# **BRITISH JOURNAL OF MEDICAL EDUCATION**

*The Journal of the Association for the Study of Medical Education*

**will be published on 19 December, 1966**

Medical education today is presenting major problems in every country. Great changes are taking place and efforts are being made to discover in what directions still further changes are needed. There is a real need for better communications in medical education between Britain and other countries. These needs will shortly be met by a new journal, the *British Journal of Medical Education*. The Journal will act as a medium for interchange of information on medical education—Undergraduate, Postgraduate and Continuing—in the United Kingdom and Overseas. It will be the official journal of the Association for the Study of Medical Education (A.S.M.E.). The first issue will be published in December 1966, and quarterly thereafter.

The *British Journal of Medical Education* will set out to fulfil A.S.M.E.'s aim of making more widely known what the British medical schools and postgraduate bodies are doing. Besides printing reports on medical education overseas, the Journal will encourage the practical study of medical education, and will take particular interest in the evaluation of methods. It will thus form a useful link between medicine and development in education in other fields.

*Quarterly. Annual Subscription, Inland £3 3s.; Abroad £3 10s. (U.S.A. \$10.00).*

## **Take advantage of this SPECIAL INTRODUCTORY OFFER**

**All subscribers to this new journal who order their subscription before 31 December, 1966, will receive a bonus issue (i.e. subscriptions will be entered to expire in December instead of September, 1967).**

Subscriptions can be ordered direct from the Subscription Manager, British Journal of Medical Education, B.M.A. House, Tavistock Square, London W.C.1, or through any leading subscription agent or bookseller throughout the world.

# **PRODEXIN<sup>regd.</sup>** **keeps acid level at placid level**

Prodexin puts acidity firmly in its place—right in the middle of the safe zone of pH 3-5. And keeps it there. Prodexin tablets give continuous and prolonged relief from pain caused by hyperacidity, dyspepsia and peptic ulcer.

Prodexin contains aluminium glycinate, a fast acting buffer antacid. Left to disperse slowly in the mouth, the tablet releases a steady trickle of antacid into the stomach: it simulates an intragastric drip in a simple and most convenient way.

Prodexin tablets are conveniently small. They can be carried about and taken wherever and whenever necessary. This is particularly useful to the ambulant patient.

**Dosage:** One or more tablets an hour when necessary. For continuous therapeutic effect, the tablet should be sucked slowly or left to disperse in the mouth. For rapid relief of pain, the tablet may be chewed and then swallowed.

**Content:** aluminium glycinate 900mg., light magnesium carbonate 100mg.

## instant buffer antacid

**Hyperacidity and peptic ulcer:**

### AN OUTSTANDINGLY DIFFERENT AND MORE EFFECTIVE TREATMENT

Just two things interest the chronic sufferer. He wants the pain to go, and stay gone. And if both results can be achieved with an antacid that tastes pleasant and is needed in lesser quantity than he's used to, he's going to be very grateful indeed.

Glymaxil, the only soluble buffer antacid, can promise exactly this. In clinical practice Glymaxil has been shown 'significantly more effective' in relieving pain and 'significantly more palatable' than aluminium hydroxide. Glymaxil, the first antacid chelate, acts faster and buffers more acid for longer periods in the ideal pH range 3-5 than other commonly used antacids.

### A very agreeable treatment

By suppressing pain promptly Glymaxil gives the nervously-inclined patient a sense of reassurance, itself highly beneficial. Taken in small doses (1-2 teaspoonfuls) and tasting pleasantly of peppermints it is also a most agreeable and convenient liquid antacid—one that will make his symptoms a great deal easier to live with.

**Dosage** One or two teaspoonfuls as required. Not more than 120ml. (one bottle) of Glymaxil should be consumed in any 24 hour period.

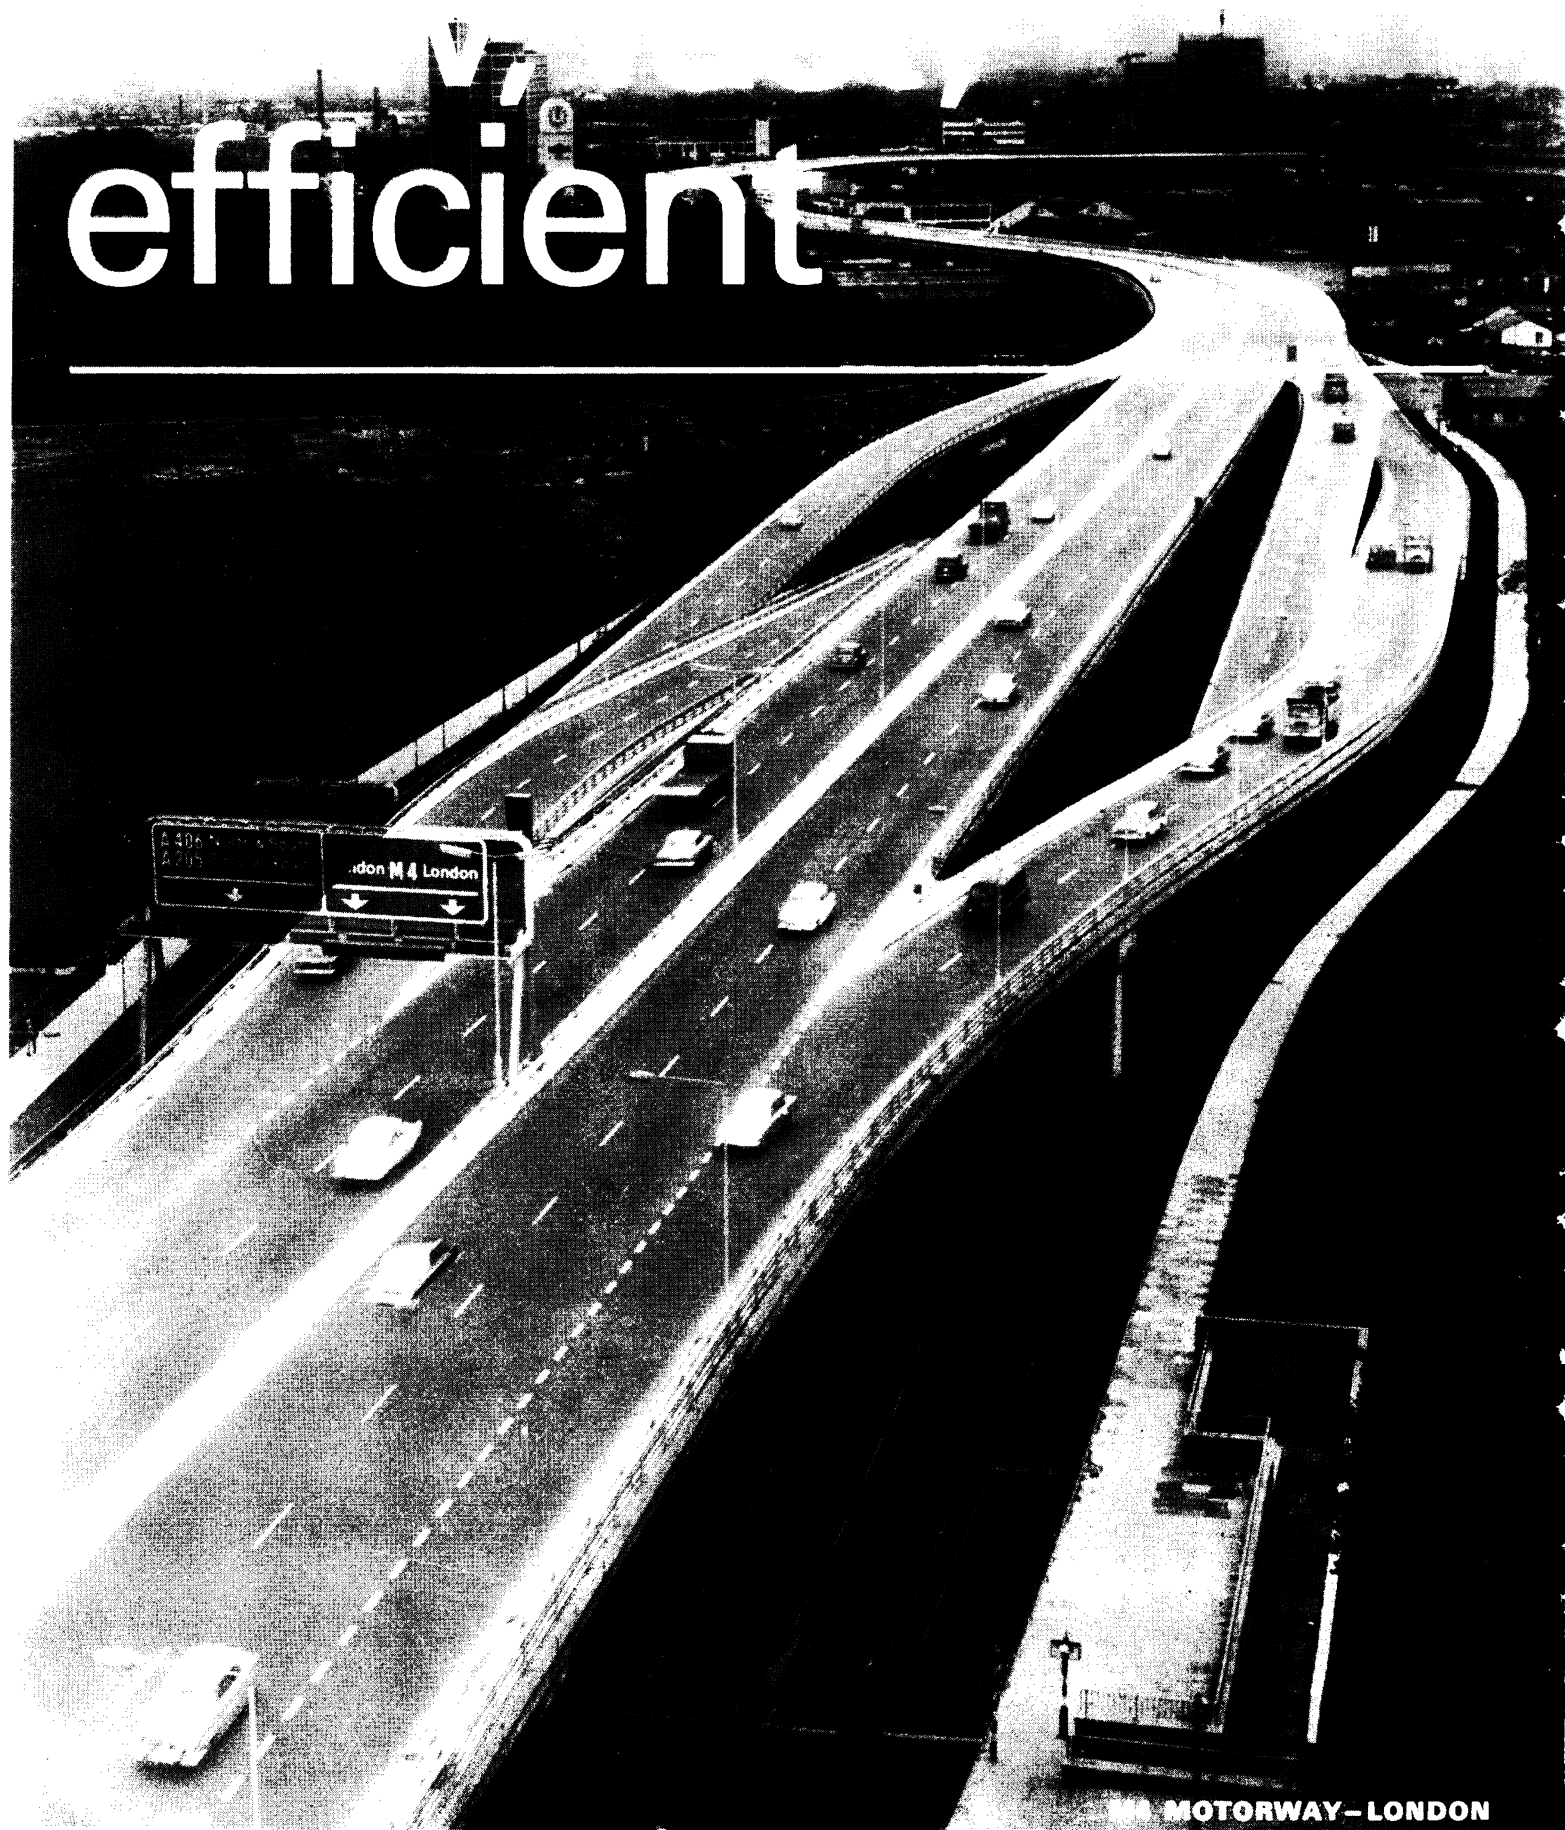

**Presentation** Bottles of 120ml. containing 40% w/v sodium glucaldrate.

## A NEW ORAL MEDICATION

A SAFE AND EFFECTIVE TOPICAL PREPARATION  
WITH IMMEDIATE ANALGESIC PROPERTIES

Bonjela provides an effective remedy for lesions of the mouth. Relief from pain and rapid healing are achieved in nine out of ten cases of oral ulceration whatever the origin.

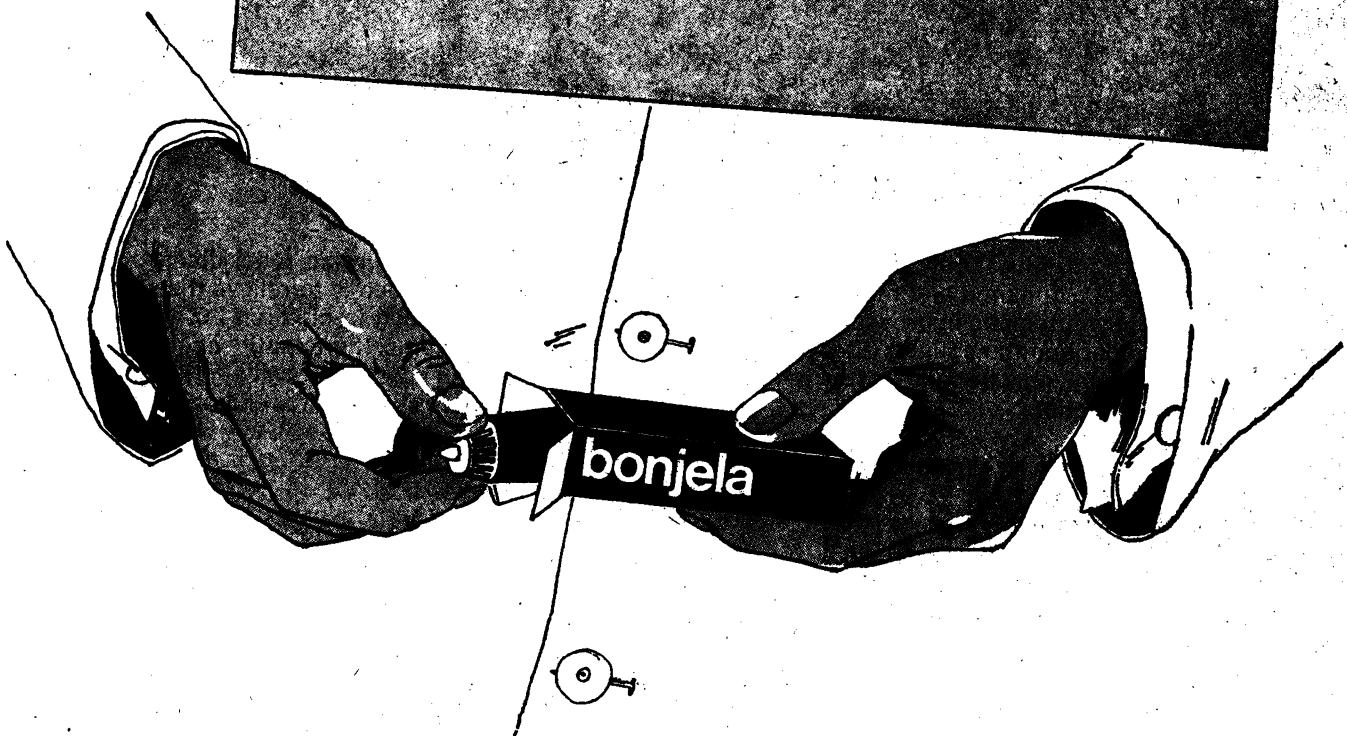

This high rate of response to Bonjela was recorded in American trials. Formal trials start with immediate clinical assessment may be made by applying Bonjela to any case of oral ulceration. Assessment based on tenderness is usually relieved within a few minutes. Due to the analgesic properties of choline salicylate and the anaesthetising action of the alcohol gel.

# And now **Exolan Cream** in response to the needs of the ambulant patient in the treatment of psoriasis

New Exolan Cream has been prepared in a cosmetically acceptable vanishing cream base, and is ideal for the treatment of psoriasis of the scalp. In general cases of psoriasis it may also be prescribed for the ambulant patient who prefers to use a cream formulation.

In the treatment of psoriasis, triacetoxanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin. It therefore may be used by the patient in his own home without fear that any harm will result if it accidentally comes into contact with normal skin.

After examining various formulations of triacetoxanthracene the most clinically effective was found to be the one which corresponds to EXOLAN PASTE. This preparation is similar in constitution to the dithranol/Lassars Paste combination which has been recommended by Consultant Dermatologists for many years.

Unfortunately some patients do not like applying pastes, especially during the day time. Also their use is precluded on the scalp and other hairy regions of the body. EXOLAN CREAM has therefore been formulated for use in these cases and contains 1% triacetoxanthracene in a vanishing cream base.

## BRONCHITIS-ASTHMA-EMPHYSEMA

Clinical evidence confirms that this new theophylline-niacinamide complex achieves rapid therapeutic blood levels for faster dilation of the bronchioles and substantial improvement in vital capacity in most cases of chronic bronchitis, asthma and emphysema.

### Significant Treatment Advantages:

The unique Anaphylline complex is a loose bonding of theophylline and niacinamide which affords a soluble theophylline through all pH ranges. No more ionization of theophylline salts with precipitation of the theophylline in the acid of the stomach. Now direct immediate absorption of the theophylline complex for faster, higher and longer blood levels.

#### \* MORE RAPID ABSORPTION FOR QUICKER PATIENT RESPONSE

Evidence from clinical trials indicates that Anaphylline achieves therapeutic blood levels faster than theophylline salts and within 15 minutes of oral administration.

#### \* MORE PROLONGED BLOOD LEVELS FOR SUSTAINED RELIEF

Rapid, initial blood levels achieved are followed by a steady, sustained rise reaching peak achievement at 60 minutes, with gradual, but uniform decline thereafter.

#### \* SUPERIOR PATIENT TOLERANCE

Achievement of these blood levels is not accompanied by any increase in the side-effects normally associated with theophylline treatment.

#### INDICATIONS

For use as a bronchodilator to control the symptoms of chronic bronchitis, chronic asthma, emphysema and other pulmonary disorders.

#### DOSAGE:

Adults 1 to 2 tablets to be taken 3 or 4 times daily, preferably after meals. (Children 6-12 yrs., half to 1 tablet.)

#### FORMULA

Theophylline-Niacinamide complex containing 100 mg. theophylline and 150 mg. niacinamide in single tablet form.

## New Betnovate Scalp Application—unique among topical steroid preparations

New Betnovate Scalp Application is unique. It has been developed specifically to fill the need for a suitable treatment for dermatoses of the scalp. This cosmetically appealing preparation contains 0.1% betamethasone as 17-valerate in a slightly gelled alcoholic solution with just the right viscosity to get to the root of the trouble without dripping or without adhering to the hair. There is no odour or visible residue on drying. The quick drying action of the spirituous vehicle produces a cooling effect on the scalp accompanied by the relief from itching and

inflammation which Betnovate brings. Two applications—morning and night—rapidly clear steroid-responsive dermatoses of the scalp, such as psoriasis and seborrhoeic dermatitis. This new Scalp Application added to the already wide Betnovate range means that there is now the right Betnovate preparation for every dermatological need.

## "Penicillin is the drug of choice for beta-haemolytic streptococcal infections . . .

. . . and oral penicillin is preferable to tetracyclines if injections are inconvenient." \*This concluding statement made as recently as September 1965 in a paper in the *British Medical Journal* supports a similar view expressed in a leading article in *The Lancet* of September 14, 1963, regarding the effectiveness of penicillin—in this case in comparison with its newer and costlier derivatives. In throat infections caused by beta-haemolytic streptococci, oral penicillin, such as Glaxo Crystapen G—suspension, syrup or tablets—is preferred, not only because of its wider margin of safety, economy and ease of administration but also because of its rapid bactericidal action against these organisms which often prove resistant to other antibiotics. In such infections Crystapen G is not just another inexpensive substitute—it is still the best antibiotic, and one that has proved reliable in the treatment of millions of patients. Crystapen is the penicillin for today.

## Daily Complan—nourishes, fortifies elderly patients who won't or can't eat regular meals

Illness, dental problems and convalescence can seriously compound the dietary problems of elderly patients. A disinclination to eat can quickly turn to a positive indifference to food. Complan, the complete meal in a cup, contains all the daily nutrients needed. It is easily prepared, and can be flavoured to meet a wide variety of fads and fancies. Complan is particularly valuable to those of your elderly patients who live alone and lacking care often subsist on a totally inadequate diet of tea and snacks.

Cups of Complan taken morning and night, or more often if required, can enrich the protein, carbohydrate, vitamin and mineral intake without upsetting delicate or disturbed digestions.

Complan offers to elderly patients the maximum amount of nourishment with the minimum amount of preparation.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1,2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3,4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

**SALARY SCALES OF HOSPITAL MEDICAL STAFF**

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966, but payment of the increase for the period October 1, 1966, to December 31, 1966, will be made until December 31, 1966, when a lump sum payment in respect of arrears will be made.

The new scales (with the old scales shown in brackets) are set out below:  
**HOUSE OFFICERS:** Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year (old scale £770 and £855), £1,200 per annum for posts held during the second year (old scale £940), £1,300 per annum for posts held during the third and subsequent years, subject to full registration (old scale £940).

Deductions of £175, £180 or £190 per annum for compulsory residence, or £220 per annum for voluntary residence. (These deductions are at present under review).

**SENIOR HOUSE OFFICERS:** £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years (old scale £1,195 and £1,255). Deductions of £210 per annum for compulsory residence and of £255 per annum for voluntary residence. (These deductions are at present under review).

**REGISTRARS:** £1,650 per annum, rising by four annual increments of £100 to £2,050 (old scale £1,425 and £1,595). Deductions of £255 per annum for compulsory residence and £300 per annum for voluntary residence. (These deductions are at present under review).

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals. (Previously £115 per annum).

On assimilation to the scale for registrars one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

**SENIOR REGISTRARS:** £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550 (old scale £1,710 and £2,395). Deductions of £295 per annum for compulsory residence and of £375 per annum for voluntary residence. (These deductions are at present under review).

On assimilation to the salary scale for senior registrars increments to a maximum of two shall be given for each year or part of year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANTS:** £1,850 per annum rising by fourteen annual increments of £100 to £3,250 (old scale £1,650 and £2,910). Deductions of £295 per annum for those with remuneration at or below the third incremental point of the scale; and £330 per annum for those above that point for compulsory residence; and of £325 or £375 per annum respectively for voluntary residence. (These deductions are at present under review).

**CONSULTANTS:** £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,855 (old scale £2,910 to £4,445). **SYDNEY EYE HOSPITAL**  
(A Division of Sydney Hospital)

Applications, closing February 28, 1966, and addressed to the undersigned, are invited for the newly established position of Pathologist to the Sydney Eye Hospital at a salary in the range \$A8,000 to \$A11,000, starting rate depending on qualifications and experience.

Sydney Eye Hospital accommodates the laboratories of the Department of Ophthalmology and Eye Health of the University of Sydney, and contains 58 beds.

In the past year, 1,653 eye operations were performed and outpatient attendances totalled 68,337.

The Pathologist should be a trained Morbid Anatomist. Of equal importance to providing a diagnostic histopathology service and the establishment of an Eye Bank will be the development of a line of research of his choice, facilities for which are set out in a supporting statement available from the undersigned.

All inquiries will be treated with strict confidence and no information about an inquirer will be sought without his permission.

H. R. Beer, Chief Executive Officer, Sydney Hospital, Box 1614, G.P.O., SYDNEY, N.S.W., AUSTRALIA. (H.3439)

# ROYAL AUSTRALIAN ARMY MEDICAL CORPS

## Medical Officers for Short Service Commissions

Medical Officers are required for full time service with the Australian Regular Army on four years short service commissions. To be eligible, applicants must be males under the age of 40 years, in possession of a medical qualification registerable in Australia and physically fit. They must also be British subjects eligible for permanent residence in Australia.

### Short Service Commissions.

Successful applicants will be appointed to a short service commission for four years. They will receive the pay and allowances of a Regular Army Medical Officer and will be required to contribute to the Defence Forces Retirement Benefit Fund which provides benefits in the event of retirement because of invalidity. Contributions are refunded in full on normal termination of appointment.

Officers appointed to 4 years Short Service Commission receive a bounty of \$3300.00 (approximately \$2000.00 after tax) on appointment but will be required to refund this on a sliding scale if permitted to retire before completion of their 4 year contract. Permission to retire prematurely will be granted only in exceptional circumstances and after refund of passage costs to Australia. Passage to Australia will be provided for successful applicants.

### Pay and Allowances.

The current pay and allowances for Medical Officers are as follows:—

Rank	Basic	At 1 year	At 2 years	At 3 years	At 4 years	At 5 years
Captain.....	\$5092.....	\$5336.....	\$5580.....	\$5822.....	\$6066.....	\$6369...
Major.....	\$6676.....	\$6978.....	\$7282.....	\$7588.....		
Lieutenant-Colonel.....	\$8256.....	\$8620.....				

These scales do not include: Clothing Maintenance Allowance: \$102 p.a. Marriage and Provision or Separation Allowance: \$628 p.a. These allowances are exempt from taxation. Current rate of exchange is \$A2.50 to £Stg.1.

### Pay Increments for Professional Experience.

Medical Officers appointed to Short Service Commissions in the RAAMC in the rank of Captain may have their period of service antedated for purposes of pay increments, but not for seniority, by one year for each two years of professional experience in civil practice after graduation up to a maximum of five years.

### Additional Allowances.

In addition to the Clothing Maintenance and Marriage Allowances shown above officers may qualify for various other allowances covering travelling, living-out, removal and children's education dependent upon circumstances. Details of these will be provided on request.

A single officer or married officer approved to live in is provided with free rations and quarters. Officers are provided with an initial issue of uniform free. Additional allowances are also paid for service in specific areas overseas and in Australia.

Doctors who contemplate emigrating to Australia are invited seriously to consider this method of ensuring financial security until adjusted to conditions there. The Royal Australian Army Medical Corps provides good clinical experience in interesting places. In addition to serving throughout Australia, RAAMC doctors are currently serving in Malaysia, Papua-New Guinea and Viet Nam.

Applications should be made to:—

AFRICA

# A MEDICAL PRACTITIONER

**£3,000 p.a. plus**

will be appointed as a Railway Medical Officer, initially with a three-year service contract.

The man appointed will gain broadly based experience, and in a country where the number of specialists is limited, will carry a heavy professional responsibility. In particular there will be opportunities to gain valuable experience in the field of Tropical Medicine. Life in Central Africa offers a healthy climate, and facilities for sport—including big game hunting and game fishing—at a low cost. Internationally famous land marks, such as the Victoria Falls and Kariba are close at hand. Taxation is low by United Kingdom standards.

Benefits are generous. In addition to a salary of £3,000 per annum, a gratuity of £1,000 is paid on completion of the initial contract.

In addition, maternity benefits are paid.

Travelling expenses for the man appointed and his family are paid on joining and leaving the service, and free rail travel facilities are provided during the period of service. Housing will be provided at a sub-economic rental or, where this is not possible, an accommodation allowance will be paid. Annual vacation leave is 30 days and is accumulative.

At the end of the three-year period, the man appointed may apply for a permanent post or for an extension of the contract.

*Applications, stating age, qualifications, previous experience, marital status, nationality, birthplace and names of two professional referees should be forwarded in confidence to:*

ST. ANDREW'S HOSPITAL  
NORTHAMPTON

FOR NERVOUS AND MENTAL DISORDERS

President: The Earl Spencer

Medical Superintendent: James Harper, M.B., F.R.C.P.(Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupational Centre, known as Gloucester House, was opened in 1962, which comprises an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

## WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. Free terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.

## NURSING HOMES
