DESERVES TO BE REMEMBERED

4. I GIVE DEVISE AND BEQUEATH all my real and personal estate whatsoever situate unto the BRITISH EMPIRE CANCER CAMPAIGN FOR RESEARCH 11 Grosvenor Crescent London S.W.1. and I direct that the receipt of the Honorary Treasurer or other proper officer for the time being of the above mentioned charity shall be a sufficient discharge to my Executors _____

IN WITNESS whereof I have hereunto set my hand this *ninth* day of *July* One thousand *one hundred and* _____

SIGNED by the said JAMES _____ as and for his last Will in the presence of us both being present at the same time who in his presence at his request and in the presence of each other have hereunto subscribed our names as witnesses

You may be asked from time to time to suggest a deserving cause as the subject of a bequest. Please remember that every year the British Empire Cancer Campaign for Research has to find more and more money for cancer research work not only in this country but in many parts of the Commonwealth. All this money must come from voluntary donations and bequests. The appropriate words to use in a will are: "I bequeath to the British Empire Cancer Campaign for Research the sum of £....." or "I devise and bequeath the residue of my estate to the British Empire Cancer Campaign for Research".

For further information please write to Sir Joseph Lockwood, Hon. Treasurer, British Empire Cancer Campaign for Research, Dept. B.M.L., 11 Grosvenor Crescent, London SW1.

PAYNOCIL is double-strength aspirin—10 grains per tablet—in a lemon-flavoured glycine base.

Paynocil is strongly analgesic, anti-pyretic and anti-rheumatic in both short and long term treatment.

The glycine disperses the tablet instantly on the tongue, and distributes the aspirin rapidly into the stomach in minutely fine particles—minimising the risk of gastric irritation.

Paynocil tablets are sealed in protective metal foil.

JUNIOR PAYNOCIL for children, a quarter-strength tablet of the same formula, is available in similar foil strips.

How you can see the world

and gain valuable medical experience

(before you settle into general practice)

Would you like to see the Far East, the Mediterranean, or the West Indies? Study the new sciences of aviation, underwater or nuclear medicine? Have complete clinical freedom, modern medical equipment and the opportunity to practise a very wide and varied field of medicine? Lead an active, exciting outdoor life against a world-wide backdrop?

These are some of the opportunities open to you as a Medical Officer in today's modern and expanding Royal Navy. During a 5-year Short Service Commission you can gain valuable, practical medical experience, treating both Royal Navy personnel and civilian families.

And you'll see something of the world – before you settle into the routine of general practice. You will be well paid, with a starting salary higher than that of a civilian hospital registrar. You can study (with financial backing) for higher degrees. You could aim for consultant status. Marriage and other allowances can add considerably to your income. And, if you wish, you can apply for a Permanent Commission after 1 year's service.

3 Ways of Entry

1. As a fully registered doctor; civilian experience counts towards your seniority.
2. During your pre-registration year.

3. As a student any time after passing 2nd M.B. For fully registered women doctors there is a special Short Service Commission.

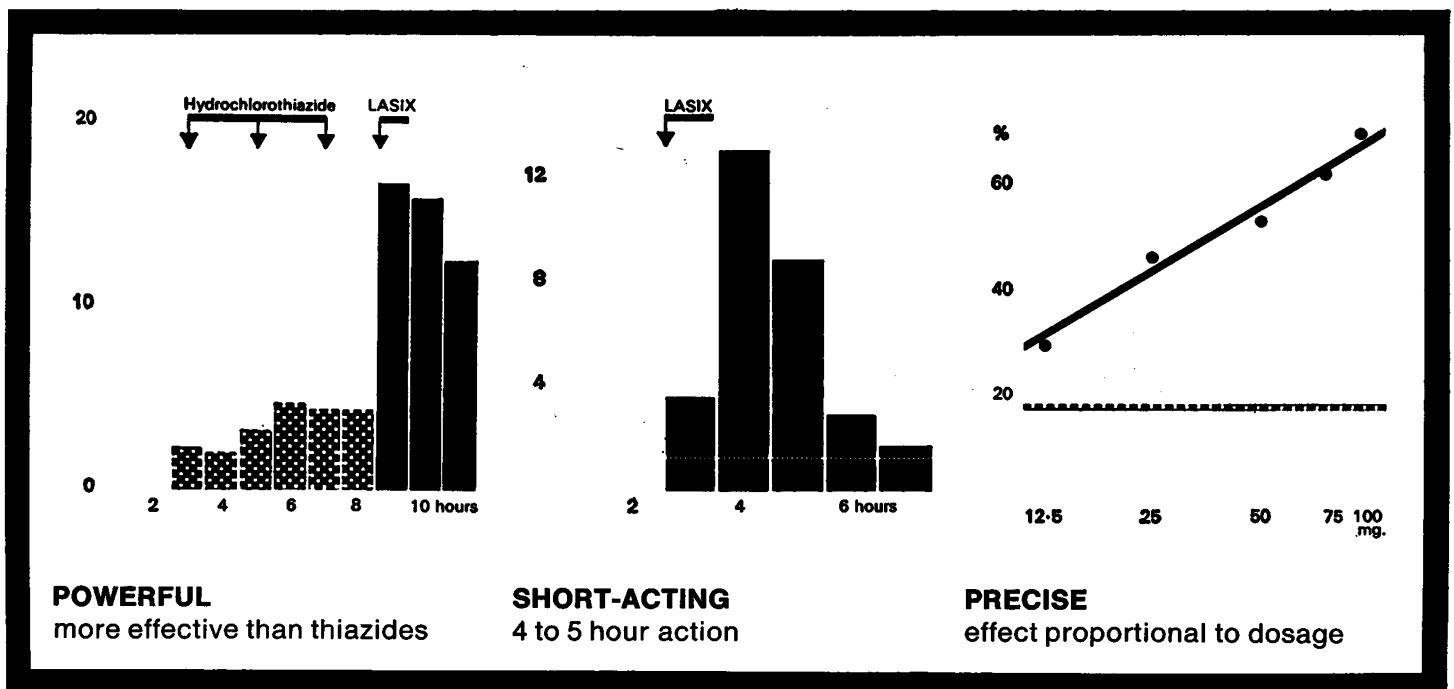

If you would like more information, write to the address below, giving details of your age and qualifications. A personal interview can be arranged if desired.

When symptoms of anxiety and depression co-exist, both facets of the patient's condition can usually be relieved by treatment with 'Tryptizol', which possesses both antidepressant and tranquillising properties. With 'Tryptizol', there is generally rapid relief of anxiety and insomnia.

**The fact that Gynovlar 21
was the first 21 tablet
oral contraceptive is a matter
of some company pride**

when all facts are considered the choice must be

but what matters clinically is the added security this idea provided for millions of women

The simple idea of an extra tablet put Gynovlar 21 ahead of the field in oral contraceptive administration. Now the 21-tablet dosage scheme is becoming standard practice as a method of virtually eliminating patient error in oral contraception.

GYNOVLAR 21 PROVIDES:

First, four-fold security by ovulation control, by protective changes in the endometrium and cervical mucus and also by the 21-tablet dosage scheme which virtually eliminates patient error.

Secondly, Gynovlar 21 is extremely well tolerated. Tolerance depends not only on the choice of progestogen, but especially on the type of dosage of oestrogen. Gynovlar 21 tablets contain 3 mg. norethisterone acetate – a progestogen used throughout the world in gynaecological medication and renowned for its

excellent tolerance – and 0.05 mg. ethinylœstradiol B.P., which is the lowest dose to be employed for oral contraception. No other presentation contains less oestrogen, many contain more.

Thirdly, the substances used in Gynovlar 21 produce normal menstrual cycles, which have been described as being of 'almost clockwork precision'. Thus Gynovlar 21 is ideally suited to the 21-tablet dosage scheme, which this product pioneered and the advantages of which have, meanwhile, been generally recognized.

brontisol*

night long relief

Brontisol is a metered dose aerosol in an inert propellant, combining β -sympathomimetic, anti-cholinergic, anti-histaminic and anti-serotonin properties. The recommended adult dosage is 1-3 puffs every 4 to 5 hours as directed by the physician. Brontisol is a new concept in the treatment of generalised airways obstruction, since it not only produces marked bronchodilation, but also controls

hypersecretion and reduces swollen mucosa. Brontisol combines a rapid, pronounced action with a long duration of effect. Maximum effect is reached within 5-10 minutes and remains at this level for at least 4 hours. A significant therapeutic response can frequently be demonstrated for up to 6 hours. Brontisol can also block continuous spasmogenic effects for up to nine hours.

SEQUENS

low hormone
intake—
fewer patient
problems

'Sequens', first of the sequential oral contraceptives to gain worldwide acceptance, inhibits ovulation without significantly disturbing the normal menstrual pattern. A major reason for this is the low hormone intake with the 'Sequens' regimen—a total of only 11.6 mg. in a full menstrual cycle. This means a very low incidence of side-effects in comparison with earlier oral contraceptives. 'Sequens' achieves maximal contraceptive effectiveness with fewer treatment problems, fewer visits from women requiring reassurance, and—because of the rarity of side-effects—a low rate of dropout. The

internationally tested pack and clear directions ensure easy understanding of the 'Sequens' dosage regimen.

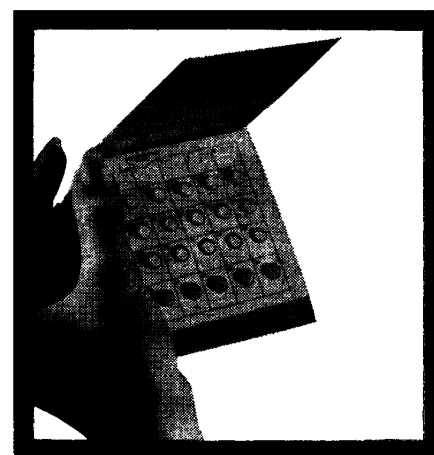

Less breakthrough bleeding than with earlier contraceptives
No weight gain problem

Tests show that 2-Diethylaminoethyl- α -phenylbutyrate Citrate has a more pronounced bronchodilatory effect than ephedrine. Three parts of 2-Diethylaminoethyl- α -phenylbutyrate Citrate producing the same effect as 5 parts of ephedrine. It acts more rapidly than ephedrine, reaches maximum effect somewhat later and falls away at a slightly slower rate. With a mixture of the substances the curve of bronchial dilatation showed that the effect produced was considerably greater than when double the quantity of each substance was administered separately. 4 mg OF THE MIXED SUBSTANCES (CONTAINING 2 mg OF EPHEDRINE) has the BRON-

Thanks men —
now Exolan takes over.*

Suddenly the treatment of psoriasis with coal tar could well be out-of-date. It has taken 2,000 years to discover an acceptable alternative to crude coal tar for treating psoriasis. All the subsequent preparations have well-known disadvantages. Cosmetic coal tars exhibit a very slow rate of healing; steroids under polythene cause discomfort to the patient and there is a risk of systemic side effects; dithranol, until now the best overall treatment for psoriasis, requires constant supervision.

Exolan paste is a new preparation which attacks psoriatic lesions with the striking effectiveness of dithranol, but without its unpleasant side-effects of burning and staining. Presented as a paste, it can be safely prescribed for application by the patient, in his own home.

Unlike steroids, there is no rapid relapse on cessation of treatment.

Practically every hospital skin department in Great Britain is now using Exolan Paste. This remarkable new British discovery is ideally suited for G.P. prescription.

A doctor's life with a difference can be found in the ROYAL ARMY MEDICAL CORPS

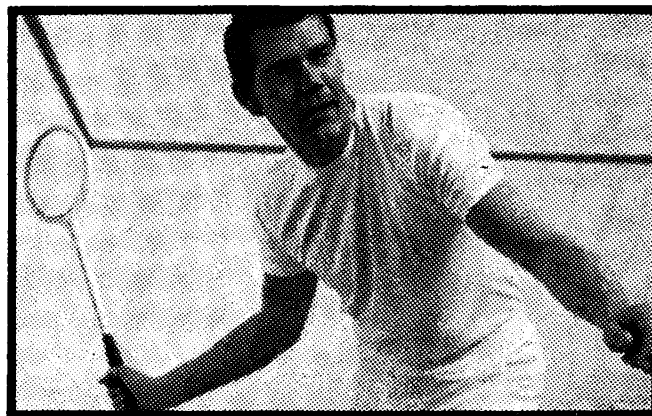

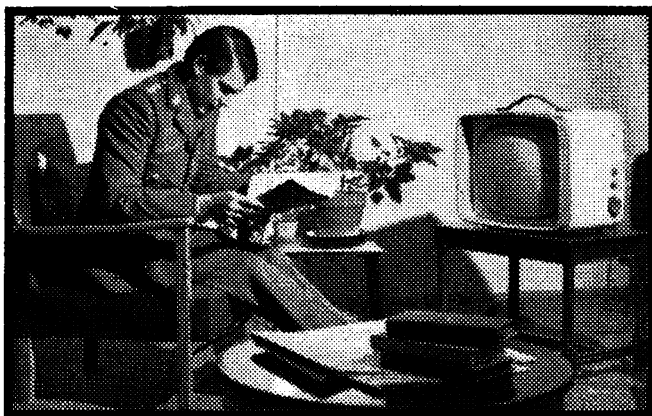

Excellent opportunities are provided for general practice under good conditions of service. The professional opportunities are very wide and varied and include caring for the wives and children of soldiers.

All aspects of medical care—preventive medicine, general and hospital practice are closely integrated. Surgeries are organised by groups and groups are supported by hospitals so that Medical Officers are able to follow up those of their patients admitted to

hospital. These modern surgeries have every facility. Good equipment, trained staff, and a locum provided for six weeks' annual leave. Post-graduate training is given.

For the married man it matters greatly how his wife feels about the Service. The community spirit of Army life, especially overseas, embraces an Officer's family as much as himself. Such extra emoluments as Marriage Allowance, Education Allowance, Disturbance

Allowance, and Local Overseas Allowance, show the importance attached by the Army to helping the Officer with a family. Most married Medical Officers get a furnished house at low rental.

Pay for a married Captain (the rank on entry) is over £2000. There are increases every two years and on promotion. Promotion to Major can normally be expected after 5 years and to Lieut-Colonel after 13 years (or shorter, where an antedate is given for experience in

hospitals and general practice). Commissions granted may be permanent or Short Service. A Short Service commission earns a tax-free gratuity of £3000 for 5 years' service, £1500 for 3 years. Regular commissions are pensionable on the normal basis.

For further information please write or pay a visit to: Colonel A. D. Young, D.S.O., M.B., Ministry of Defence (AMD2), Dept. 432, Lansdowne House, Berkeley Square, London, W.1.

For greater simplicity in oral contraception...

Ovulen—the low dose oral contraceptive—now comes in this 3week wallet

Ovulen (brand of ethynodiol diacetate with mestranol) is the oral contraceptive with a progestin content of only 1 mg. per tablet. The new 3-week wallet means that Ovulen now combines the benefits of low dosage with a simple 3-week administration schedule. *This routine can be easily explained to the patient in a few minutes.*

SIMPLICITY The patient takes one tablet a day for 3 weeks, waits one week, then starts her next course of tablets. The complete 4-week cycle makes it easier for her to remember her 'pill routine', because her *starting day* will always be the same day of the week. Ovulen's low progestin content is consistently associated with a very low incidence of side effects.

Anaphylline

(THEOPHYLLINE-NIACINAMIDE)
a new theophylline complex for more
effective maintenance therapy in mild to moderate cases of

BRONCHITIS-ASTHMA-EMPHYSEMA

Clinical evidence confirms that this new theophylline-niacinamide complex achieves rapid therapeutic blood levels for faster dilation of the bronchioles and substantial improvement in vital capacity in most cases of chronic bronchitis, asthma and emphysema.

Significant Treatment Advantages:

The unique Anaphylline complex is a loose bonding of theophylline and niacinamide which affords a soluble theophylline through all pH ranges. No more ionization of theophylline salts with precipitation of the theophylline in the acid of the stomach. Now direct immediate absorption of the theophylline complex for faster, higher and longer blood levels.

* MORE RAPID ABSORPTION FOR QUICKER PATIENT RESPONSE

Evidence from clinical trials indicates that Anaphylline achieves therapeutic blood levels faster than theophylline salts and within 15 minutes of oral administration.

* MORE PROLONGED BLOOD LEVELS FOR SUSTAINED RELIEF

Rapid, initial blood levels achieved are followed by a steady, sustained rise reaching peak achievement at 60 minutes, with gradual, but uniform decline thereafter.

* SUPERIOR PATIENT TOLERANCE

Achievement of these blood levels is not accompanied by any increase in the side-effects normally associated with theophylline treatment.

INDICATIONS

For use as a bronchodilator to control the symptoms of chronic bronchitis, chronic asthma, emphysema and other pulmonary disorders.

DOSAGE:

Adults 1 to 2 tablets to be taken 3 or 4 times daily, preferably after meals. (Children 6-12 yrs., half to 1 tablet.)

HAVE A LINE FOR EVERY CALL ON INFANT FEEDING

No two babies are exactly alike, but the vast majority will thrive on our standard infant foods. A very small percentage, however, present a wide variety of differing feeding problems.

The whole of our medical research, over the past fifty years, has been directed towards the production of superlative infant foods. As a result, we claim to produce not only the best food for the majority, but also for this small but vitally important minority.

Our Medical Handbook, giving a complete list of products with their analyses and indications, can be obtained free on application to: The Medical & Research Department, Cow & Gate Ltd., Guildford, Surrey.

Abstracts from Clinical Reports

Pruritic Dermatoses

'The results of the present study demonstrate that dimethpyrindene possesses a high order of clinical efficacy as an antipruritic agent in allergic and pruritic dermatoses. As to rapidity of action and duration of effect, it is equal to most, if not all, potent antihistamines currently available.'

Current Therapeutic Research, No. 4. Vol. 4. April 1962.

Paediatric Use

'The results of dimethpyrindene therapy in children were particularly gratifying, in view of the type of condition involved (atopic dermatitis, urticaria and perianal pruritus). An antihistamine that is both effective and safe in paediatric use is a welcome boon to mothers as well as a source of satisfaction to the children.'

Current Therapeutic Research, Vol. 4. No. 4. April 1962.

Comparative Efficacy

'In a clinical study of 105 patients with urticaria, the drug proved at least as effective as the phenothiazine derivative, trimeprazine, and was remarkably free of side effects, particularly the more serious ones occasionally encountered with phenothiazine agents. These factors suggest that dimethindene more closely approximates the criteria of an ideal agent for the symptomatic control of pruritus. Of the 105 patients 79% responded to the compound.'

Clin. Med. 71. 1657-1660, 1964.

allegron

nortriptyline hydrochloride

quickly relieves depression in any guise

The true condition of the depressed and anxious patient may often be hidden behind a variety of misleading symptoms until her appearance in the surgery becomes a problem in itself.

Allegron simplifies treatment

It is one drug especially suited to treating those mental and emotional states often associated with refractory physical symptoms.

Allegron acts quickly

It lifts the underlying depression, calms any anxiety and relieves psychosomatic symptoms by removing their cause.

Allegron is well tolerated

It is without the restrictions of the MAOI's, and is one of the safest of psychotropic drugs.

Usual adult dosage: 25 mg. three times daily.

Tablets of 25 mg. (No. 1011) and 10 mg. (No. 1010) base equivalent. Liquid 10 mg. base equivalent per 5 ml. (No. 5010).

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

HEALTH CENTRES & GROUP PRACTICES

Lord Cohen of Birkenhead writes the introduction to a booklet on Health Centres and Group Practices based on recent articles in the *B.M.J.*

"... a series of excellent articles. . . Any practitioner who is considering how he can improve his service to his patients and his own working conditions will find this a very useful book."

Lancet (1966), 1, 380.

"... a 'must' for any group contemplating new practice premises . . . should be equally valuable to the M.O.H. planning a new health centre."

Brit. med. J. (1966), 1, 221.

"These reports . . . provide an admirable summary of the position today. . . ."

**BRITISH POSTGRADUATE MEDICAL
FEDERATION**
University of London**POSTGRADUATE TRAVELLING
FELLOWSHIPS**

The governing body of the British Postgraduate Medical Federation invites applications from registered medical or dental practitioners for a limited number of postgraduate Travelling Fellowships.

The aim of the Fellowships is to enable graduates who are in the course of training as specialists in one of the pre-clinical or clinical branches of medicine, surgery or dentistry, to obtain experience of the methods of practice, education and research at other universities or centres in the United Kingdom or abroad. Candidates must be British subjects holding an appointment at one of the undergraduate or postgraduate teaching hospitals or medical or dental schools or postgraduate institutes of the University of London.

The Fellowships will normally be tenable for one year, and the successful candidates will be expected to commence work at, or after, the end of the academic year 1966-7. The value of the Fellowships is not less than £1,150 per annum, and in addition allowances are paid for study abroad, for dependants in the case of married Fellows, and for travelling. Applications must be submitted before November 30, 1966, and further information and application forms may be obtained from the Assistant Director, British Postgraduate Medical Federation, Central Office, 18 Guilford Street, London W.C.1. An Assistant Medical Director required by LEO LABORATORIES LTD

As a research-based pharmaceutical company with a particular interest in the fields of antibiotic and endocrine therapy, we are expanding our clinical research organization. We would therefore like to invite applications from registered medical practitioners for a full-time appointment to our Medical Department staff. The Medical Department organizes clinical trials of new drugs in the United Kingdom, maintains close liaison with the Company's research laboratories in Denmark and is responsible for the documentation required by the various medical committees. Applicants should have had several years' clinical experience, preferably both in hospital and general practice. Experience in the pharmaceutical industry would also be an advantage, but we are primarily looking for an enthusiastic man (or woman) who has a particular interest in the scientific aspects of drug therapy. Previous research experience, some knowledge of statistics, an ability to write lucidly or a knowledge of laboratory techniques would be useful additional attributes, but we would not expect any candidate to possess them all. The successful candidate should be prepared to undertake a certain amount of travel in the United Kingdom. Commencing salary would depend upon experience and qualifications, but would not be less than £3,000. A car is provided, and non-contributory pension and life assurance schemes are in operation. Applications will be treated in strict confidence and should be addressed to:

The Medical Director, Leo Laboratories Ltd., Hayes Gate House, Uxbridge Road, Hayes, Middx. (10013)

DERBYSHIRE COUNTY COUNCIL

"COMBINED AND MIXED" APPOINTMENT OF DISTRICT MEDICAL OFFICER OF HEALTH AND ASSISTANT COUNTY MEDICAL OFFICER

Applications are invited for the above-mentioned whole-time appointment from registered medical practitioners (male or female) holding a Diploma in Public Health of equivalent qualification. The allocation of salary is based on 8/11ths to the two District Councils and 3/11ths to the County Council. The salary scale is £2,501 18s. 7d. to £2,973 8s. 3d. and account may be taken of previous professional experience in determining the starting point on the scale.

As District Medical Officer of Health the successful candidate will be subject to the sole control and direction of the District Councils; as an Assistant County Medical Officer of Health, he/she will act under the direction of the County Medical Officer of Health who is also the Principal School Medical Officer. While there is no "divisional administration" of the County Council's medical services, he/she will be required to act as a School Medical Officer, conduct clinics and perform such other duties as may be required. Preference will be given to a candidate who has had good and varied experience in public health duties.

The officer will be required to reside in an area convenient to the District Councils. Sympathetic consideration will be given to the provision of temporary housing accommodation, if desired. Removal and lodging allowances are paid in appropriate cases. The officer must not engage in private practice, and must devote whole-time service to the duties of the before-mentioned posts. The appointment is subject to the provisions of the Local Government Superannuation Acts, 1937-53, and the successful candidate will be required to pass a medical examination. Canvassing either directly or indirectly with a disqualification.

Application forms may be obtained from the County Medical Officer of Health, County Offices, Matlock. Completed forms should be sent to him so that they are received not later than October 26, 1966. (H.9284)

World Leader in Steroid Research

The chemical investigations initiated by Dr. Carl Djerassi and his collaborators of Syntex in the field of 19-nor steroids led in 1951 to the synthesis of norethisterone, an outstandingly active oral progestin. Norethisterone, and other similar compounds, made possible the subsequent biological and clinical studies on hormonal control of fertility.

During the first part of this decade Syntex started an extensive clinical study to determine the minimum dose of norethisterone and mestranol needed to inhibit ovulation and reduce to a minimum the side-effects produced by administering progestins and oestrogens.

From this study a new product was developed, Norinyl-1 containing the lowest dosage of progestin and oestrogen shown to inhibit ovulation i.e. 1 mg. of norethisterone and 50 mcg. of mestranol.

Details of this product appear overleaf.

Reliability

More than three thousand women completed 20,692 valid treatment cycles without a single pregnancy.¹ A valid treatment cycle is one in which intercourse takes place, NORINYL-1 is used as directed and no other contraceptive is employed.

Safety

The very low steroid content of NORINYL-1 is accompanied by the disappearance of some dose-dependent effects.² Bromsulphthalein excretion rates in women taking NORINYL-1 could not be distinguished from those in an untreated control group.³

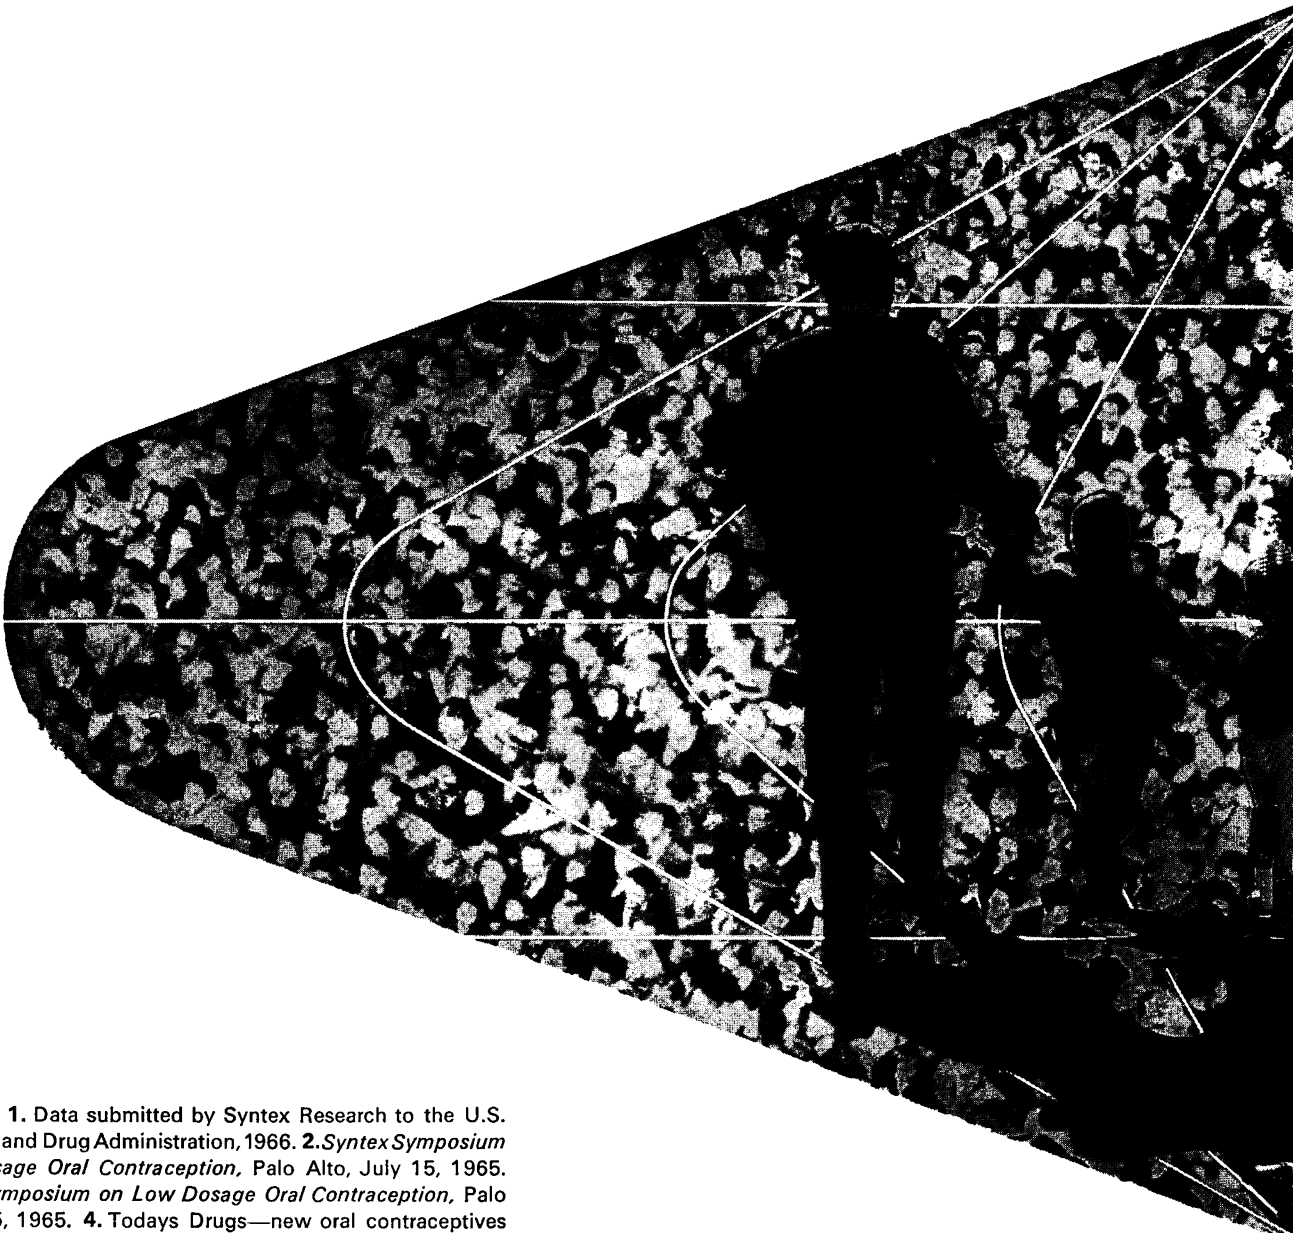

Simplicity

The tiny tablet is easy to swallow, the pack convenient to use and the 21 day routine virtually eliminates patient error.⁴

Tolerance

In 20,692 cycles the incidence of *headache, depression and breast symptoms* did not differ in any cycle, **even the first**, from that in the untreated control group. **After the second cycle**, the reported incidence of *nausea* approached pre-treatment control levels. Among *dysmenorrhoea cases* 89.5% had no further symptoms after starting NORINYL-1. *Pre-menstrual tension* was totally relieved in 79.3% of cases.¹

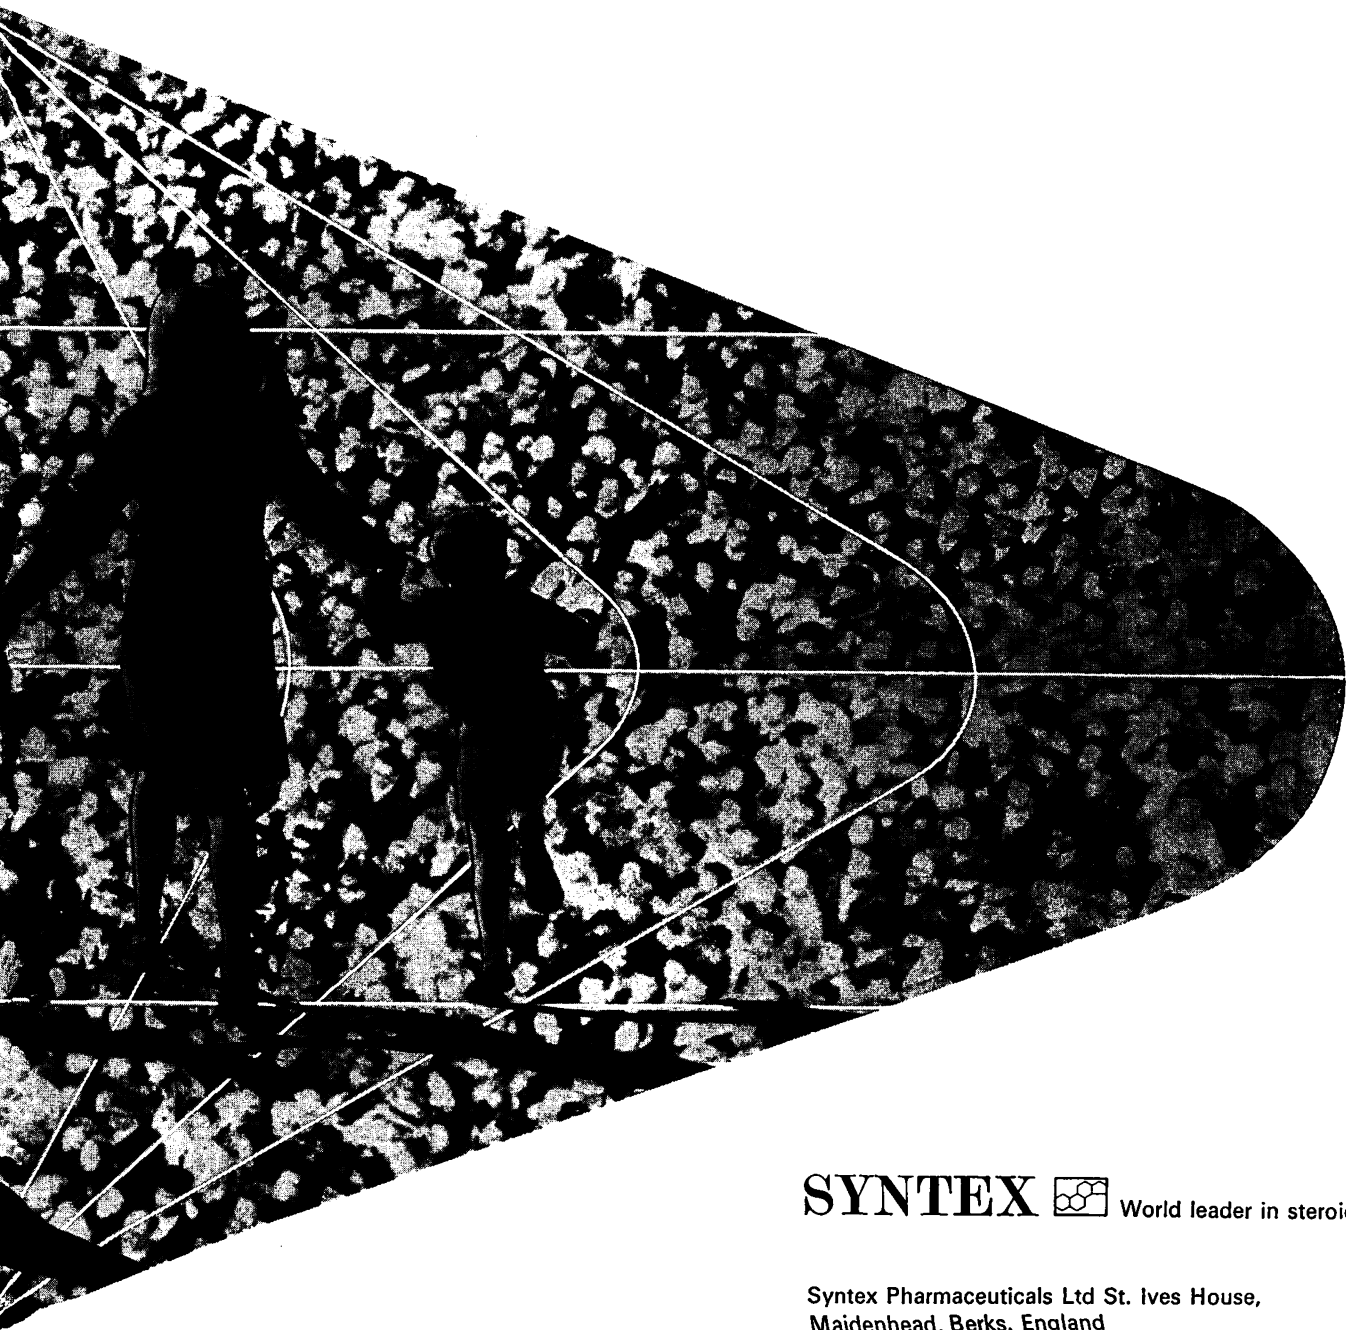

Each tablet contains 1 mg. of norethisterone (an original Syntex discovery) and 0.05 mg. of mestranol. Packed in wallets of 21 tablets.

MEDICAL OFFICERS

Careers in South Africa

Vacancies exist for Medical Officers in the Anglo American Corporation Group Medical Service in South Africa. The Corporation has a number of well equipped hospitals on its mines where care of its African mineworkers is undertaken. Apart from general work common to all male hospitals, medical officers will have the opportunity to gain experience of a valuable nature in traumatic surgery. They will be required to take an interest in the health, feeding and general welfare of the employees and will participate to some extent in conventional public health administration. Medical officers will also gain experience in the field of industrial health requirements.

Leave is at the rate of approximately one month annually and long leave is granted after every five years of service. In addition there is a study leave plan which enables selected medical officers to obtain further approved qualifications or to attend approved refresher courses.

The service offers, if desired, a long term career with all the usual benefits. The minimum commencing salary offered is £2,700 p.a. Consideration will be given to starting applicants with suitable experience on a commensurately higher salary. Unfurnished houses are available at a nominal rental. In the case of single men accommodation and board will be available in staff quarters at standard rates. Where required for professional duties, cars are provided by the Company. Membership of the Mine Officials' Pension Fund and Medical Benefit Society is a condition of service.

Successful candidates and their dependants will receive financial assistance in respect of air or sea fares and the transportation of personal effects to South Africa.

Applications, giving full details of medical career to date, age, marital status and qualifications, together with the names of two referees, should be addressed to:

**CONSULTANT RADIOLOGIST
Whylla Hospital, South Australia**

The Board of Management invite applications from medical practitioners, registrable locally, who have a special diploma in diagnostic radiology for the above position, now vacant.

The hospital of 230 beds, recently rebuilt, is of the latest design. The staff includes a Consultant physician and surgeon. It serves a young industrial population of 22,000, rapidly expanding. The township has a full range of social amenities, including education up to matriculation standard ("A" level, U.K.).

The candidate may elect to be paid a basic salary of \$A.7,500, rising to \$A.8,000 per annum, with full fees for specialist procedures, e.g., pyelograms, barium, etc., or for payment at a rate of 60% of net profits of the department. In either case it is expected that the initial net income will be \$A.11,500 (Estg. \$A.4,600) per annum before tax, and there would be excellent prospects of a steady increase depending on the Consultant's own ability to establish a service for practitioners in the Eyre Peninsula.

For further details please write to the Medical Superintendent, The Whylla Hospital Inc., P.O. Box 267, Whylla, South Australia, who would be pleased to answer fully any queries. (H.9321)

IF ANY PATIENTS
ARE IN NEED OF HELP—

the members of the Medical Profession are reminded that the Distressed Gentlefolk's Aid Association can provide assistance under three main headings:

The long-term sick and infirm—middle-aged as well as aged who unfortunately are not blessed with loving relatives or friends who can care for them.

The frail and aged—who with financial help can still be cared for in their own homes.

The middle-aged—who through illness or misfortune are in grave financial distress, especially women with young families deprived of their husbands' support through sudden illness or death.
