

## A MONEY SAVING OFFER

Attention is drawn to the following special discounts offered to members of the British Medical Association

### FRED SNELGROVE LTD.

Furnishers, Jewellers and General Salesmen

We supply Carpets, Down Quilts, Bedding, etc., at 10% on the wholesale prices as invoiced to us. We give a note of introduction to Manufacturers' showrooms, where goods may be viewed as in a retail shop, which in most cases means a saving of 20% on normal retail prices. In the event of a customer being unable to visit showrooms, but knowing what is required, we will endeavour to obtain and supply as above if he will advise us as to the make and model. A charge is made for delivery—at cost. This is not excessive, and the saving is still more than worth while.

The same system applies to all Jewellery, Signet Rings, Wedding Rings, Brush Sets, Cut Glass, Barometers, Musical Boxes, etc.

Watches	Less 22½%
Cutlery, Fountain Pens, Lighters, Tape Recorders	Less 20%
Furniture (most makes), Perambulators, Cribs, etc.	Less 15-20%
Clocks, Infra-red Cookers, Electric Razors, Binoculars, Radio and Record Reproducers	Less 15%
Electric Blankets, Electric Fires, Oil Heaters, Typewriters, Lawn Mowers	Less 12½%
Refrigerators, Spin Dryers, Washing Machines, Electric Food Mixers	Less 7½-12½%

ALL DISCOUNTS QUOTED ARE OFF THE FULL RETAIL PRICE INCLUDING PURCHASE TAX

On acceptance of an order we require a deposit of 10%, the balance to be paid three days before delivery. We cover a very extensive range of goods and welcome all enquiries. If we cannot meet your requirements we can only regretfully tell you so.

(We do not deal in Television or Photographic equipment)

If you have a patient with a chronic itch  
a good scratch will help, but FENOSTIL  
is much more effective.

A few milligrams of FENOSTIL per day are sufficient to control symptoms associated with histamine release: Therapeutic ratio 14,800: Greater potency and longer duration of action than chlorpheniramine.

FENOSTIL—non-phenothiazine—reduces to a minimum the side effects often met with in anti-histaminics. Drowsiness is rare, and if it occurs, can usually be avoided by modification of dosage.

FENOSTIL may safely be prescribed in all cases of pruritus and skin allergies; allergic conditions of the nose; allergic conditions of the eye; sensitisation reactions.

FENOSTIL (dimethindene maleate) is available in two forms:

FENOSTIL RETARD, prompt yet long-acting tablets 2.5 mg. Tins of 20 x 100. Dose: 1 tablet morning and evening.

FENOSTIL SYRUP 1 mg/10 ml. Bottles of 100 ml. Dose:  $\frac{1}{2}$ -2 teaspoonsful two or three times a day.

# FOR THE WOMAN WHO IS NOT A B.Sc.

# A GREATER DEGREE OF SIMPLICITY IN ORAL CONTRACEPTION

There is virtually only one form of failure in oral contraception: patient failure. The patient, in spite of her checking systems with diaries and calendars, may miss a tablet or miscount the days of the interval. Such errors—when they occur—involve the doctor in unnecessary consultation and explanation. This led us to the development of Gynovlar 21, the first oral contraceptive with 21 tablets instead of the usual 20.

It is the 21st tablet which allows this surprisingly simple dosage scheme: ☐ 3 weeks' treatment ☐ 1 week's interval and so on without variation. The start of each new course is not subject to individual interpretation of the menstrual pattern and thus the risk of miscalculation by the patient is virtually excluded.

**THE SIMPLEST VISUAL CHECK:** Only the 21st tablet makes the Memo-Pack possible. This is a unique visual dispenser, in which each tablet is marked with the day on which it should be taken. The patient can therefore check at a glance whether she has followed the dosage correctly. The Memo-Pack reveals instantly without recording or pre-setting, whether the day's tablet has been taken. As long as a woman knows what day of the week it is she just can't go wrong.

## Today's Drugs—"New Oral Contraceptives"

"It is interesting to note that Gynovlar is the only product on C.I.F.C. trial in which patients have not completely missed any tablets. Presumably because of the more regular routine of tablet-taking, patients find it simpler to follow and are less liable to miss them.

The cycle length with this 21/7 regimen [3 weeks' treatment, 1 week's interval] of course is always 28 days".

*British Medical Journal, 8 August, 1964, p. 357.*

## Gynovlar 21 First with the 21st

### INDICATIONS

Contraception, Dysmenorrhoea, Endometriosis, Functional sterility, Normalisation of irregular cycles.

### DOSAGE

1 tablet daily for 21 days, followed by a tablet free interval of 7 days. Each new course of tablets is started on exactly the same day of the week as the previous course.

*N.B. The first course should start on the fifth day of the cycle.*

## of a NAVAL MEDICAL OFFICER

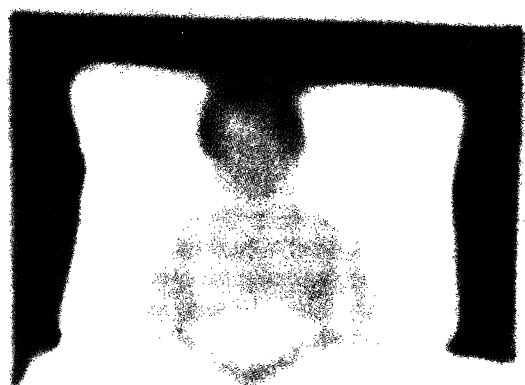

This is a life of unbounded opportunity. Anywhere in the world, you practise medicine with complete medical freedom. Among 100,000 Naval men and women you gain extensive medical experience of the most varied nature. Civilian patients, too, of both sexes and all ages, are treated in Naval hospitals. You have excellent opportunities for specialising in the normal clinical subjects, and in the less usual, such as Nuclear, Underwater, and Aviation medicine. You are actively encouraged and financially assisted to acquire higher degrees. You can gain consultant status.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your initial pay is considerably higher than that of a civilian hospital registrar. You can enter in one of three ways:

as a registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission. For fullest details of your Royal Navy life as a Medical Officer, write, mentioning your own qualifications and age to: **The Medical Director-General of the Navy, Medical Dept. # Glaxo's unique two-tier tablet for diuretic and anti-hypertensive treatment

---

## **Prompt anti-hypertensive/diuretic effect**

## **Delayed, sustained potassium release and absorption**

Glaxo's new two-tier tablet helps to counter the problem of potassium depletion during prolonged treatment. It is designed for gradual, sustained potassium release and absorption and to minimise gastric irritation.

---

This unique tablet design has been applied to two new products :

## **Neo-NaClex-K**

Bendrofluazide 2.5 mg, potassium chloride 630 mg—pink and white. In bottles of 25, 100 and 500.

## **Serplex**

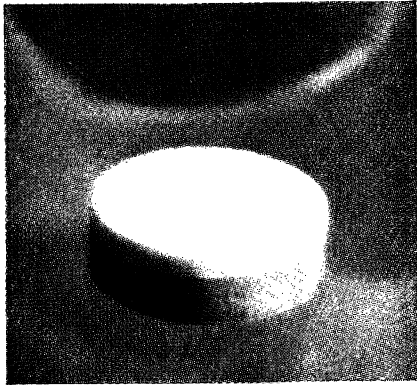

Reserpine 0.125 mg, bendrofluazide 2.5 mg potassium chloride 630 mg—blue and white. In bottles of 25, 100 and 500.

---

Neo-NaClex-K and Serplex are Glaxo trade marks

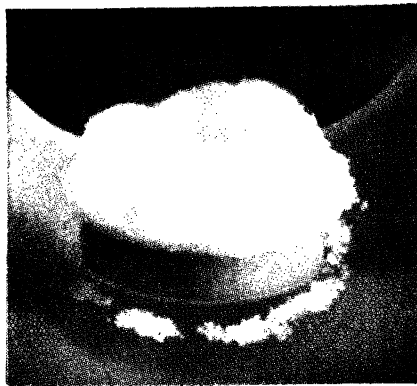

Detailed literature is available from Glaxo Laboratories Limited

### **How Neo-NaClex-K and Serplex tablets work**

The film-coated tablets are tasteless and easily swallowed.

---

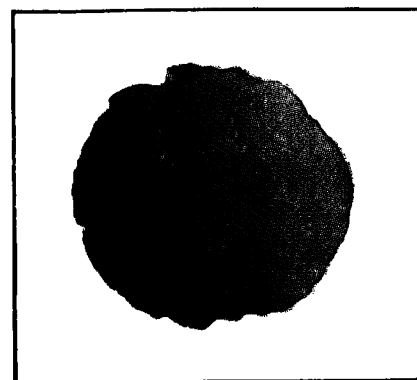

Very shortly after the tablet is swallowed, the white tier disintegrates and the diuretic/anti-hypertensive dose is available for absorption.

---

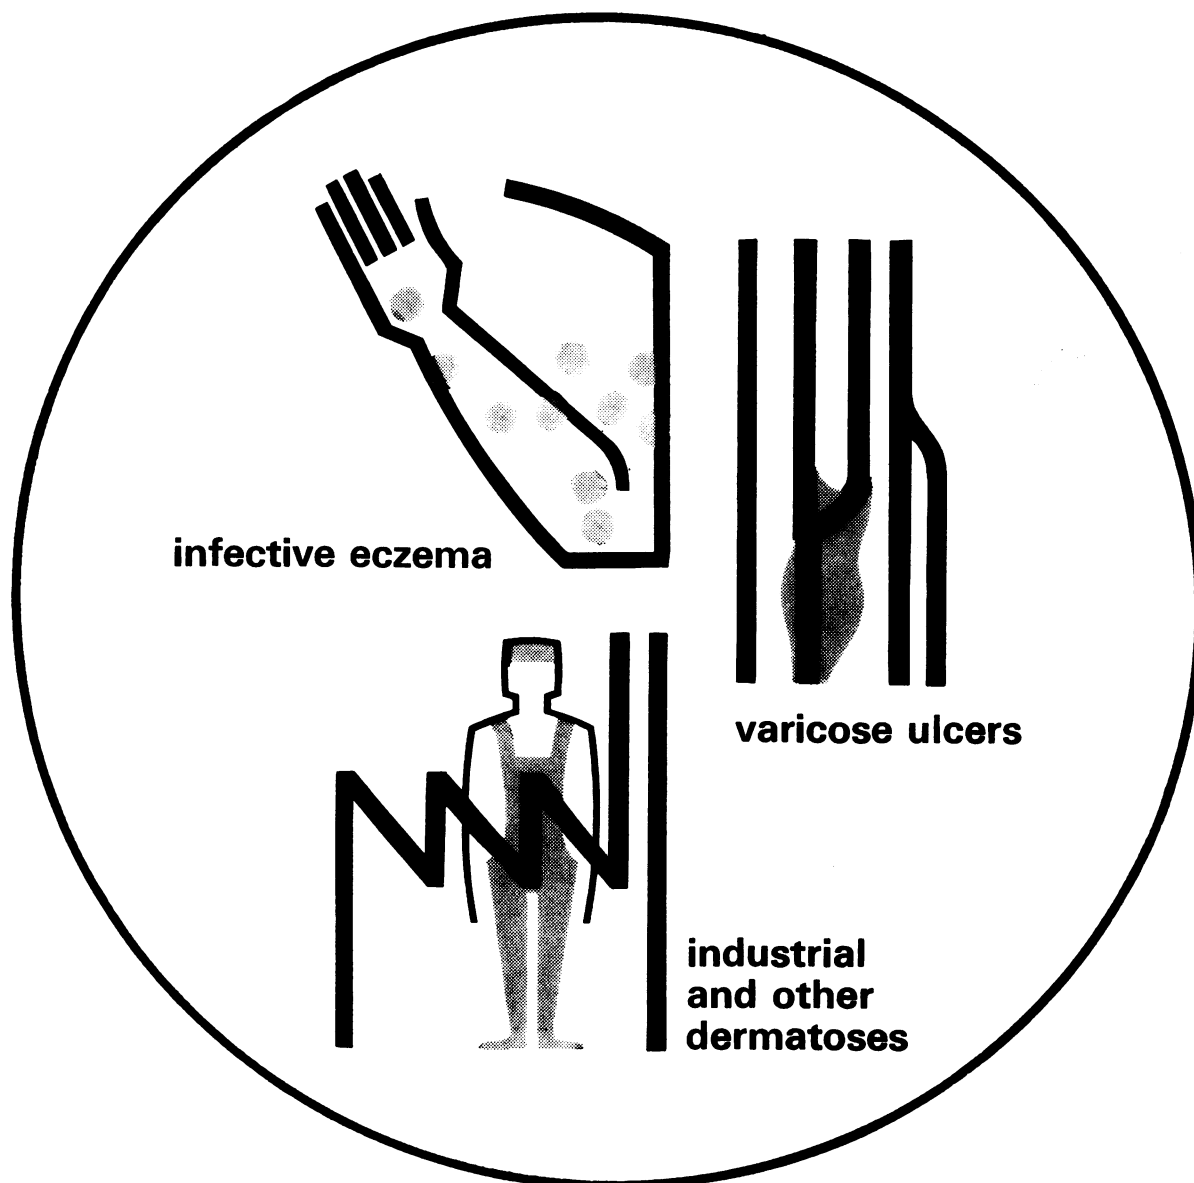

The coloured tier, containing potassium chloride crystals, is designed to give a gradual release of the potassium to minimise gastric irritation. Reliable absorption of this material from the intestine has been demonstrated.

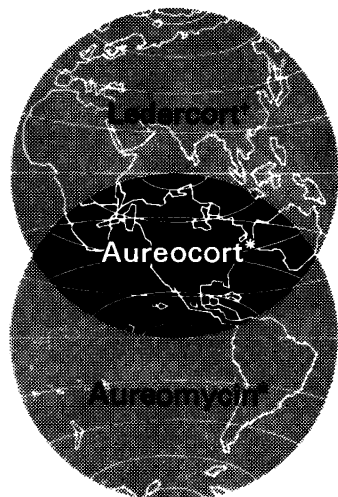

---

This tier dissolves slowly, exposing and releasing the crystals of potassium chloride very slowly so that no great concentration is reached at one time. The final photograph shows (after magnification) what remains of the coloured matrix after the potassium chloride has leached out steadily and completely for absorption.

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*"In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy."*

Med. Times, N.Y., 1958, 1, 74

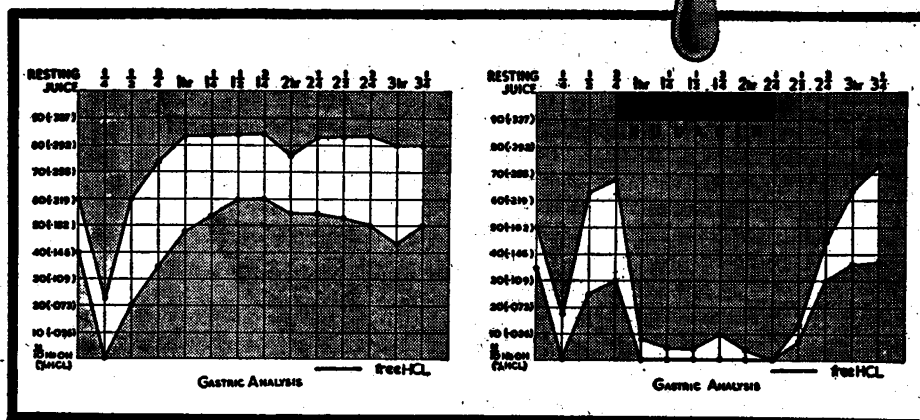

## Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable.<sup>1</sup> Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.<sup>8</sup>

# 'Nefrolan'

enables the physician to  
improve the patient's prognosis.

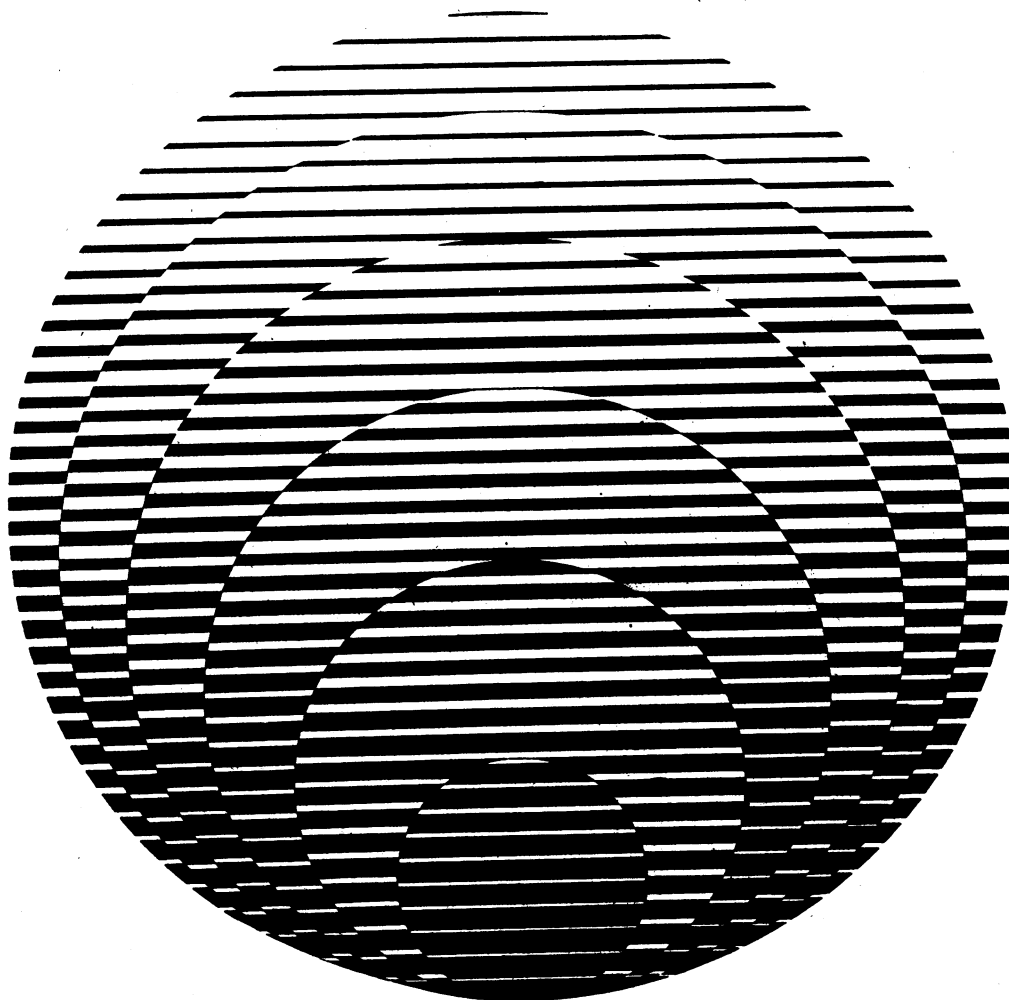

A product of  
May & Baker Research

Whether symptomless or not, hypertension can be effectively treated with 'Nefrolan'\* brand of clorexolone without fear of inducing distressing side-effects. Thus, by reducing high blood pressure to a safe level, the development of its serious and often irreversible complications is prevented. Where a more profound anti-hypertensive effect is required, 'Nefrolan' may be given in conjunction with reduced doses of more potent hypotensive agents. This minimises any resultant side-effects of the more potent drug.

*As with all anti-hypertensive agents, however, the administration of 'Nefrolan' should not be initiated prior to a full clinical investigation.*

At high dosage levels, 'Nefrolan' is also an effective oral diuretic.

Available as tablets of  
10 mg. for hypotensive use.  
25 mg. for diuresis and more severe hypertension.

'Tryptizol' is an outstanding antidepressant which has an additional tranquillising effect, making it particularly useful where anxiety is prominent. Since 'Tryptizol' is not a monoamine oxidase inhibitor, dietary restrictions are unnecessary.

Available as 25 mg and 10 mg tablets, a syrup, and an injection.  
Detailed information is available to physicians on request.

for, it also contains a highly effective antifungal antibiotic nystatin, which can prevent the monilial superinfection often found when tetracycline alone is given

Thus, the patient receiving this Mysteclin tablet can be protected against monilial side-effects such as diarrhoea; ano-genital pruritus and thrush.<sup>1</sup>

**DORBANEX**  
Dorbanex: trade mark  
softens the stool  
then gently evacuates  
the constipated bowel

Pain caused by hard, dry stools can be a distressing aspect of constipation. Discomfort leads to retention and, in turn, overloading of the rectum. But if – as with *Dorbanex* – treatment is directed at softening the stool and stimulating colonic peristalsis, the cycle of pain-retention-accumulation is broken. Defaecation is comfortable; anxiety is allayed; and the bowel is helped back to normal function.

Because *Dorbanex* contains the laxative 1 : 8-dihydroxyanthraquinone, *plus* a new faecal softening agent poloxalkol, it both softens and mobilises the stool. This dual action is invaluable in patients with anal fissures or haemorrhoids, and in obviating straining – an important consideration in elderly or cardiac patients.

Disadvantages of laxative treatment, such as unpredictability, griping, leakage, or interference with gastro-intestinal function do *not* arise with *Dorbanex*. Especially appreciated by patients old, young or pregnant are its advantages of small dosage (1 or teaspoonsful at bedtime) and palatability.

Each teaspoonful (5 ml.) of *Dorbanex* contains 25 mg. 1 : 8-dihydroxyanthraquinone and 200 mg. poloxalkol. Bottles of 60 ml. (4/-) and 500 ml. (30/-) P.T. extra.

# Why put ascorbic acid in an iron tablet?

The "Sidros Absorption Bridge" is built with Lego

## TO HELP YOUR PATIENT

The "Sidros Absorption Bridge" illustrates today's views on iron absorption. Iron is absorbed from the intestine only in its ferrous state. It is oxidized to the ferric salt on entering the mucosa and has to be reduced to ferrous iron before it can cross the barrier between mucosa and blood stream. Ascorbic acid acts as a reducing agent in this process.<sup>1, 2, 3</sup>

Each Sidros tablet contains 300 mg. ferrous gluconate and 30 mg. stabilized ascorbic acid.  
Dosage: 1-2 tablets three times daily.

Stabilized ascorbic acid is present in SIDROS to keep iron in its absorbable ferrous state in the alkaline environment of the bowel and to act as a reducing agent in the mucosa.

### And to help you

Fewer complaints. . . . The incidence of side effects with ferrous gluconate is one-fifth of that with ferrous sulphate.<sup>4</sup>

## Deca-Durabolin

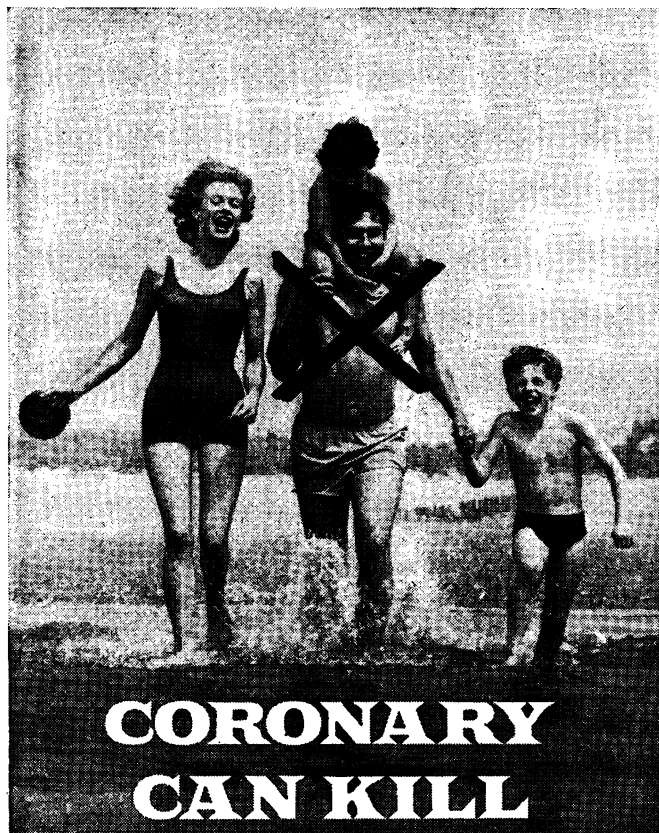

(nandrolone decanoate), 25 or 50 mg. per ml.  
for intramuscular injection.  
1 ml. Orgaject disposable syringes and  
1 ml. ampoules.

Durabolin and Deca-Durabolin stimulate tissue-building and counteract nitrogen loss in many clinical conditions. The effect in osteoporosis and in advanced breast cancer is often marked, leading to an improvement in the patient's general condition, relief of pain and a regression of specific symptoms. Other conditions in which these preparations are useful include severe debility, post-operative catabolism, severe trauma, slow-healing fractures, burns and renal failure—in all these, the correction of an adverse nitrogen balance helps in the patient's recovery.

Durabolin is ideal for initial therapy: it is normally given at weekly intervals. Deca-Durabolin is a longer acting form which is ideal for maintenance therapy: it only needs to be given every three weeks.

**Vacancy—Housing Estate, Irlam, Lancs**  
Applications invited for vacancy on new housing estate. There is no list but the successful applicant will be granted an Initial Practice Allowance if eligible. It is expected that 158 houses will be completed by November, 1965. The total estimated population will be 2,000. The temporary tenancy of a house will be granted to the successful applicant. He will be expected, within a period of two years, to lease land from the Housing Authority upon which to build practice premises. The appointed candidate will be required to take up office as soon as possible. Apply on Form E.C.16A not later than September 25, 1965, to The Clerk, Lancashire Executive Council, 42 West Cliff, Preston, Lancs. (11136)

LIVERPOOL EXECUTIVE COUNCIL  
(NATIONAL HEALTH SERVICE)

## Medical Practice Vacancy

**Cantrill Farm Estate**  
A vacancy exists for the first of a number of doctors who will be required to practise on the Cantrill Farm Estate. The estate is in the process of development and will eventually have an estimated population of 18,000, of which about 3,500 persons will be resident in the Liverpool portion of the estate, the remainder of the population being in the Whiston (Lancashire) part of the estate.

Some houses will be ready for occupation on the Liverpool part of the estate by the end of 1965. It is hoped that the Liverpool portion will be fully occupied in 1966.

Building of the Lancashire part of the estate will commence in 1966.

Initially, the Liverpool Corporation will make a house on the Liverpool part of the estate available at an economic rent.

The Lancashire Executive Council has invited the Lancashire County Council to provide on the Lancashire part of the Estate a Group Practice Centre with accommodation for six doctors, which will be adjacent to the Lancashire County Council clinics, thus establishing conditions designed to give the greatest possible likelihood of close co-operation between the doctors and the County Council's health and welfare services. The distance from one side of the estate to the other is approximately one mile and the present intention is that the group practice building will be erected in the centre of the estate in close proximity to the main shopping centre.

The Lancashire Executive Council will be responsible for appointing additional doctors as may be required to practise on the estate.

The house which is being provided for the doctor on the Liverpool part of the estate will only be available for a temporary period until such time as a group practice building on the Lancashire part of the estate is erected, when the Liverpool doctor will be expected to conduct his practice from the group practice building being provided. The Initial Practice Allowance will be paid to the appointed applicant subject to conformity to the standard terms and conditions prescribed by the Minister of Health.

So far as can be ascertained at the present time the doctor appointed will be expected to commence practice on the Estate about the end of the year.

Forms of application may be obtained from the undersigned, to whom completed application forms should be sent not later than October 14, 1965.—J. H. Sumner, Liverpool Executive Council, 36 Princes Road, Liverpool 8. (10695)

## South-Eastern Regional Hospital Board

COMBINED GENERAL PRACTICE  
PRINCIPAL/HOSPITAL APPOINTMENTS

Applications are invited from registered medical practitioners to fill two new posts in Livingston new town.

An integrated medical service is planned for this new town. The first two posts now offered combine general practice and hospital work, with the opportunity to participate in the health services operated by Midlothian County Council.

Each practitioner will have his own list of patients as a principal under the general medical services, and will hold a part-time appointment (five sessions weekly) in the district general hospital (Bangour General Hospital, West Lothian) in the grade of Medical Assistant, with placing dependent upon experience. An Initial Practice Allowance will be available in addition to capitation and other fees for general medical services and sessional payments in respect of hospital and local authority employment.

A dwelling house will be available to rent from the Livingston Development Corporation. Temporary surgery accommodation will be similarly available until completion of a comprehensive health centre.

Further information regarding these posts may be had from the Clerk, Lothians and Peebles Executive Council, 25 Stafford Street, Edinburgh 3, with whom applications, giving full details of age, qualifications and experience, together with the names and addresses of three referees, must be lodged not later than Thursday, September 30, 1965. ## Surgery—contd. on p. xlii

*Flt. Lt. John Bradshaw, M.B., Ch.B., has just taken up his first appointment on an R.A.F. Station. "I like the way the R.A.F. treats its doctors," he says. "The conditions of work are much better than in general practice under the National Health Scheme." Dr. Bradshaw is 24 and qualified at Sheffield. His wife is an ex-Nurse and they have two young children.*

# Before you commit yourself to a practice, work 3 or 5 years in the R.A.F.

You'll do some interesting, out-of-the-rut medicine, see a bit of the world, live well, and 'retire' with up to £3,000, tax free.

**If you are in your pre-Registration year,** here is something for you to think about.

You do not, now, need to take up your workaday N.H.S. career straight away. Furthermore, there are good reasons why you should not be in too much of a hurry. After 3 or 5 years you'll know, far better than you do now, where your particular talents and interests lie, and what sort of a future—personal as well as professional—you want to make for yourself. If you're a round peg, you'll know what a square hole looks like.

A short spell in the R.A.F. is, in fact, a *breathing-space*. It gives you the chance to make up your mind about all sorts of things.

You'd get your first job in the R.A.F. 3 months after you joined—probably as junior M.O. at a Station: rather like being an "Assistant with a view". In a typical case you could be one of two doctors with, between you, 1500 to 2500 people to take care of, and your own 'cottage hospital' with wards, theatre and laboratory, and secretarial as well as nursing staff.

You'd have a shorter list than a civilian G.P., and to this extent you would live a less strenuous life. To compensate, you would give more comprehensive care. It is this—and the variety of your work—that makes practice in the R.A.F. so interesting.

In the R.A.F. you combine several functions. You are in medical care not only of people, but of the environment they live in, and of the work they do. In proportion you do less curative work and more preventive work than is even possible for most civilian doctors.

A lot of people hold the view that this is the way all medicine should be practised: with the

closest possible integration of the doctor and the community.

## This is the choice you face

Think of two doctors, both aged 40. One went to his practice straight from his teaching hospital, and has been there ever since. The other went into the R.A.F. on a 5-year commission. He lived—and lived well—in the tropics with his family for 2½ years, and, on leave or on duty, visited 7 countries: two European, three Asiatic, and two Australasian. By now he's been in civilian practice for 10 years: he's as well established as the other doctor. But which of the two has got more out of life, and has the richer memories to look back upon?

*In many ways, the transition from hospital into the R.A.F. seems more 'natural' than the movement to civilian practice. You go from one community to another—and they have much in common: both are young, cheerful, energetic, rather self-contained—and at the same time very professional, with a marked sense of purpose. If you can feel, now, that you are going to miss Medical School—think about the R.A.F. Service life would probably be 'right' for you.*

## The vulgar matter of £. s. d. . . .

Next year, if you were in the R.A.F. as a married officer aged 25, your pay and allowances would be over £2000 and your cost of living would be low. If you were single, living in the mess, you'd get the equivalent of first class hotel accommodation and service for only a few shillings a day out of your pay.

*Leave the Service after 3 years, and you get a gratuity of £1,500, cash. Stay on for 5, and*

*you get £3,000. With this, you could put down a deposit on a house and furnish it very well indeed, attic to cellar.*

What a start to a civilian career!

## The time for bold decisions is when you are young and free

Today, because you are at the beginning of your career, you can take a short time out from the main stream of civilian practice *just by deciding to do it.*

Now, you are free to go. In a few years time, you probably won't be.

You'll have a practice 'with your name on it'; children who want a permanent home to strike roots in; and so on. It will be time for you to settle down.

Meanwhile, at the parting of the ways, you have this chance. Now is the time to find out about it.

The best thing is to write off straight away. If you can't—tear this page out and put it in your pocket to remind you.

The address to write to is: Wing Commander D. G. M. Hills, O.B.E., M.B., B.S., D.P.H., R.A.F., Ministry of Defence (MAI/HN206G), 1-6 Tavistock Square, London, W.C.1. Please give your age and qualifications.

## HOMES

## NORTHUMBERLAND HOUSE

Finchley, N.3. Tel. Finchley 5283  
A psychiatric Nursing Home. Elderly patients accepted. Moderate inclusive terms. Apply Resident Physician.

ST. ANDREW'S HOSPITAL,  
NORTHAMPTON

## FOR NERVOUS AND MENTAL DISORDERS

President: The Earl Spencer  
Medical Superintendent  
D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients. Both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

## WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

## MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch. For terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.
