## SINGLE-DOSE TREATMENT FOR BOTH THREADWORMS AND ROUNDWORMS

"With its high cure-rate, lack of toxicity, ease of administration, and simplicity of dosage, we regard pripsen as, at present, the remedy of choice for enterobiasis... The doses of piperazine were less than half those hitherto used in seven days' treatment, and there were no toxic effects."

*Lancet*, 1960, *i*, 256.

"Pripsen... is a highly effective agent against ascariasis."

"Of the 88 patients completing the trial, 74 (84%) were cured by a single dose and, in the remaining 14, repeated dosage... resulted in a 100% cure-rate... Apart from one patient... there were no undesirable side-effects in this series, which included babies of 4 and 5 months."

### **DISEASES OF MUSCLE**

by J. N. Walton, T.D., M.D., F.R.C.P., *July and August, 1966*

This outstanding REVIEW ARTICLE by one of the world's leading authorities on the muscular diseases will undoubtedly be hailed as a most important contribution towards the better understanding of the nature and inter-relationship of these baffling disorders. Taking each type of myopathy in turn, the author reviews its clinical manifestations, its pathological features, and its genetic background in the light of the most recent research. He concludes with a valuable commentary on differential diagnosis and a comprehensive bibliography containing more than 300 references.

The selective abstracting service offered by the journal is already widely known. The institution of the current series of Review Articles has greatly increased its popularity. These articles, like the abstracting service which they are designed to supplement, are directed as much towards the general reader as to the specialist, providing him with authoritative surveys of the growing points of medicine, each complete with an up-to-date bibliography. Other articles that have appeared or are scheduled for early publication are:

## Psoriasis... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.<sup>2</sup> A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.<sup>2</sup> These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

**New Alphosyl lubricating cream.** A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipoid constituents of normal healthy skin. The vehicle also contains hydrophylic-lipophilic bipolar substances which

Oct. 9th.

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalane, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

**Formula:** Allantoin 2%+90% alcoholic extract of coal-tar (5-1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

*Urtica dioica*

An original drawing, reproduced here by the kind permission of the British Museum, (Natural History) Dept. of Botany.

### Fancy

*Urtica dioica* is better known to the inhabitants of this country as the stinging nettle. Nowadays we regard the stinging nettle as merely an unsightly weed and a painful nuisance. At one time, however, our forebears drank a decoction of nettle flowers to purify the blood and to get rid of nettle rash.

## Obstetrics in General Practice

*Published July 1966*

This book is made up of a series of articles printed in the "Current Practice" section of the BRITISH MEDICAL JOURNAL. It is designed to give a lucid and practical account of obstetrics as it is carried out in the patient's home or in a maternity unit, with special emphasis on the role of the general practitioner and his relationship to the consultant obstetrician and the hospital. The principal authors are consultant obstetricians, but to ensure that the general practitioner's own view and special experience should be represented the consultant contributors were asked to prepare their articles in collaboration with general practitioners. The book as a whole is a product of such co-operative effort. It will prove a useful guide to this important branch of medical practice.

GRADUATE COURSE IN FAMILY  
PRACTICE

McMaster University, Hamilton, Ontario

This course will be established to begin July 1, 1967. The objective is to train physicians for Family Practice, and to present an academic programme which will allow the trainee to examine and learn about the major problems in Family Practice. Physicians in training will spend about one-third of their time in the practice of family physicians who will be full-time faculty members of the McMaster Medical School. While working in this Family Practice Unit there will be increasing responsibility for patients, under the continuous supervision of the staff. Seminars, rounds, consultation-teaching sessions, and journal club meetings will be part of the programme. Elective time will be available for research in problems relevant to Family Practice and learning the techniques appropriate to such research, and for further experience in clinical areas of interest. About two-thirds of the time will be spent in residency training in Departments of Paediatrics, Medicine, Psychiatry, Surgery, and Obstetrics and Gynaecology in accredited hospitals.

An integrated three-year course is being offered. But initially applicants will be accepted into the second year who have completed a junior internship, or into the third year after two years of internship. The first year fulfils the requirements of the Ontario College of Physicians and Surgeons for a licence to practise in this province. While there will be no contractual obligation for a recent graduate to take the full three-year course, preference will be given to applicants who wish to do so.

Please direct inquiries to: Dr. W. B. Spaulding, Associate Dean, Faculty of Medicine, McMaster University, Hamilton, Ontario. (H.8545)

## GENERAL MEDICAL OFFICER/ANAESTHETIST

Mufulira Copper Mines, situated on the Zambian Copperbelt, maintain two modern, well-equipped hospitals (total 460 beds), with excellent laboratory, x-ray, operating and other facilities. There is a team of ten medical officers and a further medical officer is now required to carry out duties of a general nature, including attending expatriate employees and their dependants on a basis of hospital out-patient consultations and domiciliary visits. He will be expected to share calls for emergency anaesthetics in addition to acting for the anaesthetist during periods of absence.

Applications are invited from suitably qualified candidates who have had experience in hospital or in general practice and a good grounding and experience in the use of modern anaesthetics.

Employment will be on a contract basis, initially for a period of one, two or three years. Salary will be dependent on qualifications and experience but will not be less than £3,420 per annum. In addition to basic salary there is an annual Christmas bonus calculated at 5% of salary. A gratuity of 5% of the basic year's earnings and rising at the rate of 1% per annum thereafter is payable at the end of the contract.

Annual leave will accrue at the rate of 55 days per annum.

The Company operates a generous life assurance scheme and education and travelling allowances are paid for children receiving a secondary education outside Zambia. A car is provided for professional use.

Fare to Mufulira will be provided for the successful applicant, his wife and children. Similar return passages will be provided on completion of the contract.

Single or married accommodation is immediately available at sub-economic rental. Basic furniture, including a stove and refrigerator, may be rented from the company for a nominal sum.

At 4,000 ft. above sea level, the Copperbelt enjoys a pleasant climate with sunshine all the year round. Excellent facilities exist for practically all sports and leisure activities; television/radio is established.

Applications, which will be treated in strict confidence, should detail personal particulars, qualifications and experience, and be forwarded with a recent photograph and indication of earliest date available to:

PUBLIC SERVICE COMMISSION  
VACANCY FOR MEDICAL OFFICER,  
MINISTRY OF HEALTH

Applications are invited from suitably qualified persons for appointment to the vacant post of Medical Officer (equivalent of Registrar) in the Mental Hospital Rehabilitation Centre, Sandilands, Nassau, New Providence, Bahamas.

The duties of the post are general duties of a Registrar at the mental hospital with 200 beds with psychiatric out-patients clinics and home follow-up. Work is done in alcoholic research and control, occupational therapy, and rehabilitation. A maximum security unit is now being constructed. There is one Consultant Psychiatrist.

The salary of the post is in the scale of £2,760 by £100 to £3,360 plus 5 per cent non-pensionable allowance, plus 5 per cent housing allowance. Commencing salary will be commensurate with qualifications and experience.

Appointment will be on contract for three years in the first instance, and a gratuity of 15 per cent of basic salary is payable on satisfactory completion of contract.

Passages are provided at the commencement and on satisfactory completion of the contract for the officer, his wife, and up to two children up to the age of 18 years.

Baggage allowance for freight charges up to a maximum of £40 is payable.

Leave at the rate of four weeks a year is granted after one year's service. There is free medical attention provided by the Ministry. There is no income tax in the Bahamas.

Applications, supported by curriculum vitae, photograph, and three testimonials, should be sent to the Chief Medical Officer, P.O. Box 358, Nassau, Bahamas, from whom further particulars of the appointment may be obtained. (10952)

Royal Hobart Hospital  
(Teaching Hospital of the University of Tasmania)

## PATHOLOGIST

Applications addressed to the General Superintendent, Dr. G. Mackay-Smith, are invited from registered medical practitioners with appropriate postgraduate qualifications, for appointment as pathologist at the Royal Hobart Hospital. The applicant should have an interest in one of the branches of pathology, preferably haematology or microbiology, and if appointed he would be expected to develop that particular branch in the hospital laboratory service.

The successful applicant will be required to teach medical students of the University of Tasmania under the direction of the Professor of Pathology, who is also Chief Pathologist at the Royal Hobart Hospital, and the appointee will be given an appropriate status within the University. The position therefore offers the opportunity to take part in the development of the teaching, research, and hospital services in pathology in a small, newly established medical school.

The salary will be within the range from specialist \$A6,854 to senior specialist \$A9,134 depending on the qualifications and experience of the appointee. A case is at present being prepared for a review of present salary rates. Assistance can be arranged in regard to boat or air fare. Salaries are payable from the date of embarkation from London, or from last normal port of call in own country.—H. M. Wright, Secretary. (11254)

## ST. ANDREW'S HOSPITAL NORTHAMPTON

FOR NERVOUS AND MENTAL DISORDERS

President: The Earl Spencer  
Medical Superintendent: James Harper, M.B., F.R.C.P. (Edin.). D.P.M.  
This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds, which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, was opened in 1962, which comprises an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

## WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

## MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch. For terms and further particulars apply to the Medical Superintendent (Telephone No.: 4454 Northampton), who can be seen in London by appointment.

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”

## Safe, Simple, Effective

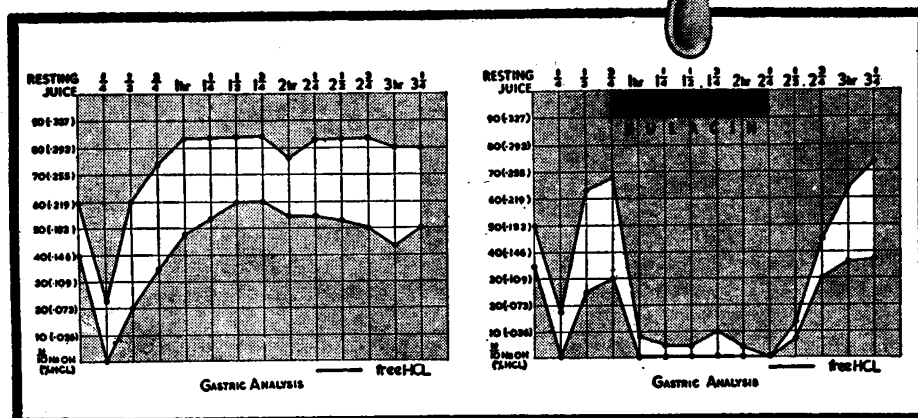

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.
