## continuous drip control of ulcer by tablet

---

**PRODEXIN** tablets give all the benefits of continuous intragastric drip therapy<sup>1</sup> without any of its disadvantages.

The slow suck down tablets are specially formulated to give prolonged antacid buffer effect, unaffected by stomach emptying rate.<sup>2</sup>

Immediate relief of pain is achieved by rapidly raising pH to 2 neutralising excess acid and controlling the acid secretion by slowly building up the pH to a desirable level of pH3.5 and pH4.5

### **DOSAGE:**

For continuous therapeutic effect one tablet at a time should be sucked slowly.  
For peptic ulcer one or more tablets an hour.

## Pylura ointment provides rapid relief from the pain and discomfort of haemorrhoids

Pylura presents adrenaline and beta-eucaine lactate incorporated in a soft lanolin and petroleum jelly ointment to which phenol has been added to prevent infection and inflammation.

When applied locally, adrenaline causes constriction of blood vessels and is employed for this purpose in the treatment of haemorrhoids, fistulae and other inflammatory conditions of the anus and rectum where, for any reason, surgery is not desirable.

When these conditions are painful the local anaesthetic beta-eucaine lactate has been found extremely effective in alleviating such pain.

Pylura is supplied with a nozzle for easy application of the ointment. Full instructions with every tube.

## *Distalgesic erases pain*

Distalgesic relieves pain of all degrees, from toothache to malignancy. Two tablets three or four times a day give prompt and lasting relief, without the development of tolerance or physical dependence.

Distalgesic contains no opiate to cause constipation or addiction, and no salicylate to irritate the gastric mucosa. Its active principles are *dextropropoxyphene*, found in clinical trials to be as potent an analgesic as oral pethidine; and *paracetamol* to widen the range of analgesia and add a valuable antipyretic action.

Distalgesic tablets [No.1014] each contain 32.5 mg. dextropropoxyphene and 325 mg. paracetamol.

# Glaxo's unique two-tier tablet for diuretic and anti-hypertensive treatment

---

**Prompt anti-hypertensive/diuretic effect**

**Delayed, sustained potassium release and absorption**

Glaxo's new two-tier tablet helps to counter the problem of potassium depletion during prolonged treatment. It is designed for gradual, sustained potassium release and absorption and to minimise gastric irritation.

---

This unique tablet design has been applied to two new products :

## Neo-NaClex-K

Bendrofluazide 2.5 mg, potassium chloride 630 mg—pink and white. In bottles of 25, 100 and 500.

## Serplex

Reserpine 0.125 mg, bendrofluazide 2.5 mg potassium chloride 630 mg—blue and white. In bottles of 25, 100 and 500.

---

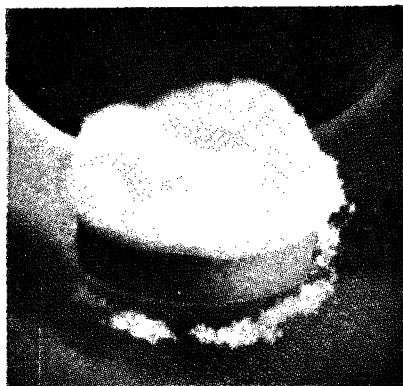

Neo-NaClex-K and Serplex are Glaxo trade marks

Detailed literature is available from Glaxo Laboratories Limited

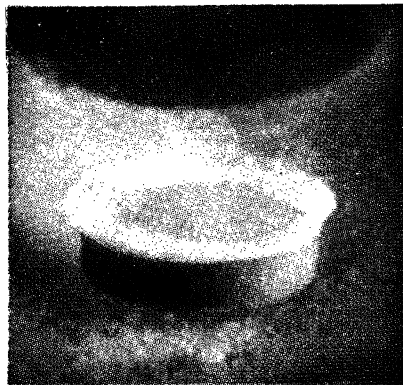

### **How Neo-NaClex-K and Serplex tablets work**

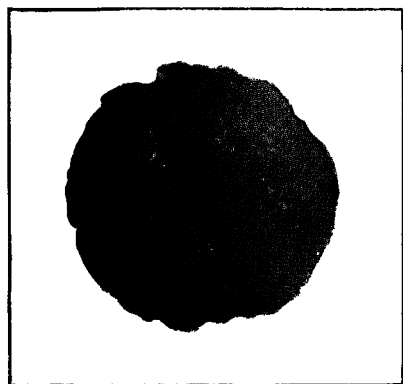

The film-coated tablets are tasteless and easily swallowed.

Very shortly after the tablet is swallowed, the white tier disintegrates and the diuretic/anti-hypertensive dose is available for absorption.

The coloured tier, containing potassium chloride crystals, is designed to give a gradual release of the potassium to minimise gastric irritation. Reliable absorption of this material from the intestine has been demonstrated.

This tier dissolves slowly, exposing and releasing the crystals of potassium chloride very slowly so that no great concentration is reached at one time. The final photograph shows (after magnification) what remains of the coloured matrix after the potassium chloride has leached out steadily and completely for absorption.

# INDOCID

INDOMETHACIN

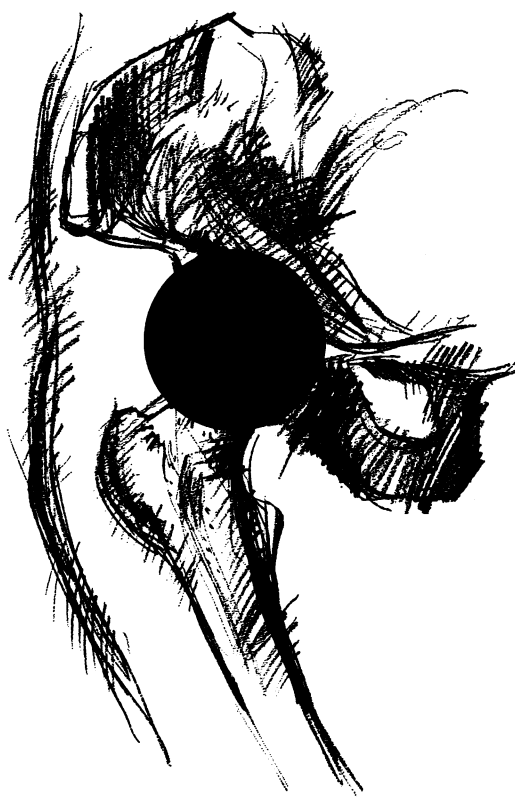

REGD

'Indocid' is a new, non-steroid anti-inflammatory agent with analgesic and antipyretic properties, chemically unrelated to the corticosteroids, phenylbutazone-like compounds or salicylates. Widespread clinical experience has shown that 'Indocid' rapidly relieves pain and inflammation and allows the patient greater mobility. In osteoarthritis, 'Indocid' is often effective where other agents are inadequate; it has given excellent results in osteoarthritis of the hip. In rheumatoid arthritis, objective evidence of effect may be seen as a measurable reduction of joint swelling. 'Indocid' has also proved effective in ankylosing spondylitis, gout, and certain soft-tissue disorders. 'Indocid' has been the subject of long and exhaustive clinical trials. A number of British papers have already been published.

'Indocid' is supplied as 25 mg capsules. Detailed information is available to physicians on request.

ANOTHER 'FIRST' FROM RIKER.....

## ....NEW 400-DOSE MEDIHALER

When Riker introduced *Medihaler* it was the world's first pressurised aerosol for inhalation therapy . . . first with a measured dose . . . first with a dry spray of premicronised particles for optimum effect in bronchospasm. Now Riker announce another first—the 400-dose *Medihaler*. More compact, yet giving one third more treatment from each unit new *Medihaler* is the result of continuous development and of successful use by doctors the world over. **With it the cost per dose is reduced 15 per cent, to less than ½d.**

Although each unit lasts so much longer, hygiene is improved because with each prescription the patient receives a complete unit. The empty unit, including adapter is thrown away. In addition, the dustcap completely encloses the mouthpiece.

In bronchospasm, *Medihaler* continues to provide an immediacy and degree of relief unsurpassed by any other method—including injection. Now it is even easier and more convenient for the patient to use.

# Now women can tear up their diaries and calendars...

# ...Gynovlar 21 eliminates the only known type of failure—patient-failure

Almost all oral contraceptives are virtually 100% reliable—if every tablet in the course is taken correctly. In order to make quite certain, most women keep checking systems with the aid of calendars and diaries. And in spite of the book-keeping (or maybe because of it) accidents do occur. These accidents can involve the doctor in a lot of unnecessary consultation and explanation.

In order to avoid all this, to do away with systems and diaries and calendars, the 21-tablet course was evolved. It is the 21st tablet which allows this surprisingly simple dosage scheme: ☐ 3 weeks' treatment ☐ 1 week's interval and so on without variation. The start of each new course is not subject to individual interpretation of the menstrual pattern and thus the risk of miscalculation by the patient is virtually excluded.

## The simplest visual check:

Only the 21st tablet makes the Memo-Pack possible. This is a unique visual dispenser in which each tablet is marked with the day on which it should be taken. The patient, therefore, can check at a glance whether she has followed the dosage correctly. Only the Memo-Pack reveals instantly, without recording or pre-setting, whether the day's tablet has been taken. As long as a woman knows what day of the week it is she just can't go wrong.

"It is interesting to note that Gynovlar is the only product on C.I.F.C. trial in which patients have not completely missed any tablets. Presumably because of the more regular routine of tablet-taking, patients find it simpler to follow and are less liable to miss them. The cycle length with this 21/7 regimen [3 weeks' treatment, 1 week's interval] of course is always 28 days."

**Today's Drugs—"New Oral Contraceptives"**  
British Medical Journal, 8 August, 1964, p.357

## INDICATIONS:

Contraception, Dysmenorrhoea, Endometriosis, Functional sterility, Normalisation of irregular cycles.

## DOSAGE:

1 tablet daily for 21 days, followed by a tablet-free interval of 7 days. Each new course of tablets is started on exactly the same day of the week as the previous course.

*N.B.—The first course should start on the fifth day of the cycle.*

# Heinz cooking retains the maximum nutritional value

Heinz use only the finest ingredients for their Baby Foods—superior, in fact, to those normally available to the average housewife.

Special cooking facilities, strict quality control—all these specialist resources combine to make Heinz Baby Foods exceptionally nutritious.

For a start, instrumentally controlled cooking ensures uniformity with each batch of foods, and prevents over-cooking.

Ingredients are carefully steam-cooked.

Once hot, the foods are exposed as little as possible to air; juices formed during cooking are retained to avoid loss of valuable soluble nutrients.

Strained foods are forced through

a fine sieve to eliminate any rough fibres or coarseness.

(With Heinz more advanced Junior Foods, ingredients are diced or minced prior to cooking.)

They are sterilized under carefully controlled conditions.

At every stage of this preparation, cooking and packing, Heinz Quality Control inspectors take samples from each batch of baby foods to ensure that the quality, taste, consistency, purity, and hygiene reach Heinz demanding standards.

For further details about Heinz Strained and Junior Foods, please write to: Foods Science Advisory Service, H. J. Heinz Co. Ltd. Hayes Park, Hayes, Middlesex.

## Is there a bronchial barrier

which prevents some of your patients  
with bronchitis from getting the benefit of the Tetracycline you prescribe?

### THE PROBLEM...

"Absorption of tetracycline is rather variable from patient to patient."<sup>1</sup>

"Tetracyclines are widely used in bronchitis

but often give relief rather than elimination of bacterial pathogens."<sup>2</sup>

### ...AND ITS EFFECTS

Permanent and irreversible lung damage can be prevented by tetracycline PROVIDED IT IS PRESENT IN SUFFICIENT QUANTITIES IN THE SPUTUM TO INHIBIT *H. INFLUENZAE*.

"The effective sputum level of tetracycline is 0.5 mcg./ml."<sup>3</sup>

BUT THE BRONCHIAL BARRIER  
RESTRICTS THE SPUTUM LEVEL

"The sputum level of tetracycline is 10-30% of the serum level in most patients."<sup>4</sup>

Since it has also been shown that up to 25% of patients can be poor tetracycline absorbers<sup>5</sup>, what happens to those bronchitics who have not achieved adequate serum levels?—they are prevented by the bronchial barrier from producing sputum levels capable of inhibiting *H. influenzae*.

### for concurrent depression and anxiety

As society becomes progressively more complex the problem of emotional disturbance grows steadily more acute. A wide variety of mental and emotional disorders, usually characterised by symptoms of both depression and anxiety, present the General Practitioner with an ever increasing volume of work. The development of psychotropic drugs has partially helped to alleviate this problem but it is now accepted that the treatment of one symptom alone may often lead to the

aggravation of the other<sup>1-5</sup>; this means that the use of an antidepressant together with a tranquilliser is often desirable.

*Triptafen is just such a combination in which both constituents are established and well-tried drugs.* The balanced formulation of antidepressant amitriptyline and tranquilliser perphenazine simplifies and facilitates the treatment of emotionally disturbed patients<sup>2-7</sup>. Triptafen offers efficacy, economy and simplicity of prescribing.

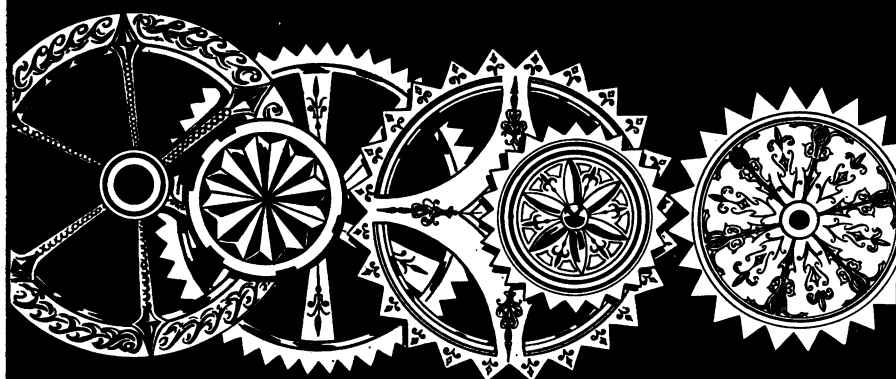

Each tablet contains amitriptyline hydrochloride 25 mg. and perphenazine B.P. 2 mg. 'Triptafen' is a registered trade mark.

## The international standard for a second...

... is 9,192,631,770 cycles of the hyper-fine resonance of the caesium atom. This, the most recent of the international standards, was adopted only in October 1964, when the International Committee on Weights and Measures met in Paris. Until then, the standard second had been 1/31,556,925.9747th of the year A.D. 1900, an astronomical measurement based on the daily rotation of the earth. The very high accuracy of the clocks physicists can now

build forced the reconsideration of this standard, and, in fact, it was inaccurate because the earth, instead of turning at an absolutely steady speed, was varying, so that the official second was getting longer and longer. The frequency of the radiation emitted by the caesium atom, on the other hand, is so accurate that even month-by-month changes in the earth's speed of rotation could be detected by atomic clocks.

## TRANSVASIN

is the standard therapy  
...for the relief of  
rheumatic symptoms

Patients suffering from rheumatic lesions obtain rapid relief with Transvasin, the well-proven and economical therapy. The esters of nicotinic, salicylic and p-aminobenzoic acids penetrate the skin and are concen-

trated on the point of injury, producing superficial erythema and deep hyperaemia. Transvasin is a valuable adjuvant in the treatment of osteo- and rheumatoid-arthritis.

# A really palatable flavoured PAS

Pasinah-D is the first PAS preparation in which the taste of Sodium PAS is successfully disguised when in solution. It dissolves completely in cold milk or water to make a pleasantly-flavoured, easy-to-take drink. Only two doses daily are required, and flavours may be alternated to give variety and lessen the danger of defaulting. Pasinah-D is very well tolerated and is specially acceptable to children.

**Surgery—contd. on p. xlv**

*Flt. Lt. John Bradshaw, M.B., Ch.B., has just taken up his first appointment on an R.A.F. Station. "I like the way the R.A.F. treats its doctors," he says. "The conditions of work are much better than in general practice under the National Health Scheme." Dr. Bradshaw is 24 and qualified at Sheffield. His wife is an ex-Nurse and they have two young children.*

# Before you commit yourself to a practice, work 3 or 5 years in the R.A.F.

You'll do some interesting, out-of-the-rut medicine, see a bit of the world, live well, and 'retire' with up to £3,000, tax free.

**If you are in your pre-Registration year,** here is something for you to think about.

You do not, now, need to take up your workaday N.H.S. career straight away. Furthermore, there are good reasons why you should not be in too much of a hurry. After 3 or 5 years you'll know, far better than you do now, where your particular talents and interests lie, and what sort of a future—personal as well as professional—you want to make for yourself. If you're a round peg, you'll know what a square hole looks like.

A short spell in the R.A.F. is, in fact, a *breathing-space*. It gives you the chance to make up your mind about all sorts of things.

You'd get your first job in the R.A.F. 3 months after you joined—probably as junior M.O. at a Station: rather like being an "Assistant with a view". In a typical case you could be one of two doctors with, between you, 1500 to 2500 people to take care of, and your own 'cottage hospital' with wards, theatre and laboratory, and secretarial as well as nursing staff.

*You'd have a shorter list than a civilian G.P., and to this extent you would live a less strenuous life. To compensate, you would give more comprehensive care. It is this—and the variety of your work—that makes practice in the R.A.F. so interesting.*

In the R.A.F. you combine several functions. You are in medical care not only of people, but of the environment they live in, and of the work they do. In proportion you do less curative work and more preventive work than is even possible for most civilian doctors.

A lot of people hold the view that this is the way all medicine should be practised: with the

closest possible integration of the doctor and the community.

## This is the choice you face

Think of two doctors, both aged 40. One went to his practice straight from his teaching hospital, and has been there ever since. The other went into the R.A.F. on a 5-year commission. He lived—and lived well—in the tropics with his family for 2½ years, and, on leave or on duty, visited 7 countries: two European, three Asiatic, and two Australasian. By now he's been in civilian practice for 10 years: he's as well established as the other doctor. But which of the two has got more out of life, and has the richer memories to look back upon?

*In many ways, the transition from hospital into the R.A.F. seems more 'natural' than the movement to civilian practice. You go from one community to another—and they have much in common: both are young, cheerful, energetic, rather self-contained—and at the same time very professional, with a marked sense of purpose. If you can feel, now, that you are going to miss Medical School—think about the R.A.F. Service life would probably be 'right' for you.*

## The vulgar matter of £. s. d. . . .

Next year, if you were in the R.A.F. as a married officer aged 25, your pay and allowances would be over £2000 and your cost of living would be low. If you were single, living in the mess, you'd get the equivalent of first class hotel accommodation and service for only a few shillings a day out of your pay.

*Leave the Service after 3 years, and you get a gratuity of £1,500, cash. Stay on for 5, and*

*you get £3,000. With this, you could put down a deposit on a house and furnish it very well indeed, attic to cellar.*

What a start to a civilian career!

## The time for bold decisions is when you are young and free

Today, because you are at the beginning of your career, you can take a short time out from the main stream of civilian practice *just by deciding to do it.*

Now, you are free to go. In a few years time, you probably won't be.

You'll have a practice 'with your name on it'; children who want a permanent home to strike roots in; and so on. It will be time for you to settle down.

Meanwhile, at the parting of the ways, you have this chance. Now is the time to find out about it.

The best thing is to write off straight away. If you can't—tear this page out and put it in your pocket to remind you.

The address to write to is: Wing Commander D. G. M. Hills, O.B.E., M.B., B.S., D.P.H., R.A.F., Ministry of Defence (MAI/HN206K), I-6 Tavistock Square, London, W.C.1. Please give your age and qualifications.

GREAT EXPECTORANTS  
FOR A DICKENS *of* a COUGH  
**Dimotane® Expectorant**  
**Dimotane® Expectorant-DC**

Most types of patients and most types of coughs respond to Dimotane Expectorant . . . a pleasant tasting combination of an excellent antihistamine, two proven decongestants and a highly effective expectorant. When additional cough suppressant action is indicated, Dimotane Expectorant-DC provides the same potent ingredients plus dihydrocodeinone bitartrate.

**formula:** Each 5 ml. of Dimotane Expectorant contains: Dimotane (bromphenira-

mine maleate), 2 mg.; (guaiphenesin), 100 mg.; Phenylephrine HCl, 5 mg.; Phenylpropanolamine HCl, 5 mg. Dimotane Expectorant-DC provides the above formula plus dihydrocodeinone bitartrate 1.8 mg. per ml.

**suggested dosage:** Adults—1 to 2 teaspoonfuls q.i.d. or more as necessary. Children— $\frac{1}{2}$  to 1 teaspoonful t.i.d. or q.i.d.

# not only most powerful but also easily controlled

Lasix is a more potent diuretic at a dose of 80 mg. than is the normal therapeutic dose of hydrochlorothiazide, chlorthalidone, cyclopentiazide, or triamterene (*Lancet*, 1964, *ii*, 1088). At this dosage the effect of Lasix is approximately the same as the effect of 2 ml. mersalyl given intramuscularly.

Not only is Lasix powerful, but it is also unusual among diuretics for its breadth of action, which gives great versatility and a high degree of control. The diuretic effect is proportional to the dose given over a uniquely wide range: the greater the dose, the greater the response. And the effect begins half an hour after an oral dose; is normally over in 4 to 5 hours.

This means that whatever the required effect, Lasix dosage can be adjusted to produce it. The normal dose range is 40 to 120 mg. For special cases, perhaps where other diuretics have failed, higher doses can be used. While these are rarely necessary they will require adequate clinical and laboratory control.

**MEDICAL OFFICER**

A medical officer is required by The English Electric Company for its works in the Stafford area.

To promote the well-being of a factory population of 10,000, his duties will include preventive and environmental work as well as the more personal contact with people in dealing clinically with physical and psychological problems arising in factory and office. He will have considerable scope for initiative.

There is a well-established medical department, with subsidiary surgeries at the various works, from which all necessary ancillary help will be given.

The Medical Officer will be based at Stafford—a pleasant county town in a green belt within easy reach of Wolverhampton, Birmingham, and Stoke-on-Trent—but he will have opportunities for occasional visits to the Company's works in other parts of the country.

The salary will be according to B.M.A. recommendations, commensurate with experience and qualifications, and the appointment carries admission into an excellent pension scheme.

Applicants should be under 40 years of age. Previous industrial experience would be an advantage but is not essential.

Applications, with the names and addresses of two referees, should be addressed to:

Dr. G. Theophilus, Group Medical Officer,

President: The Earl Spencer  
Medical Superintendent:  
D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, a Recreation and Occupation Centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

**WANTAGE HOUSE**

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

**MOULTON PARK**

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch. For terms and further particulars apply to the Medical Superintendent (Telephone 34354 Northampton) who can be seen in London by appointment.
