

The problem of the dirty mouth

Even in 1966 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

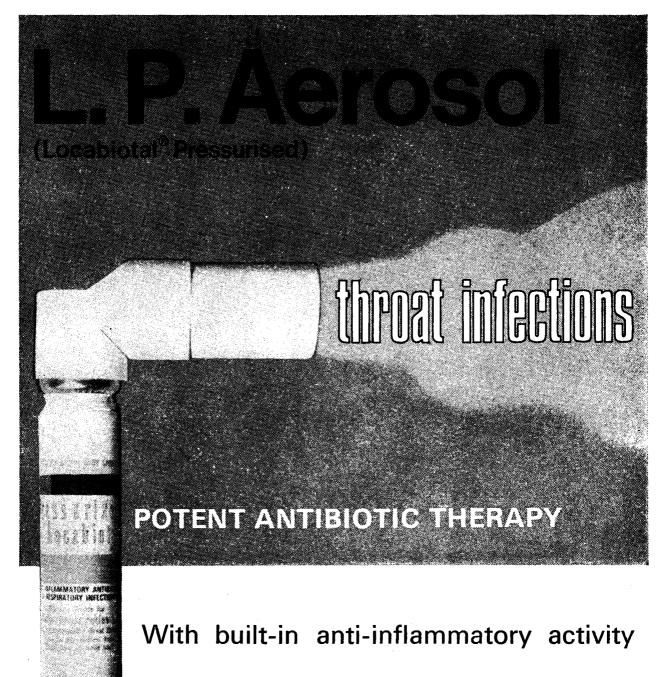

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

CONSIDER NOW

summer-long protection against HAY FEVER with D-VAC Pollens 3 dose course

regd

D-VAC Pollens, Bencard emulsified 'depot' vaccine for 'classical' hay fever and pollen asthma, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

Primary Course (three injections containing 250, 750 and 3,500 Noon units respectively): designed for patients who have not received pollen vaccine treatment in the last five years or whose seasonal symptoms are severe, and for children (aged 8-14 years).

Advanced Course (three injections containing 750, 3,500 and 7,500 Noon units respec-

tively): designed for patients aged 15 years and over who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

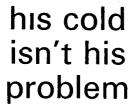

(Patients suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose given in February or early March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

TO BE SURE

of obtaining D-VAC Pollens, it is advisable to prescribe and order before 31st December: no order can be accepted after 20th January.

Prescriptions and orders, for D-VAC Pollens 'Primary' or 'Advanced', should state the exact date (between 13th February and 4th March) on which the first dose is to be injected. The first dose will be despatched to arrive by this date. (D-VAC Pollens is not available outside the U.K.)

One CAPRITON Tablet every four hours (adult dose) preferably with a hot drink.

- relieves nasal congestion allowing the patient to breathe freely.
- relieves running nose and eyes.
- counteracts fever and general discomfort —relieves headache.
- does not cause rebound congestion.
 CAPRITON Tablets have been reformulated and no longer contain phenacetin. The quantity of aspirin has been increased to provide adequate analgesia.

How you can see the world

and gain valuable medical experience

(before you settle into general practice)

Would you like to see the Far East, the Mediterranean, or the West Indies? Study the new sciences of aviation, underwater or nuclear medicine? Have complete clinical freedom, modern medical equipment and the opportunity to practise a very wide and varied field of medicine? Lead an active, exciting outdoor life against a world-wide backcloth?

These are some of the opportunities open to you as a Medical Officer in today's modern and expanding Royal Navy. During a 5-year Short Service Commission you can gain valuable, practical medical experience, treating both Royal Navy personnel and civilian families.

And you'll see something of the world before you settle into the routine of general practice. You will be well paid, with a starting salary higher than that of a civilian hospital registrar. You can study (with financial backing) for higher degrees. You could aim for consultant status. Marriage and other allowances can add considerably to your income. And, if you wish, you can apply for a Permanent Commission after 1 year's service.

3 Ways of Entry

- 1. As a fully registered doctor; civilian experience counts towards your seniority.
- 2. During your pre-registration year.

3. As a student any time after passing 2nd M.B. For fully registered women doctors there is a special Short Service Commission.

If you would like more information, write to the address below, giving details of your age and qualifications. A personal interview can be arranged if desired.

The Medical Director-General of the Navy, Dept. 724FR6, Empress State Building, London, S.W.6.

Few bronchitic patients can afford a day off.
Give them effective relief with new

Galaton and Delexin

These two new Wander products give effective relief in the cough and bronchospasm common to many acute and chronic respiratory disorders.

GALATON combines a time-proved cough suppressant (codeine phosphate) with an effective bronchodilator (phenyl-propanolamine). It relieves dry, unproductive cough and wheezing in many respiratory disorders—including acute bronchitis, chronic bronchitis and emphysema, bronchial asthma and pertussis. Galaton is particularly helpful in relieving the distressing night-time cough that disturbs sleep. DELEXIN combines a powerful expectorant (guaiphenesin)—which liquefies tenacious, viscous sputum—with the bronchodilator and vasoconstrictor effects of phenylpropanolamine. Indications include acute tracheitis, acute bronchitis, chronic bronchitis and emphysema, and the respiratory complications of infectious diseases.

	Formulae per 10 ml (Part 1)	Packs and basic N.H.S. prices
Galaton	Codeine phosphate B.P.20mg. Phenylpropanolamine hydrochloride	6 fl. oz. bottle 3/6d.
Delexin	Guaiphenesin100mg. Phenylpropanolamine hydrochloride25mg. Orange flavoured syrup	8 fl. oz bottle 4/8d. (plus P.T.)

What makes this antibiotic so valuable to the hospital physician?

Spectrum?

Exceptionally broad. It covers most grampositive organisms — including the penicillinresistant staphylococci — and many gramnegative organisms.

Action?

Intensely bactericidal. It gives a rapid kill of bacteria at or near the minimum inhibitory concentration, especially in the case of gramnegative organisms.

Safety?

Wide clinical usage has confirmed the laboratory evidence of Ceporin's low toxicity— a particularly valuable attribute in the treatment of the very young or the very old—and it is usually well tolerated by patients allergic to penicillin.

This combination of attributes is invaluable in many situations where other antibiotics —

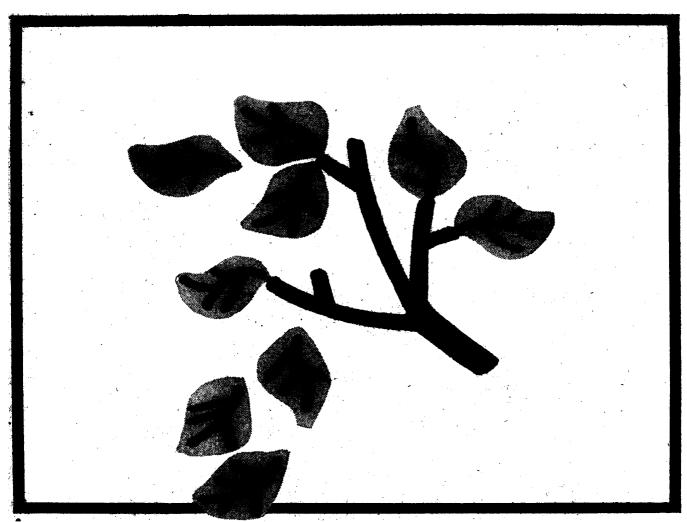

including penicillin — might prove ineffective or dangerous. A recent analysis of results from over 1500 cases has shown high success rates in a wide variety of infections — including urinary and respiratory tract infections, septicaemias and soft tissue infections. Many reports mention the rapid clinical response obtained with Ceporin after other antibiotics had failed.

Presentation

Ceporin is issued in vials containing 250 mg, 500 mg and 1 gram of cephaloridine, packed singly and in boxes of five.

Ceporin is a Glaxo trade mark

Detailed literature is available from Glaxo Laboratories Ltd Greenford, Middlesex

1 in 3 of your adult patients faces 'the hazards of middle age'

* acute and chronic bronchitis; atherosclerosis; gastro-intestinal disease.

The G.P. is necessarily a specialist in the treatment of the hazards of middle-age. This is because between 30% and 40% of his adult patients are between the ages of 45 and 60.1

In that age group every illness serious enough to warrant medical advice requires, on average, six consultations where, not so many years before, four would have sufficed. The middle-aged are less able to tolerate the burdens of acute or chronic illness; the insidious onset of degenerative conditions or metabolic disorders imposes a drain on reserves that is perhaps not appreciated before diagnosis of the overlying condition is made.

The commonest maladies in middle-age are bronchitis and other respiratory diseases, cardiovascular disabilities and gastro-intestinal disease. All are liable

in earlier years. The best defence against metabolic stress imposed by illness at any age is adequate nutritional support. Subclinical vitamin deficiency induced by unsatisfactory nutritional habits in middle age or unsuspected chronic alcoholism may be severely aggravated by repeated infections or persistent illness. In that situation nutritional adequacy becomes paramount but, because of preoccupation with specific drug therapy, may be overlooked.

to tax severely the nutritional foundations laid down

information about a new drug

Merrell-National (Laboratories) Ltd. is pleased to announce that **CLOMID** (clomiphene citrate) is now commercially available in the United Kingdom. This drug, synthesised by Merrell and extensively investigated both in this country and abroad has been shown to be effective in inducing ovulation in some anovulatory women. Its sole indication is to induce ovulation in such patients who desire to become pregnant.

Clomid is not universally effective and the degree of success is very closely related to the proper selection of the patient. In a high percentage of cases proper selection can only be made after extensive clinical and laboratory studies have been performed. Clomid is, on the other hand, a highly potent drug and its use (especially its excessive use), may be attended by significant side effects.

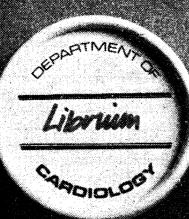

For the above reasons we believe it prudent that Clomid should be prescribed only by those who, in addition to having special experience in infertility problems, also have extensive laboratory facilities available to them. Under these circumstances beneficial results will be increased and adverse effects reduced.

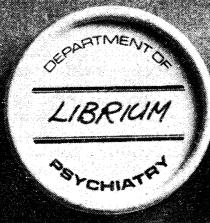

We shall be pleased to provide additional information about Clomid on request.

Merrell-National (Laboratories) Ltd., 20 Savile Row, London W.1.

BRONCHITIS-ASTHMA-EMPHYSEMA

Clinical evidence confirms that this new theophylline-niacinamide complex achieves rapid therapeutic blood levels for faster dilation of the bronchioles and substantial improvement in vital capacity in most cases of chronic bronchitis, asthma and emphysema.

Significant Treatment Advantages:

The unique Anaphylline complex is a loose bonding of theophylline and niacinamide which affords a soluble theophylline through all pH ranges. No more ionization of theophylline salts with precipitation of the theophylline in the acid of the stomach. Now direct immediate absorption of the theophylline complex for faster, higher and longer blood levels.

* MORE RAPID ABSORPTION FOR QUICKER PATIENT RESPONSE

Evidence from clinical trials indicates that Anaphylline achieves therapeutic blood levels faster than theophylline salts and within 15 minutes of oral administration.

* MORE PROLONGED BLOOD LEVELS FOR SUSTAINED RELIEF

Rapid, initial blood levels achieved are followed by a steady, sustained rise reaching peak achievement at 60 minutes, with gradual, but uniform decline thereafter.

* SUPERIOR PATIENT TOLERANCE

Achievement of these blood levels is not accompanied by any increase in the side-effects normally associated with the ophylline treatment.

INDICATIONS

For use as a bronchodilator to control the symptoms of chronic bronchitis, chronic asthma, emphysema and other pulmonary disorders.

DOSAGE:

Adults 1 to 2 tablets to be taken 3 or 4 times daily, preferably after meals. (Children 6-12 yrs., half to 1 tablet.)

FORMULA

Theophylline-Niacinamide complex containing 100 mg, theophylline and 150 mg, niacinamide in single tablet form.

A doctor's life with a difference can be found in the

ROYAL ARMY MEDICAL CORPS

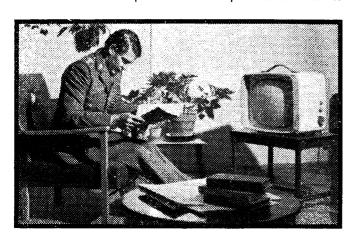

Excellent opportunities are provided for general practice under good conditions of service. The professional opportunities are very wide and varied and include caring for the wives and children of soldiers.

All aspects of medical care—preventive medicine, general and hospital practice are closely integrated. Surgeries are organised by groups and groups are supported by hospitals so that Medical Officers are able to follow up those of their patients admitted to

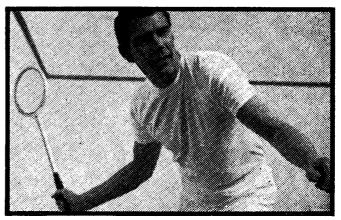

hospital. These modern surgeries have every facility. Good equipment, trained staff, and a locum provided for six weeks' annual leave. Post-graduate training is given.

For the married man it matters greatly how his wife feels about the Service. The community spirit of Army life, especially overseas, embraces an Officer's family as much as himself. Such extra emoluments as Marriage Allowance, Education Allowance, Disturbance

Allowance, and Local Overseas Allowance, show the importance attached by the Army to helping the Officer with a family. Most married Medical Officers get a furnished house at low rental.

Pay for a married Captain (the rank on entry) is over £2000. There are increases every two years and on promotion. Promotion to Major can normally be expected after 5 years and to Lieut-Colonel after 13 years (or shorter, where an antedate is given for experience in

hospitals and general practice). Commissions granted may be permanent or Short Service. A Short Service commission earns a tax-free gratuity of £3000 for 5 years' service, £1500 for 3 years. Regular commissions are pensionable on the normal basis.

For further information please write or pay a visit to: Colonel A. D. Young, D.S.O., M.B., Ministry of Defence (AMD2), Dept. 460, Lansdowne House, Berkeley Square, London, W.1.

CORTROPHIN-ZN LONG ACTING ACTH

Incorporating a NEW Phosphate Modification for maximum duration of effect with greatest ease of administration

It is a fine aqueous suspension with an even distribution of particles to ensure even dosage.

The suspension is free-running at room temperature and can easily be injected through the finest needles.

The period of effective adrenal stimulation is prolonged by adsorbing the ACTH on to colloidal zinc hydroxide now with the addition of colloidal zinc phosphate. The duration of activity bears a direct relationship to dosage, the higher doses of Cortrophin-ZN producing adrenocortical activity into the third day.

- Indications (1) Rheumatoid arthritis.
 - (2) Bronchial asthma.
 - (3) Other conditions requiring an anti-inflammatory effect.
 - (4) To facilitate withdrawal of corticosteroid therapy.

Dosage Initially 40-80 i.u. daily, subcutaneously or intramuscularly. When symptoms are controlled frequency of injection should be reduced to twice or three times weekly.

according to individual requirements.

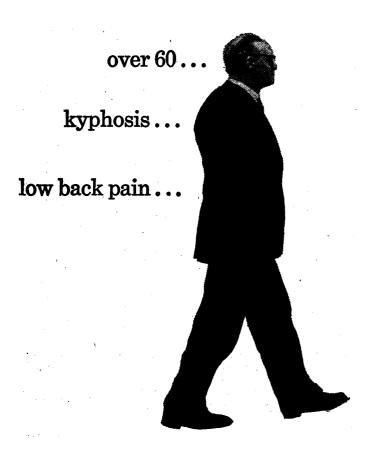

Packing

Vials of 5 ml. containing either 20 i.u. or 40 i.u. per ml. Cortrophin-ZN complies with the specifications for Corticotrophin Zinc Hydroxide Injection B.P.

Keeping patients on a low-fat diet

THE For patients given a low-fat diet un-**PROBLEM** doubtedly one of the greatest difficulties is keeping to their diet over a longish period. Tea or coffee without milk are not the easiest of tastes to acquire; even when the patient and his household are fully co-operative, low-fat dishes, week after week, call for no mean feat of ingenuity.

NEW A simple and obvious answer is the use of non-fat milk for drinks and cooking. Patients and their families accept it readily. In Cadbury's Marvel doctors now have a tested product which they can recommend with complete confidence for use in coffee, for hot or cold drinks, puddings and custards, and any other normal household use.

WHAT IS Marvel non-fat milk granules are made MARVEL? from pure fresh dairy milk, in a way that extracts only the water and all but a trace (less than 0.15% when reconstituted) of the fat. Apart from the fat, and associated vitamins A and D, all milk nutrients (including the lactose, protein and valuable mineral saits) remain.

Marvel contains no additives whatsoever. When it is reconstituted in water Marvel is exceptionally palatable, being similar in flavour and freshness to the taste of bottled milk.

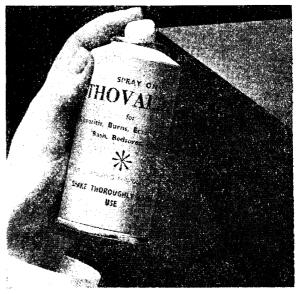

OTHER In addition to its use where a low-fat USES diet is prescribed, Marvel can prove useful in high-protein diets. It is considerably less expensive than bottled milk, and can be taken as an addition to the normal milk supply. The 2s 3d tin makes $3\frac{1}{2}$ pints, costing less than 8d a pint.

SUSTAINED ACTION **GLYCERYL TRINITRATE**

In a double-blind controlled trial of fifty patients the number of those experiencing nocturnal attacks of angina was large enough to demonstrate a clear-cut reduction in such attacks while Sustac was being taken.

Postgrad. med. J., 1964, 40, 351.

The total number of T.N.T. tablets consumed by patients when taking Sustac in a double-blind controlled trial was significantly less than when taking the placebo tablet.

Brit. J. clin. Pract., 1964, 18, 731.

Saventrine

SUSTAINED ACTION ISOPRENALINE HYDROCHLORIDE

represents a major advance in the treatment of heart block as it obviates the need for artificial pacemakers in half the patients treated.

Practitioner, 1965, 195, 819. Lancet, 1965, 1, 1299.

Surgery-contd. on p. 1.

Before you commit yourself to a practice, work 3 or 5 years in the R.A.F.

You'll do some interesting, out-of-the-rut medicine, see a bit of the world, live well, and 'retire' with up to £3,000, tax free.

Your first job in the R.A.F. would probably be junior M.O. at a Station: rather like being an 'Assistant with a view'. In a typical case you could be one of two doctors with, between you, 1500 to 2500 people to take care of, and your own 'cottage hospital' with wards, theatre and laboratory, and secretarial as well as nursing staff.

You'd have a shorter list than a civilian G.P., and to this extent you would live a less strenuous life. To compensate, you would give much more comprehensive care. It is this—and the variety of your mork—that makes practice in the R.A.F. so interesting.

In the R.A.F. you combine several functions. You are in medical care not only of people, but of the environment they live in, and of the work they do. In proportion you do less curative work and more preventive work than is even possible for most civilian doctors.

A lot of people hold the view that this is the way all medicine should be practised—with the closest possible integration of the doctor and the community.

This is the choice you face

Think of two doctors, both aged 40. One went to his practice straight from his teaching hospital, and has been there ever since. The other went into the R.A.F. on a 5-year commission. He lived

-and lived well -in the tropics with his family for 2½ years and, on leave or on duty, visited 7 countries: two European, three Asiatic, and two Australasian. By now he's been in civilian practice for 10 years; he's as well established as the other doctor. But which of the two has got more out of life, and has the richer memories to look back upon?

In many ways, the transition from hospital into the R.A.F. seems more 'natural' than the movement to civilian practice. You go from one community to another—and they have much in common: both are young, cheerful, energetic, rather self-contained—and at the same time very professional, with a marked sense of purpose. If you can feel, now, that you are going to miss Medical School—think about the R.A.F. Service life would probably be 'right' for you.

The time for bold decisions is when you are young and free

Today, because you are at the beginning of your career, you can take a short time out from the main stream of civilian practice just by deciding to do it.

Now, you are free to go. In a few years time,

you probably won't be.

You'll have a practice 'with your name on it'; children who want a permanent home to strike root in; and soon. It will be time for you to settle down.

Meanwhile, at the parting of the ways, you have

The address to write to is: Wing Commander D. G. M. Hills, O.B.E., M.B., B.S., D.P.H., R.A.F., Ministry of Defence(M.A.I./724EE12). 1-6 Tavistock Square, London, W.C.I. Please give your age and qualifications.

Medical cadetships. Commissions as a cadet are available to students who have passed second M.B. (or equivalent). Initially your basic pay would be £630 p.a. Appropriate R.A.F. allowances, examination and tuition fees are paid in addition. You would continue to live and work as a medical student and when fully registered you would start work in the R.A.F. as a doctor in the rank of Flight I ieutenant on a five year short service commission. Further information may be obtained from the

Surgery-contd. from p. xlviii.

BROXIL

would be my choice in routine penicillin therapy

BECAUSE of its Excellent Clinical Results

There are 380 published references to Broxil in world literature. These confirm its success in infections such as tonsillitis, pharyngitis, otitis media, boils and carbuncles, which in an overwhelming proportion of cases are caused by Gram-positive organisms (staphylococci, streptococci and pneumococci).

BECAUSE of its Specific Activity

Broxil is highly bactericidal to the majority of these organisms, destroying them without disrupting the normal intestinal flora.

BECAUSE of its High Blood Levels

Broxil gives blood levels double those achieved by penicillin V and at least as high as intramuscular injections of penicillin G.

BECAUSE, in its syrup form, it is particularly suitable for children.

Broxil is readily accepted and tolerated by children, and side effects are minimal.

Availability: 125 and 250 mg. tablets and capsules. 60 ml. syrup (125 mg./5 ml.)

Dosage: Children: 62.5—125 mg. every 4—6 hours. Adults: 125—250 mg. every 4—6 hours. Prophylactic Dose: Adults: 125 mg. twice daily. Children: 62.5—125 mg. twice daily.

Lasix "represents the biggest advance in diuretic therapy since the introduction of chlorothiazide."

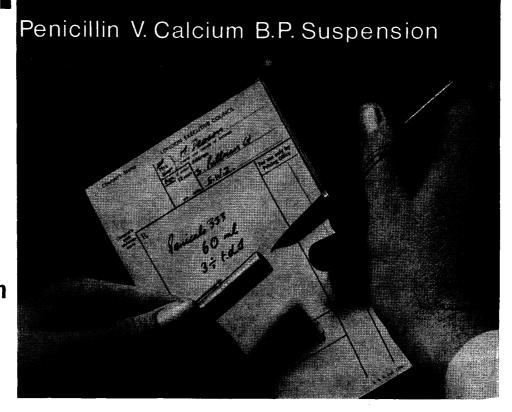

Practitioner, 1965, 194, 694

MINISTRY OF HEALTH HEADQUARTERS MEDICAL OFFICERS

HEADQUARTERS MEDICAL
OFFICERS

At least two posts in London for registered medical practitioners (men or women) aged at least 28.

DUTIES: The medical staff is concerned with all medical aspects of the planning and organization of the National Health Service and the health services on local authorities, and with liaison with the relevant professional activities outside the department, including research. It is organized in special sections which give full scope for the application and acquisition of specialized knowledge and experience, but the individual medical officer is not necessarily restricted to one field, and movement between sections is common. Opportunities for special studies, including study leave or secondment, may be available.

QUALIFICATIONS: Good postgraduate clinical experience expected.

QUALIFICATIONS: Good post-graduate clinical experience expected, and experience in the administration of one or more of the branches of the National Health Service or local authority services a particular advantage. Know-ledge of medical statistics or electronic data processing an added recommenda-tion

data processing an added recommendation.

STARTING SALARY (Inner London): £2,345 at 28 to £3,519 at 40 or over (or possibly higher at 41 or over). Scale maximum £3,980. Non-contributory pension. Promotion prospects.

WRITE to Civil Service Commission.
23 Savile Row, London W.1, for application form, quoting 6544/66. Closing date November 29, 1966. (10890)

PNEUMOCONIOSIS MEDICAL

Three posts (including one at Manchester and one at Stoke-on-Trent) for registered medical practitioners (men or women) aged at least 28 with special interest and experience in chest work.

DUTIES include membership of Pneumoconiosis Medical Panel for clinical examination of claimants to disablement benefit and supervision of radiographical work. Experience of work connected with dust diseases will be an advantage.

STARTING SALARY: £2,260 at age

COMMERCIAL APPOINTMENTS

The Wellcome Research Laboratories

Microbiologist

(Mycoplasmas)

A vacancy exists in the Department of Virology for a graduate with previous training in microbiology to work on the mycoplasmas. The duties include research into the properties of the organisms and their role in diseases of man and animals, and the provision of specialist advice and assistance within the Department. Strong preference will be given to applicants with prior experience with mycoplasmas. There is considerable scope for individual research and personal initiative in a department that has pioneered this particular field. Laboratory facilities are excellent and publication of results is encouraged.

The salary paid will be according to qualifications and experience.

Applications, giving full personal particulars, and quoting reference AM267, should be sent to the Senior Personnel Officer, The Wellcome Research Laboratories, Beckenham, Kent, from whom further details may be obtained.

MEDICAL ADVISER £2,500-3,500

AN OPPORTUNITY TO JOIN A HIGHLY RESPECTED COMPANY IN THE PHARMACEUTICAL INDUSTRY

Applications are invited from registered medical practitioners who are anxious to work in a challenging commercial environment. The appointment is located in the provinces and housing is readily available. Active part-time professional appointment would be encouraged and an unusual freedom of activity will be possible.

THE RIGHT PERSON FOR THIS APPOINTMENT

must be able to make a constructive contribution to the marketing function in communication both with the profession and within the company organisation. Applicants should be under 35 years of age and have had good experience in hospital. Duties will include supervision of clinical trials in various fields.

The company operates a contributory pension scheme and a company car will be provided. Salary will be negotiable within the stated range depending on qualifications and experience.

Applications will be treated in strictest confidence and no information likely to identify the applicant will be submitted to the company without prior permission.

Do not write at length, simply phone or write for an enrolment form quoting MP/2/23 or for general enrolment for similar appointments MP/Gen./?0.

SPECIALIST SURGEON

A vacancy will shortly occur for a specialist surgeon at the Ernest Oppenheimer Hospital.

This hospital, which is situated in Welkom in the Orange Free State, has over 800 beds and provides a full medical service for approximately 60,000 Africans employed on the gold mines of Anglo American Corporation.

The surgery practised will be predominantly traumatic, but will also cover the normal range of treatment required by an adult male African population.

The salary scale will be disclosed to bona fide applicants, who should be on the specialist register. An unfurnished house is supplied at a nominal rental. Generous leave, medical benefit and pension entitlements apply.

ERNEST OPPENHEIMER HOSPITAL

Short listed candidates will be interviewed in London by the Group Medical Consultant during the last week of November.

ALL ENQUIRIES should be addressed to:

The Medical Director,

University Hospital.

(H.9797)

MEDICAL OFFICER - WEST AFRICA

Applications are invited for an immediate appointment in the medical service of a Unilever Company operating in Commonwealth West Africa. Candidates should preferably be not more than thirty-five years of age and should have had good experience since qualifying.

The scope of the work done by the Company's medical services varies from place to place in West Africa, but in general may be said to cover the health supervision of working communities and their dependants. In many cases this involves taking charge of a small hospital. There is also considerable opportunity for the practice of preventive medicine, public health and industrial medicine in the

While each Doctor is administratively responsible to his local manager, his professional links are with the Deputy Principal Medical Adviser, Unilever Limited, to whom applications should be made at Unilever House, Blackfriars, London, E.C.4., where the appointment will be made following a personal interview.

The starting salary with allowances for overseas service will not be less than £3,500 per annum and in accordance with age, qualifications and experience. The length of tour in West Africa is approximately fifteen months, followed by generous leave on full pay. There is a contributory pension fund, mid-tour passages are arranged and education allowances paid for children under education in the United Kingdom.

Those preferring a short term appointment are also welcome to apply.

(H.9825)

MEDICAL OFFICERS

The Anglo American Corporation Group Medical Service wishes to strengthen its staff of medical officers in South Africa. Its several hospitals are outstandingly well-equipped and serve many thousands of African employees.

In addition to the normal work common to all hospitals for men, the Group's medical officers supervise the health, housing, nutrition and general welfare of the employees, and also assist in maintaining the high standards of public health on the mines. They can further expect to have opportunities of gaining invaluable experience in traumatic surgery.

A starting salary in the range £2,700—£3,250 p.a. is offered. Income Tax is about half that paid in U.K., and commodities in general cost noticeably less. A spacious detached house is provided at a rental of approximately £5 a month. There are excellent pension and health schemes. In all centres there are facilities for at least the popular games including golf and tennis—and time to play them. Help in the house is readily obtainable and moderately inexpensive. The South African climate is acknowledged to be one of the most congenial and healthy in the world.

Air fares to South Africa for employees and their families are paid for *in toto* by the Group and generous assistance is given towards the cost of moving baggage and possessions.

The Anglo American Corporation with its associated groups, including De Beers, forms the largest single concern in South Africa. It has interests outside South Africa too, and has a reputation for progressive policies in regard to the welfare of its African and European employees.

Applications, giving full details of medical career to date, age, marital status and qualifications, together with the names of two referees, should be sent not later than 19th November to:

Appointments Officer, Department SA6189, 7 Rolls Buildings, London E.C.4.

Senior appointments for MEDICAL OFFICERS

(UP TO 53 YEARS)

particularly those with experience in all aspects of Military Aviation

THE ROYAL AUSTRALIAN AIR FORCE **INVITES IMMEDIATE APPLICATIONS!**

DUTIES:

CLINICAL REGISTRARS will be employed as Clinical Registrars of RAAF hospitals in Australia or overseas; their duties could also relate to preventive and aviation medicine and medical administration. GENERAL PRACTI-TIONERS will be appointed as medical officers at RAAF bases or on staff duties. In determining rank on appointment regard will be given to rank formerly held and to experience, preferably in the Royal Air Force. Appointees will be normally granted the rank of Squadron Leader.

Some vacancies exist for appointments as Wing Commander or Group Captain to applicants who have held commensurate senior rank. Appointees in these categories would be associated with staff duties or appointed to the command of a RAAF hospital in Australia or overseas.

SALARY RANGE:

Rank	Single	Married
Squadron Leader	\$A6697-7610	\$A7300-8212
Wing Commander		
Group Captain		

ON APPOINTMENT GRATUITY:

Applicants appointed to a Short Service Commission will be entitled to a bounty of \$A3300, payable on commencement of service; an additional \$A3300 will be paid on commencement of a further four year Short Service Commission. Applicants appointed to a Permanent Commission will qualify for a bounty of sA7300 on commencement of service. Appointment will be effected in the United Kingdom with consequent free travel to Australia.

SERVICE ADVANTAGES:

Free medical and dental care, free accommodation (single officers) or an allowance, removal expenses, initial clothing issue and uniform allowance.

THE PRINCE HENRY AND PRINCE OF WALES HOSPITALS (Teaching Hospitals of the University of New South Wales)

(Teaching Hospitals of the University of New South Wales)

VACANCIES
for Medical Specialists

Applications are invited from suitably qualified medical practitioners for appointment to the staff of the hospicals.

SALARY: \$8,104 per annum range \$10,104 per annum with progression to \$11,104 per annum with progression to \$11,104 per annum if appointed as Senior Specialist. Commencing rate according to qualifications and experience.

If engaged in substantial teaching of undergraduate students of the Faculty of Medicine of the University of New South Wales, successful applicants may, on application to the university, be considered for appointment as Clinical Lecturer or Clinical Associate Professor and receive in addition to salary an emolument for teaching and other contributions they may make to the university at the rate of \$300 per annum or \$500 per annum respectively. Specialists holding the title of Clinical Associate Professor will be accorded membership of the Faculty of Medicine. In special circumstances, Clinical Lecturers will be considered for appointment as members of the Faculty.

SPECIALIST CARDIOLOGIST

Applicants should have had good laboratory training with evidence of

Applicants should have had good laboratory training with evidence of achievement in clinical and/or animal inachievement in clinical and/or animal investigation. The appointee may be required to direct the haemodynamic laboratory and to train and supervise technicians, in addition to normal clinical duties. He will be expected to teach undergraduate and postgraduate students and to formulate and supervise original work for higher degree candidates and research fellows of the university.

Well-equipped laboratories are available at The Prince Henry Hospital where the Cardiologist will be based. An active cardiac surgical unit is established at the

cardiac surgical unit is established at the

If appointed (annual appointment) as Chairman of the Division of Cardiology with the hospitals, an administrative allowance of \$200 per annum will be

Chairman of the Division of Cardiology with the hospitals, an administrative allowance of \$200 per annum will be paid.

Further information may be obtained from Professor R. B. Blacket, Director of the Department of Medicine, Prince Henry Hospital, Little Bay, Sydney.

SPECIALIST PSYCHIATRIST

This appointment will be within the department of psychiatry, which is integrated with the School of Psychiatry of the University of New South Wales.

The appointee will be responsible to the Professor of Psychiatry for the care of out-patients and in-patients. He will participate in the work of the department generally; carry out undergraduate and postgraduate teaching; and be given the opportunity to undertake research.

Further information may be obtained from Professor L. Kiloh, Director of the Department of Psychiatry, Prince Henry Hospital, Little Bay, Sydney.

SPECIALIST PAEDIATRIC

PSYCHIATRIST

This appointment will be within the department of psychiatry and the successful applicant will be seconded to the department of paediatrics. He will undertake clinical care of patients and will assist with the undergraduate teaching programme. There will be opportunities for postgraduate teaching and research.

Further information may be obtained from Professor L. Beveridge, Director of the Department of Paediatrics, Prince of Wales Hospital, Randwick, Sydney, or from Professor I. Reveridge, Director of the Department of Psychiatry, Prince Henry Hospital, Little Bay, Sydney, or from Professor I. Reveridge, Director of the Department of Psychiatry, Prince Henry Hospital, Little Bay, Sydney, or from Professor I. Reveridge, Director of the Department of Psychiatry, Prince Henry Hospital, Little Bay, Sydney, or from Professor I. Kiloh, Director of the Department of Psychiatry, Prince Henry Hospital, Little Bay, Sydney, or from Professor I. Reveridge, Director of the Department of Psychiatry, Prince Henry Hospital, Little Bay, Sydney, or from Professor I. Reveridge, Director of the Department of Psychiatry, Prince Henry Hospita

patients.
The successful applicant will assist the patients.

The successful applicant will assist the Director of Rehabilitation Medicine in clinical and associated administrative resonosibilities within the department at both hospitals and in particular the spinal injuries unit at Prince Henry Hospital. He will have opportunities to participate in teaching and research.

Further information may be obtained from Dr. G. Burniston, Director of Rehabilitation Medicine, Prince Henry Hospital, Little Bay, Sydney.

Formal application should be made to the Personnel Officer, Prince Henry Hospital, Little Bay, Sydney, and should include a full account of the candidate's clinical experience and academic record together with the names of three referees.

CLOSING DATE: December 2, 1966.

J. R. CLANCY.

Chief Executive Officer.
