Basic Ideas in Neurophysiology by Tristan D. M. Roberts, BSC, PhD,

The main part of this book is taken in its entirety from a highly original, comprehensive work, Neurophysiology of Postural Mechanisms (see forthcoming books below) and it forms a complete introduction to muscle, nerve and synapse. The final chapter contains much new material, specially prepared for this book, on the muscle spindle and the servo control of muscle.

Cardiac Pathology

by Robert Lannigan, MD, MCPath,

392 pages. Illus. £5 16s. A short but comprehensive textbook on the pathology of heart disease. Particular attention has been paid to some rare diseases since it is in these uncommon and obscure conditions that information is difficult to

Hospital Administration

Second edition

By G. A. Robinson, FICA,

576 pages. Illus. £5 10s. A revised and updated reference book and guide to the behind-the-scenes departments of a hospital. All aspects are covered, including accounts, law, stores and office practice.

... an admirable and authoritative review of one of the major problems facing the National Health Service at the present day." British Medical Journal.

Modern trends in Rheumatology—1

edited by Alan G. S. Hill, MC, FRCP, (Ed), MRCP,

416 pages. Illus. 95s. Aspects of rheumatology are discussed within three broad themes—aetiological research, advances in clinical management, and recognition of the broadening clinical pattern of connective tissue disease.

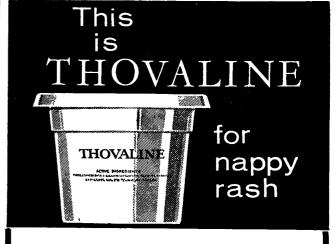

Operative Cholangiography

by C. A. R. Schulenburg, MD, ChM, FRCS,

271 pages. Illus. An important book dealing with all the techniques for carrying out cholangiography during an abdominal operation.

Today he prescribes Gantrisin

It didn't mean much to him in 1950. Just a conversation overheard in his father's surgery about 'successful clinical trials'.

Today, he knows what that phrase means and, above all, knows that sixteen years of world-wide usage have finally and conclusively proved the value of Gantrisin in urinary tract infections.

Gantrisin*

Effectiveness, safety and world-wide acceptance over sixteen testing years.

FURAMIDE provides the simplest safest and most effective treatment available at the present time for intestinal amoebiasis

Practical No injections, special diets or enemas are required. Furamide is suitable for ambulant patients.

Simple Dosage is simple—one tablet three times a day for ten days in patients of average weight.

Effective Cure rates of 75% to 80% in the acute stage and 90% to 100% in the chronic condition may be expected. Safe Side-effects, apart from occasional flatulence, have not been reported, and the toxicity of Furamide is very low.

Inexpensive Furamide is less expensive than the drugs conventionally used in amoebiasis, and as hospitalisation is not normally necessary (unless the clinical condition of the patients warrants it) treatment with Furamide often shows a substantial saving compared with the older forms of therapy. Furamide has been the subject of extensive clinical trials in South America, South Africa and Asia. References and detailed literature will be gladly sent on request.

Furamide Each tablet contains 0.5 G of diloxanide furoate B.P. Packed in bottles of 15 and 250 tablets.

A product of Boots Research

FURAMIDE

Few bronchitic patients can afford a day off.
Give them effective relief with new

Galaton and Delexin

These two new Wander products give effective relief in the cough and bronchospasm common to many acute and chronic respiratory disorders.

GALATON combines a time-proved cough suppressant (codeine phosphate) with an effective bronchodilator (phenyl-propanolamine). It relieves dry, unproductive cough and wheezing in many respiratory disorders—including acute bronchitis, chronic bronchitis and emphysema, bronchial asthma and pertussis. Galaton is particularly helpful in relieving the distressing night-time cough that disturbs sleep. DELEXIN combines a powerful expectorant (guaiphenesin)—which liquefies tenacious, viscous sputum—with the bronchodilator and vasoconstrictor effects of phenylpropanolamine. Indications include acute tracheitis, acute bronchitis, chronic bronchitis and emphysema, and the respiratory complications of infectious diseases.

	Formulae per 10 ml	Packs and basic N.H.S. prices
	Codeine phosphate B.P.20mg.	
Galaton	Phenylpropanolamine hydrochloride25mg.	6 fl. oz. bottle 3/6d.

FIGHT CANCER

WITH A WILL!

When you are consulted about bequests for medical work that deserves support, please remember the work of the Imperial Cancer Research Fund. Founded on the initiative of the Royal Colleges of Physicians and Surgeons, the I.C.R.F. is fighting all forms of cancer, including leukaemia, with every weapon of modern science in up-to-date laboratories. It has no official grants and is entirely supported by voluntary contributions. Will you please help—now?

How to word your Will

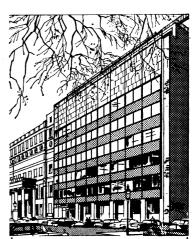

'I hereby bequeath the sum ofpounds free of duty to the Imperial Cancer Research Fund, Lincoln's Inn Fields, WC2 for the purpose of scientific research, and I direct that the receipt of the Honorary Treasurer shall be a good discharge for such legacy'.

Patron: I.M. The Queen

IMPERIAL CANCER RESEARCH FUND

THE CLINICAL SIGNIFICANCE OF SERUM ENZYME ESTIMATIONS

A Review Article by D. N. Barron, M.D., D.Sc., M.R.C.P., F.C.Path., in the December issue of ABSTRACTS OF WORLD MEDICINE

The rapid and extensive advances in clinical enzymology in recent years have presented the clinician with a bewildering choice of new investigations, some of which may give him valuable information which cannot be obtained by other means, while others are of dubious diagnostic or prognostic value. This authoritative article provides a much-needed guide to a complex subject. After a lucid review of general principles the author discusses the changes in serum enzyme activities that may result from disease of the heart, the liver, and other organs and assesses the value of each of them in terms of its clinical usefulness and in the light of the most recent knowledge. A full bibliography is appended.

The selective abstracting service offered by ABSTRACTS OF WORLD MEDICINE is already widely known. The institution of the current series of Review Articles has greatly increased its popularity. These articles, like the abstracting service which they are designed to supplement, are directed as much towards the general reader as to the specialist, providing him with authoritative surveys of the growing points of medicine, each complete with an up-to-date bibliography. Other articles that have recently appeared are:

In **Gout** and other hyperuricaemic conditions

'Zyloric' Allopurinol

has a radically **new** mode of action

'Zyloric' lowers serum and urinary uric acid levels by inhibition of xanthine oxidase, an enzyme important in uric acid formation. 'Zyloric' prevents the deposition of urates in the tissues, relieves chronic joint pain, increases joint mobility and has the great advantage that it also inhibits urinary urate stone formation. 'Zyloric' is therefore indicated especially in gouty nephropathy, in patients who form urate stones,

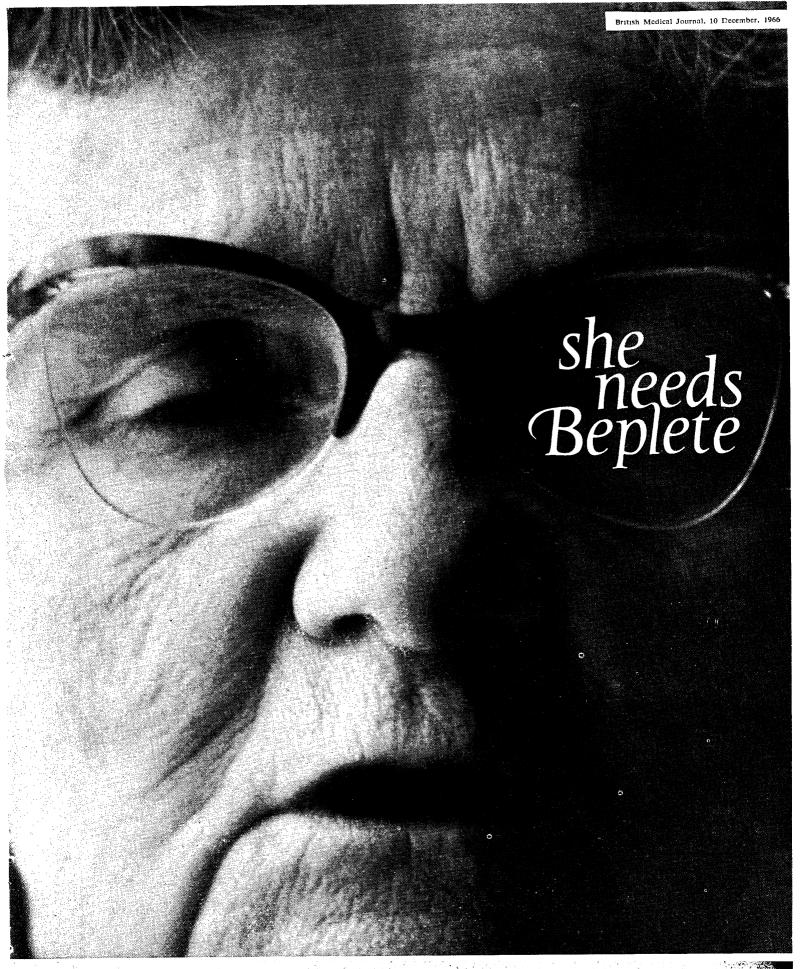

'Zyloric' Allopurinol

and in those with unusually severe disease.

Exolan Cream in response to the needs of the ambulant patient in the treatment of psoriasis

New Explan Cream has been propered in a cosmetically seceptable continued or the scalp. In general cases, of pantiasis it may also be prescribed for the ambulant patient who prefers to use a cream formulation.

In the treatment of psoriasis, tracetoxyant bracene has been shown to exhibit the healing properties of dimeanol while displaying none of the side effects of burning or staining the skin. It therefore may be used by the patient in his own home without fear that any harm will result if it accidentally comes into contact with normal skin.

A product of British research from:-DERMAL LABORATORIES LIMITED 247 GRAYS INN ROAD LONDON WC1 After combine various formulations of seriscenorizations the most efinically effective was found to be the one which corresponds to EXOLAN PASTE. This preparation is similar in constitutions to the dithranol/Lassars Paste combination which has been recommended by Consultant Dermatologists for many years.

Unfortunately some patients do not like applying pastes, especially during the day time. Also their use is precluded on the scalp and other hairy regions of the body. EXOLAN CREAM has therefore been formulated for use in these cases and contains 1% triacetoxyanthracene in a vanishing cream base.

WE volan

Durabolin

(Nandrolone Phenylpropionate, B.P.), 25 mg. per ml. for intramuscular injection. 1 ml. Orgaject disposable syringes, 1 ml. ampoules and 4 ml. vials.

Deca-Durabolin

(nandrolone decanoate), 25 or 50 mg. per ml. for intramuscular injection.

1 ml. Orgaject disposable syringes and 1 ml. ampoules.

Durabolin and Deca-Durabolin stimulate tissue-building and counteract nitrogen loss in many clinical conditions. The effect in osteoporosis and in advanced breast cancer is often marked, leading to an improvement in the patient's general condition, relief of pain and a regression of specific symptoms. Other conditions in which these preparations are useful include severe debility, post-operative catabolism, severe trauma, slowhealing fractures, burns and renal failure-in all these, the correction of an adverse nitrogen balance helps in the patient's recovery.

Durabolin is ideal for initial therapy: it is normally given at weekly intervals. Deca-Durabolin is a longer acting form which is ideal for maintenance therapy: it only needs to be given every three weeks.

ORGANON LABORATORIES LIMITED

CROWN HOUSE LONDON ROAD MORDEN SURREY ENGLAND

Why ONLY Nulacin?

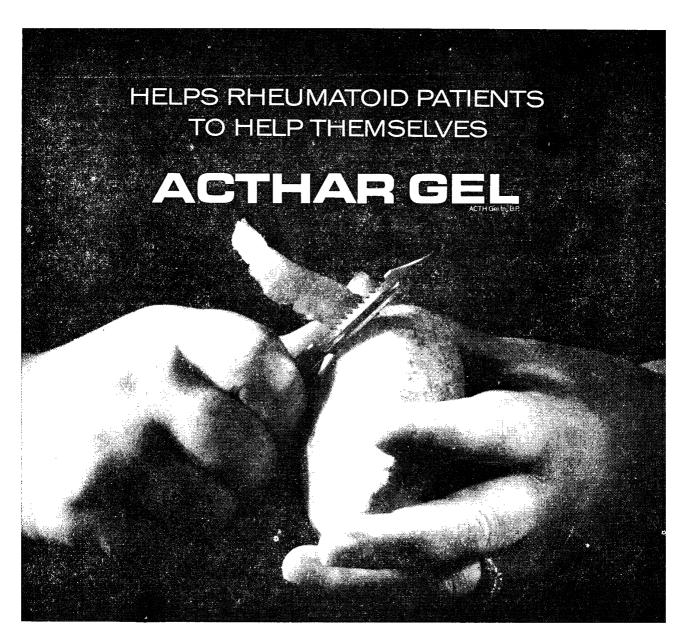

All alkalis, given by mouth, have only a transient effect on gastric acidity. This is probably due to rapid emptying of the stomach. Before Nulacin, an intragastric milk and alkali drip through a Ryle's tube was the only effective way to achieve continuous neutralization of stomach contents. The milk protein neutralized hydrochloric acid without stimulating further production. The milk fat helped to inhibit the formation of excess gastric juice. And the anacids

A CONTRACTOR OF THE PARTY OF TH

dealt with excess acid. Nulacin brought this to the ambulant patient—and still does.

Only Nulacin is made from whole milk combines milk protein and milk fat with designations and suitable antacids.

Only Nulacin is prepared in a size, shape and sistency to dissolve slowly in the mouth and pura continuous milk-alkali drip in the stomach.

PROMPT RELIEF OF PAIN

INCREASED MOBILITY

MORE NORMAL LIFE

Effective and Reliable

For over 15 years ACTHAR GEL therapy has brought new life to rheumatoid patients. It is still the most effective treatment and the most reliable long-acting corticotrophin available.

Safe Stimulation Therapy

ACTHAR GEL stimulates the adrenal cortex to release the full range of natural steroids, thereby avoiding the hazards of adrenal suppression associated with synthetic corticosteroid therapy.

The toxicity of the more potent analgesics is avoided and such side-effects as may occur are usually due to over-dosage. These are seldom serious and may be reversed by adjusting the dosage.

For Self-Administration

When the maintenance dose has been determined, the patient can easily be taught self-administration of ACTHAR GEL. Several thousand self-injections have now been given and many previously crippled patients have returned to, and remained at, their occupations.

For fuller details please write for the book "The Place of ACTHAR GEL in the Treatment of Rheumatoid Arthritis".

CONSIDER NOW

summer-long protection against HAY FEVER with D-VAC Pollens 3 dose course

D-VAC Pollens, Bencard emulsified 'depot' vaccine for 'classical' hay fever and pollen asthma, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

Primary Course (three injections containing 250, 750 and 3,500 Noon units respectively): designed for patients who have not received pollen vaccine treatment in the last five years or whose seasonal symptoms are severe, and for children (aged 8-14 years).

Advanced Course (three injections containing 750, 3,500 and 7,500 Noon units respective.)

tively): designed for patients aged 15 years and over who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose given in February or early March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

TO BE SURE

of obtaining D-VAC Pollens, it is advisable to prescribe and order before 31st December: no order can be accepted after 20th January.

Prescriptions and orders, for D-VAC Pollens 'Primary' or 'Advanced', should state the exact date (between 13th February and 4th March) on which the first dose is to be injected. The first dose will be despatched to arrive by this date. (D-VAC Pollens is not available outside the U.K.)

Brentford, Middlesex Telephone: ISLeworth 4111

THE PATIENT UNDER PRESSURE This man is continually under heavy pressure at work. At home, he has problems. He finds it difficult to escape from stress. Anxiety and tension have begun to distort his reactions. He is restless and takes offence without reason at the office. At home a similar story-he snaps at the children indiscriminately. Diagnosis-anxiety state.

Distalgesic erases pain

Two tablets of Distalgesic taken three or four times daily bring prompt and lasting relief in pain of varying degrees. Distalgesic maintains its effect at this dosage level even in long-term use, such as in the aches and pains of rheumatism. It can be effective against more severe pain, often delaying the need for parenteral narcotics. Distalgesic itself is non-narcotic, does not cause constipation or addiction and does not irritate the gastric mucosa.

Distalgesic tablets each contain 32.5 mg. dextropropoxyphene hydrochloride, described as the most promising alternative to codeine, and 325 mg. paracetamol, generally regarded as the safest of the antipyretic analgesics.

efficient, convenient—and acceptable to the patient

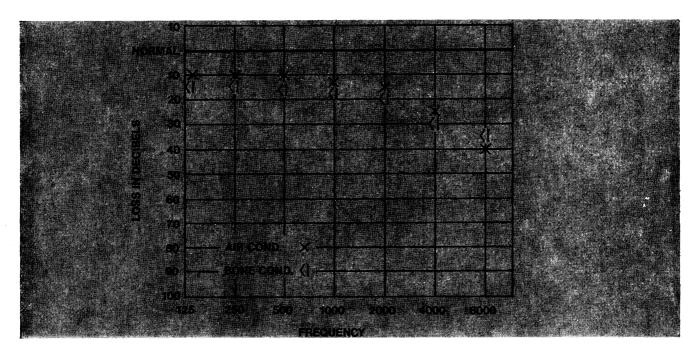

Each 'Feospan Spansule' Capsule contains 150 mg. exsiccated ferrous sulphate and 3 mg. aneurine hydrochloride (Vitamin B₁). Literature containing prescribing information is available on request.

Smith Kline & French Laboratories Ltd Welwyn Garden City, Hertfordshire

'Feospan' and 'Spansule' are trade marks

objective evidence proves that cyclospasmol® is also of value in the treatment of cerebrovascular disease

Audiometry

A trial was conducted using 28 patients ranging in age from 50-70 years. All these patients were suffering from gradual hearing loss which inhibited their social contact with family and friends. The patients were placed on 600-800 mg of Cyclospasmol daily, for periods ranging from 1-3 months. Their hearing loss at various frequencies was tested before and after treatment and recorded on audiograms.

After treatment the pure tone and speech audiograms showed significant gains over those obtained before treatment, in over 50% of the cases. Cyclospasmol was thus shown by an objective method to be an effective treatment in hearing loss of the aged due to vascular disturbances.

Further details of this trial available on request.

Dosage: 200 mg. q.d.s. which may be reduced to 200 mg. b.d. when maximum therapeutic benefit has been reached.

10 December 1966 ADVERTISEMENT BRITISH MEDICAL JOURNAL

the antibiotic that works for them . . .

ERYTHROPED (erythromycin ethyl succinate 200 mg/5ml, Abbott) is a logical first choice for the treatment of common bacterial infections of children. Its potency against the cocci is considerably greater than that of the tetracyclines or chloramphenicol. But, this power is gentle power—potency tempered with a remarkable degree of safety.

ERYTHROPED is, in fact, the least toxic and the least allergenic antibiotic currently in common use. ERYTHROPED is effective over a wide clinical spectrum that covers most common bacterial infections of children met with in general practice. Not least important, ERYTHROPED is presented in a form that will be taken. Its pleasant cherry flavour makes it readily acceptable to children—even the very young.

...in the pack that works for you

One 60 ml bottle provides a full five-day course of treatment—twenty-four 100 mg doses. In addition, attention is drawn on the bottle label to the need to complete the full course of treatment, so that the potential of ERYTHROPED may be fully realised.

Dosage half to one teaspoonful every four to six hours

Erythrope[®]

power tempered with **safety** plus coverage

AFRICA

A MEDICAL **PRACTITIONER**

£3,000 p.a. plus

will be appointed as a Railway Medical Officer, initially with a three-year service contract. The man appointed will gain broadly based experience, and in a country where the number of specialists is limited, will carry a heavy professional responsibility. In particular there will be opportunities to gain valuable experience in the field of Tropical Medicine. Life in Central Africa offers a healthy climate, and facilities for sport-including big game hunting and game fishing-at a low cost. Internationally famous land marks, such as the Victoria Falls and Kariba are close at hand. Taxation is low by United Kingdom standards.

Benefits are generous. In addition to a salary of £3,000 per annum, a gratuity of £1,000 is paid on completion of the initial contract. In addition, maternity benefits are paid. Travelling expenses for the man appointed and his family are paid on joining and leaving the service, and free rail travel facilities are provided during the period of service. Housing will be provided at a sub-economic rental or, where this is not possible, an accommodation allowance will be paid. Annual vacation leave is 30 days and is accumulative. At the end of the three-year period, the man appointed may apply for a permanent post or for an extension of the contract.

Applications, stating age, qualifications, previous experience, marital status, nationality, birthplace and names of two professional referees should be forwarded in confidence to:

CHIEF MEDICAL OFFICER OF RHODESIA RAILWAYS. PERSONNEL DIVISION, P.O. BOX 1932, LUSAKA, ZAMBIA,

from whom further information and particulars will be supplied on request.

The closing date for receipt of applications is January 31, 1967.

(11649)

WORDS

Acting directly at the site of pain in muscle, Intralgin Gel quickly relieves muscular aches and pains. Vigorous massage is not needed with Intralgin Gel-unlike traditional rubs which rely on erythema or counterirritation. After penetrating the skin the constituents-salicylamide and benzocaine - concentrate in underlying tissue to give rapid relief. Whether pain results from strain, injury, fibrositis, lumbago or non-articular rheumatism, Intralgin Gel quickly gets stiff and aching muscles back into action.

Intralgin GEL registered trade mark QUICKLY EASES ACHING MUSCLES

50 G. tube (basic NHS price 3/-) contains Benzocaine BP 2% w/w, salicylamide 5% w/w in an alcoholic vehicle.

Also available: Intralgin Liquid 8 fl. oz. (5/4d) 32 fl. oz. (16/8d)
