Choledyl relieves dyspnoea and diminishes the frequency of acute bronchospasm. It can be given routinely over long periods without loss of effectiveness. Pour in the blood sample Push the lever Read the cell count

It's just that simple with the new Sanborn Model 75 Cell Counter.

Your laboratory technicians can run accurate blood cell counts all day long with no loss in efficiency.

Since the total number of cells sampled is approximately 50 times that of a manual count, variation in count from random distribution of cells is markedly reduced. Results are repeatable within $\pm 1.5\%$.

Cleaning between determinations of red cell counts or white cell counts is unnecessary. This makes it possible to run counts continuously.

A precision instrument designed for hard everyday use in the busy laboratory, the Sanborn Model 75 costs £ 707. For more information and a demonstration contact Sanborn medical Sales Division, Hewlett-Packard Ltd.

a matter of judgement

The golfer who is trying to reduce his handicap has to exercise a nice sense of judgement in selecting the right club for each stroke he plays, with due regard for all the circumstances of lie and distance. Not merely one that would do, but the *right* one. Comparable situations occur every day in every field—including the problem of selecting the right presentation to use against an infection which the doctor judges to be best treated with erythromycin.

Outside of hospital, intravenous presentations (*eg* Erythrocin lactobionate) scarcely enter into the picture, though an initial intramuscular injection of Erythrocin I.M. may be desirable to get therapy off to a more rapid start.

For oral administration in adults and older children, Filmtab® Erythrocin stearate is the presentation of choice. Enteric-coated tablets will "do", but many doctors remain unconvinced of their reliability. Erythromycin estolate, though acid-stable and giving excellent blood levels, is occasionally associated with jaundice†. No other form of erythromycin causes this or any other significant toxicity.

Filmtab Erythrocin, for example, employs the stearate salt, which has never been shown to cause liver damage. It is equally effective clinically, and the Erythrocin tablet is buffered against gastric acids. Specific blood-level studies have proved, and wide clinical experience over more than ten years has amply confirmed, that absorption of the antibiotic is entirely reliable.

†Erythromycin estolate (*Ilosone*) and jaundice (*Editorial*), *Canad. med. Ass. J.* 1963, **88**, 1173

Filmtab Erythrocin tablets are supplied in strengths of 100 and 250 mg. The Filmtab coating contributes to easier swallowing, and dissolves very rapidly indeed in the stomach.

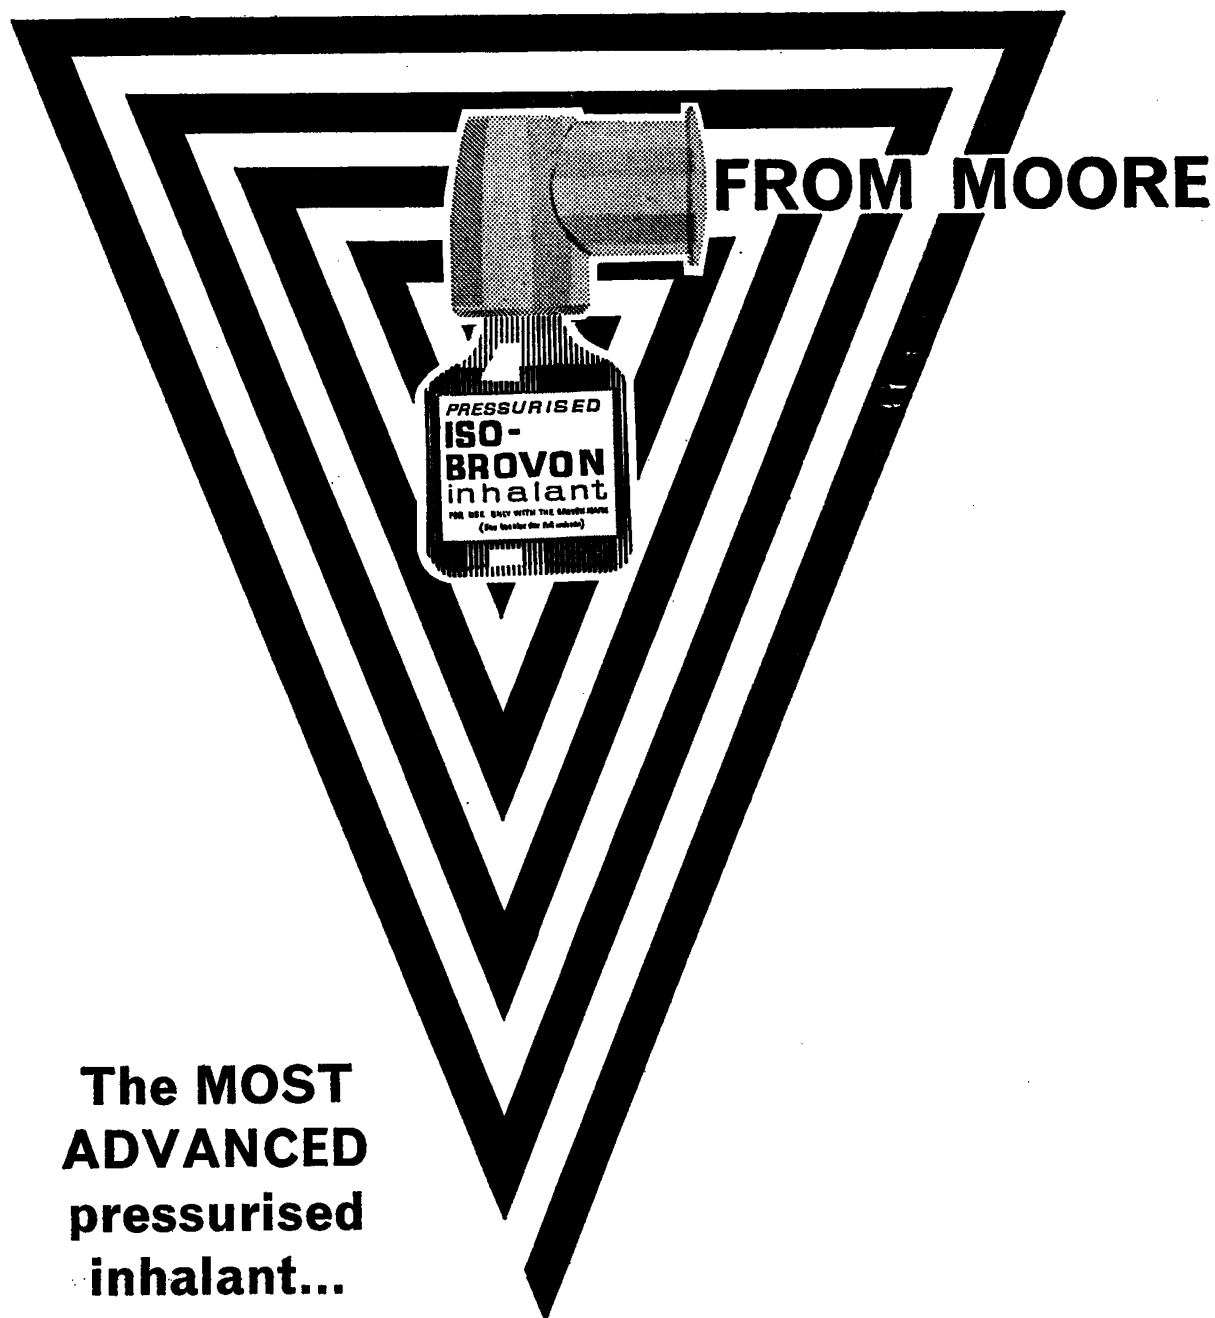

For young children and other patients who cannot take tablets, Abbott produce two liquid erythromycin preparations: one based on Erythrocin stearate (Erythrocin Suspension—100 mg/5 ml), and one on Erythrocin ethyl succinate (Erythroped®). The use of a tasteless salt in Erythroped® has made it possible to produce a pleasant cherry-flavoured suspension containing 200 mg in each 5 ml teaspoonful. The 60 ml bottle therefore holds 24 doses of 100 mg, and is one of the most economical—as well as one of the most palatable—antibiotic suspensions available.

Introducing

D-VAC Pollens

The new

3-injection

course for protection against hay fever

Hay Fever sufferers can look forward with relief to next summer, by receiving a short course of desensitisation with D-Vac Pollens.

D-Vac Pollens is a 'depot' pollen vaccine formulated by the Bencard Allergy Unit. The new 3-dose course is the outcome of three years' experience with D-Vac Pollens in allergy clinics, showing it to be safe and at least as effective as aqueous vaccine.

D-Vac Pollens is available as two alternative courses:

Primary Course: For patients who have not previously been desensitised or who are known to be excessively sensitive to grass pollens; and for children (aged 6-12 years).

Advanced Course: For patients aged over 12 who have had previous pollen treatment and whose symptoms are not excessively severe.

Action now against hay fever will bring its reward next summer

The 3 injections are administered at 4-week intervals starting between 1st and 20th February. Because D-Vac Pollens is prepared specially to order, prescriptions (marked 'Primary' or 'Advanced' Course) should be made out and orders placed **before 31st December**, and should indicate the date in February on which the first dose is required.

D-VAC* Pollens is a product of British research at

cracks under 'DOLOXENE'TM

Three qualities highlight 'Doloxene' as an outstanding analgesic.

Potent 'Doloxene' is comparable with the more effective analgesics in use today. Its action is maintained over long courses of treatment—it will often delay the use of opiates.

Safe 'Doloxene' is free from the side-effects that have limited the value of classic analgesics such as morphine, codeine and the salicylates.

Purely analgesic 'Doloxene' has one significant pharmacological action—analgesia. It is not antipyretic, neither does it suppress the cough reflex.

'Doloxene' brand Dextropropoxyphene Hydrochloride is available as 'Pulvules' of 65 mg.

'DOLOXENE COMPOUND-65'

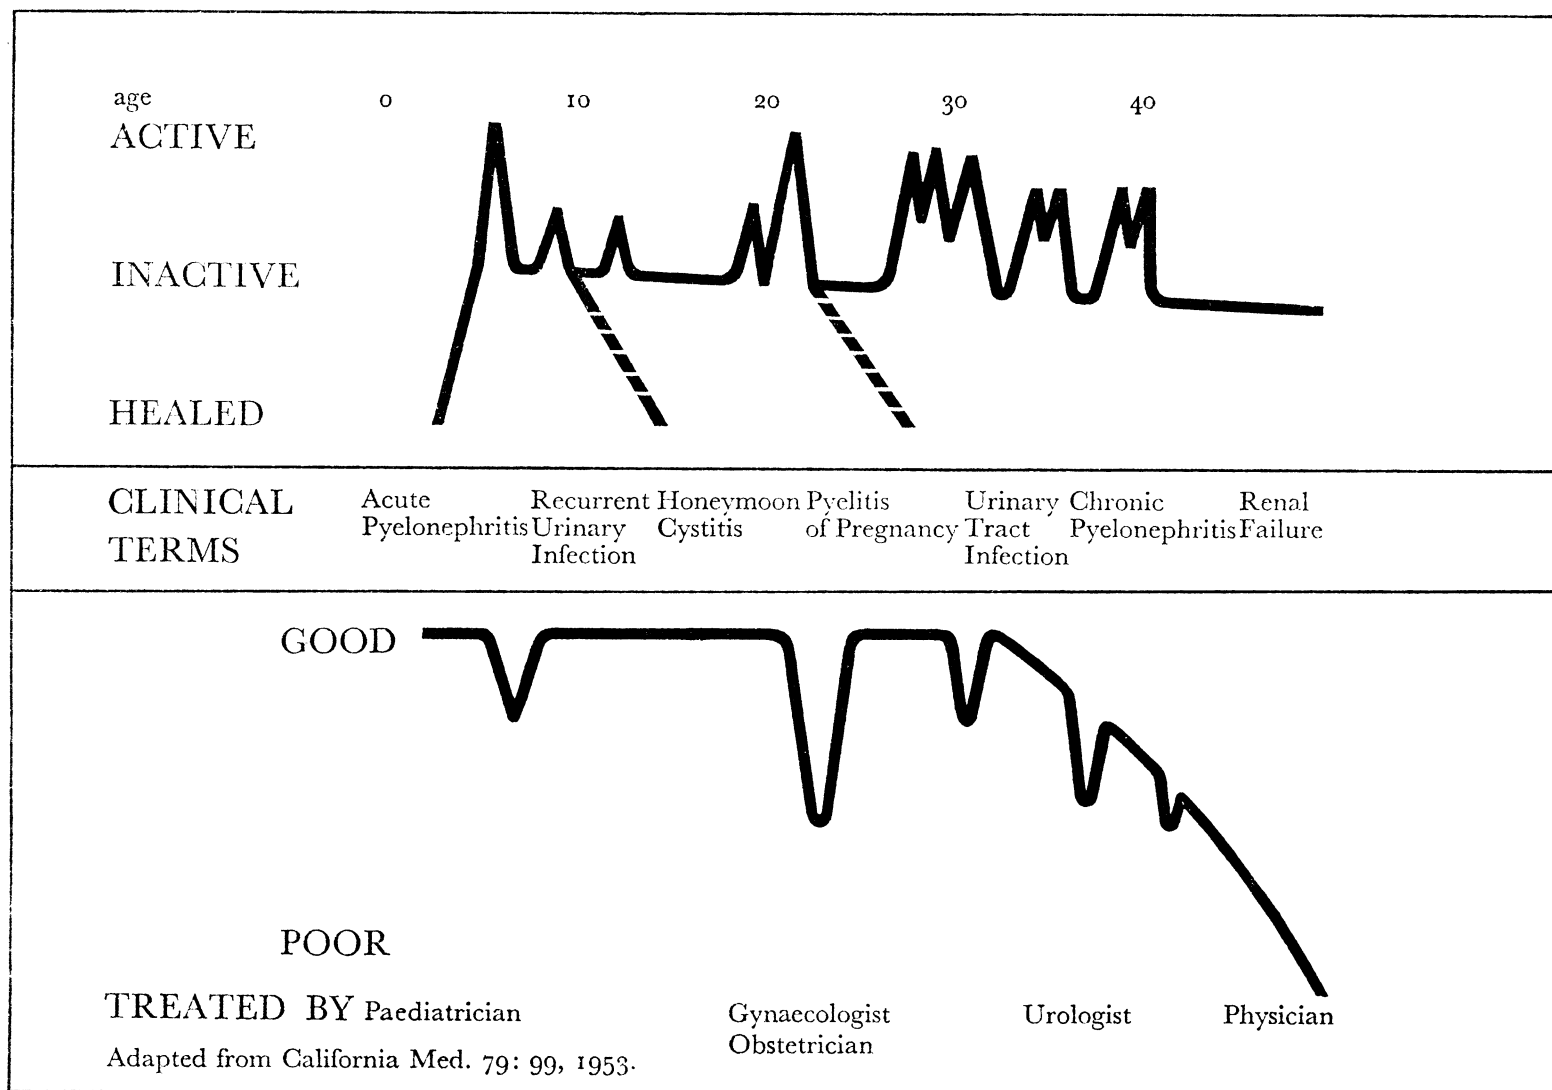

is indicated when pain is accompanied by fever or inflammation.

Formula: 'Pulvules' containing 'Doloxene' 65 mg., Phenacetin 162 mg., Aspirin 227 mg., and Caffeine 32.4 mg.

NORMAX

THIS CAPSULE

PROMOTES REGULARITY

It contains dioctyl-sodium sulphosuccinate 60 mg, and 1-8 dihydroxyanthraquinone 50mg.

Normax acts by softening the faeces and gently stimulating colonic peristalsis. It is indicated especially during pregnancy and for the elderly patient, when its gentle action in restoring regularity is most appreciated.

1-8 dihydroxyanthraquinone acts on the lower bowel and has no irritant actions. Dioctyl-sodium sulphosuccinate is not absorbed and does not break down during its passage through the intestine.

Dioctyl-sodium sulphosuccinate acts by lowering the surface tension of the impacted faecal mass and in association with the mild peristaltic movement induced by the 1-8 dihydroxyanthraquinone, leads to facilitated passage of soft stools. Animal experiments and extensive clinical observations have failed to reveal evidence of toxicity.^{1,2}

Because of this the therapeutic effect of Normax can be obtained without the danger of toxicity. Normax has a wide application in the treatment of constipation and it retains its effectiveness even when used regularly over long periods.¹ Normax restores regularity and is a rational approach to the treatment of constipation.

Normax capsules are available in bottles of 30 and 250 at basic NHS price of 4/10d. and 26/10d. respectively. Normax is subject to purchase tax.

THE PRACTICE OF MEDICINE IN THE BRITISH ARMY

What are your thoughts in your pre-registration year? Have you decided to go direct into general practice?

To take up a hospital appointment? Or have you other ideas?

You may well consider a 3 or 5 year Short Service Commission in the ROYAL ARMY MEDICAL CORPS. You will have great scope for a well-paid job in general practice, or a chance to specialise.

At the end of the period of your Short Service Commission there is a tax-free terminal gratuity of £1500 or £3000. Rank during pre-registration is Lieutenant with promotion to Captain on full registration.

SCOPE OF THE WORK

Professional standards are high. The R.A.M.C. is responsible for the welfare not only of serving officers and men but also of their families, the Women's Services and some of the civilians working with the Army. Thus there is ample scope for good general practice. There are thirty well equipped hospitals at home and overseas, as well as field medical units to provide medical care for the Army in its active role. Research is an increasingly important aspect of work in the R.A.M.C.

PAY, ALLOWANCES AND LEAVE

The range of pay varies from not less than £2000 for the young married Captain up to £5000 for the senior consultant. Annual allowances may be paid to assist in the education of your children.

Six weeks leave may be taken each year and you are not responsible for finding and paying your relief.

LIVING ACCOMMODATION

If you are single you would live in a well appointed Officers' Mess, at very small cost from your pocket. If you are married you are usually provided with a fully furnished house for which the rent would be less than £200 a year.

YOUR FAMILY

For the married man the attitude of his wife to the Service is of the greatest importance. The community

spirit of Army life, especially overseas, embraces an officer's family as much as himself. In addition to having your family with you at home and with opportunities to take them with you overseas, such allowances as Marriage Allowance, Education Allowance, Disturbance Allowance and Local Overseas Allowance show the importance attached by the Army to your family life.

FUTURE PROSPECTS

If you decide to return to civil life at the end of your Short Service Commission you will have gained considerable experience and have a substantial sum behind you to get started.

If you decide to make a career in the Service you may apply for a permanent commission and serve up to the age of 60. Promotion to Major is after 5 years reckonable service, and to Lieut-Colonel after 13.

You may continue if you wish in general practice where great importance is attached to post-graduate study for such diplomas as D.Obst. R.C.O.G., and D.C.H. Refresher courses are arranged at the Royal Army Medical College and other post-graduate centres. Officers granted permanent commissions may apply for training in any of fourteen specialties and those selected are given ample time and opportunity for obtaining their higher qualifications. Senior specialists may be awarded consultant grading directly comparable with civilian standards and extra pay for specialist and consultants ranges between £109 and £584 a year.

FOR FURTHER INFORMATION

Please write giving your age and qualifications to:

Colonel A. D. Young, D.S.O., M.B., Army Medical Directorate, Dept. 282, Lansdowne House, Berkeley Square, London, W.1. or you may care to come and discuss your application personally.

Heinz cooking retains the maximum nutritional value

Heinz use only the finest ingredients for their Baby Foods—superior, in fact, to those normally available to the average housewife.

Special cooking facilities, strict quality control—all these specialist resources combine to make Heinz Baby Foods exceptionally nutritious.

For a start, instrumentally controlled cooking ensures uniformity with each batch of foods, and prevents over-cooking.

Ingredients are carefully steam-cooked.

Once hot, the foods are exposed as little as possible to air; juices formed during cooking are retained to avoid loss of valuable soluble nutrients.

Strained foods are forced through

a fine sieve to eliminate any rough fibres or coarseness.

(With Heinz more advanced Junior Foods, ingredients are diced or minced prior to cooking.)

They are sterilized under carefully controlled conditions.

At every stage of this preparation, cooking and packing, Heinz Quality Control inspectors take samples from each batch of baby foods to ensure that the quality, taste, consistency, purity, and hygiene reach Heinz demanding standards.

For further information about Heinz Strained and Junior Foods, write to: Foods Science Advisory Service, H.J. Heinz Co. Ltd. Harlesden London NW10.

Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulatory patient

“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”
(Medical Times 1958, 1: 74)

NULACIN TABLETS have been developed so that when allowed to dissolve slowly in the mouth, they give continuous milk-alkali drip therapy and provide a treatment of peptic ulcer and other conditions associated with hyperacidity. The effectiveness of Nulacin therapy has been established by clinical work in many countries. The following are a few references to the literature:

“Doctor,

Once she might have been diagnosed as “anxiety state”. Today, you know she might be a depressive, but it doesn’t seem as simple as all that. The truth of the matter is that patients don’t always fit neatly into diagnostic categories. They may suffer from such diverse symptoms as depression, agitation, loss of appetite and tension-fatigue at the same time.

The great strength of ‘Aventyl’ is that its beneficial actions range widely over the symptoms which plague these

problem patients. ‘Aventyl’ is not merely an anti-depressant, nor is it a combination of drugs. It is a *single substance* which relieves a constellation of mental and emotional symptoms embracing depression, anxiety and their effects on awareness and mood.

‘Aventyl’ is not a monoamine oxidase inhibitor, and no serious side-effects have been reported at the recommended dosage.

'Esbatal'

an effective and adaptable hypotensive agent

'Esbatal' brand Bethanidine Sulphate is a hypotensive agent with the advantages of selective adrenergic neurone blockade without some of the disadvantages. For example, patients taking 'Esbatal' are free from the uncontrollable and sometimes explosive diarrhoea that may occur with such treatment.

The rapid onset of action of 'Esbatal' enables speedy control of blood pressure to be achieved. This is coupled with a short duration of activity (about 12 hours) that allows greater flexibility in stabilisation and control. 'Esbatal' therapy is indicated for those patients suffering from severe and malignant hypertension, as well as for those who are inadequately controlled with other therapy.

Further information will be supplied upon request.

THE INTERNATIONAL STANDARD OF MASS...

... is this platinum-iridium cylinder kept at the International Bureau of Weights and Measures, Sèvres, near Paris. It was established in 1889, and is known as the International Prototype Kilogramme. Its height is equal to its diameter and it is composed of 90% platinum and 10% iridium. Replicas

have been distributed, as national reference copies, to other countries.

If the reference weights have a different composition from the standard, the different *buoyances in air* must be taken into account. This emphasizes the high degree of accuracy involved.

"It is clear that the efficient treatment of constipation requires the limitation of laxatives to preferably one aperient of general efficacy; the laxative must be inexpensive, easy to administer, and physiological in its action, so that a rational treatment of bowel re-education (in contrast to the symptomatic and temporary relief by purging) can be initiated. Of all the laxatives available, the claims of standardized senna [Senokot] for general use appeared outstanding." *Gut* (1962) 3, 85

REMIDERM

new for the
most effective
management
of inflammatory
dermatoses

In the treatment of inflammatory dermatoses, *Remiderm*, which combines a highly effective antiseptic, halquinol, with the well-established topical corticosteroid, triamcinolone acetonide, rapidly relieves the inflammatory, pruritic or allergic symptoms, and at the same time, protects the lesion from secondary infection. Where infection is already present *Remiderm* hastens recovery by controlling the causative organisms, but, unlike the antibiotic-corticosteroid combinations, *Remiderm* has not been found to cause skin sensitization and cannot induce the development of antibiotic-resistant bacteria.

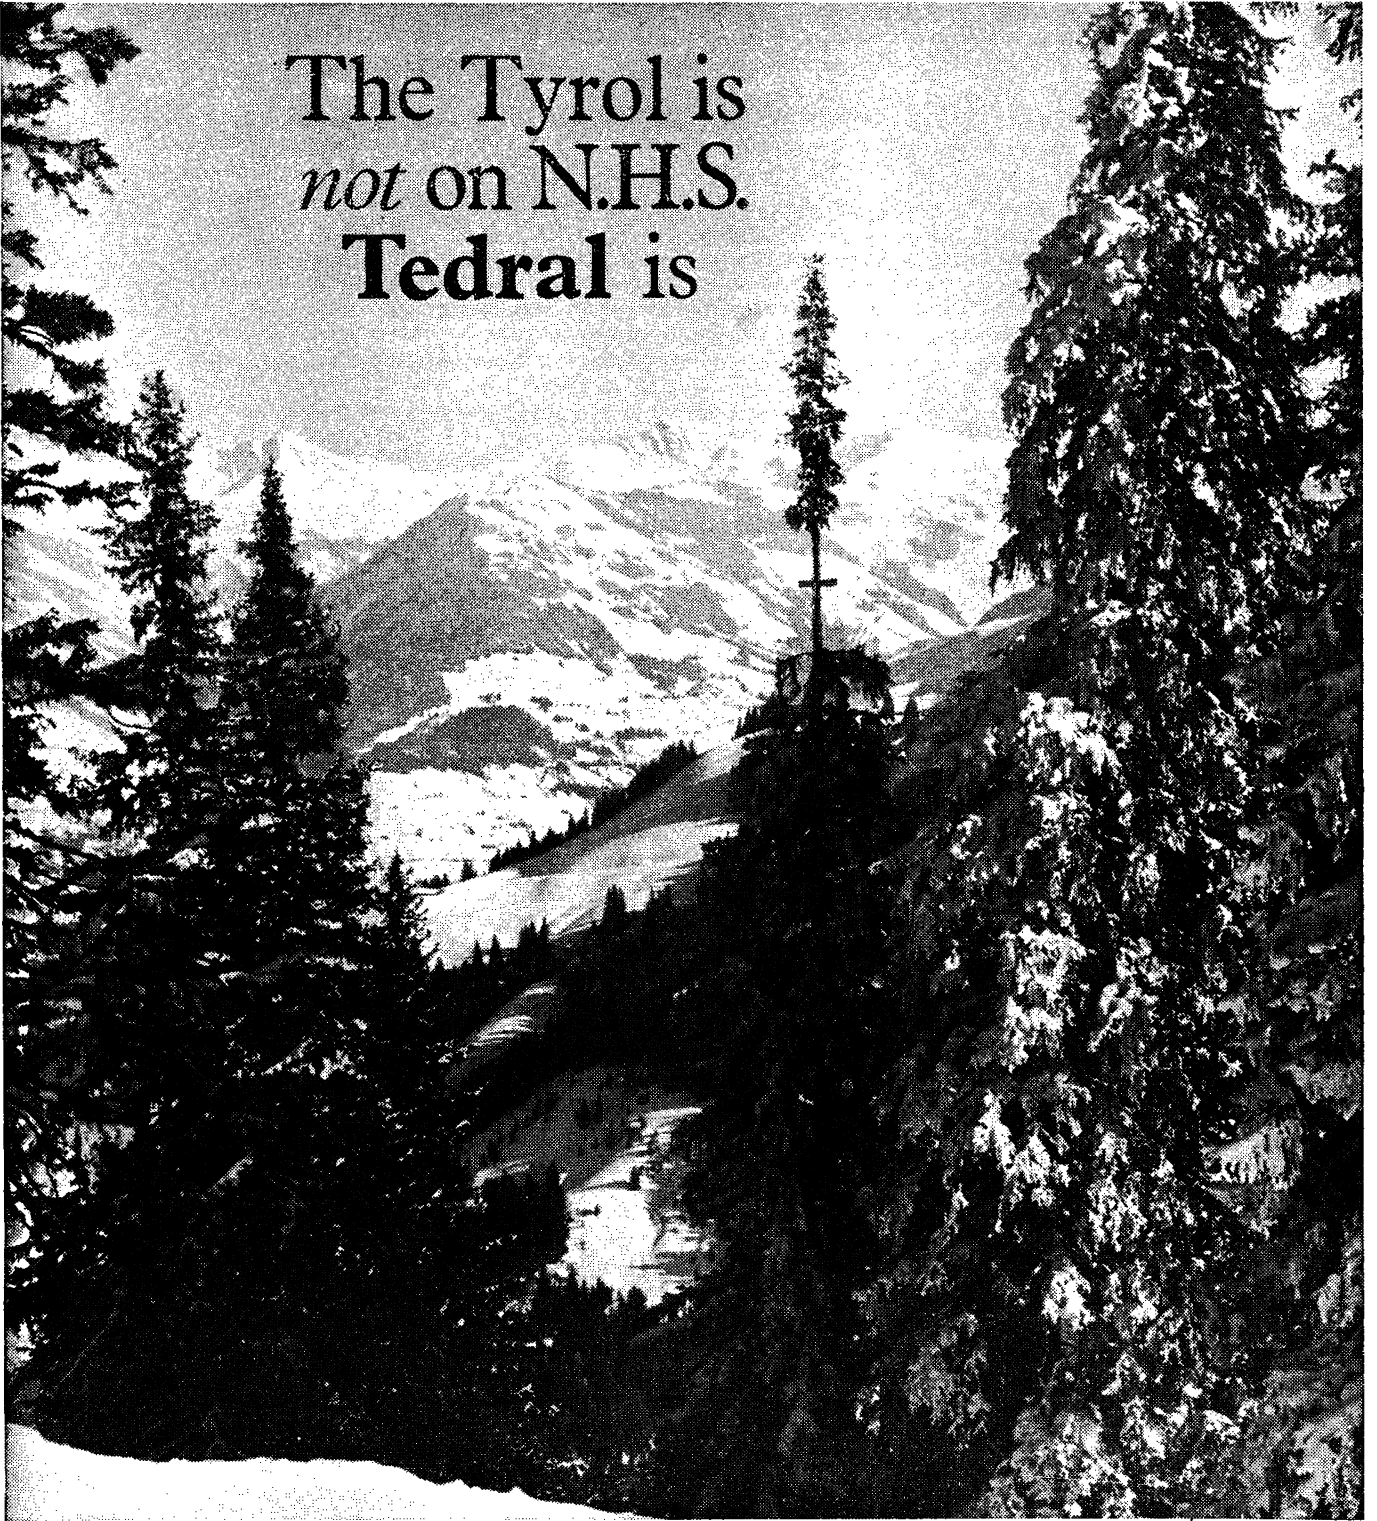

Remiderm is available in two forms: cream and ointment. Each contains triamcinolone acetonide 0.025% and halquinol (Squibb chlorhydroxyquinoline) 0.75%. Packs: 15 gm. tubes, 7/9 basic NHS price.

**FLAT
FOOT?**

TRADITIONAL METHOD
ANY SHOE with external wedge. Any external wedge to heel disturbs plane of forepart and heel.

OUR METHOD
INNERAZE keeps sole and heel in perfect alignment.

...do you recommend an external wedge on the shoes? But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

FOR COMPLETE AVAILABILITY OF THE B VITAMINS

Deficiencies of single factors of the Vitamin B Complex do not occur. Thus, even when a deficiency condition seems to result from the lack of a single factor of the Complex, and it is considered necessary to give intensive treatment with this factor, *the other members of the Complex should be administered concurrently*. It is therefore essential that the source of the Vitamin B Complex selected for this purpose should release its full vitamin content to the body. *Human experiments show that the rich, natural vitamin potency of Aluzyme is completely available to the human system.* Basic N.H.S. continuous drip control of ulcer by tablet

PRODEXIN tablets give all the benefits of continuous intragastric drip therapy¹ without any of its disadvantages.

The slow suck down tablets are specially formulated to give prolonged antacid buffer effect, unaffected by stomach emptying rate.²

Immediate relief of pain is achieved by rapidly raising pH to 2 neutralising excess acid and controlling the acid secretion by slowly building up the pH to a desirable level of pH3.5 and pH4.5

DOSAGE:

For continuous therapeutic effect one tablet at a time should be sucked slowly.
For peptic ulcer one or more tablets an hour.

A really palatable flavoured PAS

Pasinah-D is the first PAS preparation in which the taste of Sodium PAS is successfully disguised when in solution. It dissolves completely in cold milk or water to make a pleasantly-flavoured, easy-to-take drink. Only two doses daily are required, and flavours may be alternated to give variety and lessen the danger of defaulting. Pasinah-D is very well tolerated and is specially acceptable to children.

LONDON BOROUGH OF BARNET**APPOINTMENT OF DEPUTY MEDICAL
OFFICER OF HEALTH**

With the agreement of the London Government Staff Commission, applications are invited for the post of Deputy Medical Officer of Health at a salary scale of £3,000 to £3,420 per annum.

Applications should be sent direct to the undersigned by December 10, 1964, on Form S.A. 4 (one of the forms issued by the London Government Staff Commission).

Applications from all suitably qualified persons will be considered. At the request of the London Government Staff Commission, preference will be given to candidates employed by authorities in the Greater London area affected by the re-organization. Officers who have already applied for the post need not re-apply.

The post is next in seniority to that of the Medical Officer of Health who will have overall responsibility for the Health and Welfare services of the London Borough of Barnet. The Borough includes the existing Boroughs of Hendon and Finchley and the Urban Districts of Barnet, East Barnet, and Friern Barnet: it has an estimated population of 318,000, an area of 22,123 acres, and an estimated population density of over 14,000 per acre. R. H. Williams, Town Clerk, Town Hall, Hendon, N.W.4. (5315)

LONDON BOROUGH OF HILLINGDON**SENIOR MEDICAL OFFICER**

With the approval of the London Government Staff Commission, applications are invited for this post in the Health and Welfare Department. Salary scale £2,090 to £2,770, ultimately £2,855.

The duties will be principally in the field of mental health and candidates should have had administrative knowledge of important health authority's mental health service. Preference will be given to applicants already serving with authorities in the Greater London area affected by the re-organization.

The new London Borough of Hillingdon comprises the existing West Middlesex districts of Hayes and Harlington, Ruimsig, Northwood, Uxbridge and Yiewsley and West Drayton—estimated population 230,000.

Forms of application may be obtained from the undersigned, and the closing date is December 14, 1964.—George Hooper, Town Clerk, Town Hall, Hayes, Middlesex. (5128)

LONDON BOROUGH OF SOUTHWARK**DEPUTY MEDICAL OFFICER OF
HEALTH**

Applications are invited for this post on a salary scale of £3,110 rising by four annual increments of £105 to £3,585, commencing salary to be agreed with the successful candidate.

The officer appointed will be required to assist in carrying out such duties as devolve upon the Medical Officer of Health by law or are from time to time assigned to him by the Council. He will also be required to undertake duties involved in the school medical service of the Inner London Education Authority. The Council will exercise substantially all the health functions of a county borough. As the Council is a large urban authority, knowledge of important food would be an advantage. The population of the borough is 311,000.

This advertisement is issued with the approval of the London Government Staff Commission and preference will be given to candidates employed by authorities in the Greater London area who are affected by re-organization. Before obtaining the Staff Commission's approval, the Council considered all applications received in response to an invitation issued to staffs in the Greater London area.

Further particulars and application form from Town Clerk, Municipal Offices, Parkham Road, S.E.5. Closing date for applications December 16, 1964. (5144)

Public Health—contd.

LONDON BOROUGH OF REDBRIDGE

SENIOR MEDICAL OFFICER
(Mental Health and Welfare)

With the approval of the London Government Staff Commission, applications are invited for the above-mentioned post in this newly-constituted London Borough formed by the union of Ilford and Wanstead and Woodford. The administrative centre will be in Ilford which is within easy reach of Central London by good public transport services.

The duties will be mainly connected with Mental Health and Welfare, but other experience may be included in order that the post may be a stepping-stone for promotion in the public health service. With respect to Mental Health, the duties will be partly administrative and partly clinical, but for Welfare, which is included in the new Health and Welfare Department, the duties will be mainly of a medical nature. In Redbridge, the Mental Health Services will be re-organized following modern trends: psychiatric hospitals concerned are within the boundaries of the Borough, and it is hoped to have joint employment of certain categories of staff including consultant psychiatrists with these hospitals.

Salary according to experience on Whitley scale £2,090 to £2,770 (ultimate maximum £2,855). Superannuation. Medical examination.

Preference will be given to candidates employed by authorities in the Greater London area who are affected by local government reorganization but applications from candidates from other parts of the country will also be considered.

Application forms obtainable from Medical Officer of Health, Town Hall, Ilford, Essex, returnable by December 14, 1964. (5127)

A crowning achievement...

'Double Century' is the sherry of all sherries. Some are too dry; some too sweet. 'Double Century' is a Sherry to suit all tastes, selected specially to celebrate the 200th birthday of the famous house of Pedro Domecq.

Try a bottle or a glass today and see if you have ever tasted such a lovely wine.
