# CREMOSTREP

Kaolin, 'Sulfasuxidine', Streptomycin

REGD

'Cremostrep' is a palatable cream containing kaolin, 'Sulfasuxidine' and streptomycin, which gives rapid control of most infectious diarrhoeas. Ready for immediate use, 'Cremostrep' is suitable for young and old, at home or on holiday.

## cream of the antidiarrhoeals

Each 5 ml contains 0.5 G 'Sulfasuxidine' (succinylsulphathiazole), 0.05 G streptomycin and 0.5 G kaolin. Detailed information is available to physicians on request. 'Sulfasuxidine' is a registered trademark.

# 'MIGRIL' MASTERS MIGRAINE

It is paradoxical that ergotamine, accepted as the most effective drug against the headache of migraine, may cause nausea and vomiting—two of the very symptoms of a migraine attack.

'Migril' successfully overcomes these symptoms by the inclusion of cyclizine hydrochloride, the rapid-acting and effective anti-emetic.

Each 'Migril' tablet contains:

Ergotamine tartrate, B.P.	2 mg.
Cyclizine hydrochloride, B.P.	50 mg.
Caffeine hydrate, B.P.	100 mg.

# Ceporin

provides effective, safe  
broad-spectrum activity

Cephaloridine . . . "is not inactivated by penicillinase and has a remarkably broad spectrum."

*Practitioner*, 1965, 195, 408

In serious infections of the respiratory tract, especially mixed infections, the unique activity of Ceporin can be used to particularly good advantage. The common infecting organisms in bronchitis and bronchopneumonia are highly sensitive to the bactericidal action of Ceporin, including penicillinase-producing staphylococci. This is why Ceporin frequently gives dramatic clearance of infection, rendering the sputum sterile and providing rapid relief of symptoms.

Ceporin can be safely used in patients hypersensitive to penicillin. In all patients and in all indications the injections are remarkably painless and make the whole

dose available to the body.

**Other indications** for Ceporin include urinary tract infections, meningitis, septicaemia, bacterial endocarditis and soft tissue infections.

ANOTHER 'FIRST' FROM RIKER.....

## ...NEW 400-DOSE MEDIHALER

When Riker introduced *Medihaler* it was the world's first pressurised aerosol for inhalation therapy . . . first with a measured dose . . . first with a dry spray of premicronised particles for optimum effect in bronchospasm. Now Riker announce another first—the 400-dose *Medihaler*. More compact, yet giving one third more treatment from each unit new *Medihaler* is the result of continuous development and of successful use by doctors the world over. **With it the cost per dose is reduced 15 per cent, to less than  $\frac{1}{2}$ d.**

Although each unit lasts so much longer, hygiene is improved because with each prescription the patient receives a complete unit. The empty unit, including adapter is thrown away. In addition, the dustcap completely encloses the mouthpiece.

In bronchospasm, *Medihaler* continues to provide an immediacy and degree of relief unsurpassed by any other method—including injection. Now it is even easier and more convenient for the patient to use.

## The "Battle of Britain" that's still being fought

The coming of winter once again underlines the disturbing fact that 15-20,000 people with respiratory symptoms will die during the next 6 months. The unceasing war against diseases of the bronchitis-asthma-emphysema group has plainly not yet been won.

About 30,000 deaths occur annually in Britain from bronchitis alone and the number shows no sign of decreasing. Deaths attributable to chronic bronchitis amount to nearly 10% of all deaths of men aged 45-64—more than from any other respiratory disease.

In another category—but none the less important—is the fact that bronchitis currently accounts for more working days off than any other illness.

### Into combat—with tetracycline

In the treatment of chronic bronchitis, current opinion advocates the employment of a drug capable of suppressing both the *Pneumococcus* and the *Haemophilus influenzae*. The one capable of doing this with safety is tetracycline. 1.

### The most effective weapon— demethylchlortetracycline Lederle

The modern tetracycline—Ledermycin demethylchlortetracycline Lederle—has been shown to provide higher and more sustained antibacterial activity levels in the serum than other tetracyclines. Broad-spectrum coverage persists up to 48 hours after the final dose—a safeguard against stopping treatment too early. "Most clinicians are agreed that tetracycline is preferable to the oxy- and chlor- derivatives... demethylchlortetracycline may possibly become the treatment of choice." 2.

## "BRITISH MEDICAL JOURNAL"

### ASSISTANT EDITOR

The Council of the British Medical Association invites applications from registered practitioners for the appointment of a Medical Assistant Editor to the *British Medical Journal*, starting on April 12, 1966, or possibly earlier. The initial salary will be £2,783 a year, rising by annual increments of £150 to £3,833 a year. In exceptional circumstances the initial salary may be above the minimum of the scale. The appointment will be for a probationary period of six months in the first place. The Association's superannuation scheme will apply on substantive appointment.

Candidates are expected to have a wide knowledge of medicine and must present evidence of literary ability and/or journalistic experience. A knowledge of one or more foreign languages is desirable. Applicants should send full particulars of qualifications and experience, together with the names and addresses of three persons to whom reference may be made, to the Editor of the *British Medical Journal*, B.M.A. House, Tavistock Square, London W.C.1, not later than December 31, 1965. Envelopes should be marked "*British Medical Journal*—Assistant Editor."

Department of Pathology

**PATHOLOGIST-  
CYTOLOGIST**

Applications are invited for the position of Pathologist-Cytologist in the above department.

The successful applicant will be required to take charge of the cytology unit which is responsible, in conjunction with the Division of Morbid Anatomy, for the development of diagnostic extolative cytological techniques for the Brisbane Hospital and the performance of such cytological work as is referred to it. At present the work is mainly concerned with cytological diagnosis of malignant disease of the female genital tract but it is desired to expand the work to diagnostic extolative cytology generally. There is opportunity to undertake investigational work in this field.

The Department of Pathology serves the Brisbane Hospital, the Children's Hospital and the Women's Hospital, a total of about 1,700 beds. The cytology unit is housed in a new modern laboratory of about 3,000 square feet and has a staff of 10 part-time screeners and four technicians.

These hospitals are the major teaching hospitals for the University of Queensland, and the position may carry some teaching duties to undergraduate and postgraduate students. Applicants should be medically qualified and hold a specialist qualification in pathology registrable in Queensland and should have experience in the fields of morbid anatomy and cytology.

The position carries a salary of £A.4,662 (\$A.9,324) subject to future basic wage adjustments, and is superannuable. Travelling expenses to Brisbane may be paid subject to certain conditions. Further details may be obtained on enquiry from the Director, Department of Pathology, Brisbane Hospital, Herston Road, Brisbane N.9, Queensland, Australia.

Applications, stating full details of academic record, qualifications and experience, citing published papers and including names of three referees, should reach the Manager, The North Brisbane Hospitals Board, Herston Road, Brisbane N.9, Queensland, Australia, by February 5, 1966. (H.3967)

## Overseas—contd.

## SWEDISH LAPPLAND

Experienced doctors of all categories are required in the north of Sweden for both hospital and general practice. The technical facilities are excellent and a good income is assured.

While large areas are undeveloped (and offer unlimited opportunities for open-air activities) there are modern towns with thriving industries, good schools, rapid communications by rail, road and air and comfortable housing. Forestry and iron-ore mining are among the main occupations. The climate is of the continental type.

Tuition in Swedish can be arranged, for familiarity with the language and, in most cases, a period of assistantship will be necessary before registration and permanent employment.

Dr. J. B. Allan, who is an anaesthetist at the hospital in Gällivare, will visit Britain in January and can arrange to call on doctors who are interested in this proposition in order to provide more detailed information regarding living and working conditions. Anyone wishing to contact him should write to him—Box OVJ217, B.M.J.

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”*

Med. Times, N.Y., 1958, 1, 74

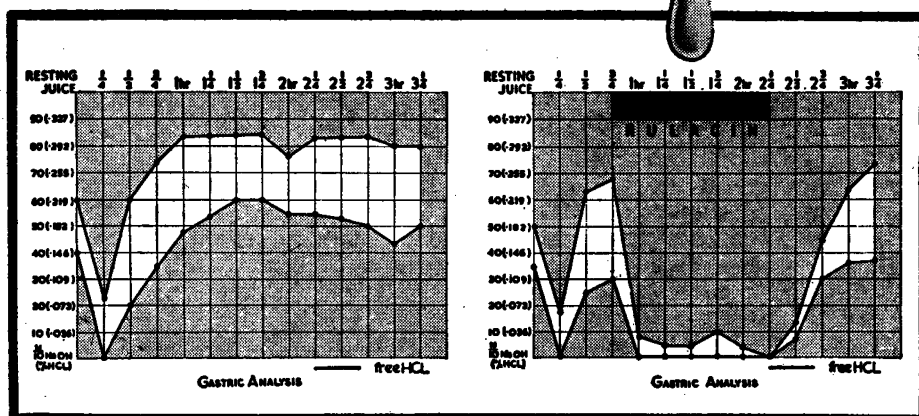

## Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.
