Chronic bronchitis **PENBRITIN** helps him put up a better fight

By swiftly reducing both the quantity and purulence of the sputum, routine dosage Penbritin brings a rapid clinical response in the majority of patients: moreover clinical trials have shown these benefits to be more marked than those observed in patients on tetracycline therapy. The success of this regimen (250mg. four times daily for one week or more) can be attributed to Penbritin's higher activity against the causative organisms, *H. influenzae* and pneumococci.

In addition, severely disabled patients, including those with extensive bronchiectasis and cases whose sputum is winter-long purulent despite other antibiotic therapy, may gain unprecedented relief from a short course of high dosage Penbritin. In published trials on this regimen (1 gram four times daily for one week or more) infection was cleared in the majority of patients, and subsequent freedom from exacerbation for up to 16 weeks was reported.

Psoriasis... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.² A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.² These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

New Alphosyl lubricating cream. A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipid constituents of normal healthy skin. The vehicle also contains hydrophylic-lipophilic bipolar substances which

Oct 9th

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalene, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

Formula: Allantoin 2%+90% alcoholic extract of coal-tar (5-1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

DENCYL LINCTUS relieves the cougher-of his cough

Effective and sustained cough relief — without complications Dencyl is a new cough linctus, differing conspicuously from most other antitussives in at least three respects:

Unique cough suppressant Dencyl Linctus contains 0.5% chlrophedianol, a potent non-narcotic suppressant giving prolonged relief from reflex coughing by day and night. Also a mild local anaesthetic, chlrophedianol adds to the effect of Dencyl's glycerin and syrup demulcents in soothing pharyngeal inflammation.

Effective whatever the cough Dencyl Linctus is formulated to subdue most types of cough, from the smoker's irritation to deeper-seated bronchial conditions and the notoriously difficult cough associated with upper respiratory tract infections. In addition, its expectorant ingredient, ipecacuanha, helps rid the patient of any persisting sputum.

No unwanted systemic actions Unlike many other antitussives, Dencyl Linctus, at normal dosage, relieves cough without interfering noticeably with bowel function, appetite, alertness, respiration or sleep pattern.

Dosage Adults, *one teaspoonful* (5ml.) of Dencyl Linctus 3-5 times a day as necessary, the final dose being taken at bedtime to encourage a good night's rest. Its warm orange flavour makes Dencyl Linctus particularly acceptable to schoolchildren, the dosage for 6-12 year olds being *half a teaspoonful* (2.5ml.). This formulation is unsuitable for children under 6 years of age.

new mode
of action

'Zyloric' lowers serum and urinary uric acid levels by inhibition of xanthine oxidase, an enzyme important in uric acid formation. 'Zyloric' prevents the deposition of urates in the tissues, relieves chronic joint pain, increases joint mobility and has the great advantage that it also inhibits urinary urate stone formation. 'Zyloric' is therefore indicated especially in gouty nephropathy, in patients who form urate stones, and in those with unusually severe disease.

Distalgesic erases pain

Two tablets of Distalgesic taken three or four times daily bring prompt and lasting relief in pain of varying degrees. Distalgesic maintains its effect at this dosage level even in long-term use, such as in the aches and pains of rheumatism. It can be effective against more severe pain, often delaying the need for parenteral narcotics. Distalgesic itself is non-narcotic, does not cause constipation or addiction and does not irritate the gastric mucosa.

Anaphylline

(THEOPHYLLINE-NIACINAMIDE)

a new theophylline complex for more
effective maintenance therapy in mild to moderate cases of

BRONCHITIS-ASTHMA-EMPHYSEMA

Clinical evidence confirms that this new theophylline-niacinamide complex achieves rapid therapeutic blood levels for faster dilation of the bronchioles and substantial improvement in vital capacity in most cases of chronic bronchitis, asthma and emphysema.

Significant Treatment Advantages:

The unique Anaphylline complex is a loose bonding of theophylline and niacinamide which affords a soluble theophylline through all pH ranges. No more ionization of theophylline salts with precipitation of the theophylline in the acid of the stomach. Now direct immediate absorption of the theophylline complex for faster, higher and longer blood levels.

* MORE RAPID ABSORPTION FOR QUICKER PATIENT RESPONSE

Evidence from clinical trials indicates that Anaphylline achieves therapeutic blood levels faster than theophylline salts and within 15 minutes of oral administration.

* MORE PROLONGED BLOOD LEVELS FOR SUSTAINED RELIEF

Rapid, initial blood levels achieved are followed by a steady, sustained rise reaching peak achievement at 60 minutes, with gradual, but uniform decline thereafter.

* SUPERIOR PATIENT TOLERANCE

Achievement of these blood levels is not accompanied by any increase in the side-effects normally associated with theophylline treatment.

INDICATIONS

For use as a bronchodilator to control the symptoms of chronic bronchitis, chronic asthma, emphysema and other pulmonary disorders.

DOSAGE:

Adults 1 to 2 tablets to be taken 3 or 4 times daily, preferably after meals. (Children 6-12 yrs., half to 1 tablet.)

FORMULA

Theophylline-Niacinamide complex containing 100 mg. theophylline and 150 mg. niacinamide in single tablet form.

SELECTION OF APERIENT

It is clear that the efficient treatment of constipation requires the limitation of laxatives to preferably one aperient of general efficacy; the laxative must be inexpensive, easy to administer, and physiological in its action, so that a rational treatment of bowel re-education (in contrast to the symptomatic and temporary relief by purging) can be initiated. Of all the laxatives available, the claims of standardized senna for general use appeared outstanding.

The latest addition to the Betnovate range is a new 30 gram tube for Betnovate-C, containing 0.1% betamethasone as 17-valerate and 3% chionoform. Since its introduction about a year ago, this combination has provided a useful alternative to Betnovate-N in treating inflammatory dermatoses complicated by infection. The effective bacteriostatic and fungistatic action of chionoform combined with the striking anti-inflammatory action of betamethasone has proved particularly valuable in the treatment of anal and vulvar pruritus and in moist dermatoses. Excellent response has also been achieved in the treatment of intertrigo, haemorrhoids and otitis externa. New economy and convenience are the extra advantages of the new 30 gram tube.

new topical fungicide
Tinaderm (tolnaftate) gives
prompt relief and rapid
clearance in tinea infections

In the treatment of athlete's foot and other tinea infections, a new measure of success can now be achieved with Tinaderm, an exceptionally effective new topical fungicide. Tinaderm (Cream and Powder) contains the new antifungal substance, tolinaftate. Applied topically, it is highly active against common dermatophytes that cause tinea pedis (athlete's foot), tinea cruris, tinea corporis and tinea manuum. Tolinaftate is not a keratolytic agent; it does not cause desquamation but penetrates lesions to kill the infecting fungi. Tolinaftate is unlikely to cause irritation or sensitisation.

Tinaderm brings swift relief from burning, itching and discomfort, often within 48 hours, followed by rapid clearance of lesions in as little as two to three weeks, regardless of the duration of the eruption. It

can be safely applied to the affected areas without discomfort to the patient. Tinaderm is gentle and soothing; it does not usually sting or irritate even when the skin is raw or acutely inflamed. Tinaderm Cream (1% tolinaftate in a vanishing base) does not stain or discolour the skin or clothing. Where perspiration is a problem or when maceration is present Tinaderm Powder (1% tolinaftate) is particularly useful.

"Penicillin is the drug of choice for beta-haemolytic streptococcal infections . . .

and oral penicillin is preferable to tetracyclines if injections are inconvenient." *This concluding statement made as recently as September 1965 in a paper in the British Medical Journal supports a similar view expressed in a leading article in *The Lancet* of September 14th, 1963, regarding the effectiveness of penicillin—in this case in comparison with its newer and costlier derivatives. In throat infections caused by beta-haemolytic streptococci, oral penicillin, such as Glaxo Crystapen G, is preferred not only because of its wider margin of safety, economy and ease of administration but also because of its rapid bactericidal action against these organisms which often prove resistant to other antibiotics. In such infections Crystapen is not just another inexpensive substitute—it is still the best antibiotic, and one that has proved reliable in the treatment of millions of

patients. Crystapen is the penicillin for today.

The two-tier tablet of Neo-NaClex-K is extremely well designed for trouble-free long-term management of mild hypertension. The white tier of the tablet provides bendrofluazide for smooth, sustained reduction of blood pressure. The pink tier provides potassium—normally sufficient to prevent potassium depletion—together with an equivalent amount of chloride ion. The tablet is designed for slow release (not delayed release) of potassium so that there is minimum risk of causing gastric irritation or small bowel ulceration.

The smooth antihypertensive action of Neo-NaClex-K is particularly suitable for the elderly hypertensive. Even the distinctive appearance of the small, easily swallowed tablet helps here—reducing the risk of confusion when different types of tablet have to be taken each day.

Presentation

Neo-NaClex-K Tablets

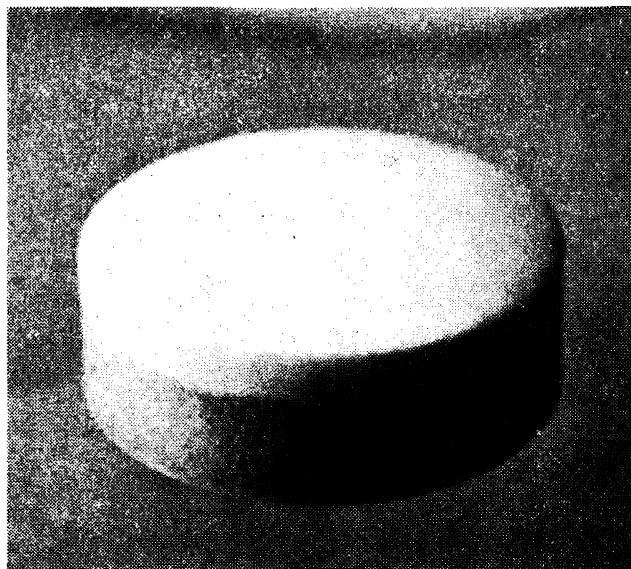

2.5 mg bendrofluazide and 630 mg potassium chloride
25, 100 and 500

Two-tier tablet action

Very shortly after the tablet is swallowed, the white tier disintegrates and the bendrofluazide is available for absorption.

Potassium chloride leaches out slowly from the pink tier.

Neo-NaClex-K is a Glaxo trade mark

Abstracts from Clinical Reports

Pruritic Dermatoses

'The results of the present study demonstrate that dimethpyrindene' possesses a high order of clinical efficacy as an antipruritic agent in allergic and pruritic dermatoses. As to rapidity of action and duration of effect, it is equal to most, if not all, potent antihistamines currently available.'

Current Therapeutic Research, Vol. 4. No. 4. April 1962.

Paediatric Use

'The results of dimethpyrindene therapy in children were particularly gratifying, in view of the type of condition involved (atopic dermatitis, urticaria and perianal pruritus). An antihistamine that is both effective and safe in paediatric use is a welcome boon to mothers as well as a source of satisfaction to the children.'

Current Therapeutic Research, Vol. 4. No. 4. April 1962.

Comparative Efficacy

'In a clinical study of 105 patients with urticaria, the drug proved at least as effective as the phenothiazine derivative, trimeprazine, and was remarkably free of side effects, particularly the more serious ones occasionally encountered with phenothiazine agents. These factors suggest that dimethindene more closely approximates the criteria of an ideal agent for the symptomatic control of pruritus. Of the 105 patients 79% responded to the compound.'

Clin. Med. 71. 1657-1660, 1964.

THE UNIVERSITY OF MANCHESTER

Applications are invited from candidates with medical qualifications registrable in this country for the post of

TEMPORARY LECTURER IN MEDICINE

Duties to commence as soon as possible, and to terminate on September 30, 1967. The post arises from the leave of absence of a permanent member of staff. The successful candidate will work in the division of metabolism in the department of medicine. Salary scale per annum: £1,805 to £2,590; salary according to qualifications and experience. Membership of F.S.S.U. Applications should be sent not later than November 5, 1966, to the Registrar, the University, Manchester 13, from whom further particulars and forms of application may be obtained on quoting reference 217/66/JMB. (10232)

**THE INCORPORATED LIVERPOOL
SCHOOL OF TROPICAL MEDICINE
Department of Parasitology****A RESEARCH ASSISTANT**

is required to collaborate with the head of the department in the development of new methods for the evaluation of compounds active against parasitic diseases. This is an original and challenging programme that will provide full scope for a young research worker with imagination and energy who wishes to prepare for a higher postgraduate qualification.

Candidates should hold an honours degree in the natural sciences, and preference will be given to those with particular interest in zoology, biochemistry or pharmacy.

Basic salary will be on the scale £850 to £1,150 with placing according to qualifications and experience, and the appointee will be entitled to participate in the F.S.S.U. The appointment is for a period of four years subject to a probationary period of six months.

Further particulars may be obtained from the Dean, Liverpool School of Tropical Medicine, Pembroke Place, Liverpool 3, with whom applications (three copies) should be lodged by December 15, 1966. (H.9534)

**THE INCORPORATED LIVERPOOL
SCHOOL OF TROPICAL MEDICINE
Department of Parasitology**

The reorganization of the department of parasitology has created vacancies for

**TWO JUNIOR LECTURERS
(Technical Assistance)**

who may be medical or non-medical science graduates.

The lecturer will be attached to the sub-department of entomology and on to the department of parasitology. The purpose of the appointments is to provide interesting and challenging posts for candidates who either have prior experience of teaching or research in tropical countries or are desirous of obtaining such experience. They must therefore be willing to be seconded to suitable teaching or research centre overseas for a major portion of their appointment when vacancies occur. Even during secondment they will be on permanent attachment to the department of parasitology (for the duration of their appointment, which is five years). They will also be expected to participate in teaching and in current research projects during any interim periods that they may spend in Liverpool.

Candidates should be within the range for lecturers (Grade II) on the university scale, and placing will depend upon individual qualifications and experience. Medical graduates must hold a qualification registrable in the United Kingdom and have at least two years' postgraduate clinical experience.

Further particulars may be obtained from the Dean, Liverpool School of Tropical Medicine, Pembroke Place, Liverpool 3, with whom applications (three copies) should be lodged by January 31, 1967. (H.9536)

University of Newcastle upon Tyne**

Applications are invited for the post of

**TEMPORARY DEMONSTRATOR
in the Department of Pathology**

which is housed in the teaching hospital (Royal Victoria Infirmary, Newcastle upon Tyne). The post is for one year and renewable annually up to three years. Subsequently a suitable Demonstrator will be offered a further extension to complete the period of training required for the M.C.Path. The successful applicant will also assist in teaching and be encouraged to undertake research.

Salary will be at the appropriate point on one of the following scales according to age, qualifications and experience:

Demonstrators: £1,200 by £110 to £1,530
Senior Demonstrators: £1,530 by £110 to £1,750.

Applications, giving full name, age, qualifications and experience, together with the names of two referees, should be addressed to the Assistant Registrar, The Medical School, University of Newcastle upon Tyne, as soon as possible. (10272)

**THE UNIVERSITY OF MANCHESTER
Department of Audiology and Education of
the Deaf**

Applications are invited for the post of Senior Research Associate to work on the use of electroencephalography in the diagnosis of hearing impairment in children and adults. The work is being financed by a grant from the Leverhulme Trust. The person appointed should hold a good degree, preferably in medicine or psychology. The work will call for a knowledge and use of the electroencephalograph and computer techniques. The person appointed will be encouraged to work in collaboration with the clinical staff of the department. The starting salary will be £1,470 per annum, rising by four annual increments of £90 to £1,830 per annum. Further particulars and forms of application may be obtained from the Registrar, the University, Manchester 13. Please quote reference 219/66/JMB. (10148)

**THE WELSH NATIONAL SCHOOL OF
MEDICINE
(University of Wales)**

Applications are invited for the appointment of

**SENIOR LECTURER
(Honorary Consultant in Haematology to the
United Cardiff Hospitals)**

In the department of pathology. Salary within the scale £2,420 to £3,990 per annum, point of entry according to qualifications and experience. Federated superannuation system.

The duties will include the investigation of patients with blood disorders attending the Cardiff Royal Infirmary.

Applicants to be made within three weeks of the appearance of this advertisement to the Academic Registrar, 34 Newmarket Road, Cardiff, from whom further particulars may be obtained. (10239)

**WHITTINGTON HOSPITAL
Highgate Hill, N.19****RESEARCH REGISTRAR (Physicist)**

required for investigations in hypertension and diabetes for one or two years, renewable for a second year. Apply to Hospital Secretary by October 31. (10265)

**UNIVERSITY OF GLASGOW
LECTURESHIP IN MEDICINE
at Glasgow Western Infirmary**

Applications are invited for a Lectureship in Medicine at Glasgow Western Infirmary. Salary according to placement on University scale for clinical teachers. The final maximum is £2,700 per annum, F.S.S.U. Applications (12 copies) should be lodged, not later than November 14, 1966, with the undersigned, from whom further particulars may be obtained.—Robt. T. Hutcheson, Secretary of the University Court. (10253)

**UNIVERSITY OF LONDON
KING'S COLLEGE
Department of Pharmacology**

The College will require on January 1, 1967, a

LECTURER IN PHARMACOLOGY

Applications are invited from graduates with medical or science qualifications in Pharmacology, Biochemistry, or Physiology. The lecturer will work under the general direction of the Professor of Pharmacology, and will have teaching and research responsibilities. A special interest in smooth muscle will be welcome.

Salary scale: £1,895 by £105 per annum to £2,630. A London allowance of £60 plus F.S.S.U. benefits will also be payable.

Conditions of appointment and application forms may be obtained from the Registrar, King's College, Strand, London W.C.2, and completed forms should reach him not later than October 31, 1966. (10022)

**UNIVERSITY OF YORK
Institute of Social and Economic Research
Health Research Unit**

It is proposed to appoint a

**RESEARCH FELLOW OR SENIOR
RESEARCH FELLOW**

to the above unit. The person appointed would be responsible for the activities of the unit, under the general supervision of the social science professors concerned, and would also be expected to undertake some teaching.

Salary, within the range £1,470 to £2,630 or £2,755 to £3,280, with F.S.S.U.

Candidates should have experience of research in one of the social sciences, and be sympathetic to the quantitative techniques in the relevant field of study. Previous experience of research into problems of health, and competence in statistical techniques, are desirable but not essential qualifications.

It is envisaged that the unit (which has been established with the generous support of the Nuffield Provincial Hospitals Trust) will develop as a permanent part of the Institute's activities. The appointment will be made for four years in the first instance, but a suitably qualified person might hope that his appointment would become permanent.

Six copies of applications, naming three referees, should be sent by November 11 to the Registrar, University of York, Heslington, York, from whom further details may be obtained. (10218)

Public Health—contd. on p. xlv

Before you commit yourself to a practice, work 3 or 5 years in the R.A.F.

You'll do some interesting, out-of-the-rut medicine, see a bit of the world, live well, and 'retire' with up to £3,000, tax free.

Your first 'job' in the R.A.F. would probably be junior M.O. at a Station: rather like being an 'Assistant with a view'. In a typical case you could be one of two doctors with, between you, 1500 to 2500 people to take care of, and your own 'cottage hospital' with wards, theatre and laboratory, and secretarial as well as nursing staff.

You'd have a shorter list than a civilian G.P., and to this extent you would live a less strenuous life. To compensate, you would give much more comprehensive care. It is this—and the variety of your work—that makes practice in the R.A.F. so interesting.

In the R.A.F. you combine several functions. You are in medical care not only of people, but of the environment they live in, and of the work they do. In proportion you do less curative work and more preventive work than is even possible for most civilian doctors.

A lot of people hold the view that this is the way all medicine should be practised—with the closest possible integration of the doctor and the community.

This is the choice you face

Think of two doctors, both aged 40. One went to his practice straight from his teaching hospital, and has been there ever since. The other went into the R.A.F. on a 5-year commission. He lived

—and lived well—in the tropics with his family for 2½ years and, on leave or on duty, visited 7 countries: two European, three Asiatic, and two Australasian. By now he's been in civilian practice for 10 years; he's as well established as the other doctor. But which of the two has got more out of life, and has the richer memories to look back upon?

In many ways, the transition from hospital into the R.A.F. seems more 'natural' than the movement to civilian practice. You go from one community to another—and they have much in common: both are young, cheerful, energetic, rather self-contained—and at the same time very professional, with a marked sense of purpose. If you can feel, now, that you are going to miss Medical School—think about the R.A.F. Service life would probably be 'right' for you.

The time for bold decisions is when you are young and free

Today, because you are at the beginning of your career, you can take a short time out from the main stream of civilian practice *just by deciding to do it.*

Now, you are free to go. In a few years time, you probably won't be.

You'll have a practice 'with your name on it'; children who want a permanent home to strike root in; and soon. It will be time for you to settle down.

Meanwhile, at the parting of the ways, you have this chance. Now is the time to find out about it.

The address to write to is: Wing Commander D. G. M. Hills, O.B.E., M.B., B.S., D.P.H., R.A.F., Ministry of Defence (M.A.I./724FE11), 1-6 Tavistock Square, London, W.C.1. Please give your age and qualifications.

Medical cadetships. Commissions as a cadet are available to students who have passed second M.B. (or equivalent). Initially your basic pay would be £630 p.a. Appropriate R.A.F. allowances, examination and tuition fees are paid in addition. You would continue to live and work as a medical student and when fully registered you would start work in the R.A.F. as a doctor in the rank of Flight Lieutenant on a five year short service commission. Further information may be obtained from the above address.

OFFICER**

(Male or female) combined with a Bursary Scheme for taking the Diploma in Public Health

Applications are invited from young medical practitioners wishing to make a career in public health. A minimum of two years' medical experience is required. The selected candidate may elect to join the Bursary scheme which provides for attendance on paid leave, in the third or fourth year of service, at London University, to take the Diploma in Public Health—with assistance towards living, travelling and course expenses. The post is kept open, and a satisfactory candidate may return to the council's service on the appropriate point in salary scale. A brochure explaining the scheme in full is supplied with the application form. Conditions of service and salary are in accordance with the Whitley Council scale—£1,515 to £2,130—commencing salary according to experience, a Bursary candidate having certain deductions. Post superannuable from date of appointment.

Applications will be considered from married women practitioners willing to work school terms only for pro-rata salary.

The successful candidate will be required to produce a satisfactory medical certificate. Car is essential, for which Whitley Council scale allowance is payable. Consideration will be given to financial assistance towards removal expenses.

Forms of application can be obtained from the County Medical Officer of Health, County Health Department, Shire Hall, Warwick. Closing date for applications is November 8.—L. Edgar Stephens, Clerk of the Council, Shire Hall, Warwick. (20374)

MEDICAL ADVISER

Applications are invited from medical graduates of British Universities, aged about 30 years, for the post of Assistant to the Head of the Clinical Investigation Department of the vigorous British subsidiary of a large European Pharmaceutical Company. The duties of the post comprise the compilation of data for submission to the Dunlop Committee and the initiation and supervision of clinical trials upon drugs developed by the parent company. Possession of a higher medical qualification or previous experience of the Pharmaceutical industry are not necessary for this post, but it is desirable that applicants should have had good all-round experience in general medicine at Registrar level. Salary and prospects are good. There is a non-contributory pension and life insurance scheme and a company car will be provided. Applicants for the post should supply brief personal details to Box CA262.

SANDOZ

invite applications from British male registered medical practitioners for a full-time appointment to the staff of their Medical Research Department in London. The Department is responsible for the organisation and administration of clinical trials in the British Isles, for submission of information to official committees, and for close liaison with the research laboratories and sales divisions.

Applicants should be under 35 years of age, have had several years' clinical experience, preferably both in hospital and general practice. Experience in psychiatry would be an advantage but is not essential. They should be prepared to undertake a certain amount of travel within the United Kingdom.

The Company operates a contributory pension scheme and provides certain other benefits. A progressive salary, depending initially on experience and qualifications, will be offered.

Applications will be treated in confidence and should be addressed to the Research Manager, Sandoz Products Limited, Sandoz House, 23 Great Castle Street, London, W.1. (10252)

COMMERCIAL APPOINTMENTS**Boehringer Ingelheim Limited**

This expanding subsidiary of a large and distinguished German pharmaceutical company wishes to appoint a physician to join the Medical Department.

The parent company undertakes very extensive drug research, both basic and applied, in Germany, Austria, and Canada. A major part of the duties involve the setting up of well designed trials of new compounds in this country. This provides the opportunity to study all stages of the development of a drug, from early animal work through human pharmacology to established use in clinical practice. It therefore requires a doctor with a real interest in this whole field and well based post-graduate medical experience.

The Company provides a generous non-contributory pension scheme and an attractive salary will be negotiated.

Please write giving a clear and concise summary of your background and experience to the Medical Director, Boehringer Ingelheim Limited, Great West Road, Isleworth, Middlesex.

INTERNATIONAL CLINICAL TRIALS

Highly-qualified clinician required to plan and supervise clinical trials of important new products in Continental countries and to serve as Medical Adviser in London international headquarters of leading ethical pharmaceutical manufacturers with Research Institutes in U.S.A. and U.K. Frequent European travel involved.

Previous business experience and knowledge of European languages desirable. Non-contributory pension scheme.

Full particulars to Managing Director, Box CA.243, B.M.J.

RASTINON tolbutamide BP

The diabetic's treatment extends, at the moment, throughout his lifetime. The long-term safety of the preparations used is just as important as their ability to maintain satisfactory blood levels. Rastinon has a record of safety exceeding that of any comparable preparation. Its effectiveness is such that during the last 8 years over three million of the world's diabetics have been stabilized on Rastinon. This is why Rastinon is the first choice in initiating and continuing the oral treatment of diabetes.

GLYMAXIL Regd. instant buffer antacid

Hyperacidity and peptic ulcer:

AN OUTSTANDINGLY DIFFERENT AND MORE EFFECTIVE TREATMENT

Just two things interest the chronic sufferer. He wants the pain to go, and stay gone. And if both results can be achieved with an antacid that tastes pleasant and is needed in lesser quantity than he's used to, he's going to be very grateful indeed.

Glymaxil, the only soluble buffer antacid, can promise exactly this. In clinical practice Glymaxil has been shown 'significantly more effective' in relieving pain and 'significantly more palatable' than aluminium hydroxide. Glymaxil, the first antacid chelate, acts faster and buffers more acid for longer periods in the ideal pH range 3-5 than other commonly used antacids.

A very agreeable treatment

By suppressing pain promptly Glymaxil gives the nervously-inclined patient a sense of reassurance, itself highly beneficial. Taken in small doses (1-2 teaspoonfuls) and tasting pleasantly of peppermints it is also a most agreeable and convenient liquid antacid—one that will make his symptoms a great deal easier to live with.

Dosage One or two teaspoonfuls as required. Not more than 120ml. (one bottle) of Glymaxil should be consumed in any 24 hour period.

Presentation Bottles of 120ml. containing 40% w/v sodium glucaldrate.

M.S.?

No need, obviously, to acquaint you with the facts of Multiple Sclerosis, also known as Disseminated Sclerosis, or that over 40,000 people in Gt. Britain suffer from the disease.

You'll doubtless know, too, about the work done by The Multiple Sclerosis Society of Gt. Britain and Northern Ireland, not the least part of which is to encourage a greater awareness on the part of the general public to the nature of the disease. In this respect, the co-operation of the medical profession is urgently needed. If you have a patient who is suffering from M.S., and you decide that it is in his best interests to acquaint him of this fact, the Society would be grateful if you would let him know of the work it is doing, and how, through its welfare services, it can help him, too.

ST. ANDREW'S HOSPITAL
NORTHAMPTON

FOR NERVOUS AND MENTAL DISORDERS

President: The Earl Spencer

Medical Superintendent: James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, was opened in 1962, which comprises an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.
