Obstetrics in General Practice

Published July 1966

This book is made up of a series of articles printed in the " Current Practice " section of the BRITISH MEDICAL JOURNAL. It is designed to give a lucid and practical account of obstetrics as it is carried out in the patient's home or in a maternity unit, with special emphasis on the role of the general practitioner and his relationship to the consultant obstetrician and the hospital. The principal authors are consultant obstetricians, but to ensure that the general practitioner's own view and special experience should be represented the consultant contributors were asked to prepare their articles in collaboration with general practitioners. The book as a whole is a product of such co-operative effort. It will prove a useful guide to this important branch of medical practice.

PROMPT RELIEF OF PAIN **INCREASED MOBILITY** **MORE NORMAL LIFE**

Effective and Reliable
For over 15 years ACTHAR GEL therapy has brought new life to rheumatoid patients. It is still the most effective treatment and the most reliable long-acting corticotrophin available.

Safe Stimulation Therapy
ACTHAR GEL stimulates the adrenal cortex to release the full range of natural steroids, thereby avoiding the hazards of adrenal suppression associated with synthetic corticosteroid therapy.

The toxicity of the more potent analgesics is avoided and such side-effects as may occur are usually due to over-dosage. These are seldom serious and may be reversed by adjusting the dosage.

For Self-Administration
When the maintenance dose has been determined, the patient can easily be taught self-administration of ACTHAR GEL. Several thousand self-injections have now been given and many previously crippled patients have returned to, and remained at, their occupations.

For fuller details please write for the book "The Place of ACTHAR GEL in the Treatment of Rheumatoid Arthritis".

trade mark NORINYL-1

today's most advanced conception regulator, satisfies these demanding criteria:

Reliability

More than four thousand women have completed more than 40,000 valid treatment cycles without a single pregnancy.[1] A valid treatment cycle is one in which intercourse takes place, NORINYL-1 is used as directed and no other contraceptive is employed.

Safety

The very low steroid content of NORINYL-1 is accompanied by the disappearance of some dose-dependent effects.[2] Bromsulphthalein excretion rates in women taking NORINYL-1 could not be distinguished from those in an untreated control group.[3]

Simplicity

The tiny tablet is easy to swallow, the pack convenient to use and the 21 day routine virtually eliminates patient error.[4]

Tolerance

In 40,000 cycles the incidence of *headache, depression* and *breast symptoms* did not differ in any cycle, **even the first**, from that in the untreated control group. **After the second cycle**, the reported incidence of *nausea* approached pre-treatment control levels Among *dysmenorrhoea cases* 89.5% had no further symptoms after starting NORINYL-1. *Pre-menstrual tension* was totally relieved in 79.3% of cases.[1]

Each tablet contains 1 mg. of norethisterone (an original Syntex discovery) and 0.05 mg. of mestranol. Packed in wallets of 21 tablets.

objective evidence proves that cyclospasmol® is also of value in the treatment of cerebrovascular disease

cyclandelate

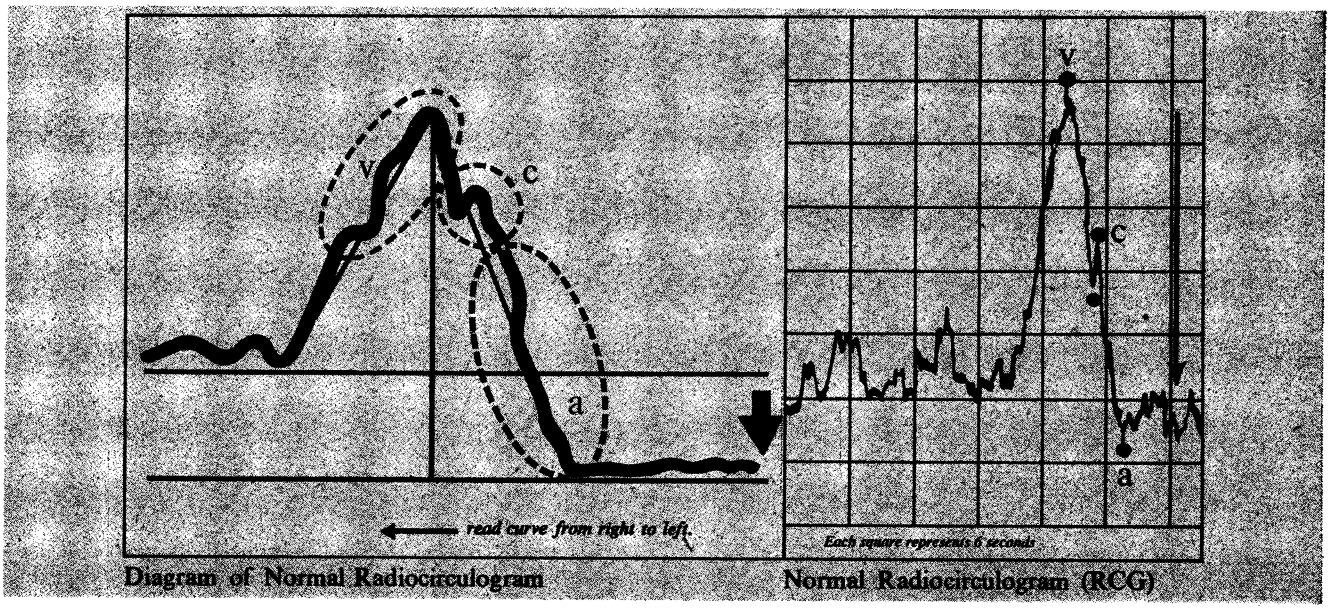

Diagram of Normal Radiocirculogram — Normal Radiocirculogram (RCG)

Radio circulography

A double blind trial was conducted with 40 patients selected at random, who had cerebrovascular disturbances of varying severity. The patients were treated with 800 mg. Cyclospasmol daily for 3 weeks. Emission from radio-isotopes circulating in the cerebrovascular system was measured, and the radio-circulograms obtained demonstrated blood transit time in the arterial, capillary and venous phases. Comparison of radio-circulograms before and after treatment showed that Cyclospasmol produced a decrease in blood transit time. Functional analysis of the radio-circulograms suggested that Cyclospasmol acts predominantly in the arteriolar and capillary areas. These objective results correlated well with the clinical improvement demonstrated by the patients. Cyclospasmol was shown to have a positive therapeutic effect by improving cerebral blood flow in mild to moderate cases of cerebrovascular insufficiency. It was well-tolerated and particularly effective in the prophylactic long term treatment of cerebrovascular accidents.

Further details of this trial available on request.

Dosage: 200 mg. q.d.s. which may be reduced to 200 mg. b.d. when maximum therapeutic benefit has been reached.

GLYMAXIL instant buffer antacid

Regd.

Hyperacidity and peptic ulcer:

AN OUTSTANDINGLY DIFFERENT AND MORE EFFECTIVE TREATMENT

Just two things interest the chronic sufferer. He wants the pain to go, and stay gone. And if both results can be achieved with an antacid that tastes pleasant and is needed in lesser quantity than he's used to, he's going to be very grateful indeed.

Glymaxil, the only soluble buffer antacid, can promise exactly this. In clinical practice Glymaxil has been shown 'significantly more effective' in relieving pain and 'significantly more palatable' than aluminium hydroxide. Glymaxil, the first antacid chelate, acts faster and buffers more acid for longer periods in the ideal pH range 3-5 than other commonly used antacids.

A very agreeable treatment

By suppressing pain promptly Glymaxil gives the nervously-inclined patient a sense of reassurance, itself highly beneficial. Taken in small doses (1-2 teaspoonfuls) and tasting pleasantly of peppermints it is also a most agreeable and convenient liquid antacid—one that will make his symptoms a great deal easier to live with.

Dosage One or two teaspoonfuls as required. Not more than 120ml. (one bottle) of Glymaxil should be consumed in any 24 hour period.

Presentation Bottles of 120ml. containing 40% w/v sodium glucaldrate.

Men like these have been helping psoriatics for 2,000 years.

Thanks men — now Exolan takes over.

Suddenly the treatment of psoriasis with coal tar could well be out-of-date. It has taken 2,000 years to discover an acceptable alternative to crude coal tar for treating psoriasis.

All the subsequent preparations have well-known disadvantages. Cosmetic coal tars exhibit a very slow rate of healing; steroids under polythene cause discomfort to the patient and there is a risk of systemic side effects; dithranol, until now the best overall treatment for psoriasis, requires constant supervision.

Exolan paste is a new preparation which attacks psoriatic lesions with the striking effectiveness of dithranol, but without its unpleasant side-effects of burning and staining. Presented as a paste, it can be safely prescribed for application by the patient, in his own home.

Unlike steroids, there is no rapid relapse on cessation of treatment.

Practically every hospital skin department in Great Britain is now using Exolan Paste. This remarkable new British discovery is ideally suited for G.P. prescription.

summer-long protection against HAY FEVER with

D-VAC Pollens 3 dose course

regd.

D-VAC Pollens, Bencard emulsified 'depot' vaccine for 'classical' hay fever and pollen asthma, is the latest development in desensitising vaccines. The course of three carefully graded injections–fewer than for any other available–has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

Primary Course (three injections containing 250, 750 and 3,500 Noon units respectively): designed for patients who have not received pollen vaccine treatment in the last five years or whose seasonal symptoms are severe, and for children (aged 8-14 years).

Advanced Course (three injections containing 750, 3,500 and 7,500 Noon units respectively): designed for patients aged 15 years and over who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose given in February or early March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

TO BE SURE

of obtaining D-VAC Pollens, it is advisable to prescribe and order before 31st December: no order can be accepted after 20th January.

Prescriptions and orders, for D-VAC Pollens 'Primary' or 'Advanced', should state the exact date (between 13th February and 4th March) on which the first dose is to be injected. The first dose will be despatched to arrive by this date. (D-VAC Pollens is not available outside the U.K.)

DENCYL LINCTUS relieves the cougher-of his cough

regd.

Effective and sustained cough relief—without complications Dencyl is a new cough linctus, differing conspicuously from most other antitussives in at least three respects:

Unique cough suppressant Dencyl Linctus contains 0.5% chlophedianol, a potent non-narcotic suppressant giving prolonged relief from reflex coughing by day and night. Also a mild local anaesthetic, chlophedianol adds to the effect of Dencyl's glycerin and syrup demulcents in soothing pharyngeal inflammation.

Effective whatever the cough Dencyl Linctus is formulated to subdue most types of cough, from the smoker's irritation to deeper-seated bronchial conditions and the notoriously difficult cough associated with upper respiratory tract infections. In addition, its expectorant ingredient, ipecacuanha, helps rid the patient of any persisting sputum.

No unwanted systemic actions Unlike many other antitussives, Dencyl Linctus, at normal dosage, relieves cough without interfering noticeably with bowel function, appetite, alertness, respiration or sleep pattern.

Dosage Adults, *one teaspoonful* (5ml.) of Dencyl Linctus 3-5 times a day as necessary, the final dose being taken at bedtime to encourage a good night's rest. Its warm orange flavour makes Dencyl Linctus particularly acceptable to schoolchildren, the dosage for 6-12 year olds being *half a teaspoonful* (2.5ml.). This formulation is unsuitable for children under 6 years of age.

Fucidin Ointment

rapidly clears unsightly lesions

Fucidin Ointment has an unusually high degree of effectiveness in the treatment of dermatological infections. Application of Fucidin Ointment has resulted, in the great majority of cases, in a notably rapid control of infection and a marked improvement in the rate of healing. The unique penetration of Fucidin Ointment can eliminate the need for incision and/or systemic antibiotics, even in treating deep-seated abcesses and paronychias. Fucidin Ointment alone can thus be expected to provide complete treatment in the majority of skin infections.

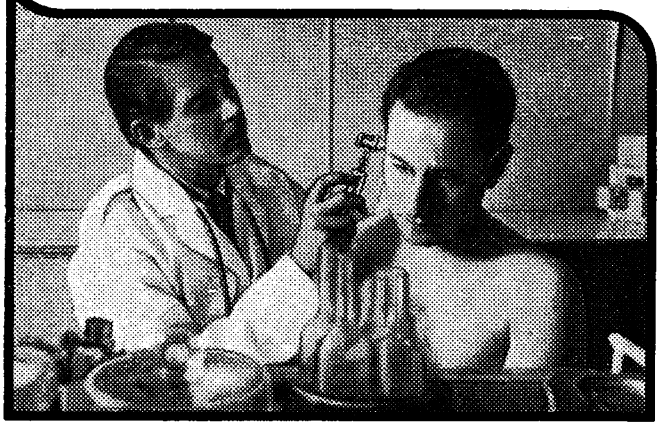
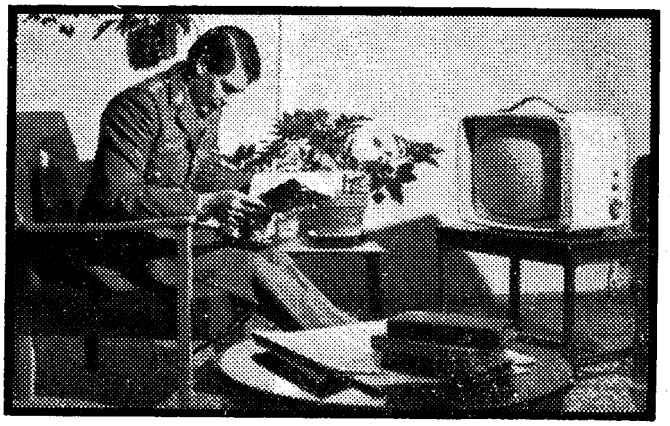
ROYAL ARMY MEDICAL CORPS

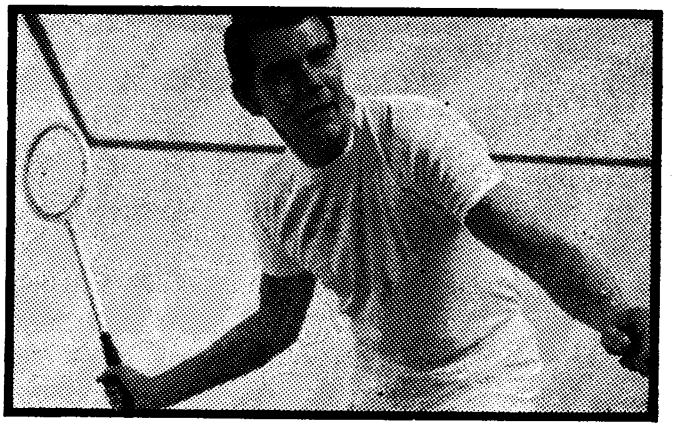


Excellent opportunities are provided for general practice under good conditions of service. The professional opportunities are very wide and varied and include caring for the wives and children of soldiers.

All aspects of medical care—preventive medicine, general and hospital practice are closely integrated. Surgeries are organised by groups and groups are supported by hospitals so that Medical Officers are able to follow up those of their patients admitted to hospital. These modern surgeries have every facility. Good equipment, trained staff, and a locum provided for six weeks' annual leave. Post-graduate training is given.

For the married man it matters greatly how his wife feels about the Service. The community spirit of Army life, especially overseas, embraces an Officer's family as much as himself. Such extra emoluments as Marriage Allowance, Education Allowance, Disturbance





Allowance, and Local Overseas Allowance, show the importance attached by the Army to helping the Officer with a family. Most married Medical Officers get a furnished house at low rental.

Pay for a married Captain (the rank on entry) is over £2000. There are increases every two years and on promotion. Promotion to Major can normally be expected after 5 years and to Lieut-Colonel after 13 years (or shorter, where an antedate is given for experience in hospitals and general practice). Commissions granted may be permanent or Short Service. A Short Service commission earns a tax-free gratuity of £3000 for 5 years' service, £1500 for 3 years. Regular commissions are pensionable on the normal basis.

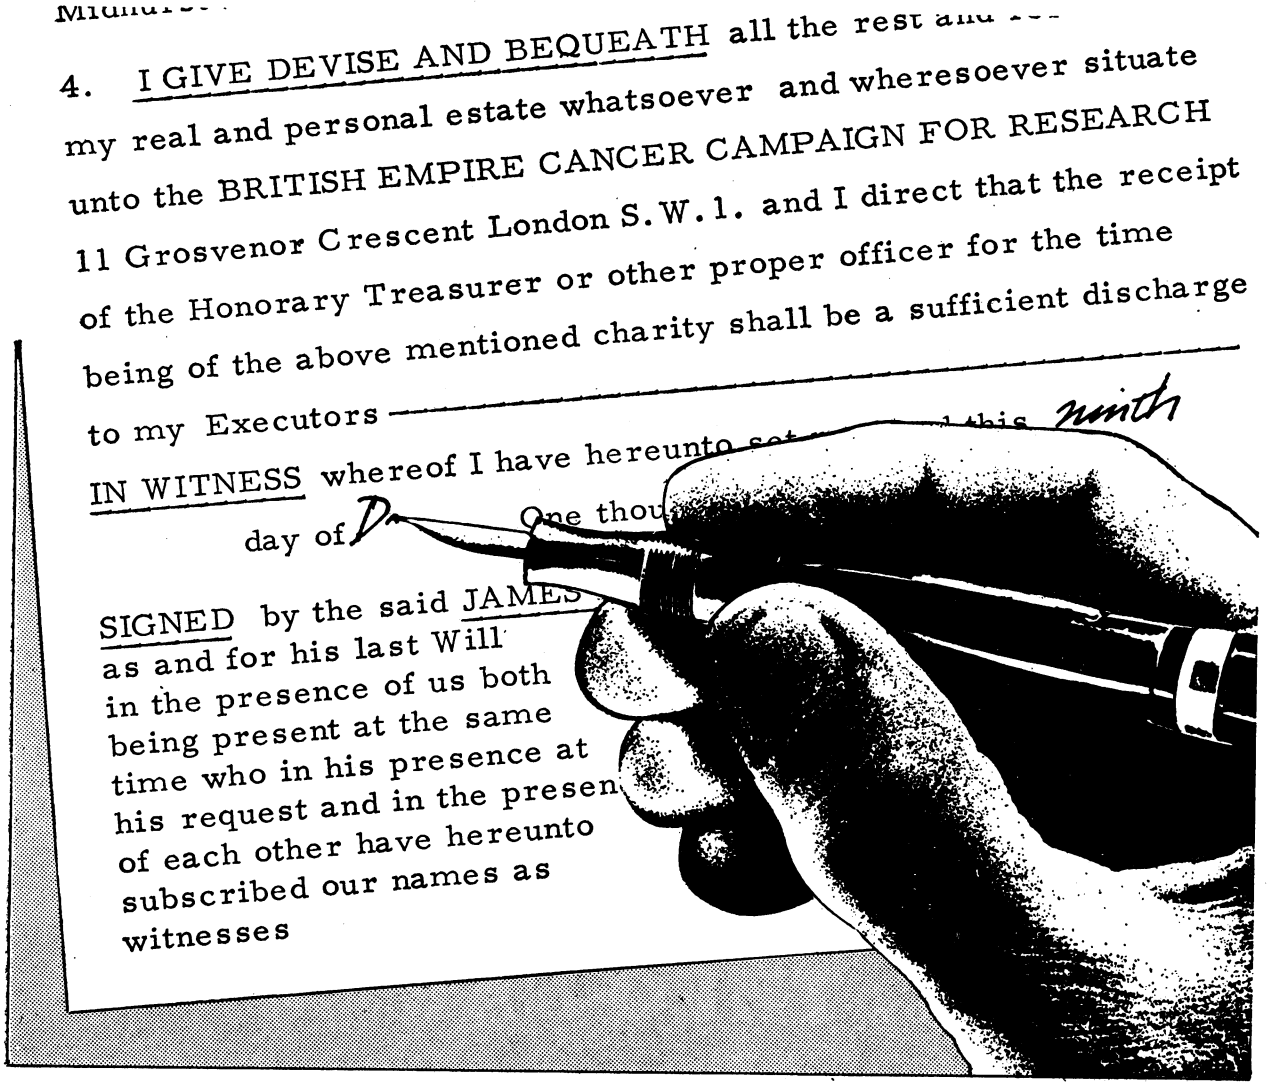
CANCER RESEARCH

DESERVES TO BE REMEMBERED



You may be asked from time to time to suggest a deserving cause as the subject of a bequest. Please remember that every year the British Empire Cancer Campaign for Research has to find more and more money for cancer research work not only in this country but in many parts of the Commonwealth. All this money must come from voluntary donations and bequests. The appropriate words to use in a will are: "I bequeath to the British Empire Cancer Campaign for Research the sum of £....." or "I devise and bequeath the residue of my estate to the British Empire Cancer Campaign for Research".

For further information please write to Sir Joseph Lockwood, Hon. Treasurer, British Empire Cancer Campaign for Research, Dept. BML, 11 Grosvenor Crescent, London SW1.

now THEO-NAR gives

8 hour relief from bronchospasm and irritant cough

Theo-nar contains theophylline and noscapine in a special sustained-release form to provide the chronic asthmatic or bronchitic with prolonged relief from bronchoconstriction **and** the useless unproductive cough which exhausts and weakens him.

Just one Theo-nar tablet will bring the patient dramatic relief lasting for 8 hours.

Two to three tablets are thus sufficient to keep the patient symptom-free throughout the night and day.

Each Theo-nar tablet contains 200 mg theophylline and 30 mg noscapine processed to provide immediate release of 100 mg theophylline and 15 mg noscapine, and delayed release after four hours of 100 mg theophylline and 15 mg noscapine.

Theo-nar gives him breath
and stops the cough that wastes it.

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966, but payment of the increase for the period October 1, 1966, to December 31, 1966, will not be made until December 31, 1966, when a lump sum payment in respect of arrears will be made.

The new scales (with the old scales shown in brackets) are set out below:

HOUSE OFFICERS: Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year (old scale £770 and £855). £1,200 per annum for posts held during the second year (old scale £940). £1,300 per annum for posts held during the third and subsequent years, subject to full registration (old scale £940).

Deductions of £175, £180 or £190 per annum for compulsory residence, or £220 per annum for voluntary residence. (These deductions are at present under review).

SENIOR HOUSE OFFICERS: £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years (old scale £1,195 and £1,255). Deductions of £210 per annum for compulsory residence and of £255 per annum for voluntary residence. (These deductions are at present under review).

REGISTRARS: £1,650 per annum, rising by four annual increments of £100 to £2,050 (old scale £1,425 and £1,595). Deductions of £255 per annum for compulsory residence and £300 per annum for voluntary residence. (These deductions are at present under review).

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals. (Previously £115 per annum).

On assimilation to the scale for registrars one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

SENIOR REGISTRARS: £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550 (old scale £1,710 to £2,395). Deductions of £295 per annum for compulsory residence and of £375 per annum for voluntary residence. (These deductions are at present under review).

On assimilation to the salary scale for senior registrars increments to a maximum of two shall be given for each year or part of year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANTS: £1,850 per annum rising by fourteen annual increments of £100 to £3,250 (old scale £1,650 to £2,910). Deductions of £295 per annum for those with remuneration at or below the third incremental point of the scale; and £330 per annum for those above that point for compulsory residence; and of £325 or £375 per annum respectively for voluntary residence. (These deductions are at present under review).

CONSULTANTS: £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885 (old scale £2,910 to £4,445). Deductions of £410 per annum for compulsory residence and of £460 per annum for voluntary residence. (These deductions are at present under review).

CLINICAL RESEARCH

1906

Due to expansion the Medical Department of Beecham Research Laboratories have two new vacancies for registered medical practitioners aged up to 40. Both men will be organizing human pharmacological studies and clinical trials. They should have wide clinical experience and a basic interest in physiology and pharmacology. A knowledge of statistical methods would be an advantage, but it is essential that the men appointed are of sufficient stature professionally and personally to converse knowledgeably with general practitioners, consultants and the staff of medical schools.

One doctor will be mainly concerned with new products at home whilst the other's primary interest will be in products established at home which are to be launched overseas. For the latter post knowledge of at least one European language is essential.

Attractive salaries will be paid to the men appointed to both posts, and they carry exceptional fringe benefits including profit participation and non-contributory pension and life assurance schemes. Those interested should send full personal details to the

Obstetrics in General Practice

Published July 1966

This book is made up of a series of articles printed in the "Current Practice" section of the BRITISH MEDICAL JOURNAL. It is designed to give a lucid and practical account of obstetrics as it is carried out in the patient's home or in a maternity unit, with special emphasis on the role of the general practitioner and his relationship to the consultant obstetrician and the hospital. The principal authors are consultant obstetricians, but to ensure that the general practitioner's own view and special experience should be represented the consultant contributors were asked to prepare their articles in collaboration with general practitioners. The book as a whole is a product of such co-operative effort. It forms a useful guide to this important branch of medical practice.

LECTURER IN PHARMACOLOGY

Applications are invited for the post of Lecturer in Pharmacology to assume duty at as early a date in 1967 as possible. Applicants should preferably have a medical degree, but the holder of a degree in pharmacology will be considered. The lecturer's duties will include systematic teaching of medical students (lectures and demonstrations), and he will be expected to undertake research.

The salary, depending on experience and qualifications, is in the range R.6,000 by R.300 to R.6,600. (Rate of exchange : R.2=£1).

Applicants should state age, qualifications, experience, publications, and research interests, and should give the names of two referees whom the University may consult.

Two copies of the application and testimonials should reach the Secretary-General, Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London S.W.1. (from whom memoranda giving the general conditions of appointment, travel allowance on appointment, and further information about the work of the department should be obtained) not later than **January 16, 1967.**

A third copy of the application should be sent direct by airmail to the Registrar, University of Cape Town, Private Bag, Rondebosch, Cape Town, South Africa, by the same date.

The University reserves the right to appoint a person other than one of the applicants or else to make no appointment. (11308)

CALTEX
has vacancies with its Associates in NORTH AFRICA for a

FIELD MEDICAL OFFICER

The duties comprise rendering medical service to oil-field staff in two remote desert camps. It is not intended that the Field Medical Officer would handle illnesses of a major or long-lasting nature or surgical operations, other than in an emergency, since the Company has adequate medical facilities close to its Head Office, and there is a ready air communication between this and the desert bases.

This position is considered bachelor status, i.e. no Company provision is made for a family. The employee will follow a special work schedule of approximately 92 days followed by 30 days paid vacation, with transportation provided to the country of recruitment. The salary will be commensurate with experience and qualifications, and whilst in the desert the Medical Officer will receive free board and lodging and laundry service.

Applicants are kindly requested to submit details of experience, training and qualifications to:

DISPENSERS, SECRETARIES

MEDICAL SECRETARY REQUIRED

Unusual opportunity to work

with Swedish/American Company in West Africa

After completing her two-year contract, our Medical Secretary is returning to England in December. We are therefore looking for a personable young lady, with first-class qualifications, as a replacement.

Location

The new air-conditioned hospital is situated at Yekepa, Liberia, West Africa, serving staff and families of the Lamco Mining Project at Nimba. The project is concerned with extracting and transporting iron ore from Nimba, 170 miles to the coast of Buchanan. Yekepa is a community of 5,000 people, lying at the foot of Mount Nimba, offering many social and recreational facilities, including a community centre, library, tennis courts, cinema, swimming-pool and golf course.

Duties

The successful applicant will be responsible to the chief medical officer, a Danish doctor, from whom she will take dictation in English. In addition to the recognized duties of a medical secretary she will also be required to run the hospital library, including the care of incoming medical journals, distribution of orders and company instructions, and temporary relief on the hospital switchboard.

Conditions

The two-year contract includes:

- Free private accommodation
- 5 weeks' paid holiday per year, plus holiday travel allowance, part of which may be spent out of Liberia
- Free return passage from and to England
- High baggage allowance
- Free medical attention

Salary

A salary in the range of $402 (£144) per month will be paid, with income tax at 3½%. She will work a 5½-day week, but the company reserves the right to increase this to a maximum of 48 hours per week when necessary. If she is required to work longer hours she will receive overtime or time off.

Qualifications

- First-class knowledge of English
- Shorthand and typing
- All-round office experience
- Knowledge of medical terminology

The position carries considerable responsibility requiring the use of much initiative. Added to this a friendly disposition and a sense of humour are invaluable qualities.

Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.

"In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy."
