ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1 2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

summer-long protection against HAY FEVER with

D-VAC Pollens 3 dose course

Sufferers from 'classical' hay fever and pollen asthma can look forward to relief next summer after desensitisation with D-VAC Pollens. This provides fundamental treatment of pollen allergy, giving a high degree of protection in the majority of patients and halting any tendency to deterioration. Long-term relief will be obtained in most cases from a pre-seasonal course given in each of three successive years.

D-VAC Pollens, Bencard emulsified 'depot' pollen vaccine, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

Primary Course (D-VAC Pollens Nos. 1, 2 and 3—250, 750 and 3,500 Noon units respectively): designed for patients who have not received pollen vaccine treatment in the last five years, or who are known to be highly sensitive to grass pollens, and for children (aged 6-12 years).

Advanced Course (D-VAC Pollens Nos. 2, 3 and 4—750, 3,500 and 7,500 Noon units respectively): designed for patients aged over 12 who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients known to exhibit very strongly positive skin test reactions or suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose being given in February or March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

TO BE SURE

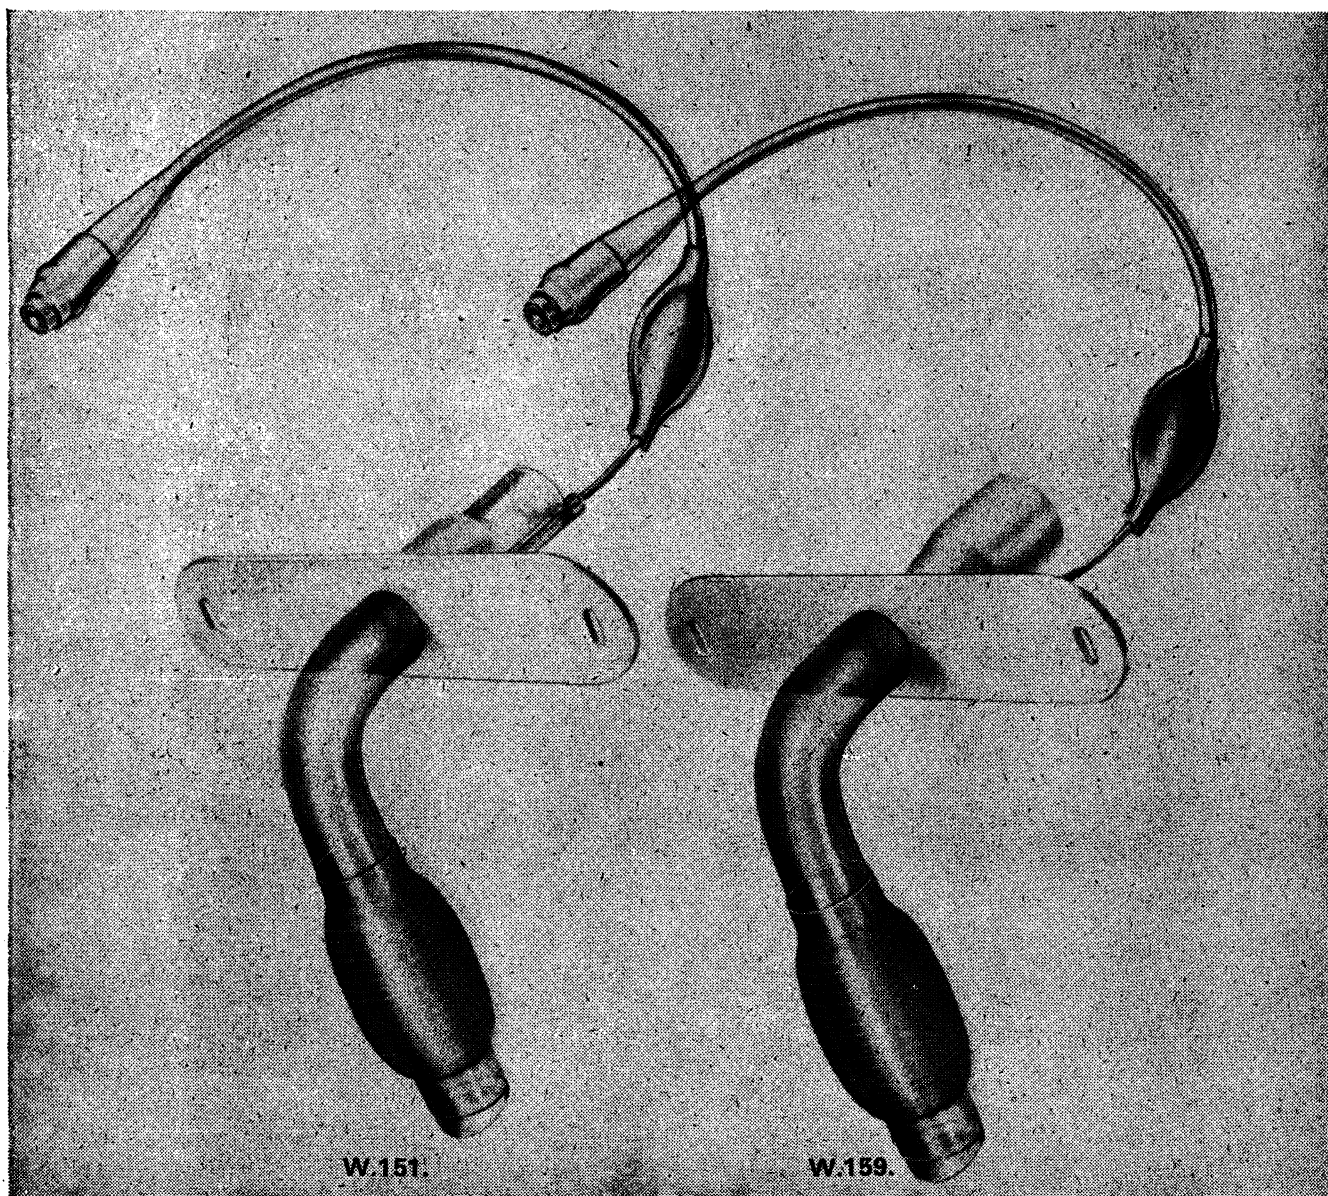

of obtaining D-VAC Pollens, it is advisable to prescribe and order before 31st December: no order can be accepted after 21st January.

Prescriptions and orders, for D-VAC Pollens 'Primary' or 'Advanced', should state the exact date (between 14th February and 12th March) on which the first dose is to be injected. The first dose will be despatched to arrive by this date. (D-VAC Pollens is not available outside the U.K.)

Are

really controlled

RASTINON

IS THE FIRST CHOICE IN INITIATING
ORAL ANTIDIABETIC THERAPY

For the maturity-onset diabetic whose blood sugar levels are inadequately controlled by diet, Rastinon provides control at normoglycaemic levels.

Given in divided doses after meals, Rastinon is rapidly absorbed and this ensures the maximum effect when the need is greatest. As hypoglycaemia is an exception with Rastinon, nocturnal hypoglycaemia will not present a hazard even with high doses.

Since side effects are few and minor the unsurpassed ratio of safety to effectiveness makes Rastinon the first choice for initiating oral antidiabetic therapy. Rastinon tablets each contain 0.5 g. tolbutamide B.P.

ETHACRYNIC ACID REGD

extends the reach of diuretic therapy

- 'Edecrin' is chemically and pharmacologically distinct from all other diuretics in current use.
- 'Edecrin' has a wider range of effectiveness than the thiazides and related diuretics.
- 'Edecrin' may be used in oedema of all grades of severity, whether acute or chronic.
- 'Edecrin' has proved effective in many cases resistant to all other diuretics.
- 'Edecrin' has an extremely rapid onset of action—faster than the parenteral mercurials.
- 'Edecrin' produces a more favourable ratio of sodium to potassium excretion than the thiazides.

a higher degree of iron absorption

D. M. Oxon

Ferrograd® C

New presentation of 'Gradumet'® iron The advantages of Ferro-Gradumet in providing ample amounts of iron in a single daily dose without gastric upset are now widely recognised by the medical profession. Ferrograd C is an extension of the 'Gradumet' presentation, consisting of ferrous sulphate in a slow-release matrix, *plus* enough vitamin C to produce improvement of absorption when this is a problem.

Iron with enough C Experimental and clinical investigation of the addition of vitamin C to oral iron therapy shows that there is an increase in absorption of iron providing *enough* vitamin C is given. Ferrograd C contains 500 mg of vitamin C and evidence shows that this amount is sufficient to make the addition worthwhile in terms of more effective absorption and possibly in utilization.

Without gastric upset Steps taken to improve absorption are of no practical value, however, unless the preparation

is well tolerated and taken regularly. The 'Gradumet' vehicle virtually eliminates the unpleasant side-effects experienced by many patients on ordinary iron therapy. Instead of exposing the stomach to large quantities of corrosive iron salts, the ferrous sulphate within the 'Gradumet' is slowly leached out, independent of body chemistry, as it passes through the gastro-intestinal tract. Ferrograd C combines the convenience and acceptability of this method of presentation together with an increased level of absorption. It is particularly recommended for those patients in whom absorption of iron is known to be poor, or where parenteral iron is being considered.

PRESENTATION Each red Filmtab® (film-coated tablet, Abbott) contains 525 mg ferrous sulphate BP (in exsiccated form), equivalent to 105 mg elemental iron and 500 mg of vitamin C as sodium ascorbate. **DOSAGE** One Ferrograd C daily before a meal.

Life At High Pressure

'High-pressure' living is often involved with inflation—in every sense.

Monetary inflation. Inflation of the ego—and gastric inflation—the hyperacidity and peptic ulcer common in the 'high-pressure' patient may be associated with inflation due to an excess of gas. This causes symptoms *per se*, and may also create a foam in the gastric lumen that can prevent antacid penetration.

polycrol

is the answer to this common problem in the 'high-pressure' patient. In addition to its balanced content of highly effective antacids, aluminium and magnesium hydroxides, 'Polycrol' contains methylpolysiloxane, a medicinal silicone that destroys intra-luminal foam by an action at the bubble surface. In this way it both facilitates penetration by its antacids, and relieves flatulent symptoms.

'Polycrol' is designed for the hyperacidic, 'high-pressure' patient.

'Polycrol' is available as a Gel in 12 oz. bottles and as a tablet in containers of 100.

Try this test. Add Aldactone-A to conventional diuretic treatment and see for yourself how it can improve the patient's condition

'In addition, and most important, *he felt well*. He did not feel like the weak, washed-out patient that I have come to expect after intensive diuretic therapy.'

The Use of Aldosterone Antagonists in Cardiological Practice.
Paper presented before the Cardiac Society of Australia
and New Zealand, October 1960.

Conventional diuretics act on the proximal renal tubule. They allow reabsorption of sodium and water and loss of potassium to continue at the distal tubule. But Aldactone-A (brand of spironolactone), added to the regimen, acts at the distal tubule, and prevents excessive sodium reabsorption and potassium loss.

Aldactone-A thus...

- ☐ Enhances sodium excretion
- ☐ Conserves potassium
- ☐ Overcomes diuretic resistance
- ☐ Improves diuresis
- ☐ Leaves patients feeling well

PAYNOCIL

in the long term
management of
Rheumatoid Arthritis

Although aspirin is still the mainstay of treatment for Rheumatoid Arthritis, patients need a high daily dose and most find it unpalatable and inconvenient to take without water.

PAYNOCIL overcomes these difficulties:

- Each Paynocil tablet contains ten grains of acetylsalicylic acid—double the usual amount—in a glycine base, thus halving the number of tablets needed daily.
- The aspirin enters the stomach in finely divided particles and acts within minutes of swallowing.
- Paynocil melts easily in the mouth and can be taken anywhere, any time, without water, while its sweet lemon flavour gives a pleasant taste.

DOSAGE: 2-3 tablets three times a day for 2-3 weeks. When the patient responds, reduce the dosage to 1-2 tablets three times a day as a maintenance dose.

CONTRA-INDICATION: Paynocil should not be given when aspirin is contra-indicated.

MOGADON* AND NATURAL SLEEP

Striking advances have recently been made into the knowledge of sleep with the aid of the electroencephalogram, and it is now recognised that sleep does not consist of a quantitative reduction in cortical activity but of a qualitative change. Hypnotics, by their generalised depressant action on all the brain structures, greatly reduce cortical activity and sleep takes on an abnormal pattern. The development of Mogadon, however, has now made the treatment of insomnia possible without any significant lessening of cortical activity. The sleep induced closely resembles natural sleep; there is no disturbance of the normal rhythmical balance that exists between the sleep and wake processes and the patient will awake refreshed, without hangover and without mental confusion.

NACTON allows the patient, not the ulcer, to dictate his diet

One man's meat (or fish!)...

Are delectable foods barred to your ulcer patients?

Once control is established with NACTON, more pleasures of the table can be enjoyed. How does NACTON achieve this control?

- ☐ It halves gastric secretion of acid
- ☐ and reduces gastric and intestinal spasm.

With this established, the patient can:

- choose his own food
- gain prolonged relief from pain
- get a good night's rest
- do away with milk and cream diets
- reduce or eliminate antacid consumption
- lead a normal life.

The "Battle of Britain" that's still being fought

The coming of winter once again underlines the disturbing fact that 15-20,000 people with respiratory symptoms will die during the next 6 months. The unceasing war against diseases of the bronchitis-asthma-emphysema group has plainly not yet been won.

About 30,000 deaths occur annually in Britain from bronchitis alone and the number shows no sign of decreasing. Deaths attributable to chronic bronchitis amount to nearly 10% of all deaths of men aged 45-64—more than from any other respiratory disease.

In another category—but none the less important—is the fact that bronchitis currently accounts for more working days off than any other illness.

Into combat—with tetracycline

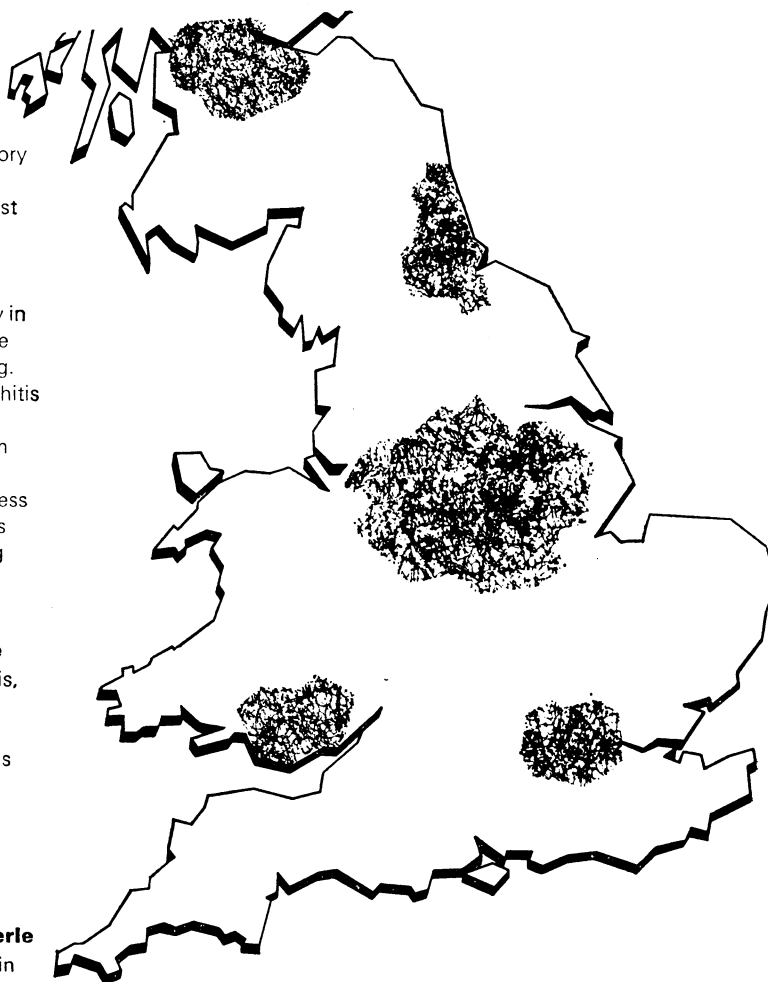

In the treatment of chronic bronchitis, current opinion advocates the employment of a drug capable of suppressing both the *Pneumococcus* and the *Haemophilus influenzae*. The one capable of doing this with safety is tetracycline. 1.

The most effective weapon— demethylchlortetracycline Lederle

The modern tetracycline—Ledermycin demethylchlortetracycline Lederle—has been shown to provide higher and more sustained antibacterial activity levels in the serum than other tetracyclines. Broad-spectrum coverage persists up to 48 hours after the final dose—a safeguard against stopping treatment too early. "Most clinicians are agreed that tetracycline is preferable to the oxy- and chlor- derivatives . . . demethylchlortetracycline may possibly become the treatment of choice." 2.

ACTHAR GEL

ACTH Gel Inj. B.P.

PROMPT RELIEF OF PAIN

INCREASED MOBILITY

MORE NORMAL LIFE

In over 15 years ACTHAR GEL has given new life to thousands of rheumatoid patients and is still unsurpassed.

Stimulation Therapy

ACTHAR GEL is not a steroid. It is a polypeptide which stimulates the adrenal cortex to release the full range of natural steroids, as opposed to the oral administration of a single synthetic steroid.

Hormone Balance Preserved

ACTHAR GEL maintains the integrity of the pituitary/adrenal axis, thereby avoiding many of the hazards of long-term corticosteroids. Normal stress response is possible and treatment can easily be withdrawn.

Safety in Use

The toxic effects of the more potent analgesics are avoided, and such side effects as are observed are

usually due to over-dosage. These are seldom serious, and may be reversed by adjusting the dosage.

Simple Administration

Several thousands of self-injections have now been given and many previously crippled patients have returned to, and remained at, their occupations.

Reliable Potency

The method of manufacture and the full B.P. 1963 assay on hypophysectomised rats means that ACTHAR GEL is the most reliable long-acting corticotrophin available. For fuller details please write for the book "The Place of ACTHAR GEL in the treatment of Rheumatoid Arthritis."

MEDICAL OFFICERS OF THE ROYAL AUSTRALIAN AIR FORCE

If you are under 53 years of age, a recently retired Medical Officer, a Clinical Registrar or a General Practitioner, you could be considered for one of the following vacancies:

(1) Ex-Service Medical Officers

Appointment to a Short Service Commission at a rank and with seniority determined on the basis of previous service rank, experience and academic qualifications. In suitable cases service may be extended on a S.S.C. basis, or where practicable from an age viewpoint, by appointment to a permanent commission.

(2) Clinical Registrars

If you have suitable experience and preferably appropriate postgraduate academic qualifications in general medicine, general surgery and anaesthesia, the R.A.A.F. offers appointment to a Short Service Commission. Successful applicants will be employed as clinical registrars in R.A.A.F. Hospitals in Australia or overseas. Appointment will be at the rank of Squadron Leader with seniority according to qualifications. Suitable officers may be offered a Permanent Commission after a preliminary period.

(3) General Practitioners

The R.A.A.F. offers appointments to a Short Service Commission for general medical duties. Rank and seniority will depend on experience and qualifications. Those without previous service in the Medical Branches of the Armed Forces will normally be appointed at the rank of Flight Lieutenant. Those with such previous service may be appointed Squadron Leader.

Duties

These involve medical duties at R.A.A.F. Hospitals or R.A.A.F. bases within Australia and/or overseas, and include active clinical work. Successful candidates will also be required to study and practise aviation medicine associated with the care of flying personnel.

Rates of Pay

Flight Lieutenant—single £A.2,515—£A.3,146
married £A.2,816—£A.3,447

Squadron Leader—single £A.3,295—£A.3,745

DEPARTMENT OF HEALTH**

Medical Officer of Health: R. L. Linton,
M.R.C.S., L.R.C.P., D.P.H., D.C.H.

**APPOINTMENT OF
DEPARTMENTAL MEDICAL OFFICERS**

Vacancies exist for full-time medical officers in the Assistant Medical Officer grade. Duties will be mainly concerned with child development clinics, the school health service and maternity services, although other general public health duties may be allocated by the Medical Officer of Health.

Facilities exist for in-service clinical training in the assessment of handicapped children. In the Borough is the first Local Authority purpose-built Hearing Clinic (Audiology Unit) and a new medical unit is in course of construction, extending the existing facilities for the assessment and treatment of cerebral palsied and other physically handicapped children. Medical surveillance is provided by the Department for handicapped children in four day special schools in the Borough for (i) deaf, with associated classes for partially hearing pupils in normal schools, (ii) physically handicapped, (iii) delicate/maladjusted and (iv) educationally sub-normal pupils. The Department also runs two junior training schools, two special care units and two adult training centres. Additionally various training facilities are provided for medical students and postgraduate D.C.H. students. For some years the Department has routinely accepted medical students from London Teaching Hospitals for visits to the various units and services comprising the Health Department. Successful applicants will be placed on an appropriate point within the scale of £1,515 to £2,130 per annum. A lump sum car allowance is payable. A "full-time" assisted D.P.H. course scheme is in operation in the Borough. The appointment is permanent, pensionable and subject to medical assessment. Whitley Council Conditions apply. Preference will be given to candidates possessing either D.P.H. or D.C.H.

Applications, giving age, details of training, present and previous appointments, with names of two referees, should reach The Medical Officer of Health, at 92 Bath Road, Hounslow, by December 22, 1965. (5014)

CANCER INSTITUTE
Melbourne, Australia

MEDICAL DIRECTOR

The Board advises that it will proceed to the appointment of a Medical Director to take up duties on September 16, 1966, or as soon thereafter as possible.

The objectives of the Board as stated in Part II of the Cancer Act, 1958, are as follows:

To provide facilities for research and investigation with respect to the causation, prevention, diagnosis and treatment of cancer and allied conditions.

To undertake such research and investigation.

To provide out-patient and in-patient hospital treatment at the Institute.

To arrange for the provision at any hospital within the meaning of the Hospitals and Charities Act 1958, of special clinics at which patients may seek relief from conditions in respect of which appropriate treatment is available at the Institute.

To provide hostels, or make other arrangements where necessary, for the accommodation of out-patients who are undergoing treatment at the Institute or at any clinic associated with it.

To provide at the Institute and, at any clinic established at any hospital, to arrange for the provision of—

(i) Teaching facilities for medical students;

(ii) Postgraduate instruction for medical practitioners; and

(iii) Instruction to nurses, technicians and physicists

with regard to cancer and allied conditions, including the diagnosis and treatment of those conditions.

To co-ordinate all activities arising from the foregoing objects.

In furtherance of these objectives, the work of the Institute is primarily clinical care of the patient and research, and embraces radiotherapy, chemotherapy, surgery, and other medical requirements, and research relating to cancer.

Applications for this position are hereby invited from duly qualified medical practitioners possessing a senior qualification in any branch of medicine, interested in clinical administration, and possessing suitable personal qualifications, and attracted to the objectives set out above.

Full-time salary is present £A.5,783 per annum. Other conditions include superannuation (equivalent to F.S.S.U.), long service leave, sick leave and recreational leave. Retiring age 65 years.

The Medical Director is ex officio a Member of the Board and of the Executive Committee of the Board of the Institute.

Full conditions of appointment, statement of organization, activities, staff, and duties and responsibilities of the Medical Director, application to the Manager and Secretary.

Applications on forms available from the undersigned, at 278 William Street, Melbourne, close on February 23, 1966.

The Board reserves the right to fill this appointment by invitation.—R. K. Churches, Manager and Secretary. (3126)

ST. ANDREW'S HOSPITAL, NORTHAMPTON

FOR NERVOUS AND MENTAL DISORDERS

President: The Earl Spencer
Medical Superintendent
D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch. For terms and further particulars, apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.

ANOTHER 'FIRST' FROM RIKER.....

....NEW 400-DOSE MEDIHALER

When Riker introduced *Medihaler* it was the world's first pressurised aerosol for inhalation therapy . . . first with a measured dose . . . first with a dry spray of premicronised particles for optimum effect in bronchospasm. Now Riker announce another first—the 400-dose *Medihaler*. More compact, yet giving one third more treatment from each unit new *Medihaler* is the result of continuous development and of successful use by doctors the world over. **With it the cost per dose is reduced 15 per cent, to less than $\frac{1}{2}$ d.**

Although each unit lasts so much longer, hygiene is improved because with each prescription the patient receives a complete unit. The empty unit, including adapter is thrown away. In addition, the dustcap completely encloses the mouthpiece.

In bronchospasm, *Medihaler* continues to provide an immediacy and degree of relief unsurpassed by any other method—including injection. Now it is even easier and more convenient for the patient to use.
