times daily.
