FERRAPLEX B
is the balanced haematinic

Ferraplex.B combines, in one tablet, a therapeutic quantity of easily assimilable ferrous iron with other haemopoietic factors needed for maximum absorption and utilisation; it rapidly increases and maintains adequate haemoglobin levels with a minimum of gastric disturbance.

Composition: ferrous sulphate (167mg.), copper carbonate (0.3mg.), ascorbic acid (vitamin C—8mg.), aneurine hydrochloride (vitamin B₁—0.5mg.), riboflavine (vitamin B₂—1mg.), nicotinamide (5mg.), and other naturally occurring constituents of vitamin B complex.

Dosage: 1-2 three times daily during or after meals.

POWER SAFETY COVERAGE **ERYTHROCIN®**

ERYTHROCIN (erythromycin, Abbott) is a suitable first-line treatment for the majority of bacterial infections encountered in general practice. It provides powerful yet safe coverage against many causative organisms, leaving the broad spectrum antibiotics free for the specific cases in which they alone are effective.

POWER The potency of Erythrocin against the cocci is considerably more than that of tetracyclines or chloramphenicol.

SAFETY Erythrocin combines this effectiveness with a remarkable degree of safety. It is, in fact, the least toxic and least allergenic antibiotic currently in use.

COVERAGE Erythrocin is effective in a high percentage of the common bacterial infections. Its wide clinical spectrum of activity covers most Gram-positive organisms—especially Staphylococci, Streptococci, Pneumococci and Clostridia—and Gram-negative organisms such as Neisseria and some strains of Haemophilus influenzae.

By prescribing Erythrocin preparations by name you ensure that your patients receive erythromycin in safe, well-absorbed forms that produce effective blood levels rapidly.

“If the antiseptic is to be of any value at all it must not only kill organisms that are dry and probably embedded in films of some kind but it must act rapidly before it is removed by evaporation, gravity or washing”.

**Dettol meets these two important provisions of
rapidity of action and compatibility with soap**

1. Rapidity of Action. Dettol kills Staph. aureus including phage type 80, 81, and Ps. pyocyanea in less than 2½ minutes (vide BRIT. MED. J., 1963 i, 498)

2. Compatibility with Soap. 'Unlike the other antiseptics, Dettol appeared to have its efficiency increased by the presence of soap, and against Staph. pyogenes the effect was one of true synergism.' — ("ANTISEPTICS IN MIDWIFERY" BRIT. MED. J., 1956, ii, 202)

Dettol is non-poisonous and is well-tolerated. Its efficiency is well maintained in the presence of organic materials and it is stable in solution.

For the maturity-onset diabetic whose blood sugar levels are inadequately controlled by diet, Rastinon provides control at normoglycaemic levels.

Given in divided doses after meals, Rastinon is rapidly absorbed and this ensures the maximum effect when the need is greatest. As hypoglycaemia is an exception with Rastinon, nocturnal hypoglycaemia will not present a hazard even with high doses.

Since side effects are few and minor the unsurpassed ratio of safety to effectiveness makes Rastinon the first choice for initiating oral antidiabetic therapy. Rastinon tablets each contain 0.5 g. tolbutamide B.P.

PENBRITIN

... whatever the severity of the condition

One Penbritin capsule four times a day for a week or more brings an excellent response in the majority of patients, reducing the volume of sputum and the severity of exacerbations.

When other antibiotics fail, four Penbritin capsules four times a day for a week or more usually provide effective treatment for advanced bronchitic patients, including those with extensive bronchiectasis. Used in this way, Penbritin is also successful in clearing the sputum of those winter-long purulent cases which would otherwise require continuous antibiotic cover. Early relapse is uncommon and many patients remain free from further infection for as long as two to three months after treatment.

Heinz use far better, fresher ingredients than the average mother

Heinz ingredients are better and fresher than those normally available to the housewife.

Only close supervision and control keep this superiority constant.

For example, before contracting with fruit or vegetable growers, Heinz agronomists study the land and the farming methods practised.

Heinz then specify precisely which seed varieties are to be sown.

In addition, all fertilisers, insecticides, etc. must have Heinz approval—backed by laboratory tests—before being used.

This far-reaching control extends to harvesting. Crops are gathered at the correct moment of maturity, and rushed to the factory for immediate processing.

The fact that Heinz' Kitt Green

factory is adjacent to the Ormskirk market garden region—where a great deal of the produce is grown—allows the maximum supervision and speed.

But even when crops are grown abroad, Heinz inspectors still exercise control.

The same high standards apply to meat. Only prime cuts of beef are used; tender veal; best boned legs and shoulders of lamb.

Everything is checked and re-checked from seed to harvest.

Finally, on arrival at Heinz kitchens, all ingredients must pass stringent quality control tests before being accepted for processing.

In chest infections

Ceporin

provides effective, safe
broad-spectrum activity

Cephaloridine . . . "is not inactivated by penicillinase and has a remarkably broad spectrum."

Practitioner, 1965, 195, 408

In serious infections of the respiratory tract, especially mixed infections, the unique activity of Ceporin can be used to particularly good advantage. The common infecting organisms in bronchitis and bronchopneumonia are highly sensitive to the bactericidal action of Ceporin, including penicillinase-producing staphylococci. This is why Ceporin frequently gives dramatic clearance of infection, rendering the sputum sterile and providing rapid relief of symptoms.

Ceporin can be safely used in patients hypersensitive to penicillin. In all patients and in all indications the injections are remarkably painless and make the whole

dose available to the body.

Other indications for Ceporin include urinary tract infections, meningitis, septicaemia, bacterial endocarditis and soft tissue infections.

INDOCID

INDOMETHACIN

REGD

For many patients, 'Indocid' has proved to be the turning point in their course of treatment. 'Indocid' may be dramatically effective in reducing pain and swelling associated with many rheumatic conditions such as rheumatoid arthritis, osteoarthritis, ankylosing spondylitis and gout. Therapy with 'Indocid' often results in a progressive improvement in mobility, even in severely-disabled patients and has proved well-suited to long-term uninterrupted therapy, even in elderly patients.

'Indocid' is a new, non-steroid agent which is chemically unrelated to the corticosteroids, phenylbutazone-like compounds, amido-pyrine or salicylates.

'Indocid' is supplied as 25 mg capsules. Detailed information is available to physicians on request.

THE ROYAL ARMY MEDICAL CORPS OFFERS OUTSTANDING OPPORTUNITIES FOR GENERAL PRACTICE

with every facility for a varied professional career: good equipment,
good pay, good allowances, trained staff and generous leave

You may not know that the Army nowadays provides more women and children than soldiers as patients for its General Practitioners. But not only are the opportunities wide and varied: the conditions of service are such that they permit a professional man to work in a professional way. The R.A.M.C. provides modern surgeries with first-class equipment; trained staff to help; a car and driver. All general practitioners are given postgraduate training and have access to military hospitals.

Pay for a married Captain (the rank on entry) is over £2,000 with increases every two years and on promotion. Children's Educational Allowances are paid. A five year Short Service Commission earns a tax-free gratuity of £3,000, and there is excellent retired pay with Terminal Grant for those who go on to a career in the Corps. Six weeks' annual leave is normally granted, and reliefs are provided. Married general practitioners get a furnished house at low rental.

CONSIDER NOW

summer-long protection against HAY FEVER with

D-VAC Pollens 3 dose course

Sufferers from 'classical' hay fever and pollen asthma can look forward to relief next summer after desensitisation with D-VAC Pollens. This provides fundamental treatment of pollen allergy, giving a high degree of protection in the majority of patients and halting any tendency to deterioration. Long-term relief will be obtained in most cases from a pre-seasonal course given in each of three successive years.

D-VAC Pollens, Bencard emulsified 'depot' pollen vaccine, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

Primary Course (D-VAC Pollens Nos. 1, 2 and 3—250, 750 and 3,500 Noon units respectively): designed for patients who have not received pollen vaccine treatment in the last five years, or who are known to be highly sensitive to grass pollens, and for children (aged 6-12 years).

Advanced Course (D-VAC Pollens Nos. 2, 3 and 4—750, 3,500 and 7,500 Noon units respectively): designed for patients aged over 12 who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients known to exhibit very strongly positive skin test reactions or suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose being given in February or March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

TO BE SURE

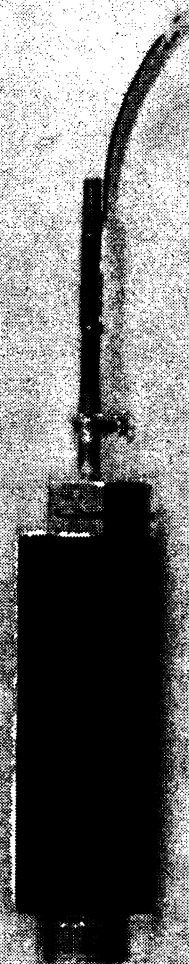

of obtaining D-VAC Pollens, it is advisable to prescribe and order before 31st December: no order can be accepted after 21st January.

Prescriptions and orders, for D-VAC Pollens 'Primary' or 'Advanced', should state the exact date (between 14th February and 12th March) on which the first dose is to be injected. The first dose will be despatched to arrive by this date. (D-VAC Pollens is not available outside the U.K.)

In Neonatal Infections, the answer is **AMPICLOX** regd.

This new product has been made available in response to three independent recommendations^{1,2,3} that an ampicillin/cloxacillin formulation would fill a conspicuous gap in neonatal therapy. Ampiclox fulfils this need, providing a broad spectrum antibiotic which includes the hospital staphylococcus within its range of activity, yet is free from the serious or potentially serious side-effects associated with current forms of therapy.

Ampiclox is indicated for the prophylaxis or treatment of infection in premature babies or neonates.^{1,2,3} Particularly:

- ☐ Suspected or confirmed infection in premature babies and neonates.
- ☐ Babies born of mothers with infected liquor.
- ☐ Babies born of mothers whose membranes ruptured more than 48 hours before delivery.
- ☐ Babies born with respiratory distress necessitating endotracheal intubation, mouth to mouth breathing or other resuscitation methods, when subsequent infection is a possible hazard.
- ☐ Babies following a difficult delivery, when inhalation of much liquor, mucus or meconium may have occurred.
- ☐ Babies requiring certain surgical procedures carrying risk of infection, such as replacement transfusion.

Ampiclox is available as Injection for intramuscular use or Neonatal Drops specially formulated for addition to the feeds of premature infants and neonates.

Most diarrhoeas are non-specific in origin. Lomotil (brand of diphenoxylate hydrochloride with atropine sulphate) provides the rapid, symptomatic control needed in such cases.

In diarrhoea of specific origin, Lomotil conserves electrolytes and prevents dehydration while antibacterial treatment takes effect.

Lomotil curbs the intestinal hypermotility characteristic of diarrhoea. It is effective in virtually all types of diarrhoea — acute, chronic or recurrent.

... is 9,192,631,770 cycles of the hyper-fine resonance of the caesium atom. This, the most recent of the international standards, was adopted only in October 1964, when the International Committee on Weights and Measures met in Paris. Until then, the standard second had been 1/31,556,925.9747th of the year A.D. 1900, an astronomical measurement based on the daily rotation of the earth. The very high accuracy of the clocks physicists can now

build forced the reconsideration of this standard, and, in fact, it was inaccurate because the earth, instead of turning at an absolutely steady speed, was varying, so that the official second was getting longer and longer. The frequency of the radiation emitted by the caesium atom, on the other hand, is so accurate that even month-by-month changes in the earth's speed of rotation could be detected by atomic clocks.

Psoriasis... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.² A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.² These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

New Alphosyl lubricating cream. A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipoid constituents of normal healthy skin. The vehicle also contains hydrophylic-lipophilic bipolar substances which

Oct 9th

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalane, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

Formula: Allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

"BRITISH MEDICAL JOURNAL"

ASSISTANT EDITOR

The Council of the British Medical Association invites applications from registered practitioners for the appointment of a Medical Assistant Editor to the *British Medical Journal*, starting on April 12, 1966, or possibly earlier. The initial salary will be £2,783 a year, rising by annual increments of £150 to £3,833 a year. In exceptional circumstances the initial salary may be above the minimum of the scale. The appointment will be for a probationary period of six months in the first place. The Association's superannuation scheme will apply on substantive appointment.

Candidates are expected to have a wide knowledge of medicine and must present evidence of literary ability and/or journalistic experience. A knowledge of one or more foreign languages is desirable. Applicants should send full particulars of qualifications and experience, together with the names and addresses of three persons to whom reference may be made, to the Editor of the *British Medical Journal*, B.M.A. House, Tavistock Square, London W.C.1, not later than December 31, 1965. Envelopes should be marked "British Medical Journal—Assistant Editor."

PRACTICES

(Executive Councils)

For vacancies (except those in Scotland) apply on Form E.C.16A, obtainable from the Executive Council. Mark envelopes "Vacancy."

APPLICATIONS ARE INVITED FOR A medical practice vacancy at Thundersley, a rapidly developing area in Benfleet Urban District. No list of patients. Average lists in the area are over 3,000 and there is every possibility that an incoming practitioner would build up a substantial list in a reasonably short time. The area is "designated" and an initial practice allowance is payable. Every possible assistance will be given to obtain surgery premises. Applications to the undersigned, on Form E.C.16A by first post December 11, 1965.—E. Bergdahl, Esq., Clerk of the Council, Essex Executive Council, Queen's Hall, Kings Avenue, Holland-on-Sea, Clacton-on-Sea, Essex. (H.3776)

RE-ADVERTISED PRACTICE VACANCY MOOREnds (THORNE RURAL DISTRICT)

Applications are invited for partnership vacancy in "Open" area. Doctors resign September 30 and December 31, 1965, the latter being the date to which the partner concerned will carry on the partnership practice with the aid of a locum. Lists at present 2,141 and 2,895 respectively. Residential and surgery premises may be available for purchase. Alternatively, premises for residential and surgery accommodation will, if necessary, be made available on rental by the local Rural District Council. Further information can be obtained on request and applications on Form E.C.16A (obtainable from the undersigned) should be submitted, not later than December 10, 1965, to B. England, Clerk, West Riding Executive Council, 5 St. John's North, Wakefield. (H.3777)

PRACTICE VACANCY BINGLEY (NO. 2) YORKSHIRE

Applications are invited for urban vacancy in "open" area adjacent to the Dales District. List at present 3,503. Doctor resigns February 14, 1966, on account of age. Access to two G.P. Maternity Units in immediate vicinity. Surgery accommodation available for purchase.

Further information (i.e. practice income, etc.) can be obtained on request, and applications on Form E.C.16A (obtainable from the undersigned) should be submitted by not later than December 10, 1965, to B. England, Clerk, West Riding Executive Council, 5 St. John's North, Wakefield. (H.3767)

PRACTICE VACANCY CROSSHILLS, NR. KEIGHLEY (Skipton R.D.)

Applications are invited for vacancy due to resignation on February 11, 1966, at Crosshills, located between Skipton and Keighley in the Yorkshire Dales, near site of proposed new district hospital. "Open area." List 2,500. Residential and surgery accommodation available for purchase. Successful applicant required to take over not later than February 12, 1966.

Applications, on Form E.C.16A (obtainable from the undersigned), should be submitted to B. England, Clerk, West Riding Executive Council, 5 St. John's North, Wakefield, by not later than December 3, 1965. (H.3768)

LANCASHIRE EXECUTIVE COUNCIL (NATIONAL HEALTH SERVICE) MEDICAL PRACTICE VACANCIES— TYLDESLEY LANCs

Applications invited for two vacancies (urban) due to the resignation of two doctors (husband and wife) who have been practising in partnership. Open area. Combined lists at present approximately 5,200. Residence and surgery available for sale. Branch surgery available on rent. Successful candidates will be required to take over on February 15, 1966.

Apply on Form E.C.16A (obtainable from the undersigned) not later than December 11, 1965, to the Clerk, Lancashire Executive Council, 42 West Cliff, Preston, Lancs. (H.3768)

THE EXECUTIVE COUNCIL OF THE WEST RIDING OF YORKSHIRE

Partners are sought in the West Riding County area at Skoley, Brighouse, Rawwell (near Leeds), Denaby Main, Scatforth, Adwick-le-Street, Rossington, Conisbrough, Bentley, Scawthorpe, and Thorne (near Doncaster).

Further information obtainable from the Clerk, West Riding Executive Council, 5 St. John's North, Wakefield. (H.3779)

WALTHAMSTOW, E.17

Applications invited for medical practice vacancy in above urban (classified) "Open" arising from resignation of medical practitioner.

Number on list, 2,887. Residential accommodation will be available for purchase and surgery premises for rental.

Forms E.C.16A, and further details, obtainable from the Clerk, North-East London Executive Council, Ilford Lane Chambers, Ilford Lane, Ilford, Essex.

MEDICAL OFFICERS

Applications are invited from registered medical practitioners for vacancies which have arisen at hospitals of the group's copper mines in Zambia—at the Nchanga mine which has two hospitals, one with 250 beds, the other with 70 beds and at the Bancroft mine hospital which has a capacity of some 200 beds.

The positions are as general duty medical officers working under the direction of each company's Chief Medical Officer. The duties are primarily those of the general practitioner and will include the care of both expatriate and indigenous patients in the hospital. Some general surgical experience would be an advantage. The hospitals are modern and well-equipped and include laboratory and X-ray facilities.

Basic commencing salary would depend on qualifications and experience but would be not less than £3,000 per annum. The appointment would be on a contract basis for a minimum period of three years and this may be renewed by mutual agreement. In addition to the salary there is a terminal gratuity in lieu of pension and a free life assurance scheme. There is also a Christmas bonus of 5% of basic salary which is paid in December each year. Up to three-and-one-half adult fares for the employee and his family are paid for the outward and for the return journey upon completion of service. Partially furnished housing at a nominal rental is available and an educational allowance is payable for children attending secondary education outside Zambia. There are generous leave conditions and other benefits which can be discussed at an interview.

Applications, which should give full details of experience, age, qualifications, marital status and the names of two medical referees, should be submitted to:

Medical Service OVERSEAS helps DEVELOPMENT

The developing countries overseas are in urgent need of doctors. A break from normal routine is offered, together with the opportunity to see something of the world and to gain valuable and interesting experience. These appointments carry attractive salaries, normally with an overseas allowance and a gratuity on completion of contract. There are also educational allowances for children and free family passages. Accommodation is provided free, or at a low rental, and income tax is usually low. In most cases superannuation rights can be preserved or maintained. Here are some examples of posts available:

MEDICAL OFFICERS

British Honduras

For general duties in the Public Hospitals. Appointment for 2 to 3 years. Salary £1,845 to £2,047 per annum, plus £175 per annum, in lieu of private practice if stationed in Belize.

Kenya

For general duties in Clinical Medicine, Public Health and Hospital Administration. Doctors contemplating a career in the public health service will find such an appointment an opportunity for gaining valuable experience. Possession of the D.P.H. is desirable but not essential. Salary scale: £1,818 to £3,000 per

annum. Private practice is permitted in certain stations. Appointment for 2 years.

Swaziland

To undertake general medical duties at a Government Hospital. The ability to undertake surgery and to administer anaesthetics will be an advantage. Salary scale: £1,683 to £2,772 per annum. Appointment for 2 to 3 years.

Gilbert and Ellice Islands

To undertake the management of all the day to day activities of a small hospital in Tarawa together with personal clinical

duties, the post-graduate training of local doctors and the development of district services in Tarawa. The Tarawa Hospital has 86 general beds, 16 psychiatric beds and a small leprosarium. Salary scale: £1,448 to £2,462 per annum. Appointment for 2 years.

Gambia

To work in preventative medicine at a new Endemic Control Unit. The D.P.H. is desirable. Salary scale: £1,560 to £2,512 per annum. Appointment for 18 to 24 months in the first instance. Private practice is not permitted, but an allowance of £150 per annum is payable in lieu.

SPECIALISTS

Trinidad and Tobago

Two Registrars (Anaesthetists) to assist the Specialist Medical Officer at the General Hospital. Candidates must possess the F.F.A. or D.A. if held prior to 1953 plus 3 years post-graduate experience. Appointment for a period of four years with prospects of permanency. Salary £2,375 per annum.

British Guiana

Medical Superintendent is required at Georgetown Public Hospital. Candidates should have either formal training in Hospital Administration or at least 10 years experience in a responsible administrative post. Appointment for 3 years. Salary £2,500 per annum.

Sarawak

Specialist Pathologist required to take administrative charge of all hospital laboratory services in Sarawak, run the General Laboratory attached to the General Hospital, Kuching, and to assist in the training of laboratory technicians. Also to be responsible for the ordering of all equipment and stores for the Laboratory Services. He must possess a

post-graduate degree or Diploma in Clinical Pathology. Experience in running a hospital laboratory service desirable. Salary £3,080 per annum, liable to local income tax. Appointment for 2 to 3 years in the first instance.

Malariologist required to be jointly responsible with a World Health Organization Officer for the Malaria Eradication Project. His duties will involve responsibility for the Project, including planning and supervision of field activities, co-ordination of divisional Malaria activities and the submission of reports required by Medical Headquarters and International Agencies. The post involves a certain amount of field work. Initial posting will be Kuching. Preference will be given to candidates who have had previous experience with a Malaria Eradication project. Possession of the D.T.M.&H. or equivalent will be an advantage. Salary scale £1,836 to £2,905 per annum. Appointment for 3 years.

Mid-West Nigeria

Pathologist required by the newly created Mid-west Region of Nigeria in Benin City, the Capital of the region.

He will undertake clinical duties and teach house officers, nurses and other junior medical personnel and medical administration units. He must have at least 5 years post-qualification experience in Pathology, preferably with a D.C.P. Salary £2,500 per annum subject to British Income Tax plus a variable tax-free overseas allowance currently payable at £1,480 per annum for a married man if accompanied, £1,250 per annum if unaccompanied, or £695 per annum for a single man. Appointment for 2 tours of 12 to 18 months each.

THE MINISTRY ANNOUNCES A NEW SCHEME FOR TRAINING OF RECENTLY REGISTERED DOCTORS FOR SERVICE OVERSEAS.

In return for undertaking to serve for 3 years in a developing country overseas, the Ministry offers a course of training to recently registered doctors which is designed to fit them for service overseas, and which will be attractive professionally and financially. During the period of training of 12 to 15 months, the doctor will receive a retaining fee bringing his total emoluments to £1,425 per annum. Write now for full details of the scheme.

Candidates should normally be nationals of the United Kingdom or Republic of Ireland and must possess medical qualifications registrable in the United Kingdom. For application forms and further information about these and other vacancies, please write, stating full name, to the **Appointments Officer**.

MINISTRY OF OVERSEAS DEVELOPMENT

ROOM 403A, ELAND HOUSE, STAG PLACE, LONDON S.W. 1.

NON-MEDICAL POSTS

The Bayer Products Company require two

Pharmacists or Biological Scientists

to join the staff of our Medical
Department as

Technical Officers

who

- * prepare and revise medical literature and product briefs.
- * correspond with doctors, pharmacists etc., on the technical aspects of our products.
- * deal with all technical telephone enquiries.
- * undertake literature searches and screening.

One vacancy will be filled by a candidate who is already in a similar position in the pharmaceutical industry and probably under 30. The other vacancy is suitable for someone without previous experience in this work, probably under 25, who can demonstrate the ability to write imaginatively and lucidly on pharmaceutical and medical topics.

Both should have a liking and interest in commercial affairs and be able to recognise how the application of technical knowledge can be used to further the commercial objectives of the company. These positions offer an excellent opportunity to acquire experience and understanding of our activities and thus provide a good springboard for promotion within the Company. Promotion and salary are determined by ability and performance, not age and experience. The Company is one of the largest in its field in the U.K., marketing a wide range of pharmaceuticals for major and minor illnesses. If you have the unusual combination of literary ability plus a pharmaceutical/biological degree, don't hesitate, but write with comprehensive details to the Staff Manager, The Bayer Products Company, Winthrop House, Surbiton, Surrey.

NOTICES

UNIVERSITY OF BIRMINGHAM SAMUEL HANSON ROWBOTHAM BEQUEST

Under the will of the late Samuel Hanson Rowbotham drawn up in 1943 the University of Birmingham holds a trust fund of which the income is to be used "for the purposes of making grants or giving pensions to any persons whose health has been shattered or who have otherwise suffered injury in the pursuit of medical research and to the dependents of such persons who may have died and whose deaths have been caused by such pursuit." The testator added "I desire that grants and pensions should be made only to those for whom no other adequate provision can be obtained from other sources and it is my desire that the University should not wait to receive claims from applicants but should diligently search out persons coming within the scope of this benefaction and in particular I wish to emphasize my desire that grants and pensions should not be restricted to members of any particular University but should be open to all persons within the United Kingdom.

Information about persons eligible for benefit under this bequest may be sent at any time to the undersigned and applications for benefit from the income received from the bequest during 1965 should be submitted before December 31, 1965.—G. Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”

Med. Times, N.Y., 1958, 1, 74

Safe, Simple, Effective

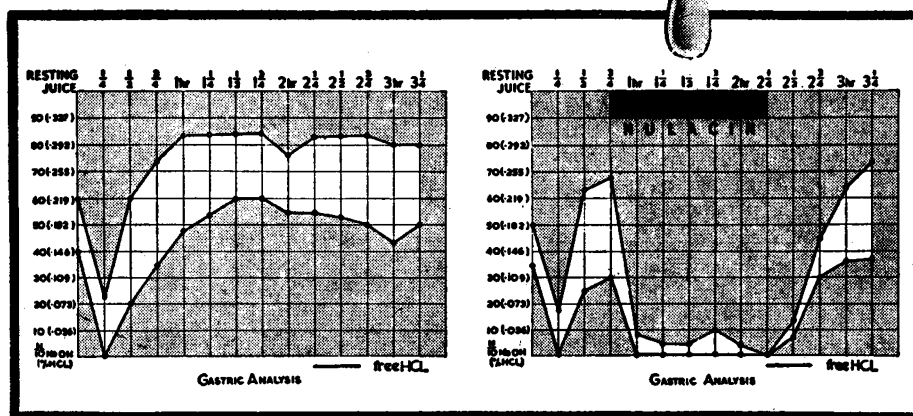

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable.¹ Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.⁸
