

The most important thing to remember about this watch is **that it isn't a watch.**

This is a Bulova Accutron timepiece. And we don't even call it a watch at all. It has no balance wheel. No mainspring. No escapement. In fact anything that can make a watch go slow or fast has been left out. Replaced by a tuning fork that keeps time so precise that the Bulova Accutron comes with the first guarantee of on-the-wrist accuracy ever given.

So any resemblance between the Bulova Accutron and a watch is purely superficial. The Bulova Accutron guarantees accuracy to within a minute a month. That's more than a watch can do. Not bad considering that the Bulova Accutron isn't a watch.

Wood anemone [*anemone nemorosa*]. Ironically, this, one of our prettiest woodland flowers was once regarded as a cure for one of the most hideous diseases—leprosy. The cure was effected by bathing the body in a decoction of its leaves.

## summer-long protection against HAY FEVER with D-VAC Pollens 3 dose course

D-VAC Pollens, Bencard emulsified 'depot' vaccine for 'classical' hay fever and pollen asthma, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

**Primary Course** (three injections containing 250, 750 and 3,500 Noon units respectively): designed for patients who have not received pollen vaccine treatment in the last five years or whose seasonal symptoms are severe, and for children (aged 8-14 years).

**Advanced Course** (three injections containing 750, 3,500 and 7,500 Noon units respec-

tively): designed for patients aged 15 years and over who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose given in February or early March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

## TO BE SURE

of obtaining D-VAC Pollens, it is advisable to prescribe and order before 31st December: no order can be accepted after 20th January.

Prescriptions and orders, for D-VAC Pollens 'Primary' or 'Advanced', should state the exact date (between 13th February and 4th March) on which the first dose is to be injected. The first dose will be despatched to arrive by this date. (D-VAC Pollens is not available outside the U.K.)

## Advances in Stereoecephalotomy

### I. Methodology and Extrapyramidal System

Second International Symposium on Stereoecephalotomy, Part I.  
Copenhagen, Denmark, 28th August 1965

Edited by E. A. SPIEGEL and H. T. WYCIS, Philadelphia, Pa.

ii+371 p., 137 fig., 28 tab., 1966 (Reprint from *Confinia Neurologica*.  
Vol. 26, No. 3-5, 1965). £6 7s. 9d.

Since the first Symposium on Stereoecephalotomy in 1961 considerable progress has been made in methodology as well as in the application for analysis and treatment of extrapyramidal disorders, pain, convulsive and behavioural disorders. Over 26,000 stereotaxic operations have been performed throughout the world since the first application of this method to human neurosurgery by SPIEGEL and WYCIS. The experiences of an international group of neurosurgeons and researchers in this field are summarized in the symposium held in Copenhagen in 1965, of which this volume represents the Proceedings.

## Progress in Medical Virology, Vol. 8

Editor: J. L. MELNICK, Houston, Texas

xii+420 p., 36 fig., 30 tab., 1966. £6 0s. 9d.

This volume deals with a number of virological problems of considerable importance, including the question of whether more harm than good may come from the present practices in using smallpox vaccine in developed countries. Other points of topical interest are: the large scale epidemic of congenital rubella which produced disease in thousands of newborn in the United States in 1965, the role of leucocytes in viral infections, the improvement of viral vaccines by the use of oil adjuvants, the recent developments in architecture of small viruses, particularly the newly discovered picodnaviruses—defective viruses with single-stranded DNA—the relationship between chemical and biological reactivity of viruses, the plaque mutants of viruses, and the new phenomena of complementation and transcapsidation among defective DNA tumour viruses of the papovavirus and adenovirus groups.

### New (3rd) Edition! Friedberg : DISEASES OF THE HEART

By Charles K. Friedberg, M.D. *The Mt. Sinai Hospital, New York, College of Physicians and Surgeons, Columbia University*

During the past 15 years the name "Friedberg" has become synonymous with authority, up-to-dateness, practicality, completeness and understandability among reference books in cardiology. This New (3rd) Edition is beyond question the finest "Friedberg" yet. Here is a remarkably cohesive, logical and balanced presentation of all the factors that together make up the clinical picture of the individual with disease or dysfunction of the heart. Virtually every problem regarding recognition, differential diagnosis, pathological physiology, treatment and prognosis is fully examined and effectively resolved. The many fronts of cardiac surgery in regard to indications, contraindications and the operative procedures themselves are superbly illuminated.

Whether you purchase this great book in the single volume or in the easier to handle two-volume set, you will receive a vast storehouse of just about all the worth-while information on heart disease available today.

In single-volume set £7 14s. 0d.

In two-volume set £9 2s. 6d.

### MANAGEMENT OF THE PATIENT WITH CANCER

Edited by Thomas F. Nealon, M.D., *Professor of Surgery, Jefferson Medical College. With contributions by 67 distinguished authorities.*

This major new reference book fills a particular need for an authoritative guide to the clinical management of the patient with cancer. It provides essential information concerning cancer of all sites so that the reader can select more easily the best approach to management of his own patient. More than 60 eminent contributors provide rational plans of management for particular types of malignancy with which they have had extensive experience. For today's best answer to almost any question about managing the patient with cancer, both physician and surgeon will find this new book to be a most authoritative and useful consultant and guide.

The most advanced techniques of diagnosis are given—cytological tests, scintillation scanning, new radiological procedures, biopsy—as well as guidance in history taking and physical examination. Clear advice is given on selection of the surgical procedure which offers best hope of cure or worth-while palliation of the patient and the latest regimens of radiotherapy and chemotherapy are included.

#### An Introduction to Medical Automation

L. C. Payne, B.Sc., Ph.D., *Private Medical Automation Consultant*

The increasing use of the computer has now become an important factor of modern life. L. C. Payne believes that medical automation will, as it develops, exercise as profound and continuing effect on the medical profession as any in its history. This book outlines in non-technical language the basic concepts of automation applied to medical practice and attempts to define the scope and direction of such developments. This is a stimulating introduction to a subject which, although in its infancy, should be understood by all those connected with medical practice.

#### Little Strokes

W. C. Alvarez, M.D., D.Sc.

The distressing lack of awareness of stroke is predicated for the most part on the widely accepted misconception that stroke is simply a way of dying and that little can be done about it. The facts indicate something altogether different. Dr. Alvarez has produced an exhaustive interpretation of this condition, including current treatment practice and methods of rehabilitation.

Raise the Bronchial Barrier by prescribing

# Tetrex

*tetracycline phosphate complex*

TETREX\* is more fully and rapidly absorbed than other forms of tetracycline, giving high serum tetracycline levels without delay. Since sputum levels of tetracycline are generally only between 10 and 30 per cent of the serum concentration—limited by the 'Bronchial Barrier'—adequate absorption is vital if full inhibition of *Haemophilus influenzae* in the lungs is to be achieved. TETREX is most likely to ensure adequate serum levels even in the poor absorber.

Available as TETREX capsules of tetracycline phosphate complex equivalent to 250 mg. tetracycline.

In special-risk patients

# Tetrex 'F'

*tetracycline phosphate complex with nystatin*

will check the increased tendency to overgrowth of *Candida albicans* in certain patients by inclusion of the specific and potent anti-fungal antibiotic, nystatin in its capsule. Clinical experience has shown that the very young and the very old, diabetic, debilitated or geriatric patients, those taking steroids or high or prolonged tetracycline dosage together with patients having a history of *Candida* infection are particularly susceptible to candidiasis during tetracycline therapy; more recent experience emphasizes that when the tetracycline is TETREX 'F'\* the risk of candidiasis is minimal.

Available as TETREX 'F' capsules of tetracycline phosphate complex equivalent to 250 mg. tetracycline with nystatin 250,000 units.

## To lessen the fear of mutilation . . . arrange for Prosthesis before mastectomy

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen—for women, men, children—you will find Spencer Supports demonstrably superior.

## widens the scope of topical steroid therapy

The evidence from extensive clinical trials—"that a better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested"\*—has been fully substantiated by the outstanding results obtained with Betnovate (betamethasone 17-valerate) in hospital and general practice. Firmly established as the topical steroid most likely to succeed in psoriasis and eczema, Betnovate has been used increasingly for many other conditions. It has proved to be uniquely effective in resistant diseases difficult to control with other topical steroids—and in relatively responsive conditions it gives a more rapid clearance. Thus a better response is now obtained throughout the whole range of steroid-responsive dermatoses. The majority of such skin disorders can be treated satisfactorily by simply applying a Betnovate preparation once or twice daily.

# GLYMAXIL Regd. instant buffer antacid

**Hyperacidity and peptic ulcer:**

## **AN OUTSTANDINGLY DIFFERENT AND MORE EFFECTIVE TREATMENT**

Just two things interest the chronic sufferer. He wants the pain to go, and stay gone. And if both results can be achieved with an antacid that tastes pleasant and is needed in lesser quantity than he's used to, he's going to be very grateful indeed.

Glymaxil, the only soluble buffer antacid, can promise exactly this. In clinical practice Glymaxil has been shown 'significantly more effective' in relieving pain and 'significantly more palatable' than aluminium hydroxide. Glymaxil, the first antacid chelate, acts faster and buffers more acid for longer periods in the ideal pH range 3-5 than other commonly used antacids.

## **A very agreeable treatment**

By suppressing pain promptly Glymaxil gives the nervously-inclined patient a sense of reassurance, itself highly beneficial. Taken in small doses (1-2 teaspoonfuls) and tasting pleasantly of peppermints it is also a most agreeable and convenient liquid antacid—one that will make his symptoms a great deal easier to live with.

**Dosage** One or two teaspoonfuls as required. Not more than 120ml. (one bottle) of Glymaxil should be consumed in any 24 hour period.

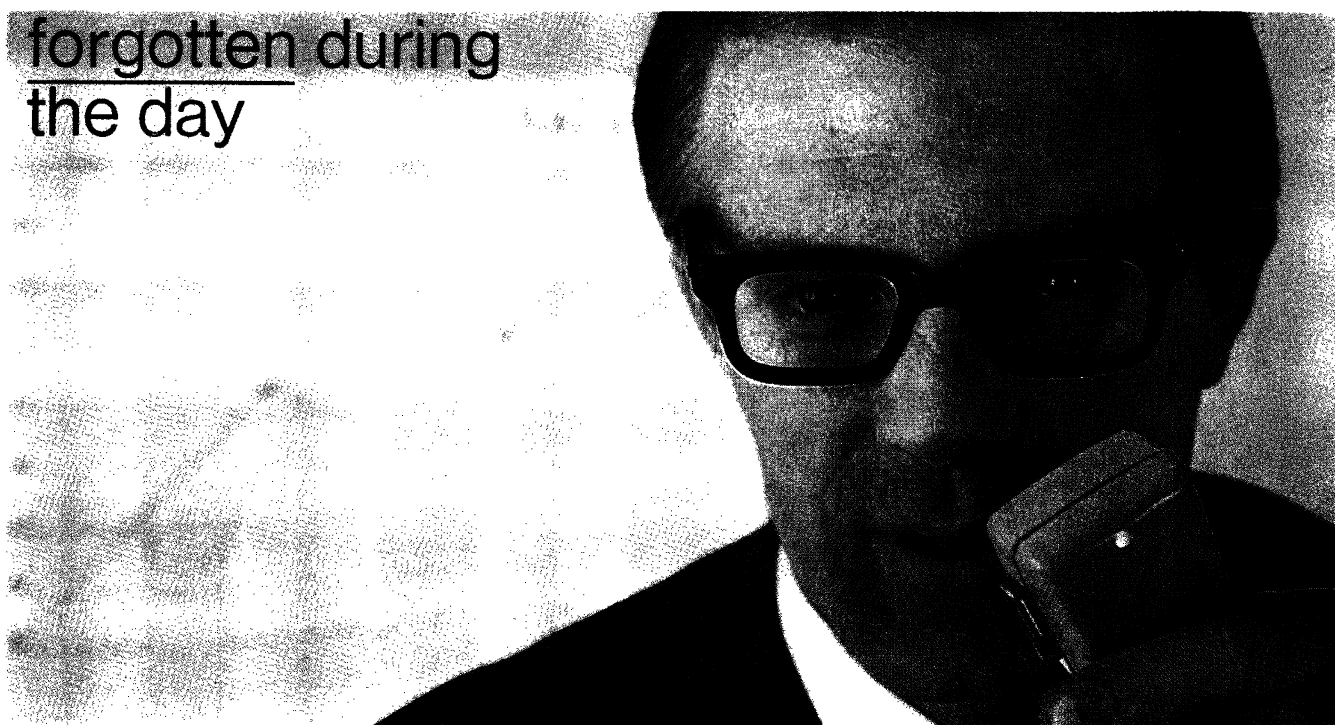

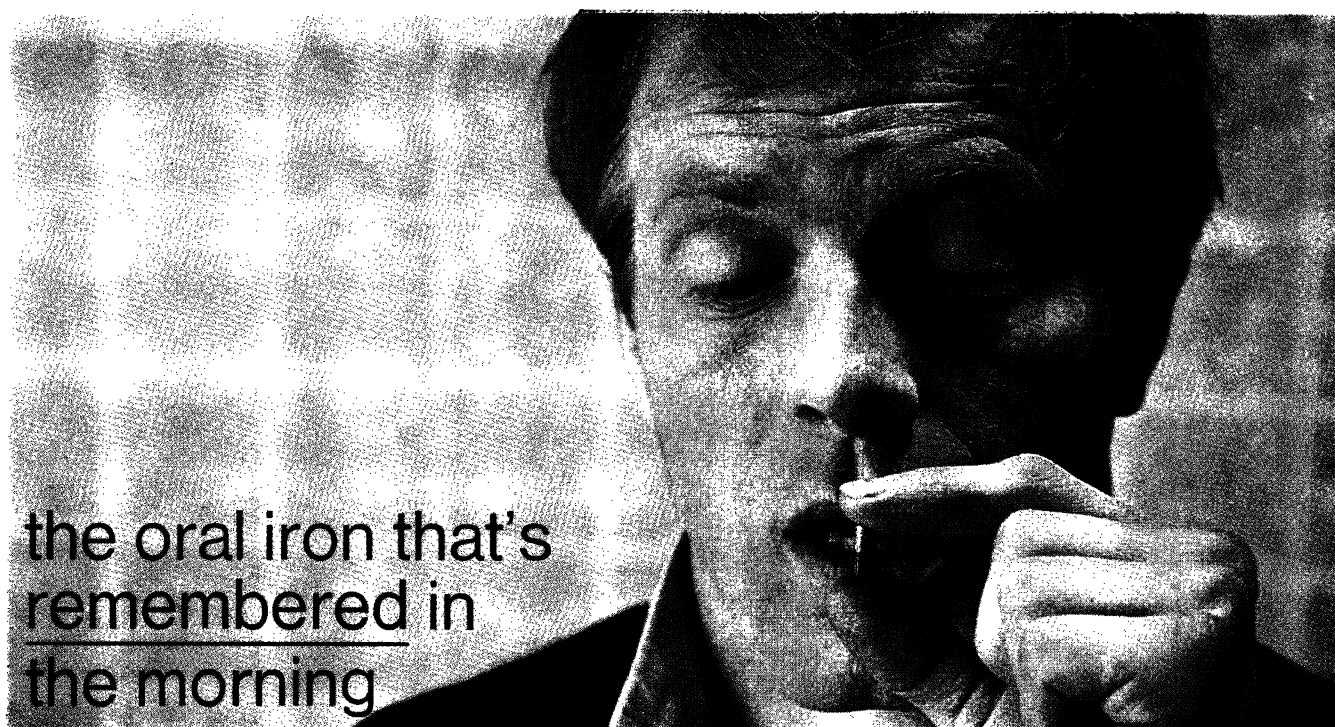

**Presentation** Bottles of 120ml. containing 40% w/v sodium glucochlorate.

# Anaphylline

(THEOPHYLLINE-NIACINAMIDE)

a new theophylline complex for more  
effective maintenance therapy in mild to moderate cases of

## BRONCHITIS-ASTHMA-EMPHYSEMA

Clinical evidence confirms that this new theophylline-niacinamide complex achieves rapid therapeutic blood levels for faster dilation of the bronchioles and substantial improvement in vital capacity in most cases of chronic bronchitis, asthma and emphysema.

### Significant Treatment Advantages:

The unique Anaphylline complex is a loose bonding of theophylline and niacinamide which affords a soluble theophylline through all pH ranges. No more ionization of theophylline salts with precipitation of the theophylline in the acid of the stomach. Now direct immediate absorption of the theophylline complex for faster, higher and longer blood levels.

#### \* MORE RAPID ABSORPTION FOR QUICKER PATIENT RESPONSE

Evidence from clinical trials indicates that Anaphylline achieves therapeutic blood levels faster than theophylline salts and within 15 minutes of oral administration.

#### \* MORE PROLONGED BLOOD LEVELS FOR SUSTAINED RELIEF

Rapid, initial blood levels achieved are followed by a steady, sustained rise reaching peak achievement at 60 minutes, with gradual, but uniform decline thereafter.

#### \* SUPERIOR PATIENT TOLERANCE

Achievement of these blood levels is not accompanied by any increase in the side-effects normally associated with theophylline treatment.

#### INDICATIONS

For use as a bronchodilator to control the symptoms of chronic bronchitis, chronic asthma, emphysema and other pulmonary disorders.

#### DOSAGE:

Adults 1 to 2 tablets to be taken 3 or 4 times daily, preferably after meals. (Children 6-12 yrs., half to 1 tablet.)

#### FORMULA

Theophylline-Niacinamide complex containing 100 mg. theophylline and 150 mg. niacinamide in single tablet form.

erase pain

## *Distalgesic erases pain*

Two tablets of Distalgesic taken three or four times daily bring prompt and lasting relief in pain of varying degrees. Distalgesic maintains its effect at this dosage level even in long-term use, such as in the aches and pains of rheumatism. It can be effective against more severe pain, often delaying the need for parenteral narcotics. Distalgesic itself is non-narcotic, does not cause constipation or addiction and does not irritate the gastric mucosa.

Distalgesic tablets each contain 32.5 mg. *dextropropoxyphene hydrochloride*, described as the most promising alternative to codeine, and 325 mg. *paracetamol*, generally regarded as the safest of the antipyretic analgesics.

## SPARE YOUR PATIENT WASTED DAYS OF PAIN

Fibrositis and myalgia... sprains and strains... lumbago... sciatica... displaced intervertebral disc... in these and many other painful muscular conditions *Norgesic* gives the patient a better chance of early pain relief than simple analgesics, and quickly gets him on the move again. *Norgesic* contains not only an analgesic—paracetamol—but orphenadrine citrate, a highly effective agent to relieve painful muscle spasm.

Because muscle tension and stiffness so often contribute to pain<sup>1</sup>, this formulation can give relief extending beyond the scope of simple analgesics. Furthermore, the patient contributes to his own recovery through his ability to move freely again<sup>1,2</sup>.

By relieving local pain and easing stiff and painful muscles, *Norgesic* gives rapid and reliable relief, restores mobility and cuts short the time the patient is out of action.

Conventional diuretics act on the proximal renal tubule. They allow reabsorption of sodium and water and loss of potassium to continue at the distal tubule. But Aldactone-A (brand of spironolactone), added to the regimen, acts at the distal tubule, and prevents excessive sodium reabsorption and potassium loss.

**PAYNOCIL** is strongly analgesic, anti-pyretic and anti-rheumatic in both short and long term treatment.

Paynocil is double-strength aspirin—10 grains per tablet—in a lemon-flavoured glycine base.

The glycine disperses the tablet instantly on the tongue, and distributes the aspirin rapidly into the stomach in minutely fine particles—minimising the risk of gastric irritation.

Paynocil tablets are sealed in protective metal foil.

**JUNIOR PAYNOCIL** for children, a quarter-strength tablet of the same formula, is available in similar foil strips.

In peptic ulcer, the  
gastric acid is secreted  
excessively and the  
oesophagus is attacked  
by the acid. This  
leads to the formation  
of ulcers. Nulacin  
is only to be employed  
in the ambulant patient  
as it is prepared from  
milk and alkali and  
combines with the  
gastric acid to form a  
carbonate. Nulacin

In fact, it has been

Nulacin tablets has  
been found to be  
effective in the

"In view of the bulkiness of most of the tabulated antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy."

## Why ONLY Nulacin?

All alkalis, given by mouth, have only a transient effect on gastric acidity. This is probably due to rapid emptying of the stomach. Before Nulacin, an intragastric milk and alkali drip through a Ryle's tube was the only effective way to achieve continuous neutralization of stomach contents. The milk protein neutralized hydrochloric acid without stimulating further production. The milk fat helped to inhibit the formation of excess gastric juice. And the antacids

dealt with excess acid. Nulacin brought this benefit to the ambulant patient—and still does.

Only Nulacin is made from whole milk and combines milk protein and milk fat with dextrans, maltose and suitable antacids.

Only Nulacin is prepared in a size, shape and consistency to dissolve slowly in the mouth and produce a continuous milk-alkali drip in the stomach.

**BRITISH MEDICAL ASSOCIATION**

**ASSISTANT SECRETARY**  
 The Council of the British Medical Association invites applications from registered medical practitioners for the post of Assistant Secretary. Preferential consideration will be given to candidates not over the age of 40.

The salary will be £3,200, rising by five annual increments to a maximum of £4,200 per annum. The Association's Superannuation Scheme will apply on substantive appointment.

The appointment will be for a probationary period of six months in the first instance, and thereafter may be terminated by six months' notice on either side.

Applications, giving details of qualifications and experience, and accompanied by the names of three persons to whom reference may be made, should be addressed to the Secretary of the Association, B.M.A. House, Tavistock Square, London W.C.1, and must be received not later than November 25, 1966.

**BRITISH MEDICAL ASSOCIATION****AN IMPORTANT APPOINTMENT**

Candidates are sought for an important new post to be created for the development of the educational activities of the Association with special reference to the use of audio-visual aids.

The post calls for enterprise, vision and judgment. Candidates should preferably be medically qualified. A good knowledge of higher education and audio-visual techniques will be an advantage. Qualities, however, are of greater importance than qualifications as such, and a lack of degrees and diplomas will not disqualify a candidate with good experience, knowledge and understanding of the role and problems of the medical profession in the modern world.

The job is both a creative and administrative one which involves the rationalization of the existing B.M.A. film and tape libraries and the subsequent planning, initiation, expansion and promotion of a programme of continuing education for medical practitioners and personnel, and health education of the public, using modern educational and allied audio-visual techniques. It offers very exceptional scope to the right person aged from 30 to 55.

**Remuneration**

An initial three-year contract is envisaged, and the salary will be commensurate with the qualities and

qualifications of the successful candidate within the range £2,500 to £5,000 per annum.

Applications, accompanied by the names of three referees, should be submitted by November 21, 1966, to the Secretary, British Medical Association, B.M.A. House, Tavistock Square, London W.C.1.

To obtain further details intending applicants are advised whenever possible to make an appointment to visit B.M.A. House. Telephone No.: Euston 4499.

(See also under "Overseas")

**ACCIDENT AND EMERGENCY  
SERVICES**

Wessex Regional Hospital Board requires a Research Fellow (Senior Registrar grade) for a period of up to six months to undertake an enquiry into the treatment received by patients involved in accidents and other emergencies, both at the scene of the accidents and during transport to hospital. The main purpose of the project is to determine whether by improved handling of patients by the ambulance service, the morbidity among accident victims can be reduced. The appointee will be attached to the accident and emergency department of the Royal Portsmouth Hospital; full support to the project will be given by the ambulance services of the Hampshire County and Portsmouth City Councils. Full particulars from the Senior Administrative Medical Officer, Wessex Regional Hospital Board, Highcroft, Remsey Road, Winchester. Closing date November 30, 1966. (20476)

**INSTITUTE OF CHILD HEALTH**

Applications are invited for a clinical academic post in the Institute of Child Health, which will be graded as of Lecturer or Senior Lecturer status according to the qualifications and experience of the successful applicant. This is a new post created for the assessment of handicapped children. The person appointed would carry out clinical, research, and teaching work in the field of handicapped children and child development.

Further information can be obtained from Dr. K. S. Holt, director of the centre. Applications should be submitted to the Dean, Institute of Child Health, 30 Guilford Street, London W.C.1, by December 1, 1966. (10588)

**THE INCORPORATED LIVERPOOL  
SCHOOL OF TROPICAL MEDICINE  
Department of Parasitology**

The reorganization of the department of parasitology has provided vacancies for **TWO JUNIOR LECTURERS** (F.S.S.U.)

who may be medical or non-medical science graduates.

One lecturer will be attached to the sub-department of entomology and on to the department of parasitology. The purpose of the appointments is to provide interesting and challenging posts for candidates who either have prior experience of teaching or research in tropical countries or are desirous of obtaining such experience. They must therefore be willing to be seconded to suitable teaching or research centres overseas for a major portion of their appointment when vacancies arise in the department. They will be on permanent attachment to the department of parasitology (for the duration of their appointment, which is five years). They will also be expected to participate in teaching and in current research projects during any interim periods that they may spend in Liverpool.

Salaries will be within the range for lecturers (Grade II) on the university scale, and placing will depend upon individual qualifications and experience. Medical graduates must hold a qualification registrable in the United Kingdom and have at least two years' postgraduate clinical experience.

Further particulars may be obtained from the Dean, Liverpool School of Tropical Medicine, Pembroke Place, Liverpool 3, with whom applications (8 copies) should be lodged by January 31, 1967. (14953)

invite applications from British male registered medical practitioners for a full-time appointment to the staff of their Medical Research Department in London. The Department is responsible for the organisation and administration of clinical trials in the British Isles, for submission of information to official committees, and for close liaison with the research laboratories and sales divisions.

Applicants should be under 35 years of age, have had several years' clinical experience, preferably both in hospital and general practice. Experience in psychiatry would be an advantage but is not essential. They should be prepared to undertake a certain amount of travel within the United Kingdom.

The Company operates a contributory pension scheme and provides certain other benefits. A progressive salary, depending initially on experience and qualifications, will be offered.

Applications will be treated in confidence and should be addressed to the Research Manager, Sandoz Products Limited, Sandoz House, 23 Great Castle Street, London, W.1. (10625)

## CLINICAL RESEARCH

Registered medical practitioners, aged about 27 to 35, are invited to apply for a post in the Medical Department, which is located in the company's Head Office, near Maidenhead. The Department is mainly comprised of a team of doctors who are actively engaged in clinical research.

Candidates for this post should preferably have had experience in hospital and general practice. Additionally they should have initiative, enthusiasm and the ability and interests that enable them to converse with consultants and other senior members of the medical profession and research staff with equal ease.

The responsibilities will be mainly directed towards clinical research in the U.K., but will also include acting in an advisory capacity on the medical aspects of promotion and matters of general medical importance. This will entail maintaining an active interest in current medical practice. In this context facilities are offered for attending suitable conferences.

General conditions of employment are good, and include a non-contributory pension scheme, free life assurance, company car, etc. Assistance will be given towards expenses incurred in moving to this area.

Please write, giving all relevant details, to: Personnel Officer, John Wyeth and Brother Limited, Huntercombe Lane South, Taplow, Maidenhead, Berks. (10458)

Chitis **PENBRITIN** helps him put up a better fight

By swiftly reducing both the quantity and purulence of the sputum, routine dosage Penbritin brings a rapid clinical response in the majority of patients: moreover clinical trials have shown these benefits to be more marked than those observed in patients on tetracycline therapy. The success of this regimen (250mg. four times daily for one week or more) can be attributed to Penbritin's higher activity against the causative organisms, H. influenzae and pneumococci.

In addition, severely disabled patients, including those with extensive bronchiectasis and cases whose sputum is winter-long purulent despite other antibiotic therapy, may gain unprecedented relief from a short course of high dosage Penbritin. In published trials on this regimen (1 gram four times daily for one week or more) infection was cleared in the majority of patients, and subsequent freedom from exacerbation for up to 16 weeks was reported.

## INDUSTRIAL APPOINTMENTS—see also p. xlv

Attention is drawn to the British Medical Association's statement of policy on the Remuneration of Industrial Medical Officers as approved by the Representative Body, 1963, which is available on request from the Secretary.

Owing to the retirement of the present works Doctor, there is a vacancy for a suitably experienced Doctor to work full time at the Moreton Factory of Cadbury Brothers Ltd.

His duties include treatment of medical and surgical emergencies, examination of applicants for employment and dealing with problems of health and hygiene in the factory which at present employs about 4,500 persons. He will be expected to co-operate with local doctors in general practice, hospital practice and public health service. Experience of general practice is essential and previous industrial or public health work will be an advantage.

The surgery has a staff of two state registered nurses, three assistant nurses and appropriate clerical staff. Salary will be in accordance with B.M.A. scales and will be related to experience and qualifications. Further information and application forms can be obtained from:—

The Manager,

CADBURY BROTHERS LIMITED (Moa/D),

## MEDICAL OFFICER - WEST AFRICA

Applications are invited for an immediate appointment in the medical service of a Unilever Company operating in Commonwealth West Africa. Candidates should preferably be not more than thirty-five years of age and should have had good experience since qualifying.

The scope of the work done by the Company's medical services varies from place to place in West Africa, but in general may be said to cover the health supervision of working communities and their dependants. In many cases this involves taking charge of a small hospital. There is also considerable opportunity for the practice of preventive medicine, public health and industrial medicine in the widest sense.

While each Doctor is administratively responsible to his local manager, his professional links are with the Deputy Principal Medical Adviser, Unilever Limited, to whom applications should be made at Unilever House, Blackfriars, London, E.C.4., where the appointment will be made following a personal interview.

The starting salary with allowances for overseas service will not be less than £3,500 per annum and in accordance with age, qualifications and experience. The length of tour in West Africa is approximately fifteen months, followed by generous leave on full pay. There is a contributory pension fund, mid-tour passages are arranged and education allowances paid for children under education in the United Kingdom.

Those preferring a short term appointment are also welcome to apply.

# MEDICAL OFFICERS

The Anglo American Corporation Group Medical Service wishes to strengthen its staff of medical officers in South Africa. Its several hospitals are outstandingly well-equipped and serve many thousands of African employees.

In addition to the normal work common to all hospitals for men, the Group's medical officers supervise the health, housing, nutrition and general welfare of the employees, and also assist in maintaining the high standards of public health on the mines. They can further expect to have opportunities of gaining invaluable experience in traumatic surgery.

A starting salary in the range £2,700—£3,250 p.a. is offered. Income Tax is about half that paid in U.K., and commodities in general cost noticeably less. A spacious detached house is provided at a rental of approximately £5 a month. There are excellent pension and health schemes. In all centres there are facilities for at least the popular games including golf and tennis—and time to play them. Help in the house is readily obtainable and moderately inexpensive. The South African climate is acknowledged to be one of the most congenial and healthy in the world.

Air fares to South Africa for employees and their families are paid for *in toto* by the Group and generous assistance is given towards the cost of moving baggage and possessions.

The Anglo American Corporation with its associated groups, including De Beers, forms the largest single concern in South Africa. It has interests outside South Africa too, and has a reputation for progressive policies in regard to the welfare of its African and European employees.

Applications, giving full details of medical career to date, age, marital status and qualifications, together with the names of two referees, should be sent not later than 19th November to:

**Appointments Officer, Department SA6189, 7 Rolls Buildings, London E.C.4.**

**ST. ANDREW'S HOSPITAL NORTHAMPTON**

**FOR NERVOUS AND MENTAL DISORDERS**

President: The Earl Spencer

Medical Superintendent: James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas on the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, was opened in 1962, which comprises an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

**WANTAGE HOUSE**

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton) who can be seen in London by appointment.
