

## Antibiotics—Advances in Production, Research and Clinical Use

Edited by Miloš Herold, Dr.Sc., and Zdeněk Gabriel

778 pages, illus., £5 5s.

The proceedings of the Congress on Antibiotics held in Prague in June, 1964. At this important congress more than a hundred and sixty contributors, from both sides of the Iron Curtain, presented material on the latest advances and developments in all spheres connected with antibiotics. *Published together with the Czechoslovak Medical Press.*

## Medical Services in Transport

Edited by J. Sharp Grant, R. M. Heggie and L. G. Norman

429 pages, illus., £6 17s. 6d.

The forty-one contributors to this volume between them comprehensively cover medical services in road, rail, sea and air transport, bringing into their proper perspective such facets as the assessment of fitness for work, rehabilitation and resettlement and the necessity for good eyesight. Chapters are included on ergonomics, a rapidly growing subject in industry, and on medical aspects of transport in various parts of the world.

## Modern Trends in Plastic Surgery—2

Edited by Thomas Gibson, M.B., F.R.C.S.(Ed.), F.R.C.S.(Glas.).

354 pages, illus., £4 15s.

The second volume of *Modern Trends in Plastic Surgery* provides a unique source of reference, both on topics which were not fully covered in the first volume, and also on the basic biological data which is difficult to obtain elsewhere.

## The Pituitary Gland

Edited by G. W. Harris, M.A., Sc.D., M.D., F.R.S. and B. T. Donovan, B.Sc., Ph.D.

An important study for research workers in endocrinology, containing thirty-two contributions from authorities in this field from many countries. The complete work provides the most authoritative account of pituitary structure and function available.

*In 3 volumes. 1,974 pages, profusely illustrated. £26 5s. per set.*

## Rehabilitation of the Hand—Second edition

By C. B. Wynn Parry, M.B.E., M.A., D.M., M.R.C.P., D.Phys.Med.

392 pages, illus., £4 12s. 6d.

This practical and authoritative guide deals exhaustively with the treatment and aftercare of the hand in every kind of disability, whether due to injury, deformity or disease. There has been extensive revision for the second edition, and sections on functional anatomy of the intrinsic muscles, treatment of hemiplegia, physiotherapy techniques, and the manufacture of splints have all been rewritten. In addition to physical treatment, problems of resettlement, vocational guidance and economics are also discussed.

# New First-aid and transit dressing for Burns

—even unskilled helpers can apply it in seconds

The Roehampton burns dressing, made from Pritex polyurethane foam, reduces risk to the patient during the critical pre-hospital period. It also provides a logical preliminary to the modern exposure treatment.

It is so simple and effective to apply that even unskilled helpers can attend to a casualty—quickly and safely.

It can be applied in seconds without causing unnecessary pain and with a minimal risk of adherence. It provides good protection against trauma and reduces the risk of infection.

This Roehampton dressing can be removed **in seconds**. It will often save the patient having to be given large doses of drugs, or even a general anaesthetic.

**In the event of multiple casualties**, such as might be caused by large scale explosions or fires, the Roehampton burns dressing has many advantages.

☐ It makes a light, compact package that is easy to transport. ☐ No special care is needed to keep it in perfect condition. ☐ It remains sterile until the package is broken open. ☐ **In all circumstances, it gives the patient the best possible means of protection from further damage while on the way to hospital.**

# COLOMYCIN

Clinical reports on COLOMYCIN clearly show its outstanding value in the treatment of Gram-negative urinary and other systemic infections (with the exception of proteus), particularly those cases which have been found resistant to antibiotics in current use. COLOMYCIN is well tolerated and the development of resistant organisms is not a problem. The use of COLOMYCIN as a bactericidal antibiotic has been recognised by its inclusion in the 1966 Addendum to the British Pharmacopoeia.

**Injections**—parenteral Colistin Sulphomethate Sodium B. P. for urinary tract and other systemic infections.

## How you can see the world

## and gain valuable medical experience

(before you settle into general practice)

Would you like to see the Far East, the Mediterranean, or the West Indies? Study the new sciences of aviation, underwater or nuclear medicine? Have complete clinical freedom, modern medical equipment and the opportunity to practise a very wide and varied field of medicine? Lead an active, exciting outdoor life against a world-wide backdrop? These are some of the opportunities open to you as a Medical Officer in today's modern and expanding Royal Navy. During a 5-year Short Service Commission you can gain valuable, practical medical experience, treating both Royal Navy personnel and civilian families.

And you'll see something of the world – before you settle into the routine of general practice. You will be well paid, with a starting salary higher than that of a civilian hospital registrar. You can study (with financial backing) for higher degrees. You could aim for consultant status. Marriage and other allowances can add considerably to your income. And, if you wish, you can apply for a Permanent Commission after 1 year's service.

### 3 Ways of Entry

1. As a fully registered doctor; civilian experience counts towards your seniority.
2. During your pre-registration year.

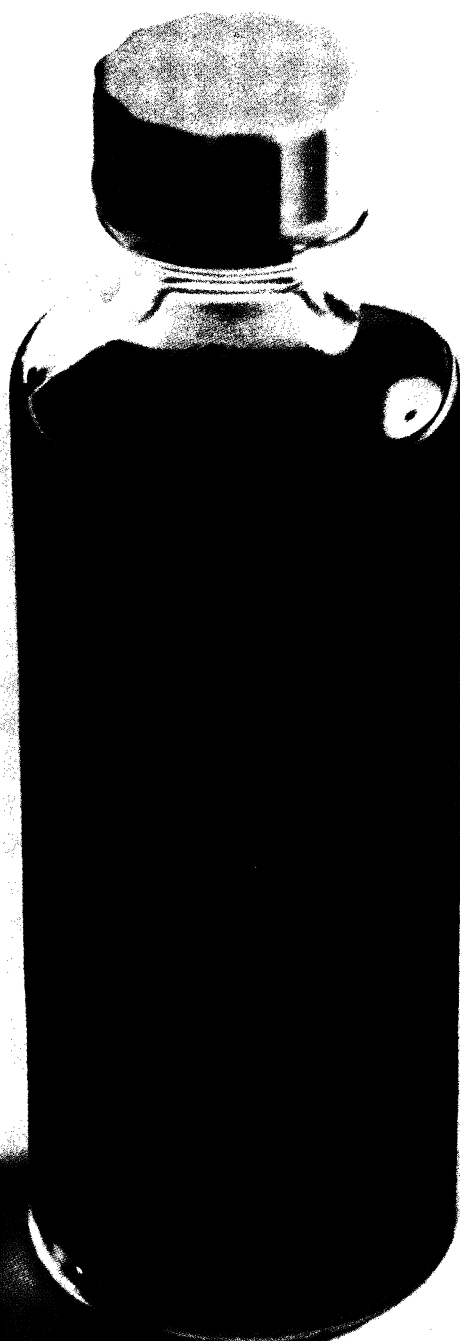

3. As a student any time after passing 2nd M.B. For fully registered women doctors there is a special Short Service Commission.

If you would like more information, write to the address below, giving details of your age and qualifications. A personal interview can be arranged if desired.

## World Leader in Steroid Research

The chemical investigations initiated by Dr. Carl Djerassi and his collaborators of Syntex in the field of 19-nor steroids led in 1951 to the synthesis of norethisterone, an outstandingly active oral progestin. Norethisterone, and other similar compounds, made possible the subsequent biological and clinical studies on hormonal control of fertility.

During the first part of this decade Syntex started an extensive clinical study to determine the minimum dose of norethisterone and mestranol needed to inhibit ovulation and reduce to a minimum the side-effects produced by administering progestins and oestrogens.

From this study a new product was developed, Norinyl-1 containing the lowest dosage of progestin and oestrogen shown to inhibit ovulation i.e. 1 mg. of norethisterone and 50 mcg. of mestranol.

Details of this product appear overleaf.

### Reliability

More than three thousand women completed 20,692 valid treatment cycles without a single pregnancy.<sup>1</sup> A valid treatment cycle is one in which intercourse takes place, NORINYL-1 is used as directed and no other contraceptive is employed.

### Safety

The very low steroid content of NORINYL-1 is accompanied by the disappearance of some dose-dependent effects.<sup>2</sup> Bromsulphthalein excretion rates in women taking NORINYL-1 could not be distinguished from those in an untreated control group.<sup>3</sup>

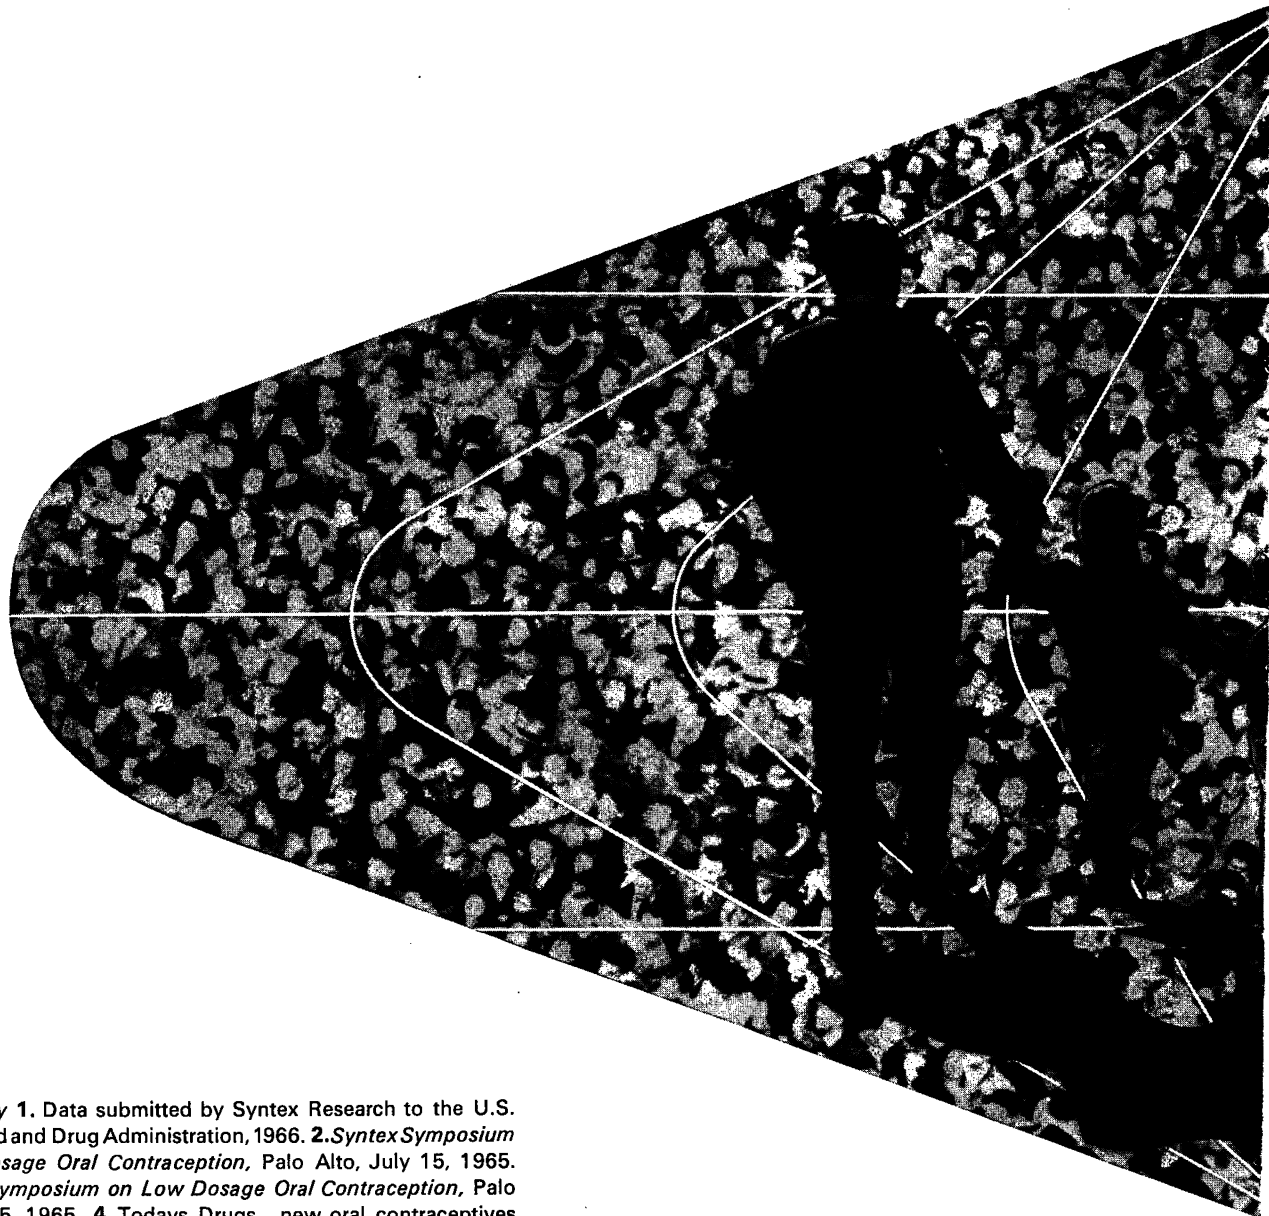

### Simplicity

The tiny tablet is easy to swallow, the pack convenient to use and the 21 day routine virtually eliminates patient error.<sup>4</sup>

### Tolerance

In 20,692 cycles the incidence of *headache, depression and breast symptoms* did not differ in any cycle, **even the first**, from that in the untreated control group. **After the second cycle**, the reported incidence of *nausea* approached pre-treatment control levels. Among *dysmenorrhoea cases* 89.5% had no further symptoms after starting NORINYL-1. *Pre-menstrual tension* was totally relieved in 79.3% of cases.<sup>1</sup>

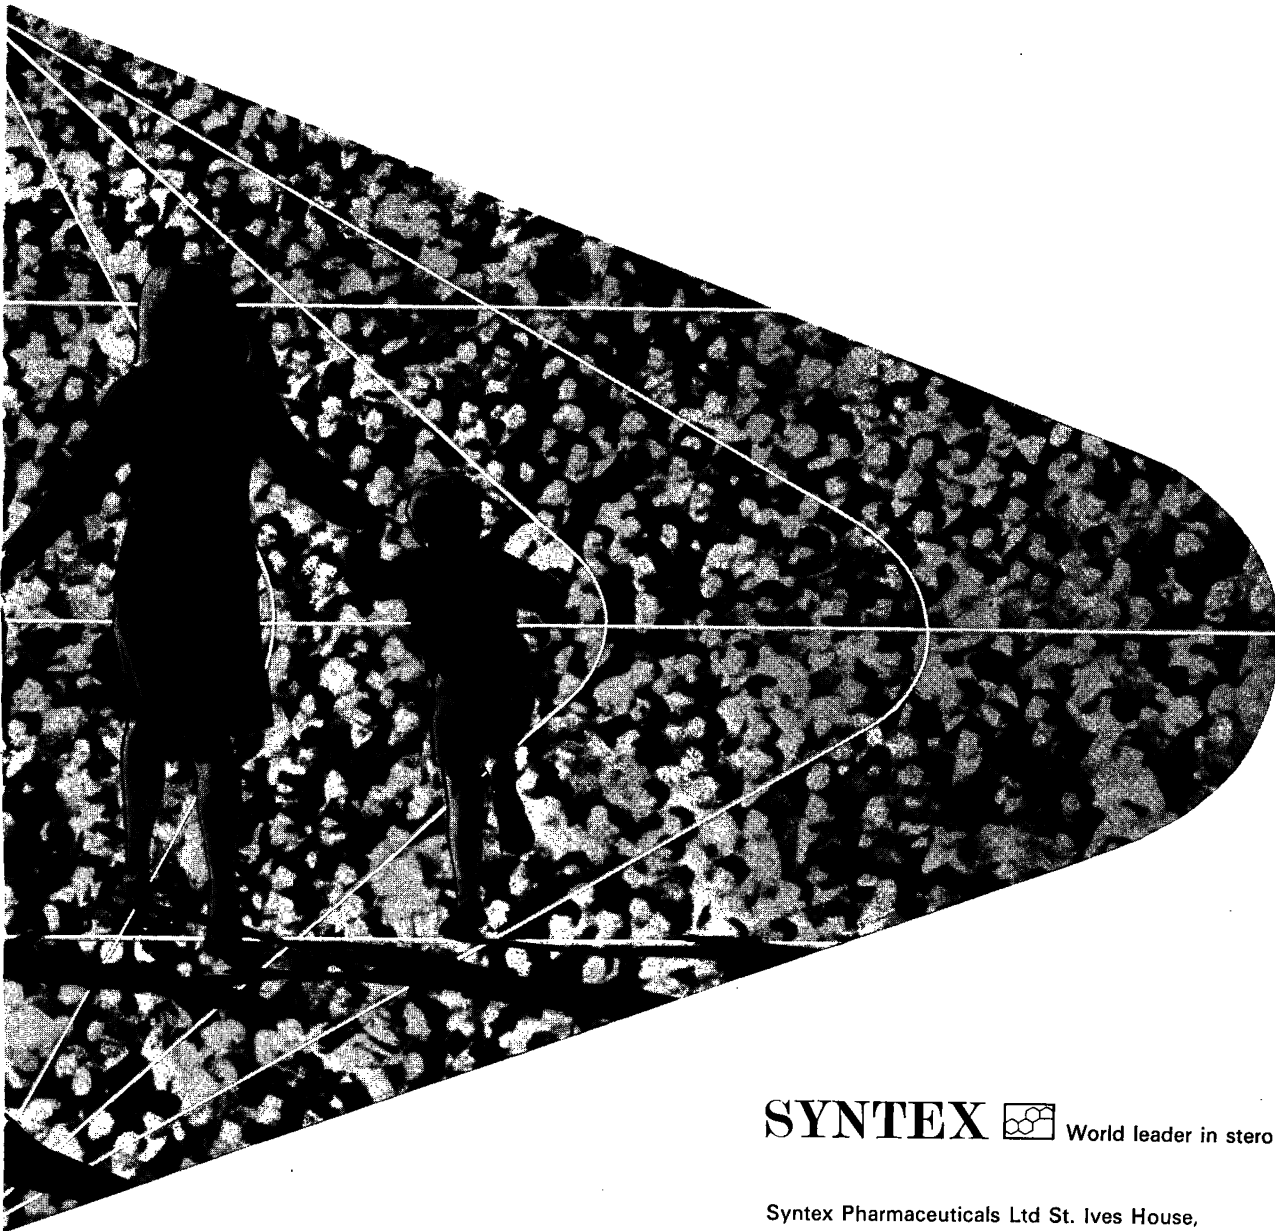

Each tablet contains 1 mg. of norethisterone (an original Syntex discovery) and 0.05 mg. of mestranol. Packed in wallets of 21 tablets.

**2 H.L. After (4.5 seconds)**

The angiogram after treatment shows a striking change. Notice the rather heavy concentration of vessels along the midline with a fairly pronounced accumulation of vessels just above the middle cerebral territory. The vessels are of much wider calibre, generally, than those seen in the control film.

TRADE MARK

Adrenergic stimulation of the heart increases myocardial oxygen consumption to a greater extent than that required for increased cardiac work. Injections of adrenaline produce ECG changes characteristic of myocardial ischaemia and in susceptible individuals provoke typical attacks of angina.

Angina resulting from exercise or emotion is a direct consequence of cardiac sympathetic stimulation. A logical approach to treatment, therefore, is to protect the heart by blockade of the adrenergic receptors with 'Inderal'.

Exercise tests and double-blind clinical studies have established the benefits of 'Inderal' to patients with angina pectoris, both in terms of improved effort tolerance and a reduction in the frequency of attacks.

Tetrex  
because

## WITH TETREX YOU CAN MAKE YOUR TETRACYCLINE THERAPY MORE EFFECTIVE

Tetracycline phosphate salt has considerable advantages over hydrochloride salt. Thus Tetrex (*tetracycline phosphate complex*) has advantages over oxytetracycline, chlortetracycline, and demethylchlortetracycline (*all hydrochlorides*).

## TETREX IS SUPERIOR IN ABSORPTION<sup>1, 2, 3</sup> —AND ITS PROTEIN BINDING IS LOW

This means that TETREX gives higher *active* blood and tissue levels; ensures a much more reliable clinical response; and increases the number of common pathogens that will be inhibited.

## TETREX WILL THEREFORE CONTROL ORGANISMS WHICH OTHERWISE MIGHT NOT HAVE RESPONDED

This applies to all infections for which tetracyclines are indicated, including infections of the upper and lower respiratory tracts, urinary tract and skin.

Examples:—1. *E.coli*. The most sensitive *E.coli* is inhibited by a low concentration of tetracycline 0.25 mcg./ml.\* Some *E.coli*, however, require such a high concentration that they are to all intents and purposes resistant. In between is a number of *E.coli* strains that can be inhibited by the higher *active* concentration of TETREX.

2. *Staph. aureus*. Many cases of tonsillitis, sinusitis and otitis media are due to *Staph. aureus*. It was found that of 300 strains of *Staph. aureus*, less than half were inhibited by 3 mcg./ml. of tetracycline, yet the average serum level achieved with tetracycline hydrochloride—250 mg. every 6 hours—is only about 2.5 mcg./ml. With TETREX the average level achieved with the same dose is about 4 mcg./ml. This means that there are bound to be some staphylococci inhibited by the high TETREX levels that would not have been inhibited by the same dose of tetracycline.

## YOU CAN EXPECT AN INCREASED NUMBER OF TREATMENT SUCCESSES FROM TETREX

# Tetrex\*

## FACTS AT YOUR FINGERTIPS

**Composition.** Tetracycline phosphate complex.

**Indications.** All infections caused by organisms sensitive to the tetracyclines.

**Dosage. Adults:** The usual dose is 1G. per day administered as 1 capsule 6 hourly or 2 capsules 12 hourly. Severe or prolonged infections may require higher doses.

**Children:** The average dose is 25 mg. per kg. (2.2 lbs.) of body weight per day in divided doses at six or twelve hourly intervals.

**Presentation.** TETREX is supplied as capsules of 250 mg. in bottles of 16, 100 and 1,000 and as a syrup containing 125 mg. tetracycline hydrochloride activity per 5 ml. teaspoonful in bottles of 2 and 16 fl. oz. Basic N.H.S. cost—16 capsules 16/4d., 100 capsules 97/6d.

**Thanks men —  
now Exolan takes over.**

Suddenly the treatment of psoriasis with coal tar could well be out-of-date. It has taken 2,000 years to discover an acceptable alternative to crude coal tar for treating psoriasis.

All the subsequent preparations have well-known disadvantages. Cosmetic coal tars exhibit a very slow rate of healing; steroids under polythene cause discomfort to the patient and there is a risk of systemic side effects; dithranol, until now the best overall treatment for psoriasis, requires constant supervision.

Exolan paste is a new preparation which attacks psoriatic lesions with the striking effectiveness of dithranol, but without its unpleasant side-effects of burning and staining. Presented as a paste, it can be safely prescribed for application by the patient, in his own home.

Unlike steroids, there is no rapid relapse on cessation of treatment.

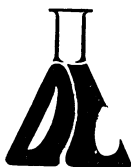

Practically every hospital skin department in Great Britain is now using Exolan Paste. This remarkable new British discovery is ideally suited for G.P. prescription.

# How commonsense can you get...

Haelan is a new preparation for steroid-responsive skin conditions.

Its advantages are strictly practical.

Haelan contains a proven steroid, flurandrenolone, in a concentration sufficient to treat all but the most severe dermatoses.

It comes in a realistic 60 gramme tube—enough for routine treatment without the need for repeat prescriptions.

Because of the pack size, and because the steroid content has not been needlessly increased, Haelan is far more economical than comparable preparations.

### *the antibiotic that works for them...*

ERYTHROPED (erythromycin, Abbott) is a logical first choice for the treatment of common bacterial infections of children. Its potency against the cocci is considerably greater than that of the tetracyclines or chloramphenicol. But, this power is gentle power—potency tempered with a remarkable degree of safety.

ERYTHROPED is, in fact, the least toxic and the

least allergenic antibiotic currently in common use. ERYTHROPED is effective over a wide clinical spectrum that covers most common bacterial infections of children met with in general practice. Not least important, ERYTHROPED is presented in a form that *will* be taken. Its pleasant cherry flavour makes it readily acceptable to children—even the very young.

### *...in the pack that works for you*

One 60 ml bottle provides a full five-day course of treatment—twenty-four 100 mg doses. In addition, attention is drawn on the bottle label to the need to

complete the full course of treatment, so that the potential of ERYTHROPED may be fully realised

# the new (11th) edition of the Merck Manual

## now available

Following the tradition of the previous ten editions of this publication, the new Merck Manual of Diagnosis and Therapy has been compiled to include recent advances in medicine, thereby providing a valuable current work of reference on all diagnostic and therapeutic developments.

The Manual has been extensively revised to widen its scope; existing material has been brought up to date and new subjects and illustrations introduced. There are also over 800 prescriptions.

Complete revision has been carried out on the chapters dealing with the chemotherapy of infections, adrenocortical therapy, anomalies in lipid metabolism, drug reactions, heart sounds and murmurs, emphysema, the diagnostic use of radio-isotopes, and a number of other topics.

Entirely new chapters have been written to cover subjects such as pulmonary alveolar proteinism, fevers of undetermined origin, cervical root syndrome, neurological examination, and carcinoid syndrome. The Manual also contains a section on family planning.

Many ready-reference guides and conversion formulae are given, together with a liberally cross-titled index. New tables and illustrations have been incorporated to assist in the understanding of myocardial abnormalities in systemic disorders, primary and secondary aldosteronism, distinguishing characteristics of the anaemias and leukaemias, the blood coagulation process, time-related cardiac physiological phenomena, and the "rule of nine" in burn therapy. Also included are clinical, pre- and post-operative procedures; weights, measures, and dosage calculations; bedside nursing techniques; laboratory tests for the surgery, and the principal methods employed in paediatrics and immunisation.

The Eleventh Edition of the Merck Manual is *internationally available* and may be ordered in the U.K. and Republic of Ireland through your local Medical Bookseller. Any enquiries may be sent to Merck Sharp & Dohme Limited.

*1866 pages, 366 chapters, thumb-indexed. Format 7" x 4 1/4". Blue, gold-stamped Fabrikoid binding. Price 60/-.*

*The Merck Manual is published by Merck Sharp & Dohme Research Laboratories, a division of Merck & Co., Inc., as part of a programme of service to the medical and allied professions.*

# *A new and unique topical gel for the treatment of inflammatory and traumatic lesions of the mouth*

Bonjela is an alcoholic gel containing choline salicylate and a quaternary ammonium compound with antiseptic properties.

## **FORMULA**

Choline salicylate 8.7%, Cetyltrimethylbenzylammonium chloride 0.01%, Alc. (95%) 39.0%, Menthol 0.057%, Glycer. 4.6%.

## **INDICATIONS**

In a series of trials it has been shown to be approximately 90 per cent effective in bringing rapid relief from pain in oral lesions. It was also shown to hasten considerably the healing process.

Among the conditions successfully treated were:

Herpes labialis	Glossitis
Oral ulcerations	Denture sores
Gingivitis	Thrush
Cheilosis	Infant teething

## **PRESENTATION**

Bonjela is available in 10 gm. tubes at a basic N.H.S. cost of 2/8½ per tube. Literature is available on request.

LLOYDS' PHARMACEUTICALS LTD., 36-38 Berkeley Sq., London, W.1  
An associate company of Lloyd-Hamoll Ltd.

## **CLINICAL TRIALS**

Clinical trials conducted with Bonjela have produced the following results:

1. An investigation with 232 patients showed that relief from pain in lesions of the mouth occurred within one to three minutes. (1)
2. An investigation with 123 patients evaluated the product as effective in 86%, partially effective in 11%, and ineffective in 3%. (2)
3. An investigation with 75 patients showed that the product was significantly effective in 93% of cases, and effective in some measure in all. (3)
4. These American investigators found Bonjela to be more effective than any other therapy available.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1,2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3,4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

## ADMINISTRATIVE

## SCOTTISH HOSPITAL SERVICE

## New Training Programme for Medical Administration

Three training posts in whole-time medical administration in the Scottish Hospital Service are offered for registered medical practitioners. Medical administration is concerned with the use and development of medical skills and resources and the work ranges from medical management of these resources in people and equipment at hospital level to the planning and management of regional services and association with the provision for medical teaching. A career in this field offers the opportunity of using epidemiological methods in studying medical needs, of carrying out operational research into the workings of health services and of applying the findings in improving the effectiveness of health services. A three-year training programme has been planned. One year will be spent attending a full-time university course leading to a postgraduate diploma and two years in supervised practical training. Commencing salary ranging from £1,880 (at age 29) to £2,085 (at age 33 or over); annual increments thereafter. University fees will also be met and other allowances in respect of travelling and subsistence may be payable. A memorandum of information may be obtained from the Principal Officer, Scottish Hospital Administrative Staffs Committee, Woodburn House, Canaan Lane, Edinburgh 10. The closing date for receipt of applications is September 30, 1966. (H.8771)

Membership of a Disablement Advisory Committee is unpaid, but service on Panels is remunerated on a sessional basis. A general practitioner or industrial medical officer wishing to be considered for such appointments should apply to his Local Medical Committee or the Secretary, Ministry of Labour, Disabled Persons Branch (D.P.I.), Kingsgate House, 66/74 Victoria Street, London S.W.1. (12484)

**IMPORTANT.** Applicants should read the revised Notice at the top of page xxxiii

INDUSTRIAL  
APPOINTMENTS

Attention is drawn to the British Medical Association's statement of policy on the Remuneration of Industrial Medical Officers as approved by the Representative Body, 1966, which is available on request from the Secretary.

NATIONAL COAL BOARD  
EAST MIDLANDS DIVISION

There are two vacancies for

ASSISTANT  
MEDICAL OFFICERS

in the East Midlands Division of the National Coal Board. The vacancies are at:

- Edwi-stowe, near Marsfield, in the North Nottinghamshire coalfield; and
- Bestwood, Nottingham, in the South Nottinghamshire coalfield.

Successful applicants will be expected to live within the area to which they are appointed. Both areas include pleasant residential localities.

These appointments provide thorough training in occupational medicine, and encouragement will be given to study for specialist qualifications. There are prospects of promotion.

Salaries will be in the range £1,800 to £2,150. There is an excellent contributory superannuation scheme with interchange arrangements with many other organizations.

Please send applications, stating choice of area and quoting S.V. No. 1567, to:

Divisional Chief Staff Officer,  
National Coal Board,  
East Midlands Division,  
Sherwood Lodge, Arnold, Nr.  
Nottingham. (12402)

## COMMERCIAL APPOINTMENTS

## MEDICAL ADVISER

Small expanding ethical pharmaceutical company invites applications for a full-time appointment from Registered Medical Practitioners aged between 28 and 45. Previous experience in the industry is not essential. A knowledge of French would be an asset.

Duties will include assisting the Medical Director in the training of representatives, preparing medical literature, arranging and controlling clinical trials.

Salary according to previous experience. Contributory pension and life assurance scheme. Good opportunities for advancement.

Please send applications with full particulars to **The Secretary, Rona Laboratories, Molyneux Street, London W.1.** (H.8584)

## INDUSTRIAL APPOINTMENTS

## NATIONAL COAL BOARD

## MEDICAL SERVICE

Applications are invited from registered medical practitioners for two full-time medical research posts. The work will be concerned in the first instance with the epidemiological and clinical aspects of occupational chest disease, but later, when the Board intend to centralize their medical research in a new institute at Edinburgh, a wider field of study will be open.

Candidates are not expected to have had extensive research experience, but they should have a basic interest in medical research and some understanding of its principles.

The two posts offer a permanent career in the Medical Service of the Board, with prospects of promotion; alternatively, they may be regarded as giving a thorough training in occupational health research. Both posts entail some travelling to coalfields. One is based in Edinburgh and the other, for the time being, in Cardiff before the move to Edinburgh in about two years' time.

Appointments are superannuable and salary dependent on qualifications and experience within range £2,050 to £3,400. Please write to Staff Department (X.962/B), National Coal Board, Hobart House, London S.W.1, for application form, which should be completed by October 15, 1966. (12528)

## NEW ZEALAND

### SOUTHLAND HOSPITAL BOARD

### PART TIME

### MEDICAL SUPERINTENDENT

Applications are invited from qualified Medical Practitioners for the part time position of Medical Superintendent, Riverton Public Hospital. This is a unique opportunity for a Medical Practitioner to establish a lucrative practice, in addition to the part time position, as the borough is without the services of a practitioner. The Board provides RENT FREE a large two storied gracious home equipped with consulting rooms.

Riverton Borough is sited on the picturesque Southland Coast and is the principal seaside resort of Southland. Riverton has a population of 1,300 but the holiday resort of Riverton Rocks and surrounding area is not included in this figure, so that a permanent population figure of well over two thousand would be a more accurate figure for the purpose of practice assessment. There is of course a heavy influx of visitors during the summer holiday season.

Terms of employment will be in accordance with the Hospital Employment (Medical Officers) Regulations 1964 and salary will be determined within the appropriate scale according to qualifications and experience.

Further particulars may be obtained from the undersigned, who would be pleased to explain more fully this great opportunity to applicants.

T. H. Miles,  
Secretary,  
Southland Hospital Board,  
P.O. Box 39,  
Invercargill,
