## FAMILY PLANNING

A Handbook for the Doctor

Edited by **MARY POLLOCK**, M.B., CH.B., M.R.C.O.G., *Clinical Assistant, Gynaecological and Fertility Department, Royal Free Hospital, London, with 15 contributors.*

This is the first time that a handbook has been written for *all* family planning advisers, summarizing and presenting every aspect of birth control. Dr. Pollock and her team of distinguished contributors also stress the psychological side of family counselling, and the problems of infertility and gynaecological matters including exfoliative cytology.

**JOHN HARTLAND**, B.Sc., M.B., CH.B., M.R.C.S., L.R.C.P. *Visiting Psychiatrist, Hallam Hospital, West Bromwich; Honorary Vice-President of the Society for Medical and Dental Hypnosis.*

It is seldom realized how wide and varied a field can be covered by the use of hypnosis in general practice; many of the common conditions regularly seen in the practitioner's surgery can be treated by this method. This new book by a medical hypnotist and psychiatrist, with over 25 years' experience in this field, is an extremely practical text for the student of hypnotherapy, containing only the minimum amount of theory necessary for a basic understanding of the subject.

## HYPNOSIS OF MAN & ANIMALS

**Dr. FERENC A. VÖLGYESI**, assisted by **GERHARD KLUMBIES**.

Translated from the 2nd edition of *Menschen-und Tierhypnose* by M. W. Hamilton.

Dr. Völgyesi, who has a wide reputation in Europe as an expert in the therapeutic uses of hypnosis as well as being renowned for his researches on the subject, traces the history of hypnosis. Against the background of his own experience in the hypnosis of both animals and humans, he emphasizes the growth of our still imperfect knowledge of the hypnotic state and the various theories that are to be considered and concludes with a full discussion of his own therapeutic techniques.

# PENBRITIN K.S.

**Brings bacterial enteritis  
firmly under control**

PENBRITIN K.S., a new product from Beecham Research Laboratories, combines all the advantages of broad spectrum antibiotic therapy with a soluble, well absorbed sulphonamide (sulphadimidine) that is effective against certain bacterial strains insensitive to ampicillin. This formulation, with Kaolin, provides a highly effective treatment that brings bacterial enteritis firmly under control by eliminating both the cause and symptoms of diarrhoea.

- The systemic action of Penbritin and sulphadimidine removes infection in the wall of the intestine – the most important site of infection.
- The unabsorbed Penbritin and sulphadimidine deal effectively with bacteria in the lumen of the gut.
- Kaolin adsorbs toxins, consolidates stools and exerts a demulcent action on inflamed mucosa.

PENBRITIN K.S. gives the broadest coverage against entero-pathogenic bacteria.

Each 20ml. dose contains Penbritin (ampicillin B.P.) 0.375g./Sulphadimidine B.P. 1.0g./Light Kaolin B.P. 5.0g.

*Availability:* 60ml. bottles with dosage measure provided. A bottle is sufficient for one course of treatment.

Penbritin K.S. is a product of

# Flagyl

**the only effective  
oral trichomonacide**

World-wide clinical use throughout the last six years has shown that it is possible to obtain a 100 per cent cure rate in the treatment of trichomoniasis using 'Flagyl'\* brand metronidazole provided that the recommended dosage scheme is followed and any sexual consorts are treated concurrently to prevent re-infection.

In those few instances where treatment appears to have failed, and if laboratory tests to measure the concentration of metronidazole in the serum show that absorption from the gastro-intestinal tract has been adequate, the possibility of previously masked monilial or Neisserian infection should be considered.

'Flagyl' is supplied as Metronidazole Tablets B.P. 200 mg. in "Prescriber Units" of 21 tablets — a complete course of treatment.

## Keeping patients on a low-fat diet

**THE PROBLEM** For patients given a low-fat diet undoubtedly one of the greatest difficulties is keeping to their diet over a longish period. Tea or coffee without milk are not the easiest of tastes to acquire; even when the patient and his household are fully co-operative, low-fat dishes, week after week, call for no mean feat of ingenuity.

**NEW HELP** A simple and obvious answer is the use of non-fat milk for drinks and cooking. Patients and their families accept it readily. In Cadbury's Marvel doctors now have a tested product which they can recommend with complete confidence for use in coffee, for hot or cold drinks, puddings and custards, and any other normal household use.

**WHAT IS MARVEL?** Marvel non-fat milk granules are made from pure fresh dairy milk, in a way that extracts only the water and all but a trace (less than 0.15% when reconstituted) of the fat. Apart from the fat, and associated vitamins A and D, all milk nutrients (including the lactose, protein and valuable mineral salts) remain. Marvel contains no additives whatsoever. When it is reconstituted in water Marvel is exceptionally palatable, being similar in flavour and freshness to the taste of bottled milk.

**OTHER USES** In addition to its use where a low-fat diet is prescribed, Marvel can prove useful in high-protein diets. It is considerably less expensive than bottled milk, and can be taken as an addition to the normal milk supply. The 2s 3d tin makes 3½ pints, costing less than 8d a pint.

# approach to therapy

## Faster, more intensive action in relieving skin inflammation.

This graph demonstrates the influence of Ultralanum and other topical corticoids applied to an experimentally induced inflammation on the skin of volunteers. From the graph it can be clearly seen that the action of Ultralanum is more intensive, since a return to normal skin colour was achieved after 4 hours, whereas it was between 6-8 hours for the other preparations. Furthermore, a marked reduction in the degree of inflammation could be observed with Ultralanum after as little as one hour.

\*Comparison of anti-inflammatory activity of topical corticoids (modified vasoconstriction test) (1957) Brit. J. Dermatol. **69**, 11. (1962) Arch. Derm. **86**, 611, modified by Kolb (to be published).

Ultralanum is a highly effective corticoid ointment which has proved itself superior to other topical corticoids.

Ultralanum achieves excellent results, not only in cases which respond to topical corticoid therapy, but also on occasions, in chronic conditions which were previously resistant to such treatment.

### How Ultralanum's unique biphasic action is of benefit to you and your patients.

Ultralanum contains fluocortolone and fluocortolone caproate. Experiments employing the labelled substances have shown that the former penetrates rapidly into the skin, the latter only slowly.

This results in a dual action providing

rapid, often dramatic relief together with sustained therapeutic effect. Thus, following an initial improvement in the condition, therapy may often be maintained with one application daily. Patients are more likely, therefore, to follow the prescribed regimen with correspondingly better clinical results.

### How Ultralanum sets new standards of economy and convenience in use.

Ultralanum, with its single daily maintenance application offers economy and convenience to the patient.

Further economy is encouraged by the availability of 10 g. packs which avoid expensive "bathroom cabinet wastage" of unused medicament.

### Composition

ULTRALANUM PLAIN contains 0.25% fluocortolone and 0.25% fluocortolone caproate.

ULTRALANUM—with 2.5% clemizole-hexachlorophane for those cases for which an antibacterial agent is required.

Both these ointments are completely non-staining and cosmetically acceptable.

# Heinz cooking retains the maximum nutritional value

Heinz use only the finest ingredients for their Baby Foods—superior, in fact, to those normally available to the average housewife.

Special cooking facilities, strict quality control—all these specialist resources combine to make Heinz Baby Foods exceptionally nutritious.

For a start, instrumentally controlled cooking ensures uniformity with each batch of foods, and prevents over-cooking.

Ingredients are carefully steam-cooked.

Once hot, the foods are exposed as little as possible to air; juices formed during cooking are retained to avoid loss of valuable soluble nutrients.

Strained foods are forced through

a fine sieve to eliminate any rough fibres or coarseness.

(With Heinz more advanced Junior Foods, ingredients are diced or minced prior to cooking.)

They are sterilized under carefully controlled conditions.

At every stage of this preparation, cooking and packing, Heinz Quality Control inspectors take samples from each batch of baby foods to ensure that the quality, taste, consistency, purity, and hygiene reach Heinz demanding standards.

For further details about Heinz Strained and Junior Foods, please write to: Foods Science Advisory Service, H. J. Heinz Co. Ltd. Hayes Park, Hayes, Middlesex.

## Psoriasis ... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.<sup>2</sup> A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.<sup>2</sup> These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

**New Alphosyl lubricating cream.** A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipid constituents of normal healthy skin. The vehicle also contains hydrophylic-lipophilic bipolar substances which

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalane, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

**Formula:** Allantoin 2%+90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

### *a wolf in sheep's clothing?*

Family doctors are becoming increasingly more aware that a seemingly simple bout of cystitis may hide a potential killer. The hidden killer is pyelonephritis which, because it is often subclinical, usually goes undetected until death ensues from renal failure. Indeed it has been stated that "Pyelonephritis has been found in 6 to 20% of autopsies; yet the clinical diagnosis... was made in only one-fifth of these cases". More and more doctors decide to take no chances with cystitis. They demand a drug that is bactericidal, specific and well tolerated. That's why they choose Negram. Negram, ideally, meets all these requirements.

He's absolutely delighted that you've cleared up his wife's cystitis so quickly. But then he doesn't know that mere remission of symptoms doesn't necessarily mean that she's 'fine'.

*You* know it. But you *also* know that by using Negram you have minimized the risk of leaving a residual infection that could cause relapse following cessation of therapy. Nice to know that his admiration is unlikely to turn to disappointment.

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”*

Med. Times, N.Y., 1958, 1, 74

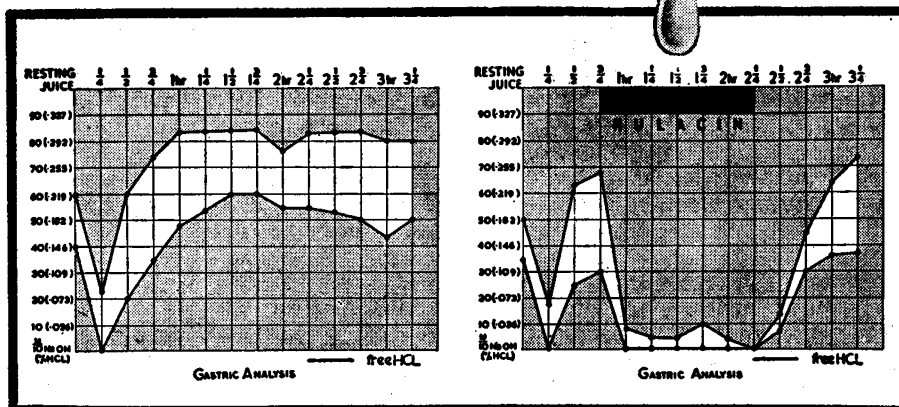

## Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.

# Obstetrics in General Practice

**Published July 1, 1966**

This book is made up of a series of articles printed in the "Current Practice" section of the **BRITISH MEDICAL JOURNAL**. It is designed to give a lucid and practical account of obstetrics as it is carried out in the patient's home or in a maternity unit, with special emphasis on the role of the general practitioner and his relationship to the consultant obstetrician and the hospital. The principal authors are consultant obstetricians, but to ensure that the general practitioner's own view and special experience should be represented the consultant contributors were asked to prepare their articles in collaboration with general practitioners. The book as a whole is a product of such co-operative effort. It will prove a useful guide to this important branch of medical practice.

## EXECUTIVE COUNCILS

## CHESHIRE EXECUTIVE COUNCIL

## GROUP OPPORTUNITIES IN CHESHIRE

**1. Hattersley, Hyde.** On behalf of Drs. Ian MacPherson and David Wickenden of 230 Hattersley Road West, Hattersley, Hyde, Cheshire, the Executive Council will be pleased to receive enquiries from doctors who might be interested in this situation. Hattersley is almost a New Town in miniature. It is located in an open situation at the beginning of the Pennine country. On October 15, 1966, Drs. MacPherson and Wickenden will commence practice from a new Local Health Authority clinic, pending the erection of a group practice centre to be built adjacent to the clinic and connected to it by a covered way. The group practice centre will eventually be owned by the council, which will settle at five to six doctors. There is a high degree of integration with the Local Health Authority Service. It is hoped to provide scope for doctors who have a specialist interest such as paediatrics, obstetrics, psychiatry, etc. An appointment system will be started on October 15; the aim is to build up a balanced group which with ancillary help will cope happily with any amount of hard and interesting work.

This is not an Executive Council appointment as the group is on a partnership basis. Drs. MacPherson and Wickenden offer a salary at the rate of £2,250 per annum during a short period to test compatibility and if desired, temporary free accommodation. Thereafter, partnership on an agreed share at once and parity at the end of the third year.

**2. Winsford.** By agreement with the doctors concerned the Council invites enquiries from doctors who may be interested in this situation. The population of Winsford is due to increase from 17,600 at January 1, 1966, to 60,000 by the 1980's. There are at present two partnerships in the town, Dr. H. D. Hewitt and partners and Dr. Peter Sutton and partners. Each practice will need to expand and conversations are now proceeding as to the build-up of groups based on these two partnerships. Modern accommodation with a close degree of co-operation with the Local Health Authority Service is being planned.

These are not Executive Council appointments; the terms and conditions of immediate appointment must be negotiated with the doctors concerned.

**3. Vacancies in Cheshire Generally.** Most vacancies occur in partnership practice but often the Executive Council is consulted where developments are in group or co-ordinated practices are concerned. The Executive Council will always be pleased to receive enquiries from doctors interested in particulars of vacancies in the County.

All applications or enquiries should be addressed to the Clerk, Cheshire Executive Council, 28 Nicholas Street, Chester. (H.7832)

Post vacant August, 1966. Tenable for six months or one year. This is one of two House Officer posts offering a unique range of experience. The two House Officers at the hospital work for alternating periods of three months under the Physician and Surgeon respectively. They visit and assist at an active treatment unit for rheumatism working with the Physiotherapist, and at an active treatment geriatric unit while working with the Surgeon. Travelling allowance is paid to car owners or hospital transport provided.

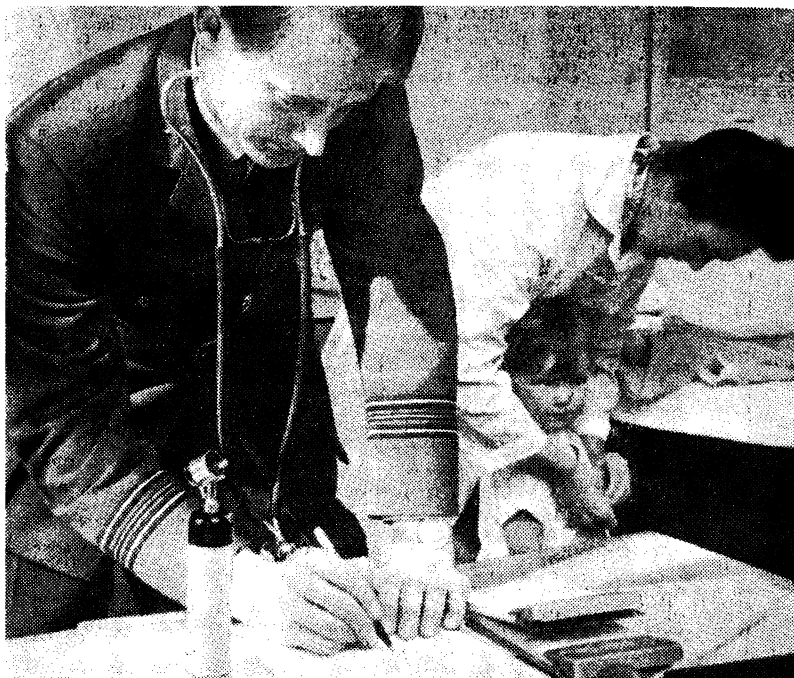

The hospital is a busy one of 52 beds holding out-patient clinics in all main specialties at which the House Officers attend. It is unusually well equipped.

The posts are resident with all services if desired, but for married applicants there is completely self-contained spacious furnished accommodation of very superior standard. The dual nature of the post ensures regular out-duty.

Applications, giving details of qualifications, and experience, together with the names of two referees, should be forwarded to the Secretary, Cromer and District General Hospital, Cromer, Norfolk. (18129)

**Surgery—contd. on p. xlv**

# Before you commit yourself to a practice, work 3 or 5 years in the R.A.F.

You'll do some interesting, out-of-the-rut medicine, see a bit of the world, live well, and 'retire' with up to £3,000, tax free.

Your first job in the R.A.F. would probably be junior M.O. at a Station: rather like being an 'Assistant with a view'. In a typical case you could be one of two doctors with, between you, 1500 to 2500 people to take care of, and your own 'cottage hospital' with wards, theatre and laboratory, and secretarial as well as nursing staff.

*You'd have a shorter list than a civilian G.P., and to this extent you would live a less strenuous life. To compensate, you would give much more comprehensive care. It is this—and the variety of your work—that makes practice in the R.A.F. so interesting.*

In the R.A.F. you combine several functions. You are in medical care not only of people, but of the environment they live in, and of the work they do. In proportion you do less curative work and more preventive work than is even possible for most civilian doctors.

A lot of people hold the view that this is the way all medicine should be practised—with the closest possible integration of the doctor and the community.

## This is the choice you face

Think of two doctors, both aged 40. One went to his practice straight from his teaching hospital, and has been there ever since. The other went into the R.A.F. on a 5-year commission. He lived

—and lived well—in the tropics with his family for 2½ years and, on leave or on duty, visited 7 countries: two European, three Asiatic, and two Australasian. By now he's been in civilian practice for 10 years; he's as well established as the other doctor. But which of the two has got more out of life, and has the richer memories to look back upon?

*In many ways, the transition from hospital into the R.A.F. seems more 'natural' than the movement to civilian practice. You go from one community to another—and they have much in common: both are young, cheerful, energetic, rather self-contained—and at the same time very professional, with a marked sense of purpose. If you can feel, now, that you are going to miss Medical School—think about the R.A.F. Service life would probably be 'right' for you.*

## The time for bold decisions is when you are young and free

Today, because you are at the beginning of your career, you can take a short time out from the main stream of civilian practice *just by deciding to do it.*

Now, you are free to go. In a few years time, you probably won't be.

You'll have a practice 'with your name on it'; children who want a permanent home to strike root in; and soon. It will be time for you to settle down.

Meanwhile, at the parting of the ways, you have this chance. Now is the time to find out about it.

The address to write to is: Wing Commander D. G. M. Hills, O.B.E., M.B., B.S., D.P.H., R.A.F., Ministry of Defence (MA1/724EE4), 1-6 Tavistock Square, London, W.C.1. Please give your age and qualifications.

**Medical cadetships.** Commissions as a cadet are available to students who have passed second M.B. (or equivalent). Initially your basic pay would be £630 p.a. Appropriate R.A.F. allowances, examination and tuition fees are paid in addition. You would continue to live and work as a medical student and when fully registered you would start work in the R.A.F. as a doctor in the rank of Flight Lieutenant on a five year short service commission. Further information may be obtained from the above address.
