

Indispensables

Certain things are basic . . . The books, for instance. You may not take them down every day, but you know them. Sound, fundamental.

You know Aspellin, too. A really effective, economical treatment for rheumatic conditions and rauscular trauma—a spirit-based liniment containing Acid Acetylsalicylic to relieve symptomatic pain rapidly, and Methyl Salicylate, with Menthol and Camphor, to reduce inflammation and muscle tension.

Rheumatism sufferers can only obtain Aspellin if you prescribe it. Aspellin is only obtainable on prescription. Cost: 101d per oz.

ASPELLIN—indicated in the treatment of acute rheumatic conditions, sciatica, lumbago, sibrositis, muscular trauma.

Professional literature and samples from: Radiol Chemicals Ltd., Radian House, 78 Upper Richmond Road, London, SW15

Spencer "Free Action" Support Brief for men

Spencer's revolutionary new concept of support in non-rubber, spandex elastic for back and abdomen.

Subtle in design to the degree of being mistaken for tailored, body-fitting underwear in the locker room, it actually provides powerful, functional support in elevating the viscera, thus relieving low back strain.

- ★ Front inner panels follow natural musculature.
- ★ Soft expansion areas at top edge and around legs allow motion and minimize bulging.
- ★ Comfortable, accommodating crotch section has easy access opening.

Patients have experienced relief from chronic low back pain while wearing the Support Brief.

We recommend this Brief for minor low back conditions and where it is considered beneficial to raise abdominal contents in aiding respiration, relieving ptosis, minimizing pooling of blood in lower abdomen, etc.

For further information on the Spencer "Free Action" Support Brief write to:

HydroSALURIC-K

Hydrochlorothiazide with potassium chloride

the most widely prescribed oral diuretic

In more than five years of clinical use, 'HydroSaluric'-K has generally proved to be an effective and reliable diuretic, producing a smooth and sustained diuresis in most cases of oedema. Eminently suitable for both hospital and domiciliary practice, 'HydroSaluric'-K has become the most widely-prescribed diuretic in the United Kingdom.

Supplied as tablets containing 25 mg hydrochlorothiazide BP and 572 mg potassium chloride. Detailed information is available to physicians on request.

a higher degree of iron absorption

Ferrograd C

New presentation of 'Gradumet®' iron The advantages of Ferro-Gradumet in providing ample amounts of iron in a single daily dose without gastric upset are now widely recognised by the medical profession. Ferrograd C is an extension of the 'Gradumet' presentation, consisting of ferrous sulphate in a slow-release matrix, plus enough vitamin C to produce improvement of absorption when this is a problem.

Iron with enough C Experimental and clinical investigation of the addition of vitamin C to oral iron therapy shows that there is an increase in absorption of iron providing enough vitamin C is given. Ferrograd C contains 500 mg of vitamin C and evidence shows that this amount is sufficient to make the addition worthwhile in terms of more effective absorption and possibly in utilization.

Without gastric upset Steps taken to improve absorption are of no practical value, however, unless the preparation

is well tolerated and taken regularly. The 'Gradumet' vehicle virtually eliminates the unpleasant side-effects experienced by many patients on ordinary iron therapy. Instead of exposing the stomach to large quantities of corrosive iron salts, the ferrous sulphate within the 'Gradumet' is slowly leached out, independent of body chemistry, as it passes through the gastro-intestinal tract. Ferrograd C combines the convenience and acceptability of this method of presentation together with an increased level of absorption. It is particularly recommended for those patients in whom absorption of iron is known to be poor, or where parenteral iron is being considered.

PRESENTATION Each red Filmtab® (film-coated tablet, Abbott) contains 525 mg ferrous sulphate BP (in exsiccated form), equivalent to 105 mg elemental iron and 500 mg of vitamin C as sodium ascorbate. DOSAGE One Ferrograd C daily before a meal.

® Ferrograd, Gradumet and Filmtab are registered trade marks of ABBOTT LABORATORIES LIMITED · QUEENBOROUGH · KENT

mmer-long protection against HAY FEVER with D-VAC Pollens 3 dose course

Sufferers from 'classical' hay fever and pollen asthma can look forward to relief next summer after desensitisation with D-VAC Pollens. This provides fundamental treatment of pollen allergy, giving a high degree of protection in the majority of patients and halting any tendency to deterioration. Long-term relief will be obtained in most cases from a pre-seasonal course given in each of three successive years.

D-VAC Pollens, Bencard emulsified 'depot' pollen vaccine, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

Primary Course (D-VAC Pollens Nos. 1, 2 and 3—250, 750 and 3,500 Noon units respectively): designed for patients who have not received pollen vaccine treatment in the last five years, or who are known to be highly sensitive to grass pollens, and for children (aged 6-12 years).

Advanced Course (D-VAC Pollens Nos. 2, 3 and 4—750, 3,500 and 7,500 Noon units respectively): designed for patients aged over 12 who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients known to exhibit very strongly positive skin test reactions or suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose being given in February or March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

 ${\sf L}$ of obtaining D-VAC Pollens, it is advisable to prescribe and order before 31st December: no order can be accepted after 21st January.

Prescriptions and orders, for D-VAC Pollens 'Primary' or 'Advanced', should state the exact date (between 14th February and 12th March) on which the first dose is to be injected. The first dose will be despatched to arrive by this date. (D-VAC Pollens is not available outside the U.K.)

D-VAC* Pollens is a product of British research at the

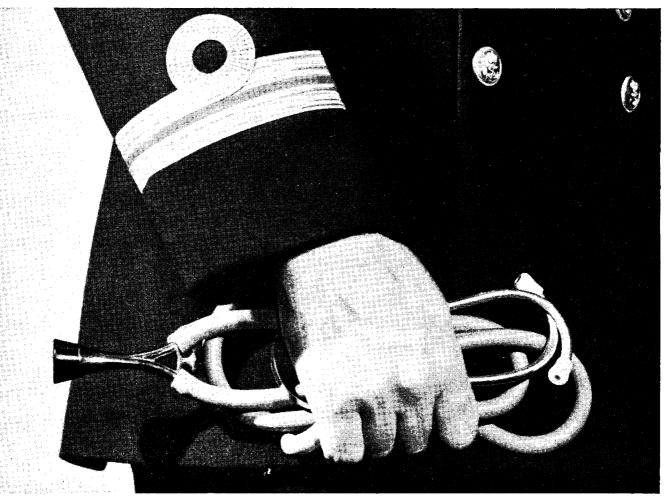

BENCARD ALLERGY UNIT

Beecham Research Laboratories

For young doctors:

clinical freedom, modern equipment and complete medical responsibility.

Where?

On land and sea. At home and overseas. As a Medical Officer in the Royal Navy.

Here is a medical career that can give you more scope and responsibility than most doctors in civilian life have—while still in your mid-twenties.

You will have the most modern equipment; clinical freedom; the opportunity to gain wide experience, both in the traditional fields of medicine and in the new sciences of nuclear, underwater and aviation medicine. And you could study for higher degrees, specialise in one of many medical subjects and even aim for consultant status—all at the expense of the Royal Navy.

But you're more than a doctor. You're a Naval Officer, too. You lead an active, varied life; have a very special status; exceptional opportunities for sport, travel and the outdoor life. And your pay and prospects are excellent. For example, your *starting* salary would be considerably higher than that of a civilian hospital registrar. And marriage and other allowances can add considerably to your income. You enter initially for a Short Service Commission—with the opportunity of a Permanent Commission after 1 year.

3 Ways of Entry

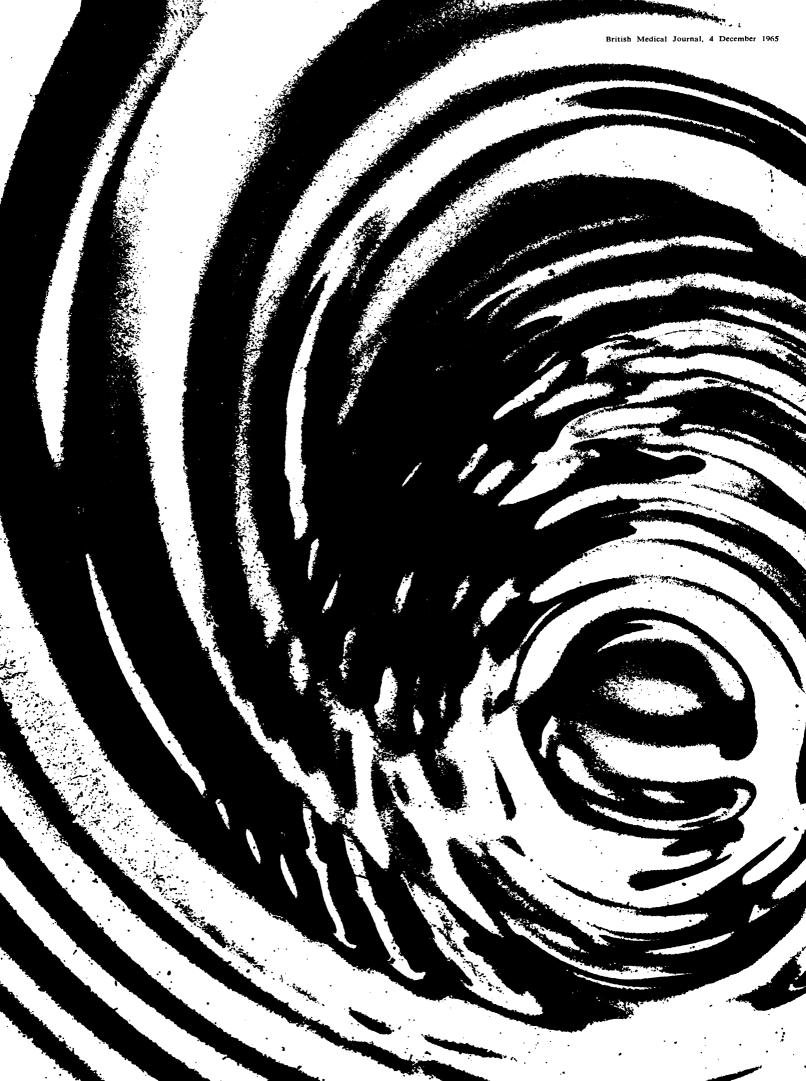

1 As a fully registered doctor; any civilian experience counts towards your seniority.

2 During your pre-registration year.

3 As a student any time after passing 2nd M.B. For fully registered women doctors there is a special Short Service Commission. If you would like more information, write to the address below, giving details of your age and qualifications. A personal interview can be arranged if desired.

The Medical Director-General of the Navy Medical Dept. HN293/.B, Empress State Building, London, S.W.6.

not only more effective than thiazides but also acts when they fail

The effectiveness of Lasix is now clinically well established. It has been shown that when thiazides have been administered to give their maximum response, Lasix gives an immediate increase in diuresis, indicating that it acts on a different site in the nephron. This supports the clinical findings that Lasix will provoke diuresis in patients resistant to thiazide therapy, and indicates that there is no value in combining Lasix with thiazides. The important thing to note is that the effect produced by Lasix is proportional to the dosage: the higher the dosage given, the greater the response. Lasix has a uniquely wide range of action: it is particularly valuable when thiazides fail to exert their required effect.

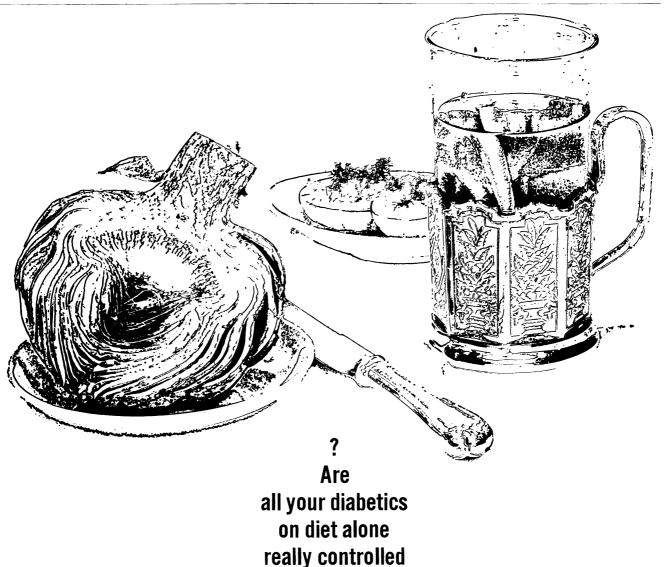

the new diuretic

Lasix tablets each contain 40 mg. frusemide and Lasix ampoules 20 mg. frusemide in 2 ml. Lasix is a registered trade mark.

HOECHST

RASTINON

IS THE FIRST CHOICE IN INITIATING ORAL ANTIDIABETIC THERAPY

For the maturity-onset diabetic whose blood sugar levels are inadequately controlled by diet, Rastinon provides control at normoglycaemic levels.

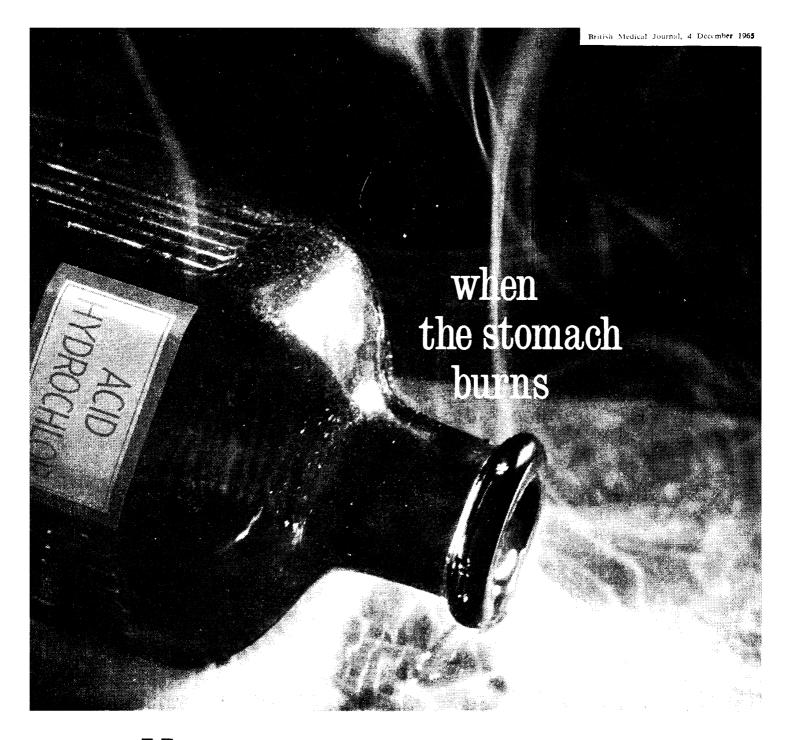

Given in divided doses after meals, Rastinon is rapidly absorbed and this ensures the maximum effect when the need is greatest. As hypoglycaemia is an exception with Rastinon, nocturnal hypoglycaemia will not present a hazard even with high doses.

Since side effects are few and minor the unsurpassed ratio of safety to effectiveness makes Rastinon the first choice for initiating oral antidiabetic therapy. Rastinon tablets each contain 0.5 g. tolbutamide B.P.

HOECHST

new Maalox gives 3 outstanding benefits

Greater, more lasting antacid effect

Maalox has a greater acid neutralising capacity than aluminium hydroxide gel, and its action is more prolonged.

No constipation

Because of the presence of magnesium hydroxide in Maalox, there is no danger of constipation.

More palatable—for longer

Maalox has a pleasant taste and smooth consistency. It remains acceptable long after other antacids have grown wearisome.

These three benefits give Maalox a special value in patients who must take antacids frequently or for long periods. Maalox is a creamy white colloidal suspension of magnesium and aluminium hydroxide gels. It is presented in bottles of 16 fl. oz.

A new treatment for Angina Pectoris

Indicated in Angina Pectoris when conventional therapy has proved inadequate.

'INDERAL' specifically blocks the unnecessary oxygen wasting effects of excessive sympathetic nervous activity on the heart. Probably the most striking benefit has been seen in patients inadequately helped by conventional drugs.

The results of 'INDERAL' therapy include less frequent anginal attacks, improved effort tolerance and decreased consumption of glyceryl trinitrate.

In addition, 'INDERAL' will control cardiac arrhythmias, including those associated with digitalis intoxication and arrhythmias occurring during anaesthesia.

Note. Because the pharmacological action is quite new, it is advisable to study the detailed literature before using 'Inderal' (propranolol).

Basic N.H.S. costs: 100 tablets: 10 mg. 16/-; 40 mg. 36/-.

A pioneer achievement of I.C.I. Research.

Oral Nasal Decongestant WANDER

'Triominic' timed-release tablets and orange-flavoured syrup contain antihistamines and a decongestant in balanced proportions to ensure relief from nasal congestion for between 6 and 8 hours. The active constituents of 'Triominic'-the original oral decongestant—reach the nasal mucosa systemically. This obviates the rebound congestion which may follow the topical use of decongestants.

Formula per timed-release tablet.

Phenylpropanolamine hydrochloride50	mg.
Mepyramine maleate B.P25	mg.
Pheniramine maleate25	mg.

Part I S.7

'Triominic' is also available as an orange-flavoured syrup. Basic N.H.S. prices: 50 tablets $5/9\frac{1}{2}$; 4 fl. oz. 2/2 (ex dispensing packs).

TWO IMPORTANT NEW BOOKS FROM SAUNDERS

MANAGEMENT OF THE PATIENT WITH CANCER

Edited by **Thomas F. Nealon, M.D.,** Professor of Surgery, Jefferson Medical College. With contributions by 67 distinguished authorities.

This major new reference book fills a particular need for an authoritative guide to the clinical management of the patient with cancer. It provides essential information concerning cancer of all sites so that the reader can select more easily the best approach to the management of his own patient. More than 60 eminent contributors provide rational plans of management for particular types of malignancy with which they have had extensive experience. For today's best answer to almost any question about managing the cancer patient, both physician and surgeon will find this new book to be a most authoritative and useful consultant and guide.

New (2nd) Edition Bockus—GASTROENTEROLOGY (Volume III)

This monumental 3-volume work, now complete, describes all known primary and secondary disorders of the digestive tract and its associated organs. Each disorder is discussed in a logical pattern: causative factors, clinical features, diagnostic aids, differential diagnosis and therapy. Volume III covers gastrointestinal parasites, the liver, biliary tract and pancreas, secondary gastrointestinal disorders. Revised and completely current material has been added on: Liver function test; Liver scanning and biopsy; Hepatic inflammation and cirrhosis; Pancreatography and isotope scanning; Pancreatitis; and many other topics. New chapters include: Endocrine Functions of the Pancreas-Hypoglycemia-Cystic Fibrosis-Collagen Disorders Affecting the Gastrointestinal Tract-Angiography in the Diagnosis of Abdominal Disorders-Dermatologic-Gastrointestinal Inter-relationships. Volume I on diseases and disorders of the esophagus and stomach was published in January, 1963; Volume II on diseases and conditions of the small and large intestine, colon and peritoneum was published in February, 1964.

By Henry L. Bockus, M.D., Emeritus Professor of Medicine, University of Pennsylvania Graduate School of Medicine. With contributions from 44 former and present associates at the University of Pennsylvania School of Medicine.

Bacterial and Mycotic Infections of Man

Edited by Rene J. Dubos, Ph.D., and James G. Hirsch, M.D.

An extensively revised fourth edition, designed to convey to the medical student and the practitioner of medicine, some knowledge of the bacteria, actinomycetes and molds pathogenic for man, as well as the phenomena which characterize the infectious process. Facts and problems concerning parasite and host, infection and microbial disease, are discussed in great detail. This new edition is the outcome of the combined experience of thirty-nine experts under the editorship of Professors Dubos and Hirsch and is an important contribution to our knowledge of bacterial and mycotic infections.

NEW BOOKS

Psychiatric Hospital Care

Edited by HUGH FREEMAN, M.A., B.M. B.CH., D.P.M., Consultant Psychiatrist, Salford Royal Hospital, with 22 contributors

This new book is a useful and valuable report for all psychiatrists and other professional workers in mental health services both in Britain and other countries. It contains 31 papers, with summaries of discussion, from a symposium, chaired by Professor Dennis Hill, in which a group of psychiatrists and other experts met to work out proposals for the future organization of psychiatric hospital care. Many contributors are well known as the authors of books or scientific papers, and all have special experience and knowledge in particular aspects of the field.

Psychiatric Illness

H. MERSKEY, M.A., D.M., D.P.M., Consultant Psychiatrist, Saxondale Hospital, Nottingham, and W. L. TONGE, M.D., D.P.M., Consultant Psychiatrist, United Sheffield Hospital

The British Medical Journal said:

"It would be difficult to praise this book too highly. It is the best small book on psychiatry for the general practitioner and the medical student as well, and anyone beginning psychiatry could hardly do better than to start with this book."

It differs from other treatments of the subject by examining and evaluating the possible causes of the patient's symptoms and suggesting ways by which the practitioner may manage his patient with insight and some hope of success.

The Medical Secretary's Handbook

MICHAEL DRURY, M.B., CH.B., M.R.C.S., L.R.C.P., Member of the Council and Examiner to the Association of Medical Secretaries. Foreword by J. FRY, M.D., F.R.C.S., Chairman of the Association of Medical Secretaries

This is the first complete text and reference book which all medical secretaries and receptionists should have. It contains the specialized information she requires to enable her to deal with medical forms and records, doctors' equipment, laboratory procedures, problems of etiquette, and medical terminology. A general account of the growth and organization of the health services in Britain is also included to give the secretary the essential background to her subject.

MOGADON* AND NATURAL SLEEP

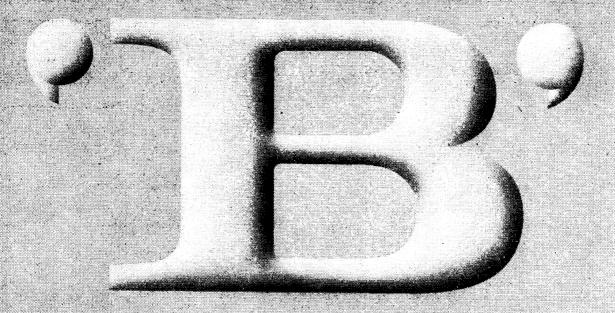

Striking advances have recently been made into the knowledge of sleep with the aid of the electroencephalogram, and it is now recognised that sleep does not consist of a quantitative reduction in cortical activity but of a qualitative change. Hypnotics, by their generalised depressant action on all the brain structures, greatly reduce cortical activity and sleep takes on an abnormal pattern. The development of Mogadon, however, has now made the treatment of insomnia possible without any significant lessening of cortical activity. The sleep induced closely resembles natural sleep; there is no disturbance of the normal rhythmical balance that exists between the sleep and wake processes and the patient will awake refreshed, without hangover and without mental confusion.

Mogadon the successor to the hypnotics

it's the

that makes the difference FERRAPLEX B is the balanced haematinic

Ferraplex B combines, in one tablet, a therapeutic quantity of easily assimilable ferrous iron with other haemopoietic factors needed for maximum absorption and utilisation; it rapidly increases and maintains adequate haemoglobin levels with a minimum of gastric disturbance.

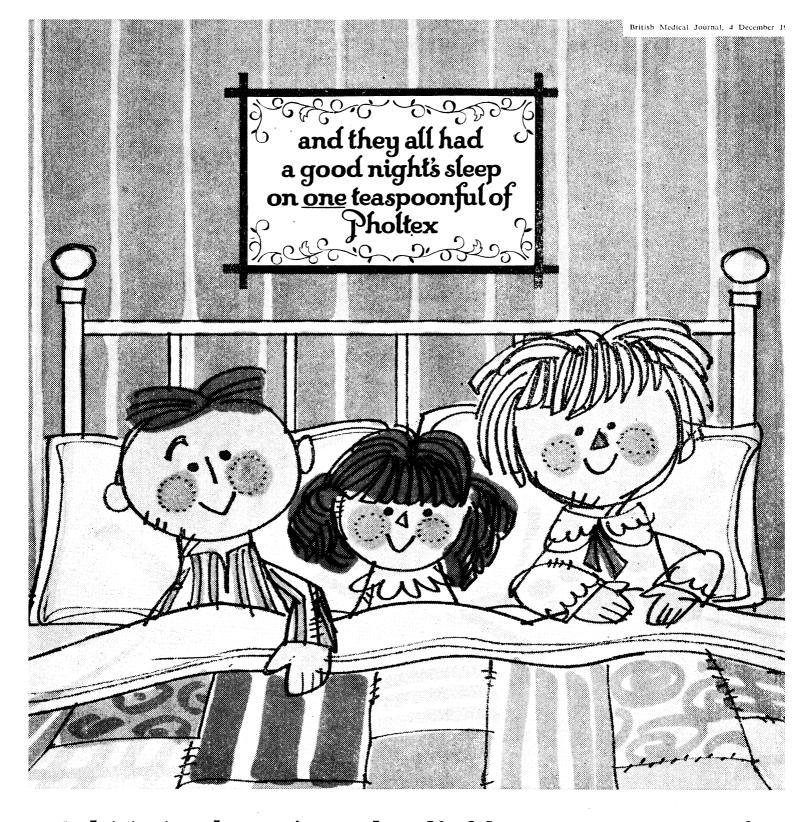

Composition: ferrous sulphate (167mg.), copper carbonate (0.3mg.), ascorbic acid (vitamin C—8mg.), aneurine hydrochloride (vitamin B_1 —0.5mg.), riboflavine (vitamin B_2 —1mg.), nicotinamide (5mg.), and other naturally occurring constituents of vitamin B complex.

Dosage: 1-2 three times daily during or after meals.

eight to ten hours' cough relief from one teaspoonful

Night coughing disturbs not only the cougher but also other members of the household. Each teaspoonful dose of *Pholtex* is effective for up to *ten hours*, long enough to ensure that sleep—for everyone—is undisturbed by troublesome cough.

The characteristic smooth and extended action of *Pholtex* results from ion-exchange release of the constituents — the cough depressant pholocodine and the antihistamine phenyltoloxamine. Because cough relief is prolonged, two or three doses daily are usually adequate and 2 fl. oz. can provide a week's treatment.

Pholtex is ideal for pædiatric use. It tastes pleasant and is easy to administer — even to infants.

Dosage: one teaspoonful (4 ml.)two or three times daily. (Children half to full adult dosage, according to age.) Each teaspoonful contains pholocdine 15 mg. and phenyltoloxamine 10 mg. as ion-exchange resin complexes.

Basic NHS cost: 2 fl. oz. 5/0d. 20 fl. oz. 47/4d.

The "Battle of Britain" that's still being fought

4 December 1965

The coming of winter once again underlines the disturbing fact that 15-20,000 people with respiratory symptoms will die during the next 6 months. The unceasing war against diseases of the bronchitis-asthmaemphysema group has plainly not yet been won.

About 30,000 deaths occur annually in Britain from bronchitis alone and the number shows no sign of decreasing Deaths attributable to chronic bronchitis amount to nearly 10% of all deaths of men aged 45-64-more than from any other respiratory disease. In another category - but none the less important-is the fact that bronchitis currently accounts for more working days off than any other illness.

Into combat-with tetracycline

In the treatment of chronic bronchitis, current opinion advocates the employment of a drug capable of suppressing both the Pneumococcus and the Haemophilus influenzae. The one capable of doing this with safety is tetracycline. 1.

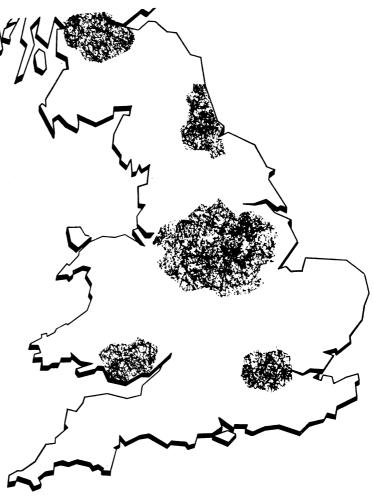

The most effective weapondemethylchlortetracycline Lederle

The modern tetracycline-Ledermycin demethylchlortetracycline Lederle -has been shown to provide higher and more sustained antibacterial activity levels in the serum than other tetracyclines. Broad-spectrum coverage persists up to 48 hours after the final dose-a safeguard against stopping treatment too early. "Most clinicians are agreed that tetracycline is preferable to the oxy- and chlor- derivatives . . . demethylchlortetracycline may possibly become the treatment of choice." 2.

One man's meat (or fish!)...

Are delectable foods barred to your ulcer patients?

Once control is established with NACTON, more pleasures of the table can be enjoyed. How does NACTON achieve this control?

- \square It halves gastric secretion of acid
- \Box and reduces gastric and intestinal spasm.

With this established, the patient can:

choose his own food

gain prolonged relief from pain

get a good night's rest

do away with milk and cream diets reduce or eliminate antacid consumption lead a normal life.

Each Nacton tablet contains 2mg. poldine methylsulphate B.P.

NACTISOLwhere anxiety complicates ulcer management

NACTISOL combines the advantages of NACTON with butabarbital, a mild sedative which provides relief from anxiety and tension.

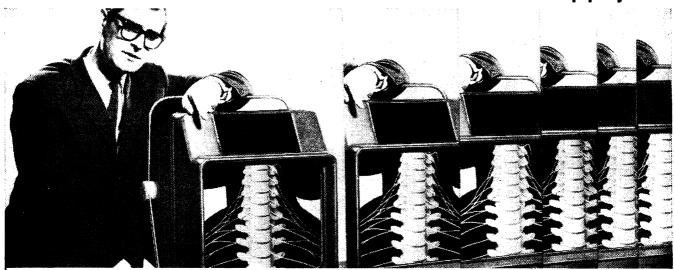

NACTON* and NACTISOL* are products of British research at **Beecham Research Laboratories**

The **Technicolor 800-E3** 8mm continuous loop projector

You start it and it repeats and repeats and repeats and repeats and repeats and repeats and repeats until every student has grasped the point

Ideal for imparting information to medical students and student nurses. The new Technicolor 800-E3 projector has been specifically designed for 8mm film loops. These are short films showing specific aspects of a single subject (for example, bandaging). Once the film has been shown, the projector repeats it instantly, as many times as required. The films are silent so that they can be introduced into lectures in the lecturer's own particular way.

This remarkable 8mm continuous loop projector features split-second cassette loading, remote control lead-is ideal for daylight viewing. Now, when students require subject matter to be repeated, just leave it to the projector.

TECHNICAL SPECIFICATION Uses 8mm standard film at silent speed of 16 pictures per second. Cassette-loading. Voltage—200/250 volt, A.C. 50-cycles. Lamp—21.5 volt, 150 watt D.C.F. with Dichroic Reflector.

For further information regarding the new Technicolor 800-E3 projector and/or 8mm film loops, please write or telephone:

success is the rule with 'llosone'

decisively effective in bacterial respiratory infections

† Over 92% of patients presenting with bronchitis (bacterial complications), tonsillitis, acute sinustis and acute streptococcal pharyngitis responded to 'llosone'.

Effective absorbency is vital in vaginal tamponage

Thousands of women every year are turning to Tampax as they become convinced it's a better method of caring for the menstrual flow. Of utmost importance to them, of course, is the competence of Tampax as an effective absorbent.

Tampax is made exclusively of soft surgical cotton, compressed for easy, correct and comfortable insertion by an individual, hygienic containerapplicator. In place, this special cotton absorbs the flow by strong capillary action along its entire length. With bulky perineal pads only a small central section is actually used. With Tampax, a woman gets total absorbency.

Your patients will welcome the tidy convenience of Tampax and will soon recognise, as have millions of other women around the world, its many other advantages. With Tampax, the problem of menstrual odour is virtually eliminated. It is easily disposable by flushing away, as are the containerapplicator tubes. Bathing and showering are made æsthetically possible. Even sitting and walking are more comfortable.

If you have patients who are having psychological or emotional difficulties over menstruation, perhaps you can ease their problem by recommending Tampax. Its use, comfortable and practical as it is, can improve a woman's or girl's whole attitude toward the complex of menstruation.

Tampax is available in Regular and Super absorbencies to meet the varying needs during the menstrual period.

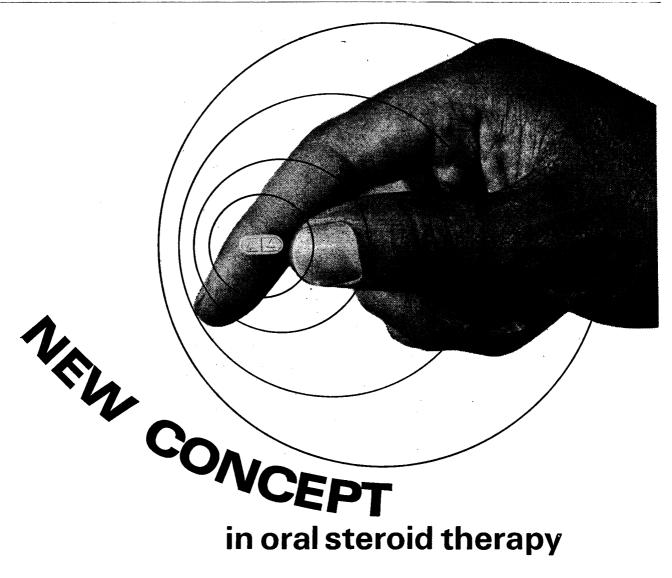

Tampax Limited, Havant, Hants.

TAMPAX

Internal sanitary protection for better menstrual hygiene

Send for sample booklets (plus re-order card) and a set of the classic Dickinson anatomical charts (laminated in plastic for permanence) for use in explaining menstruation and tamponage to patients. No charge.

in the many facets of emotional distress

for concurrent depression and anxiety

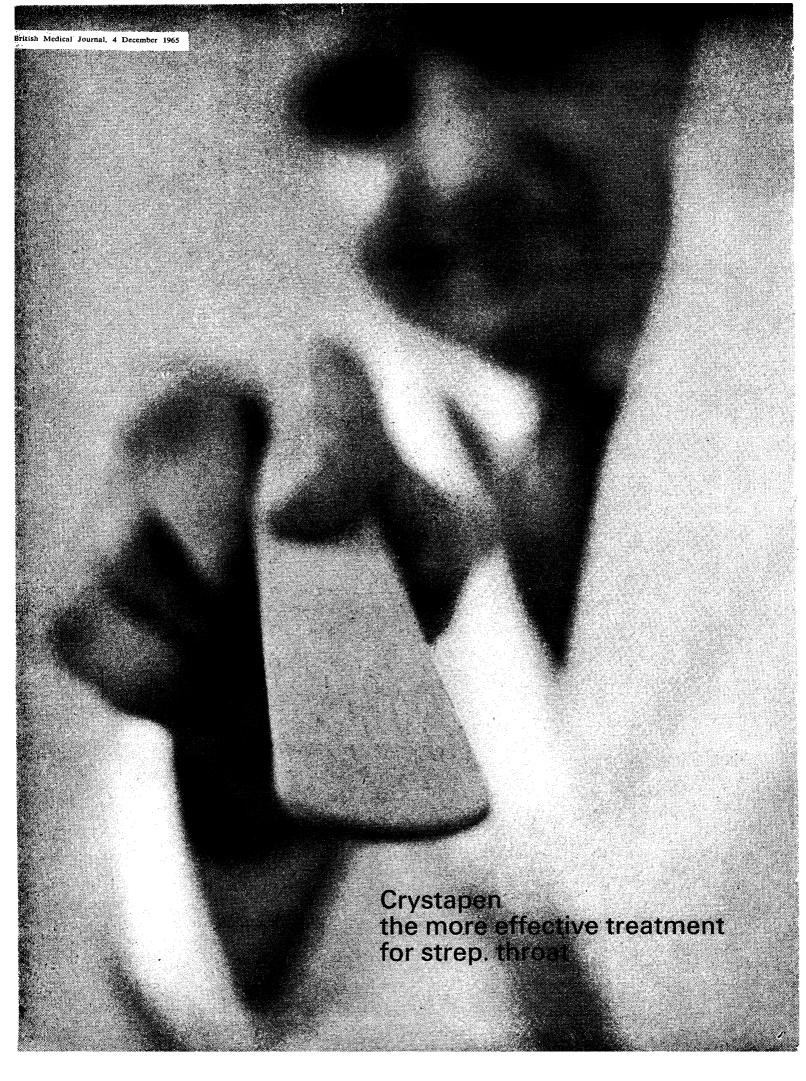

As society becomes progressively more complex the problem of emotional disturbance grows steadily more acute. A wide variety of mental and emotional disorders, usually characterised by symptoms of both depression and anxiety, present the General Practitioner with an ever increasing volume of work. The development of psychotropic drugs has partially helped to alleviate this problem but it is now accepted that the treatment of one symptom alone may often lead to the

aggravation of the other^{z-5}; this means that the use of an antidepressant together with a tranquilliser is often desirable.

Triptafen is just such a combination in which both constituents are established and well-tried drugs. The balanced formulation of anti-depressant amitriptyline and tranquilliser perphenazine simplifies and facilitates the treatment of emotionally disturbed patients²⁻⁷. Triptafen offers efficacy, economy and simplicity of prescribing.

Each tablet contains amitriptyline hydrochloride 25 mg. and perphenazine B.P. 2 mg. 'Triptafen' is a registered trade mark.

An analysis of the nutritional properties of Mackeson

Of course, dark beers have long been regarded as a valuable aid in building up strength after illness. But Mackeson has the important advantage of being more acceptable to invalids and convalescents because of its taste.

Instead of having a bitter taste

it is smooth and mild in flavour and consequently 'goes down' much better with the patients.

Calorific Value: 276 calories per pint, essentially equal to three quarters of a pint of milk.

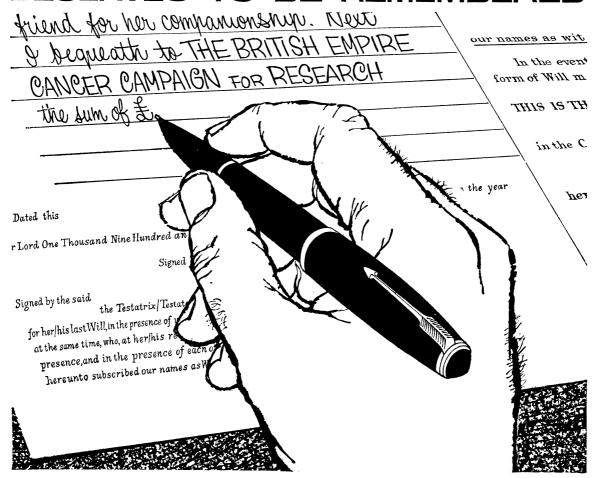

Lactose Sugar: One of the main ingredients, easily digested and quickly assimilated even by weakened digestive systems. Nitrogenous Matter: as protein break-down products, e.g. peptides and amino acids.

B-Group Vitamins: contains valuable water-soluble members of this group of vitamins.

CANCER RESEARCH

DESERVES TO BE REMEMBERED

You may be asked from time to time to suggest a deserving cause as the subject of a bequest. Please remember that every year the British Empire Cancer Campaign for Research has to find more and more money for cancer research work not only in this country but in many parts of the Commonwealth. All this money must come from voluntary donations and bequests. The appropriate words to use in a will are: "I bequeath to the British Empire Cancer Campaign for Research the sum of £....." or "I devise and bequeath the residue of my estate to the British Empire Cancer Campaign for Research".

For further information please write to Sir Joseph Lockwood, Hon. Treasurer, British Empire Cancer Campaign for Research, Dept. BM.L., 11 Grosvenor Crescent, London SW1.

BRITISH EMPIRE CANCER CAMPAIGN FOR RESEARCH

MEDICAL OFFICERS OF THE ROYAL AUSTRALIAN AIR FORCE

If you are under 53 years of age, a recently retired Medical Officer, a Clinical Registrar or a General Practitioner, you could be considered for one of the following vacancies:

(I) Ex-Service Medical Officers

Appointment to a Short Service Commission at a rank and with seniority determined on the basis of previous service rank, experience and academic qualifications. In suitable cases service may be extended on a S.S.C. basis, or where practicable from an age viewpoint, by appointment to a permanent commission.

(2) Clinical Registrars

If you have suitable experience and preferably appropriate postgraduate academic qualifications in general medicine, general surgery and anaesthesia, the R.A.A.F. offers appointment to a Short Service Commission. Successful applicants will be employed as clinical registrars in R.A.A.F. hospitals in Australia or overseas. Appointment will be at the rank of Squadron Leader with seniority according to qualifications. Suitable officers may be offered a Permanent Commission after a preliminary period.

(3) General Practitioners

The R.A.A.F. offers appointments to a Short Service Commission for general medical duties. Rank and seniority will depend on experience and qualifications. Those without previous service in the Medical Branches of the Armed Forces will normally be appointed at the rank of Flight Lieutenant. Those with such previous service may be appointed Squadron Leader.

Duties

These involve medical duties at R.A.A.F. Hospitals or R.A.A.F. bases within Australia and/or overseas, and include active clinical work. Successful candidates will also be required to study and practise aviation medicine associated with the care of flying personnel.

Rates of Pay

Flight Lieutenant—single £A.2,515-£A.3,146 married £A.2,816-£A.3,447

Squadron Leader—single £A.3,295-£A.3,745 married £.A3,596-£A.4,046

Wing Commander —single £A.4,075-£A.4,256 married £A.4,376-£A.4,557

Group Captain—single £A.4,720—married £A.5,021.

Successful candidates will be appointed in London, and first class passages to Australia provided for themselves and families.

" BRITISH MEDICAL JOURNAL"

ASSISTANT EDITOR

The Council of the British Medical Association invites applications from registered practitioners for the ap-pointment of a Medical Assistant Editor to the British Medical Journal, starting on April 12, 1966, or possibly earlier. The initial salary will be £2,783 a year, rising by annual increments of £150 to £3,833 a year. In exceptional circumstances the initial salary may be above the minimum of the scale. The appointment will be for a probationary period of six months in the first place. The Asso-ciation's superannuation scheme will

apply on substantive appointment.

Candidates are expected to have a Candidates are expected to have a wide knowledge of medicine and must present evidence of literary ability and/or journalistic experience. A knowledge of one or more foreign languages is desirable. Applicants should send full particulars of qualifications and experience, together with the names and addresses of three persons to whom reference may be made. sons to whom reference may be made, to the Editor of the British Medical Journal, B.M.A. House, Tavistock Square, London W.C.I, not later than December 31, 1965. Envelopes should be marked "British Medical Journal Assistant Editors" Assistant Editor."

PRACTICES (Executive Councils)

For vacancies (except those in Scotland) apply on Form E.C.16A, obtainable from the Executive Council, Mark envelopes "Vacancy."

"Yacancy."

"Yacancy."

APPLICATIONS ARE INVITED FOR A medical practice vacancy at Thundersley, a rapidly developing area in Benfleet Urban District. No list of patients. Average lists in the area are over 3,000 and there is every possibility that an incoming practitioner would build up a substantial list in a reasonably short time. The area is "designated" and an initial practice allowance is payable. Every possible assistance will be given to obtain surgery premises. Applications to the undersigned, on Form Ec.16A by first post December 11, 1965.—E. Bergdahl, Esc., Clerk of the Council, Escentive Council, Queen's Hall, Avenue, Holland-on-Sea, Clacton-on-Sea, Essex. (H.3778)

COMMERCIAL APPOINTMENTS—see also p. lxi

The expansion of our European Clinical Evaluation activities and our desire for even higher standards of trials, demands that we add

YOUNG BOCTOR

to our Clinical Evaluation team to work as the

ASSISTANT MEDICAL RESEARCH MANAGER U.K.

Based at Surbiton.

Responsible for arranging clinical trials of new drugs in the U.K.

This appointment arises as a result of the promotion of the previous manager.

We seek a young man under 35 who has a real interest in clinical trial work and who has a questing, yet positive approach to problems.

The personality of the Doctor appointed must be such that it is acceptable to a broad range of medical men in the United Kingdom.

The post will carry a good salary—for the right man—and the use of a company car.

The post will involve a reasonable degree of travel in the United Kingdom.

Salaries in The Winthrop Products Company are reviewed regularly and salary increases are related to a man's contribution to the common goal. Working conditions and companions are first class. We normally work a five-day week.

This is a challenging and responsible post that offers a stimulating and rewarding future.

If you would like to discuss this appointment in greater detail, would you send details of your experience to date to David Rowlands, Staff Director, The Winthrop Products Company, Winthrop House, Surbiton, Surrey, who has been asked to handle this appointment personally.

International Medical Research

Two posts are available which offer unusual interest and variety to well-qualified doctors, aged 30 to 45, with a scientific and international outlook. The work consists of:

• evaluating the potential application of research drugs via pre-clinical and clinical trials throughout the world
• dealing with unusual medical queries arising throughout the world
• keeping abreast of international medical thinking and practice throughout the world throughout the world
• keeping abreast of international medical thinking and practice throughout the world via con-erences, literature surveys, etc.
• lecturing on specialized topics
• liaison with a major pharmaceutical research unit. One post entails residence in the London area and the other, upstate New York. Both entail much travel; fluency in a foreign language in addition to English is necessary (note: school French is not enough. Spanish would be particularly helpful.) Although good qualifications and good administrative ability are called for, the doctors appointed must also be good mixers who can be at ease in any capital city or major hospital. These are pensionable career appointments offering security and prospects; the starting salary in London will be not less than £3,500. An appropriate dollar salary will be paid in New York. Candidates should state their preference.

(Ref. M5/1836/BMI)

UNIVERSITY OF NEW SOUTH WALES

ASSOCIATE PROFESSOR in the DEPARTMENT OF MEDICAL MICROBIOLOGY

Salary will be not less than £A.4,100 per annum, and will be determined in relation to the successful applicant's qualifications and experience.

Applicants should have high academic qualifications and practical training and experience in medical microbiology, as well as experience in teaching and research in this or related fields.

The successful applicant will be head of the newly established department of medical microbiclesy in the faculty of medicine, and he will be responsible for advising the faculty on the curriculum in medical microbiclegy and for implementing the teaching programme. In this he will have the co-operation of the well-established department of microbiology in the school of biological sciences and of senior staff in the hospital division of microbiology.

The department will be accommodated in the clinical sciences building at Prince Henry Hospital, where offices, laboratories, preparation areas and animal facilities are available. The successful applicant may be considered for appointment to the staff of the Prince Henry and Prince of Wales Hospitals.

Subject to the consent of the University Council associate professors may undertake a limited amount of higher consultative work.

The University reserves the right to fill any position by invitation.

Details of appointment, including superannuation, study leave, and housing scheme, may be obtained from the Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London S.W.1.

Applications close in Australia and London on January 10, 1966.

Oversea-contd.

ANGLO AMERICAN CORPORATION (CENTRAL AFRICA) LIMITED

MEDICAL OFFICERS

Applications are invited from registered medical practitioners for vacancies which have arisen at hospitals of the group's copper mines in Zambia—at the Nchanga mine which has two hospitals, one with 250 beds, the other with 70 beds and at the Bancroft mine hospital which has a capacity of some 200 beds.

The positions are as general duty medical officers working under the direction of each company's Chief Medical Officer. The duties are primarily those of the general practitioner and will include the care of both expatriate and indigenous patients in the hospital. Some general surgical experience would be an advantage. The hospitals are modern and well-equipped and include laboratory and X-ray facilities.

Basic commencing salary would depend on qualifications and experience but would be not less than £3,000 per annum. The appointment would be on a contract basis for a minimum period of three years and this may be renewed by mutual agreement. In addition to the salary there is a terminal gratuity in lieu of pension and a free life assurance scheme. There is also a Christmas bonus of 5% of basic salary which is paid in December each year. Up to three-and-one-half adult fares for the employee and his family are paid for the outward and for the return journey upon completion of service. Partially furnished housing at a nominal rental is available and an educational allowance is payable for children attending secondary education outside Zambia. There are generous leave conditions and other benefits which can be discussed at an interview.

Applications, which should give full details of experience, age, qualifications, marital status and the names of two medical referees, should be submitted to:

The Appointments Officer, Dept. B/101, 7 Rolls Buildings,
London, E.C.4

to reach him not later than December 17, 1965.
