cracks under DOLOXENE?

Three qualities highlight 'Doloxene' as an outstanding analgesic.

Potent 'Doloxene' is comparable with the more effective analgesics in use today. Its action is maintained over long courses of treatment—it will often delay the use of opiates.

Safe 'Doloxene' is free from the side-effects that have limited the value of classic analgesics such as morphine, codeine and the salicylates.

Purely analgesic 'Doloxene' has one significant pharmacological action—analgesia. It is not antipyretic, neither does it suppress the cough reflex.

'Doloxene' brand Dextrosropoxyphene Hydrochloride is available as 'Pulvules' of 65 mg.

'DOLOXENE COMPOUND-65'

is indicated when pain is accompanied by fever or inflammation. Formula: 'Pulvules' containing 'Doloxene' 65 mg., Phenacetin 162 mg., Aspirin 227 mg., and Caffeine 32.4 mg.

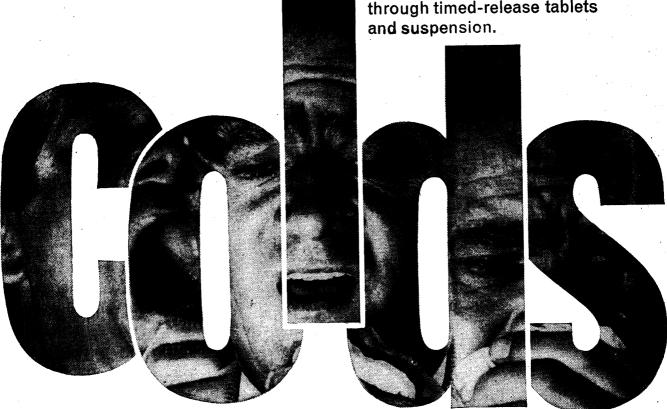

Eli Lilly and Company Limited, Basingstoke, England

BRITISH MEDICAL JOURNAL

a new concept in protective liver therapy

laevoral-c

Laevoral 'C' is offered as a new supplement in the treatment of liver intoxications with particular reference to its value in the treatment of alcoholic patients in whom disturbance of carbohydrate metabolism is thought to be an aetiological factor. The formula of Laevoral 'C' is based on the importance of restoring and maintaining liver glycogen synthesis in conditions where glycogen depletion arises due to the increased energy demands of the liver in carrying out its detoxification process. Laevoral 'C' helps to maintain the detoxifying process of the liver. Provides a readily utilizable source of energy for the intermediate metabolism and maintenance of important enzyme systems.

Indications:

Chronic Alcoholism, Acute and chronic hepatitis, toxaemia of pregnancy, radiation sickness.

Formula:

Each 100 ml. contains Laevulose 65.0 gm. Ascorbic acid 1.5 gm. Pyridoxine hydrochloride 60 mg.

CALMIC LIMITED, Crewe, Cheshire.

TO-DAY'S DRUGS

This book is about to be published—on 22 December 1964. It is based on a series of review articles which were printed in the "To-day's Drugs" section of the *British Medical Journal* between January 1963 and May 1964. These articles have been edited and brought completely up to date so as to form an authoritative and practical guide to modern therapeutics. The book is designed to cover the drug treatment of those common conditions which are met with in general and hospital practice. There are important sections dealing with antibiotic therapy, cardiovascular conditions, rheumatic disorders, oral contraceptives, and the special problems involved in paediatric and geriatric prescribing. Special attention has been paid to the precautions which should be taken in using these drugs and their toxic and side-effects. This book should be of value to all doctors concerned in the day-to-day treatment of patients.

The success of BIOGASTRONE in peptic ulcer

further proof:

In October 1962, Biogastrone* was used in a clinical trial among patients with peptic ulcer. The results indicated that Biogastrone significantly reduced the size of ulcer niche.

"It is suggested that Biogastrone promotes the healing of gastric ulcers."

Lancet (1962) ii: 793

Now, in the latest 1964 trial, the same author proves beyond any doubt that Biogastrone is successful in assisting peptic ulcers to heal. The average degree of healing was similar in both trials—72 and 77% in the Biogastrone groups and 35 and 44% for the control.

"It is concluded, therefore, that the drug is of real therapeutic benefit."

Scot.med.J. (1964) 9: 183

Dosage: Two tablets (each 50 mg. carbenoxolone sodium) to be taken three times a day after meals for the first week, followed by one tablet three times a day for the next three weeks, the tablets best being taken with a little water or milk.

Invaluable treatment for **PRURITUS** and other skin conditions

A bland, sedative germicidal cream possessing powerful local anaesthetic properties. It is of great value in the treatment of eczematous conditions, pruritus tinea and other skin infections due to bacteria or fungi. The soothing effect produced on the application of R.B.C. in cases of intractable itching materially assists healing by promoting sleep and preventing rubbing and scratching

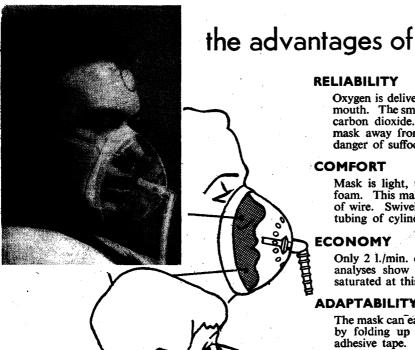

Professional sample and literature on request from

TANKERTON

KENT

RELIABILITY

Oxygen is delivered direct to the patient's nose and mouth. The small volume prevents accumulation of carbon dioxide. The semi-rigid plastic holds the mask away from face if oxygen supply fails. No danger of suffocation.

COMFORT

Mask is light, transparent and edged with plastic foam. This makes close fit, without the discomfort of wire. Swivelling inflow pipe reduces drag from tubing of cylinder.

ECONOMY

Only 2 1./min. of oxygen are required. Blood gas analyses show that the blood becomes normally saturated at this low flow.

ADAPTABILITY

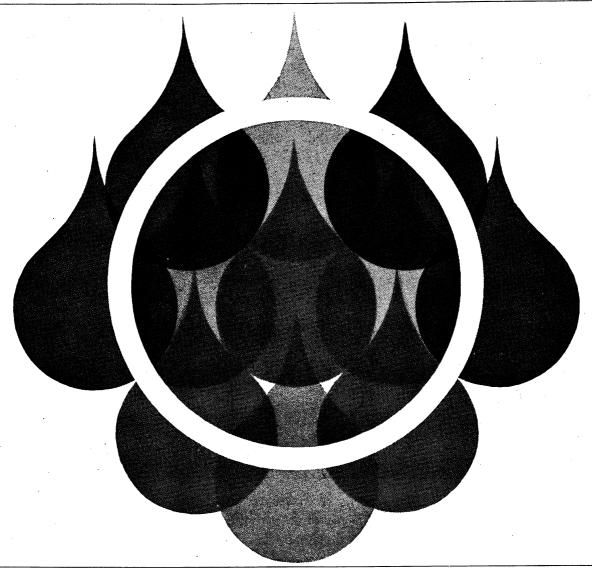

The mask can easily be adapted to fit young children by folding up the lower corner and fixing with adhesive tape.

USED BY LEADING HOSPITALS THROUGHOUT THE COUNTRY Cost. MC masks are individually packed in polythene bags containing full instructions and are available at quantity discounts or 3/6 singly. The improved efficiency and great economy in oxygen more than repay the slight extra initial

Obtainable from

*Prodexin regd.

continuous drip control of ulcer by tablet

PRODEXIN tablets give all the benefits of continuous intragastric drip therapy ¹ without any of its disadvantages.

The slow suck down tablets are specially formulated to give prolonged antacid buffer effect, unaffected by stomach emptying rate.₂

Immediate relief of pain is achieved by rapidly raising pH to 2 neutralising excess acid and controlling the acid secretion by slowly building up the pH to a desirable level of pH3.5 and pH4.5

DOSAGE:

For continuous therapeutic effect one tablet at a time should be sucked slowly. For peptic ulcer one or more tablets an hour.

New compound unrelated to thiazides, aldosterone antagonists or carbonic anhydrase inhibitors To combat serious sodium and water retention and cause less potassium loss

Lasix-the new

4-chloro-N-(2-furylmethyl)-5-sulphamoylanthranilic acid

Less potassium loss

produces only half the potassium loss of the thiazides for the same volume of water excreted; conversely, doubles water and sodium excretion for the same potassium loss as the thiazides

Starts to act where thiazides stop

effective where thiazides fail: when thiazides give no further response Lasix gives an immediate increase in diuresis

Precise control of response

diuresis lasts about four hours, can be adjusted to suit patient's convenience—taken at teatime diuresis is over by bedtime: response is directly proportional to dosage

Clinical findings

"the Na/K ratio for [Lasix] (2.53) was considerably better than that for hydrochlorothiazide (1.64). The same difference was apparent in urinary potassium concentration, which was 34.8 milliequivalents/litre when [Lasix] was given, as opposed to 67.7 milliequivalents/litre during hydrochlorothiazide therapy."

Lasix "is distinctly superior in diuretic action, fluid output being 200% greater and sodium excretion 167% greater than the levels achieved by hydrochlorothiazide."

"The danger of hypokalaemia appears to be less during [Lasix] treatment than during treatment with other diuretics at present in use. No other significant side-effects have so far been observed."

Experimental Investigations and Clinical Trials of Lasix

Dtsch. med. Wschr. 1963. 88, 1695

Some facts about Lasix

Lasix belongs to a new group of compounds with diuretic activity that is valuable whenever the risk of hypokalaemia has to be minimized, and it obviates the concurrent administration of potassium salts. It has a powerful effect on sodium and water excretion, and works even in severe sodium retention when thiazides have failed

Lasix has a superior action to other diuretics and it has an exceptionally high therapeutic reserve in comparison with them, so that it is possible to increase the dosage with safety up to 500 mg. daily until the desired therapeutic effect is obtained. The usual dosage range is 40-120 mg.

Lasix is also one of the very few diuretics that can be administered intravenously. Onset is immediate and lasts for up to two hours. This makes Lasix particularly valuable in emergency treatment.

Lasix acts by inhibiting tubular reabsorption of sodium. It is indicated in cardiac, hepatic and renal oedema. Lasix is very well tolerated: few side-effects have been reported, none serious

Lasix is one of the safest and most potent diuretics to be introduced to the medical profession this decade. Less potassium loss
Starts to act where thiazides stop
Precise control of response

diuretic

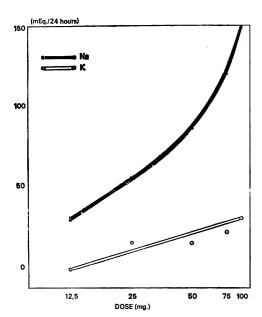

Figure 1 shows the oral dose-response curve in healthy human subjects. At the presently recommended doses sodium excretion is still rising steeply while pctassium excretion shows only a small linear increase ¹

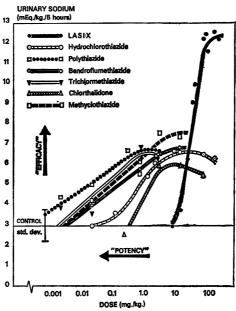

Figure 2 shows the dose-response curves of different diuretics in rats, and demonstrates dramatically how much more powerful is the diuresis produced by Lasix.³

Presentation and Price: Lasix is presented as tablets of 40 mg. in containers of 50 and 250 at basic NHS prices of 32/6d and 154/4d; and in ampoules containing 20 mg. in 2 ml. in packages of 5 and 25 at 17/9d and 84/4d. These prices are subject to P.T.

Three effective dosage schemes can

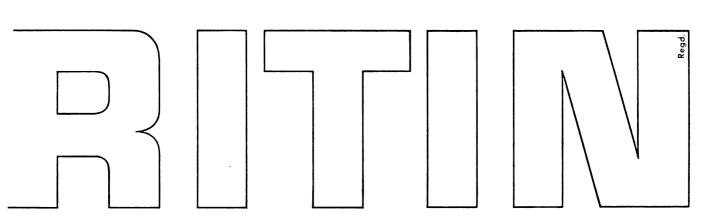

1 Routine Dosage

Doses of 250mg. q.i.d. of Penbritin will usually suppress *H. influenzae*, the most important pathogenic organism in Chronic Bronchitis, with consequent relief of exacerbations. In the majority of cases, this method, repeated whenever an exacerbation occurs, is all that is required to keep the patient ambulant.

2 Prophylaxis

When continuous daily treatment is considered desirable, one capsule (250mg.) is recommended every twelve hours.

- **1** Lancet, (1964), 2, 445
- 2 Thorax, (1964), 19, 298
- 3 Lancet, (1964), 2, 444

Chronic Bronchitic

now be considered for bronchitic patients

3 High Dosage Therapy

This technique offers great promise in the treatment of winter-long purulent cases, particularly those which fail to respond to other antibiotic regimens¹ or who have previously required continuous antibiotic cover². Moreover, many of the patients remained free from exacerbations for long periods after treatment was stopped. These high doses have been given without side-effects¹.².

A likely explanation for these clinical results is that a concentration of Penbritin bactericidal to *H. influenzae* has been attained in the sputum^{1,2,3}, and estimations of sputum level of the antibiotic give support to this probability². A bactericidal concentration of the tetracyclines is unattainable in any practical dosage². One of the authors² commented:

'Such a response to other antibiotics is, in our experience, extremely rare in patients of the type taking part in this trial.'

12 December 1964 **ADVERTISEMENT**

I feel awful 99

Once she might have been diagnosed as "anxiety state". Today, you know she might be a depressive, but it doesn't seem as simple as all that. The truth of the matter is that patients don't always fit neatly into diagnostic categories. They may suffer from such diverse symptoms as depression, agitation, loss of appetite and tensionfatigue at the same time.

The great strength of 'Aventyl' is that its beneficial actions range widely over the symptoms which plague these problem patients. 'Aventyl' is not merely an antidepressant, nor is it a combination of drugs. It is a single substance which relieves a constellation of mental and emotional symptoms embracing depression, anxiety and their effects on awareness and mood.

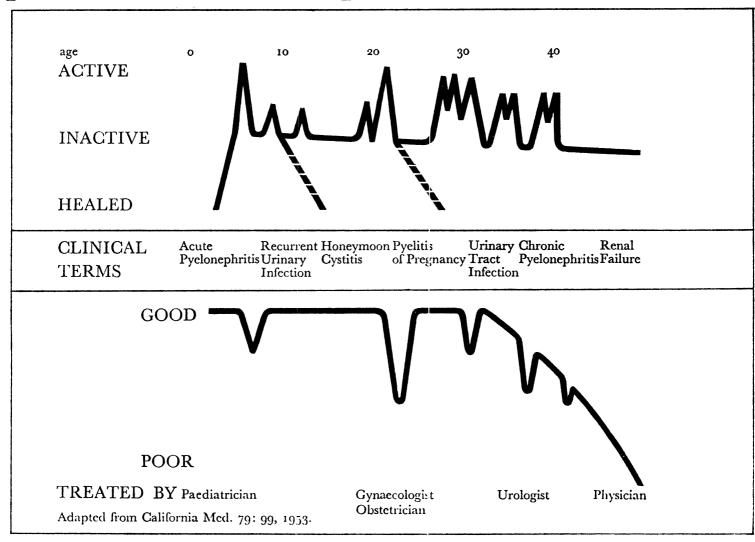

'Aventyl' is not a monoamine oxidase inhibitor, and no serious side-effects have been reported at the recommended dosage.

AVENTY Lightens the troubled mind

Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulatory patient

66In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.?? (Medical Times 1958, 1:74)

NULACIN TABLETS have been developed so that when allowed to dissolve slowly in the mouth, they give continuous milk-alkali drip therapy and provide a treatment of peptic ulcer and other conditions associated with hyperacidity. The effectiveness of Nulacin therapy has been established by clinical work in many countries. The following are a few references to the literature:

FOR THE PREVENTION AND TREATMENT OF CHILBLAINS

Two factors which predispose to chilblains are defective peripheral circulation and diminished coagulability of the blood. ADAPRIN counteracts both these defects with a combination of nicotinamide and acetomenaphthone. Nicotinamide improves peripheral circulation without the unpleasant side effects which rapid vasodilatation with nicotinic acid often produces. Acetomenaphthone, Vitamin K analogue, corrects hypoprothrombinaemia and restores the coagulation to normal. ADAPRIN is non-toxic, and may safely be given to both children and adults over long periods for prevention of chilblains. Literature and professional samples on request from Ward, Blenkinsop & Co. Ltd., Fulton House, Empire Way, Wembley, Middx. Telephone: WEMbley 8686

NORYAL

AN ORAL TREATMENT FOR HAEMORRHOIDS

Norval capsules contain dioctylsodium sulphosuccinate 60 mg. and taken orally will reduce the tendency to haemorrhoidal bleeding. Taken regularly Norval will ensure a softened stool without increasing bulk or having a laxative effect. Dioctylsodium sulphosuccinate works by reducing surface tension, penetrating into the hard impacted faecal mass, softening the faeces and eliminating the need to strain to stool.

SAFETY

Dioctyl-sodium sulphosuccinate is not absorbed and does not break down during its passage through the intestine.

There is no evidence to suggest that Norval will decrease in effectiveness when used regularly for indefinite periods of time. Norval eliminates the strain to stool and is a rational approach to the prevention of haemorrhoidal bleeding.

PRESENTATION AND BASIC N.H.S. PRICE

Norval capsules are available in bottles of 30 and 250 at basic N.H.S. prices of 3/10d. and 20/-respectively. Norval is not advertised to the public and has no B.P. equivalent. Norval is subject to purchase tax.

XIV

D-VAC Pollens

The new

3-injection

course for protection against hay fever

Hay Fever sufferers can look forward with relief to next summer, by receiving a short course of desensitisation with D-Vac Pollens.

D-Vac Pollens is a 'depot' pollen vaccine formulated by the Bencard Allergy Unit. The new 3-dose course is the outcome of three years' experience with D-Vac Pollens in allergy clinics, showing it to be safe and at least as effective as aqueous vaccine.

D-Vac Pollens is available as two alternative courses:

Primary Course: For patients who have not previously been desensitised or who are known to be excessively sensitive to grass pollens; and for children (aged 6-12 years).

Advanced Course: For patients aged over 12 who have had previous pollen treatment and whose symptoms are not excessively severe.

Action now against hay fever will bring its reward next summer

The 3 injections are administered at 4-week intervals starting between 1st and 20th February. Because D-Vac Pollens is prepared specially to order, prescriptions (marked 'Primary' or 'Advanced' Course) should be made out and orders placed **before 31st December**, and should indicate the date in February on which the first dose is required.

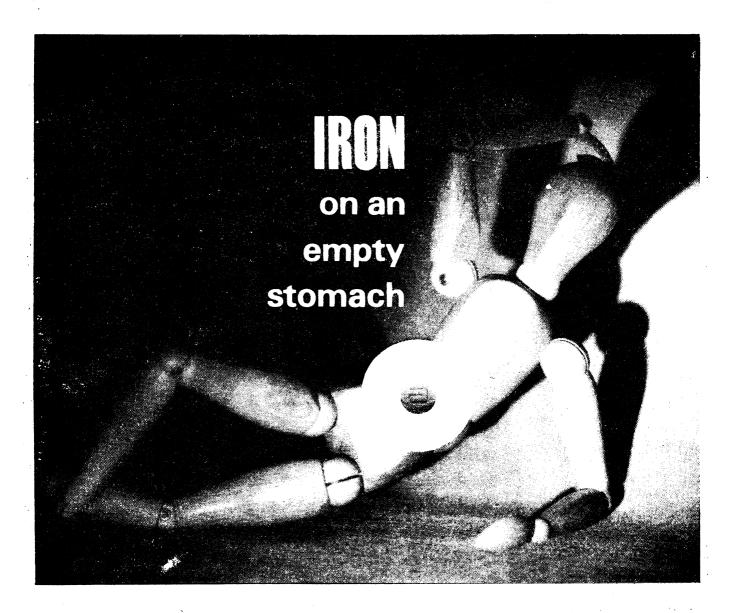

The Wellcome Medical Diary

During the past few weeks, thousands of Wellcome Medical Diaries have been dispatched to members of the medical profession all over the world.

The Wellcome Medical Diary has been distributed every year since 1897-

Yet another example of Wellcome service to medicine.

To prescribe iron before breakfast would be asking for trouble with ordinary ferrous sulphate tablets. Even taken after meals and in divided doses, such tablets cause irritation and unpleasant side effects in many patients, often leading to the abandonment of therapy.

But "One FERRO-GRADUMET ® tablet before breakfast" is right. This once-daily haematinic is made to be taken on an empty stomach, for the Ferro-Gradumet is a unique approach to the treatment of iron-deficiency anaemia. Just one tablet daily, before breakfast, gives steady, trouble-free assimilation of ample amounts of iron. Instead of releasing a corrosively large dose of ferrous sulphate in the stomach, the Gradumet slowly leaches out its contents over a period of hours throughout the gastro-intestinal tract until, finally, the empty matrix is excreted.

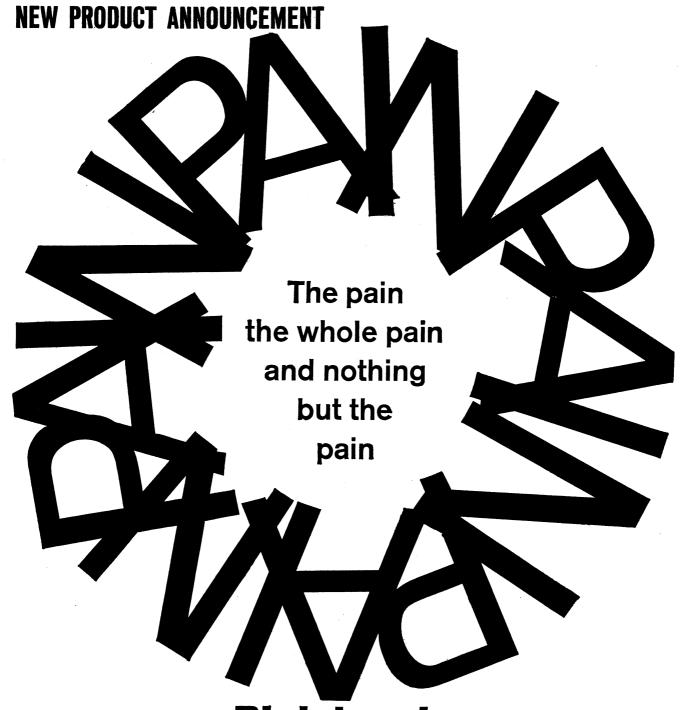

The secret of the Gradumet lies in this inert sponge-like matrix, the pores of which are permeated with ferrous sulphate and a soluble "channelling agent". The predetermined release pattern, which is independent of body chemistry, retains the greater part of the ferrous sulphate until the tablet has passed out of the stomach into the small intestine, where it is better absorbed with less irritation.

Each Ferro-Cadumet tablet contains the exsiccated equivalent of 525 mg ferrous sulphate, providing 105 mg elemental iron—a sufficient daily dose in all cases of iron-deficiency anaemia.

PRESENTATION Each red Filmtab ® (film-coated tablet, Abbott) contains 525 mg ferrous sulphate (in exsiccated form), equivalent to 105 mg elemental iron.

® GRADUMET and FILMTAB are Registered Trade Marks

When you prescribe Aludrox* for your ulcer patient you enable him to enjoy a sensible, near normal diet. Aludrox controls excess gastric acidity and allows digestion to proceed normally. Furthermore, it protects the damaged mucosa and allows healing to proceed undisturbed behind a protective layer of aluminium hydroxide gel. John Wyeth & Brother Ltd., Taplow, Maidenhead, Berks.

IPEXON is an expectorant, demulcent, bronchodilating linctus indicated for the symptomatic treatment of productive cough

FORMULA
Guaiphenesin
(glyceryl guaiacol ether) 100 mg.
Ephedrine Hydrochloride 18.3 mg.
Sucrose 2.5 g
Glycerin 1.25 ml.
Aromatic flavoured vehicle to 5 ml.

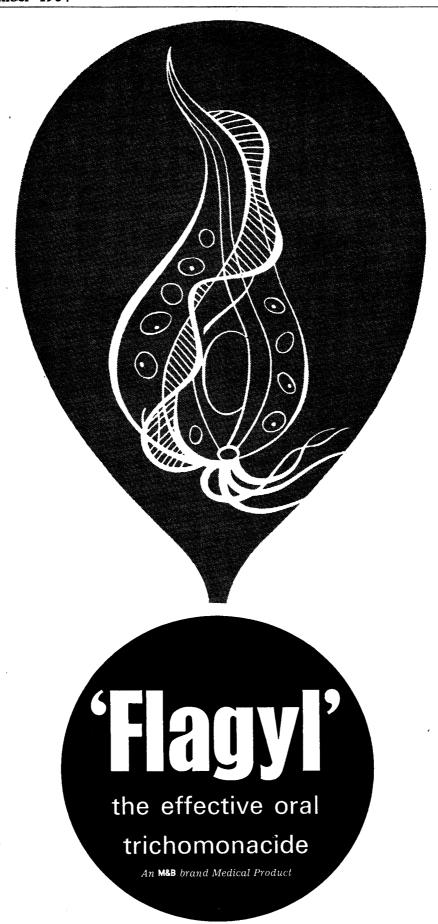

PRESENTATION
IPEXON Expectorant is
available in bottles of 4 fl. oz.
A plastic measuring spoon is
included in each pack so that
doses can be measured accurately.

DOSAGE
Adults 5 ml. (1 teaspoonful)
3 to 4 times daily.
Children 2—12 years of age—
2.5 ml. (½ teaspoonful) 3 to 4 times daily. Under 2 years of age 2.5 ml.
(½ teaspoonful) once or twice daily.

IPEXON Expectorant is an excellent combination of drug properties for use in the management of respiratory diseases in which difficulty in raising sputum is experienced.

AN EVANS MEDICAL PRODUCT

Alupent®

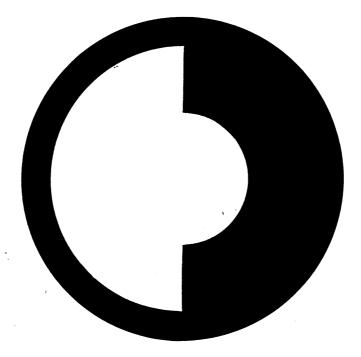

Where the problem is wheezing in chronic bronchitis

Effective routine treatment requires a bronchodilator which is both potent and well-tolerated by the patient.

Published evidence has shown that **Alupent** 20 mg. fulfils these requirements. In an objective study comparing **Alupent**, ephedrine, isoprenaline and methoxyphenamine by mouth spirometric measurements showed that **Alupent** 20 mg. produced the largest and most sustained bronchodilator effect over a period of four hours¹.

In a double-blind, controlled study of 35 chronic bronchitic patients, **Alupent** 20 mg. produced a significant mean increase of 21.5% in F.E.V.₁ in 32 patients. The incidence of side-effects with **Alupent** in this series was no different from that with the placebo tablet². This evidence shows that for effective prophylaxis of wheezing in chronic bronchitis

the Answer is Alupent 20 mg. q.d.s.

'Allegron' is a registered trade mark

new for the most effective management of inflammatory dermatoses

In the treatment of inflammatory dermaloses, Remiderm, which combines a highly effective antiseptic, halquinol, with the well-established topical corticosteroid, triamcinolone acetonide, rapidly relieves the inflammatory, pruritic or allergic symptoms, and at the same time, protects the lesion from secondary infection. Where infection is already present Remiderm hastens recovery by controlling the causative organisms, but, unlike the antibiotic-corticosteroid combinations, Remiderm has not been found to cause skin sensitization and cannot induce the development of antibiotic-resistant bacteria.

Remiderm is available in two forms: cream and ointment. Each contains triamcinolone acetonide 0.025% and halquinol (Squibb chlorhydroxyquinoline) 0.75%. Packs: 15 gm. tubes, 7/9 basic NHS price.

PHARMACEUTICAL PRODUCTS

Readers are reminded that prescribers' literature and clinical information are always available from advertisers on request.

ONE ORAL BROAD-SPECTRUM ANTIBIOTIC STARTS WITH INJECTION-LIKE PERFORMANCE AND ENDS WITH UP TO 2 EXTRA DAYS' PROTECTION

DEMETHYLCHLORTETRACYCLINE LEDERLE

.. by giving up to 3.5 times the in vitro tetracycline activity, combined with lower rate of serum decay and slower renal clearance ... a depot-like effect resulting from favourable protein binding... providing higher, sustained, rapid in vivo response ... and without risk of pain induration, abscess formation, and added cost of intramuscular therapy.

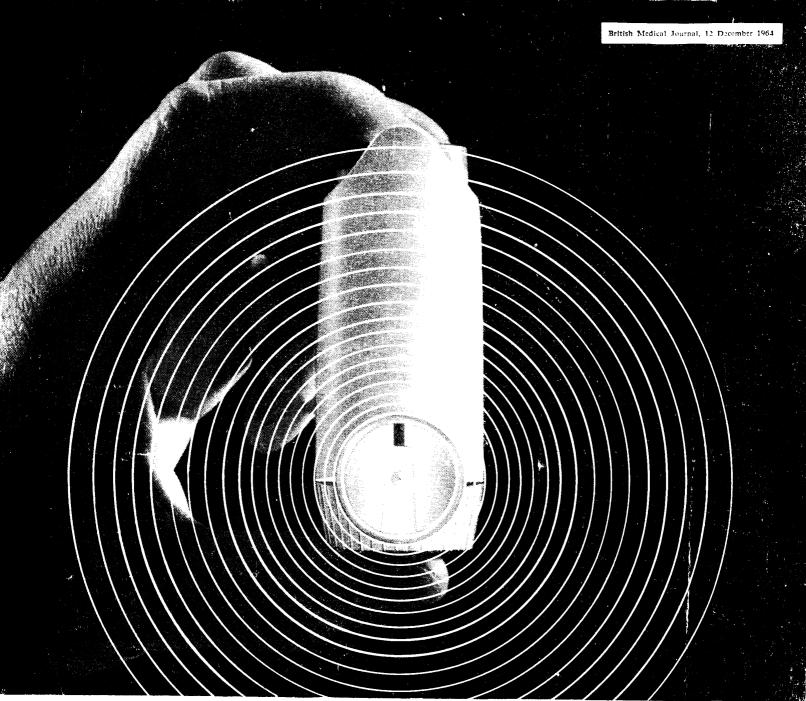

For adults: capsules/tablets 150 mg (1 q.i.d. or 2 b.i.d.). For children: pleasantly flavoured paediatric drops, 60 mg/cc (3 mg/drop), and syrup, 75 mg/5 cc teaspoonful (3-6 mg/lb/day).

Lederle Laboratories a division of Cyanamid of Great Britain Limited **Bush House London WC2**

"INSTANT BREATH"

In the asthmatic attack—profound relief in seconds

One or two inhalations from *Medihaler-iso* Forte can provide relief of bronchospasm comparable in speed and degree to that achieved by injection. Yet for the patient there is nothing simpler or more convenient to use whenever required. Each dose (0.4 mg. isoprenaline sulphate) contains over 85% by weight of particles between 2 and 7 microns in diameter—optimum for retention in the lungs. Treatment economy is assured because

each vial delivers over 300 doses at a cost of less than $\frac{3}{4}$ d. per dose.

Medihaler-iso Forte, Medihaler-iso and Medihaler-epi are now supplied with a new-style plastic oral adapter.

basic N.H.S. priœs Medihaler-iso Forte	complete	refill
