## Neulactil

During the last eighteen months psychiatrists have been evaluating the properties of 'Neulactil'\* brand pericyazine in the management of a wide variety of mental and emotional disorders. From their reports it has become clear that this new M&B phenothiazine derivative, in addition to possessing a useful anxiolytic effect, is a powerful inhibitor of aggression and impulsiveness in modifying disturbed behaviour. Moreover, 'Neulactil' has been found effective at modest dosage levels which rarely give rise to the unwanted effects which sometimes characterize the use of other

therapeutic regimens. Since many of the more severe anxiety and tension states and behaviour disorders are first diagnosed and often treated solely by the general practitioner, it is likely that 'Neulactil' will find valuable application in general practice.

# Anaphylline

(THEOPHYLLINE-NIACINAMIDE)

a new theophylline complex for more  
effective maintenance therapy in mild to moderate cases of

## BRONCHITIS-ASTHMA-EMPHYSEMA

Clinical evidence confirms that this new theophylline-niacinamide complex achieves rapid therapeutic blood levels for faster dilation of the bronchioles and substantial improvement in vital capacity in most cases of chronic bronchitis, asthma and emphysema.

### Significant Treatment Advantages:

The unique Anaphylline complex is a loose bonding of theophylline and niacinamide which affords a soluble theophylline through all pH ranges. No more ionization of theophylline salts with precipitation of the theophylline in the acid of the stomach. Now direct immediate absorption of the theophylline complex for faster, higher and longer blood levels.

#### \* MORE RAPID ABSORPTION FOR QUICKER PATIENT RESPONSE

Evidence from clinical trials indicates that Anaphylline achieves therapeutic blood levels faster than theophylline salts and within 15 minutes of oral administration.

#### \* MORE PROLONGED BLOOD LEVELS FOR SUSTAINED RELIEF

Rapid, initial blood levels achieved are followed by a steady, sustained rise reaching peak achievement at 60 minutes, with gradual, but uniform decline thereafter.

#### \* SUPERIOR PATIENT TOLERANCE

Achievement of these blood levels is not accompanied by any increase in the side-effects normally associated with theophylline treatment.

#### INDICATIONS

For use as a bronchodilator to control the symptoms of chronic bronchitis, chronic asthma, emphysema and other pulmonary disorders.

#### DOSAGE:

Adults 1 to 2 tablets to be taken 3 or 4 times daily, preferably after meals. (Children 6-12 yrs., half to 1 tablet.)

#### FORMULA

Theophylline-Niacinamide complex containing 100 mg. theophylline and 150 mg. niacinamide in single tablet form.

# BRITISH JOURNAL OF MEDICAL EDUCATION

*The Journal of the Association for the Study of Medical Education*

**was published on 19 December, 1966**

Medical education today is presenting major problems in every country. Great changes are taking place and efforts are being made to discover in what directions still further changes are needed. There is a real need for better communications in medical education between Britain and other countries. These needs will shortly be met by a new journal, the *British Journal of Medical Education*. The Journal will act as a medium for interchange of information on medical education—Undergraduate, Postgraduate and Continuing—in the United Kingdom and Overseas. It will be the official journal of the Association for the Study of Medical Education (A.S.M.E.). The first issue will be published in December 1966, and quarterly thereafter.

The *British Journal of Medical Education* will set out to fulfil A.S.M.E.'s aim of making more widely known what the British medical schools and postgraduate bodies are doing. Besides printing reports on medical education overseas, the Journal will encourage the practical study of medical education, and will take particular interest in the evaluation of methods. It will thus form a useful link between medicine and development in education in other fields.

*Quarterly. Annual Subscription, Inland £3 3s. ; Abroad £3 10s. (U.S.A. \$10.00).*

## Take advantage of this SPECIAL INTRODUCTORY OFFER

**All subscribers to this new journal who order their subscription before 31 December, 1966, will receive a bonus issue (i.e. subscriptions will be entered to expire in December instead of September, 1967).**

Subscriptions can be ordered direct from the Subscription Manager, British Journal of Medical Education, B.M.A. House, Tavistock Square, London W.C.1, or through any leading subscription agent or bookseller throughout the world.

'Zyloric' lowers serum and urinary uric acid levels by inhibition of xanthine oxidase, an enzyme important in uric acid formation. 'Zyloric' prevents the deposition of urates in the tissues, relieves chronic joint pain, increases joint mobility and has the great advantage that it also inhibits urinary urate stone formation. 'Zyloric' is therefore indicated especially in gouty nephropathy, in patients who form urate stones, and in those with unusually severe disease.

# How commonsense can you get...

Haelan is a new preparation for steroid-responsive skin conditions.

Its advantages are strictly practical.

Haelan contains a proven steroid, flurandrenolone, in a concentration sufficient to treat all but the most severe dermatoses.

It comes in a realistic 60 gramme tube—enough for routine treatment without the need for repeat prescriptions.

Because of the pack size, and because the steroid content has not been needlessly increased, Haelan is far more economical than comparable preparations.

## summer-long protection against HAY FEVER with D-VAC Pollens 3 dose course

regd.

D-VAC Pollens, Bencard emulsified 'depot' vaccine for 'classical' hay fever and pollen asthma, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

**Primary Course** (three injections containing 250, 750 and 3,500 Noon units respectively): designed for patients who have not received pollen vaccine treatment in the last five years or whose seasonal symptoms are severe, and for children (aged 8-14 years).

**Advanced Course** (three injections containing 750, 3,500 and 7,500 Noon units respec-

tively): designed for patients aged 15 years and over who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose given in February or early March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

## TO BE SURE

of obtaining D-VAC Pollens, it is advisable to prescribe and order before 31st December: no order can be accepted after 20th January.

Prescriptions and orders, for D-VAC Pollens 'Primary' or 'Advanced', should state the exact date (between 13th February and 4th March) on which the first dose is to be injected. The first dose will be despatched to arrive by this date. (D-VAC Pollens is not available outside the U.K.)

# And now **Exolan Cream** in response to the needs of the ambulant patient in the treatment of psoriasis

New Exolan Cream has been prepared in a cosmetically acceptable vanishing cream base, and is ideal for the treatment of psoriasis of the scalp. In general cases of psoriasis it may also be prescribed for the ambulant patient who prefers to use a cream formulation.

In the treatment of psoriasis, triacetoxyanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin. It therefore may be used by the patient in his own home without fear that any harm will result if it accidentally comes into contact with normal skin.

After examining various formulations of triacetoxyanthracene the most clinically effective was found to be the one which corresponds to EXOLAN PASTE. This preparation is similar in constitution to the dithranol/Lassars Paste combination which has been recommended by Consultant Dermatologists for many years.

Unfortunately some patients do not like applying pastes, especially during the day time. Also their use is precluded on the scalp and other hairy regions of the body. EXOLAN CREAM has therefore been formulated for use in these cases and contains 1% triacetoxyanthracene in a vanishing cream base.

# Obstetrics in General Practice

*Published July 1966*

This book is made up of a series of articles printed in the "Current Practice" section of the BRITISH MEDICAL JOURNAL. It is designed to give a lucid and practical account of obstetrics as it is carried out in the patient's home or in a maternity unit, with special emphasis on the role of the general practitioner and his relationship to the consultant obstetrician and the hospital. The principal authors are consultant obstetricians, but to ensure that the general practitioner's own view and special experience should be represented the consultant contributors were asked to prepare their articles in collaboration with general practitioners. The book as a whole is a product of such co-operative effort. It will prove a useful guide to this important branch of medical practice.

**SALARY SCALES OF HOSPITAL MEDICAL STAFF**

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966, but payment of the increase for the period October 1, 1966, to December 31, 1966, will not be made until December 31, 1966, when a lump sum payment in respect of arrears will be made.

The new scales (with the old scales shown in brackets) are set out below:  
**HOUSE OFFICERS:** Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year (old scale £770 and £855). £1,200 per annum for posts held during the second year (old scale £940). £1,300 per annum for posts held during the third and subsequent years, subject to full registration (old scale £940).

Deductions of £175, £180 or £190 per annum for compulsory residence, or £220 per annum for voluntary residence. (These deductions are at present under review).  
**SENIOR HOUSE OFFICERS:** £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years (old scale £1,195 and £1,255). Deductions of £210 per annum for compulsory residence and of £255 per annum for voluntary residence. (These deductions are at present under review).

**REGISTRARS:** £1,650 per annum, rising by four annual increments of £100 to £2,050 (old scale £1,425 and £1,595). Deductions of £255 per annum for compulsory residence and £300 per annum for voluntary residence. (These deductions are at present under review).

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals. (Previously £115 per annum).  
On assimilation to the scale for registrars one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

**SENIOR REGISTRARS:** £1,950 per annum rising by one increment of £100 and four further annual increments of £25 to £2,550 (old scale £1,710 to £2,395). Deductions of £295 per annum for compulsory residence and of £375 per annum for voluntary residence. (These deductions are at present under review).

On assimilation to the salary scale for senior registrars increments to a maximum of two shall be given for each year or part of year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANTS:** £1,850 per annum rising by fourteen annual increments of £25 to £2,550 (old scale £1,650 to £2,395). Deductions of £295 per annum for compulsory residence and of £375 per annum for voluntary residence. (These deductions are at present under review).

**CONSULTANTS:** £3,500 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885 (old scale £3,910 to £4,445). # MEDICAL OFFICERS

The Anglo American Corporation Group Medical Service wishes to strengthen its staff of medical officers in South Africa. Its several hospitals are outstandingly well-equipped and serve many thousands of African employees.

In addition to the normal work common to all hospitals for men, the Group's medical officers supervise the health, housing, nutrition and general welfare of the employees, and also assist in maintaining the high standards of public health on the mines. They can further expect to have opportunities of gaining invaluable experience in traumatic surgery.

A starting salary in the range £2,700—£3,250 p.a. is offered. Income Tax is about half that paid in U.K., and commodities in general cost noticeably less. A spacious detached house is provided at a rental of approximately £5 a month. There are excellent pension and health schemes. In all centres there are facilities for at least the popular games including golf and tennis—and time to play them. Help in the house is readily obtainable and moderately inexpensive. The South African climate is acknowledged to be one of the most congenial and healthy in the world.

Air fares to South Africa for employees and their families are paid for *in toto* by the Group and generous assistance is given towards the cost of moving baggage and possessions.

The Anglo American Corporation with its associated groups, including De Beers, forms the largest single concern in South Africa. It has interests outside South Africa too, and has a reputation for progressive policies in regard to the welfare of its African and European employees.

Please send your application, giving full details of medical career to date, age, marital status and qualifications, together with the names of two referees to:

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”*

## Safe, Simple, Effective

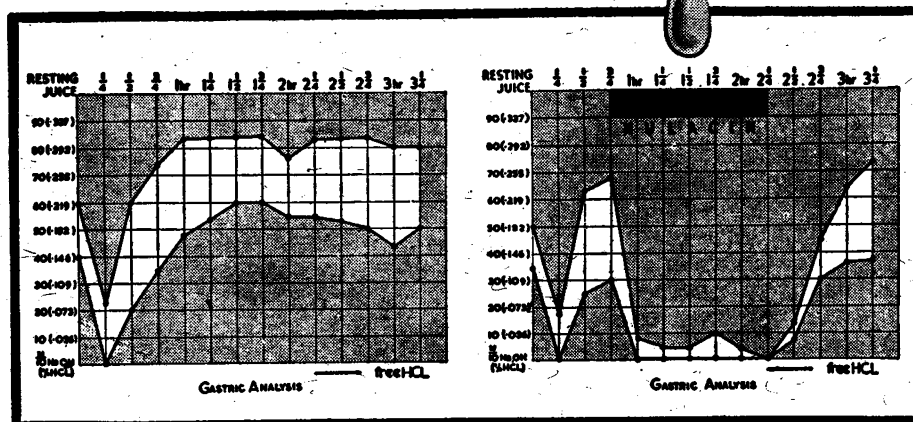

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.
