

OXFORD UNIVERSITY PRESS

To be published 7 January 1965

Samson Wright's Applied Physiology

REVISED BY CYRIL A. KEELE

Professor of Pharmacology and Therapeutics, University of London, at the Middlesex Hospital Medical School and

ERIC NEIL

John Astor Professor of Physiology, University of London, at the Middlesex Hospital Medical School

In this new edition, published less than four years since the previous edition, the revisers have completed the process of bringing the work completely up to date. Two sections, those on the digestive system and on the the endocrine glands have been rewritten; all other sections have been brought up to date. A number of the older illustrations which served little purpose in elaborating the text have been deleted,

Paper Covers 42s net

others have been reduced in size and a number of new ones added.

Dr J. B. Jepson has been responsible for matters relating to biochemistry and physical chemistry throughout the book.

ELEVENTH EDITION: 534 pages, 388 illustrations, Cloth Boards 60s net

Reprinted December 1964 with additions and corrections

An Introduction to Human Physiology

J. H. GREEN

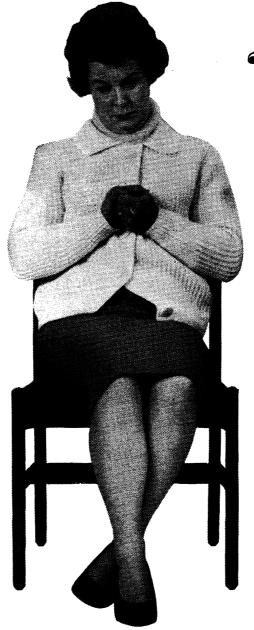

Reader in Physiology, University of London, at the Middlesex Hospital Medical School

This reprint has given the author an opportunity to revise the text in the light of recent advances and to add a small amount of new material. A section has been added on the thymus gland, in view of its current immunological interest, and brief accounts of the breath sounds, current views on memory storage, the

Paper Covers 21s net

use of hyperbaric oxygen and sinus nerve stimulation using implanted electrodes have also been included. Nine illustrations have been modified or redrawn and a number of minor revisions made to the text.

160 pages, 172 illustrations, Cloth Boards 35s net

Solution,
I feel awful

Once she might have been diagnosed as "anxiety state". Today, you know she might be a depressive, but it doesn't seem as simple as all that. The truth of the matter is that patients don't always fit neatly into diagnostic categories. They may suffer from such diverse symptoms as depression, agitation, loss of appetite and tension-fatigue at the same time.

The great strength of 'Aventyl' is that its beneficial actions range widely over the symptoms which plague these

problem patients. 'Aventyl' is not merely an antidepressant, nor is it a combination of drugs. It is a *single substance* which relieves a constellation of mental and emotional symptoms embracing depression, anxiety and their effects on awareness and mood.

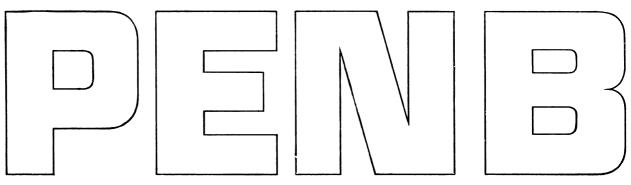

'Aventyl' is not a monoamine oxidase inhibitor, and no serious side-effects have been reported at the recommended dosage.

'AVENTYL' lightens the troubled mind

*Pulvules' of 10 mg. and 25 mg. Liquid: 10 mg. in each 5 ml., in bottles of 120 and 480 ml.

*Full information will be sent on request.

brings new hope to th

Three effective dosage schemes can no

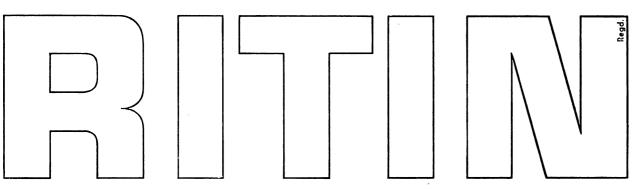

1 Routine Dosage

Doses of 250mg. q.i.d. of Penbritin will usually suppress *H. influenzae*, the most important pathogenic organism in Chronic Bronchitis, with consequent relief of exacerbations. In the majority of cases, this method, repeated whenever an exacerbation occurs, is all that is required to keep the patient ambulant.

2 Prophylaxis

When continuous daily treatment is considered desirable, one capsule (250mg.) is recommended every twelve hours.

- 1 Lancet, (1964), 2,445
- 2 Thorax, (1964), 19,298
- 3 Lancet, (1964), 2,444

e Chronic Bronchitic

v be considered for bronchitic patients

3 High Dosage Therapy*

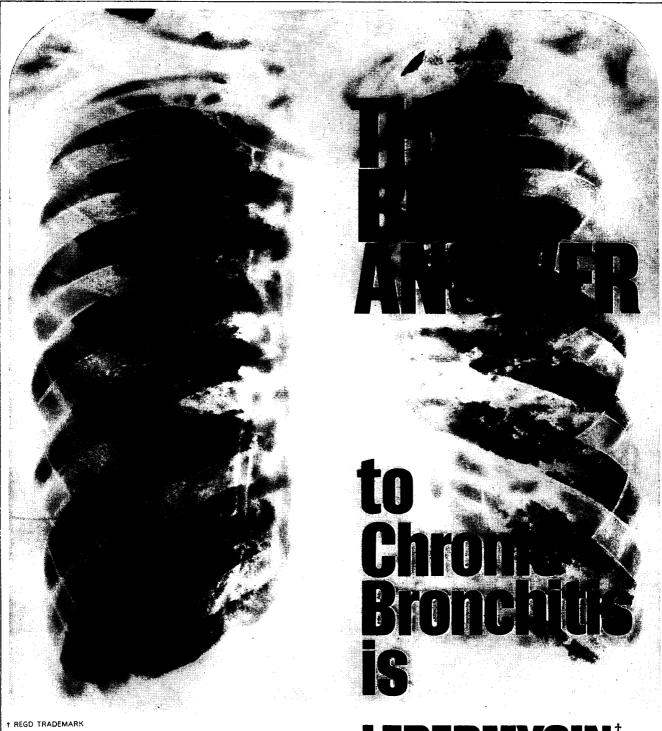

This technique offers great promise in the treatment of winter-long purulent cases, particularly those which fail to respond to other antibiotic regimens² or who have previously required continuous antibiotic cover². Moreover, many of the patients remained free from exacerbations for long periods after treatment was stopped. These high doses have been given without side-effects 1,2, A likely explanation for these clinical results is that a concentration of Penbritin bactericidal to H. influenzae has been attained in the sputum^{1,2,3}. and estimations of sputum level of the antibiotic give support to this probability². A bactericidal concentration of the tetracyclines is unattainable in any practical dosage². One of the authors² commented:

'Such a response to other antibiotics is, in our experience, extremely rare in patients of the type taking part in this trial'.

Aldactone-A

brand of spironolactone

for the water-logged patient

Many patients with oedema and ascites fail to get a complete response to diuretic treatment. An important cause of this resistance is excessive secretion of aldosterone, a sodium-retaining adrenal steroid.

In these water-logged patients the early addition of Aldactone-A (a selective aldosterone antagonist) to the diuretic programme is a compelling therapeutic necessity.

Aldactone-A acts as a booster to conventional diuretics, maintaining and enhancing their effect and enabling more complete diuresis to be achieved until 'dry weight' is regained. Aldactone-A also increases the safety of long-term diuretic therapy by minimizing potassium depletion. Finally, patients on Aldactone-A often feel better, function better, and may be permitted a more liberal diet.

Available as 25 mg. tablets in bottles of 30, 100 and 500.

Aldactone is a Registered Trade Mark

JUST PUBLISHED

TO-DAY'S DRUGS

This book has just been published — on 22 December. It is based on a series of review articles which were printed in the "To-day's Drugs" section of the *British Medical Journal* between January 1963 and May 1964. These articles have been edited and brought completely up to date so as to form an authoritative and practical guide to modern therapeutics. The book is designed to cover the drug treatment of those common conditions which are met with in general and hospital practice. There are important sections dealing with antibiotic therapy, cardiovascular conditions, rheumatic disorders, oral contraceptives, and the special problems involved in paediatric and geriatric prescribing. Special attention has been paid to the precautions which should be taken in using these drugs and their toxic and side-effects. This book should be of value to all doctors concerned in the day-to-day treatment of patients.

NORMAX

THIS CAPSULE

PROMOTES REGULARITY

It contains dioctyl-sodium sulphosuccinate 60 mg, and 1-8 dihydroxyanthraquinone 50 mg.

Normax acts by softening the faeces and gently stimulating colonic peristalsis. It is indicated especially during pregnancy and for the elderly patient, when its gentle action in restoring regularity is most appreciated.

1-8 dihydroxyanthraquinone acts on the lower bowel and has no irritant actions. Dioctylsodium sulphosuccinate is not absorbed and does not break downduring its passage through the intestine.

Dioctyl-sodium sulphosuccinate acts by lowering the surface tension of the impacted faecal mass and in association with the mild peristaltic movement induced by the 1-8 dihydroxyanthraquinone, leads to facilitated passage of soft stools. Animal experiments and extensive clinical observations have failed to reveal evidence of toxicity. 1.2.

Because of this the therapeutic effect of Normax can be obtained without the danger of toxicity. Normax has a wide application in the treatment of constipation and it retains its effectiveness even when used regularly over long periods. Normax restores regularity and is a rational approach to the treatment of constipation.

Normax capsules are available in bottles of 30 and 250 at basic NHS price of 4/10d. and 26/10d. respectively. Normax is subject to purchase tax.

DETAILED LITERATURE WILL BE SUPPLIED ON REQUEST.

FLEXIBILITY

'Esbatal' tablets give effective adrenergic neurone blockade of conveniently short duration. This allows flexibility of dosage in the early management of hypertension, and during routine maintenance therapy.

RAPIDITY

'Esbatal' provides all the advantages of rapid stabilisation in essential and malignant hypertension, and in hypertensive heart failure. The quick onset of action makes it particularly useful in hypertensive crises; an effective oral dose will begin to lower blood pressure in two hours.

Side-effects are minimal,

being only those necessarily associated with adrenergic neurone blockade. Diarrhoea is practically unknown.

Available as 10 mg. and 50 mg. scored, peach-coloured tablets.

'And adepts in the speaking trade'
Keep a cough by them ready made'
REV. CHARLES CHURCHILL

But for those who do not regularly indulge in 'the speaking trade', a cough is no blessing.

'Actifed' Compound Linctus provides rapid and effective relief from coughs and congestion. It combines the decongestant properties of pseudoephedrine and the antihistamine effect of triprolidine with the proven cough-controlling action of codeine.

It is indicated in unproductive cough, cough with cold or cough with bronchitis or allergy, in young or old.

new for the most effective management of inflammatory dermatoses

In the treatment of inflammatory dermatoses. Remiderm, which combines a highly effective, antiseptic, halquipol, with the well-established topical corticosterold, triamcinolone acetonide, rapidly relieves the inflammatory, pruritic or allergic symptoms, and at the same fine, protects the lesion from secondary infection. Where infection is already present. Remiderm hastens recovery by controlling the causative organisms, but, unlike the antibiotic-corticosteroid combinations, Remiderm has not been found to cause skin sensitization and cannot induce the development of antibiotic-resistant bacteria.

Remiderm is available in two forms: cream and ointment. Each contains triamcinolone acetonide 0.025% and halquinol (Squibb chlorhydroxyquinoline) 0.75%.

Packs: 15 gm. tubes, 7/9 basic NHS price.

the delicate balance of diabetes is safely held by RASTINON

The problem of successfully balancing the diabetic between hyperglycaemia and hypoglycaemia has always been difficult. The action of Rastinon is to hold this balance safely stable.

Rastinon releases endogenous insulin which ensures that blood sugar is maintained at the normal level. Rastinon is indicated in the treatment of the maturity-onset type of diabetic. It is safe,

effective and economical. Rastinon tablets each contain 0.5 G. tolbutamide B.P.

Nulacin and only Nulacin provides intragastric milk-alkali drip therapy

66In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy. 99 Med. Times, N.Y., 1958, 1, 74

Safe, Simple, **Effective**

In treating peptic ulcer a Ryles tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.

AMENDED ADVERTISEMENT ABSTRACTS OF WORLD MEDICINE

ASSISTANT EDITOR

The Council of the British Medical Association invites applications from registered practitioners for the appointment of Medical Assistant Editor of Abstracts of World Medicine at a salary of £2,365 a year, rising by annual increments of £142 to £3,648 a year. In exceptional circumstances the initial salary may be above the minimum of the scale. The appointment will be for a probationary period of six months in the first place. The Association's Superannuation Scheme will apply on substantive appointment.

Preference will be given to candidates under 45 years of age with a wide knowledge of medicine (up to M.D. or M.R.C.P. standard) who can present evidence of literary ability M.D. or M.K.C.P. standard) who can present evidence of literary ability and/or journalistic experience. A knowledge of one or more foreign languages is highly desirable and an interest in the proper use of the English language essential.

Applications giving details of quali-

English language essential. Applications, giving details of qualifications and experience and accompanied by the names of three persons to whom reference may be made, should be addressed to the Editor of Abstracts of World Medicine, B.M.A. House, Tavistock Square, London W.C.1, and must be received before lanuary 31, 1965. January 31, 1965.

AUSTRALIAN MEDICAL ASSOCIATION ASSISTANT GENERAL SECRETARY

The Australian Medical Association invites applications from registered Medical Practitioners for appointment Assistant General Secretary. The position is a whole-time

The position is a whole-time one and private practice is not permitted. The salary for the post will be at the commencing rate of £3,750 per annum, plus superannuation rights on the basis of 10% of the salary, paid annually by the Australian Medical Association and 5% contributed by the appointee. The appointment is subject to confirmation after six the appointee. The appointment is subject to confirmation after six months service, and is terminable by three months notice on either side. Leave entitlement will be four weeks per annum.

Applicants should have had experi ence of private practice and experience in administration is desirable.

Applications, stating name in full, date of birth, qualifications, experidate of birth, qualifications, experience, marital status, together with the names and addresses of three persons to whom reference may be made, should be sent to the General Secretary of the Australian Medical Association, 77-79 Arundel Street, Glebe, New South Wales, to arrive not later than January 18, 1965.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent \(\pi \) testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. \(\times 259, \) N.H.S.).

\(\pi \) SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.
