

## To lessen the fear of mutilation . . arrange for Prosthesis before mastectomy

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen—for women, men, children—you will find Spencer Supports demonstrably superior.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1,2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>4</sup>

Only her face will show that she's wearing Supp-hose. Many women reject support stockings because they think that such a stocking is thick and unattractive. Consequently they are prepared to sacrifice their health for the sake of their appearance. But this is where Elbeo Supp-hose stockings have a tremendous advantage; they look scarcely any different from everyone else's nylon stockings. They are made in fashionable colours—seamed or seamfree. They are sheer, unbelievably sheer for the strong support they give. Yet they give as much relief as the thicker type of support stocking and are entirely acceptable from a medical point of view.

**Medically beneficial.** Made in nylon yarn, specially coiled, twisted and fixed before the stockings are knitted, Supp-hose

stockings provide adequate compressive elastic support which is maintained over months of wear and washing. This makes them suitable for venous states of the lower extremities causing oedema and requiring elastic support. Supp-hose stockings will relieve, significantly, the symptoms associated with varicose veins, the post-phlebotic phenomenon or chronic venous insufficiency. Supp-hose can also be recommended to patients suffering from the condition termed 'tired legs', particularly during pregnancy.

**Thousands of women are wearing Supp-hose stockings.** Each year we receive dozens of enthusiastic testimonials. A report on clinical trials—and information about sizing—will gladly be sent on request. Write to Dept BM7, Elbeo House, Woodborough Road, Nottingham.

### ONE TABLET DAILY THROUGHOUT PREGNANCY

It is now known beyond doubt that megaloblastic anaemia of pregnancy is caused by deficiency of folic acid.

From the very excellent results obtained over the years by the prophylactic use of folic acid and iron given orally from the beginning of pregnancy it is becoming more and more generally accepted that anaemia of pregnancy can be prevented. The question of the optimum dose of folic acid has not been easy to establish but recent work\* suggests that not less than 300 mcg. and not more than 400 mcg. daily can be considered adequate.

In the light of this knowledge Folex-350 containing 350 mcg. of folic acid and 300 mg. of ferrous gluconate has been introduced.

Indomethacin

- relief of pain
- relief of stiffness
- increased mobility
- reduction in the need for other anti-arthritic agents, for example steroids
- suitable for long-term use

"It is clear from reported clinical experience that indomethacin is a powerful compound, capable of giving relief of symptoms and reduction of inflammatory signs in several rheumatic disorders."

*Brit.med.J.*, 1966, 1, 80 (8 Jan)

## 'Indocid' in soft tissue lesions

In acute musculoskeletal disorders such as bursitis, tendinitis, synovitis, and capsulitis of the shoulder, 'Indocid' rapidly decreases pain and increases mobility. A recent British double-blind study demonstrated that the majority of patients with capsulitis of the shoulder ('the painful stiff shoulder syndrome') showed both objective and subjective improvement within one week.

"The charts show that indomethacin was found to be significantly better than placebo for all four\* of the criteria measured."

## 'Indocid' and corticosteroids in arthritic disorders

In many cases where corticosteroids are being used the introduction of 'Indocid' may eliminate the need for steroids or permit a reduction in their dosage.

"Dosage of corticosteroids can quite frequently be reduced under cover of indomethacin; the effect of the two drugs appears to be simply additive." *Brit.med.J.*, 1964, 2, 429 (15 Aug)

The use of 'Indocid' may avoid or postpone the necessity for steroid therapy.

"During the two and a half years that indomethacin has been available to us it is of relevance to note that only three patients with rheumatoid arthritis have been started on long-term corticosteroid therapy or A.C.T.H. The fact that a non-steroid anti-inflammatory agent is now available may well make a profound difference to the present use of corticosteroids in this condition." *Brit.med.J.*, 1965, 2, 1231 (27 Nov)

The physician, trained to make rational choices, faces a problem when he comes to The Pill, for he knows that as far as the combined oral contraceptives are concerned all are virtually 100% effective.

He looks then for other significant differences. First of these is the incidence of side-effects. (*The latest data from the F.P.A. show that Lyndiol 2.5 is outstandingly free from side-effects*).

Price is another factor, especially as the acceptability of the oral contraceptive idea spreads down the socio-economic scale to those families who perhaps need contraception most and can afford it least. (*Lyndiol 2.5 offers the most reasonable price-to-patient*).

And he considers patient reliability – which dosage scheme will be easiest to follow? (*Lyndiol 2.5's 'fixed day' routine means simply that if a patient starts on, say, a Friday, she finishes three weeks later on a Friday and begins her new course on the following Friday*).

### A NEW ORAL MEDICATION

#### **A SAFE AND EFFECTIVE TOPICAL PREPARATION WITH IMMEDIATE ANALGESIC PROPERTIES**

Bonjela provides an effective remedy for lesions of the mouth. Relief from pain and rapid healing are achieved in nine out of ten cases of oral ulceration whatever the origin.

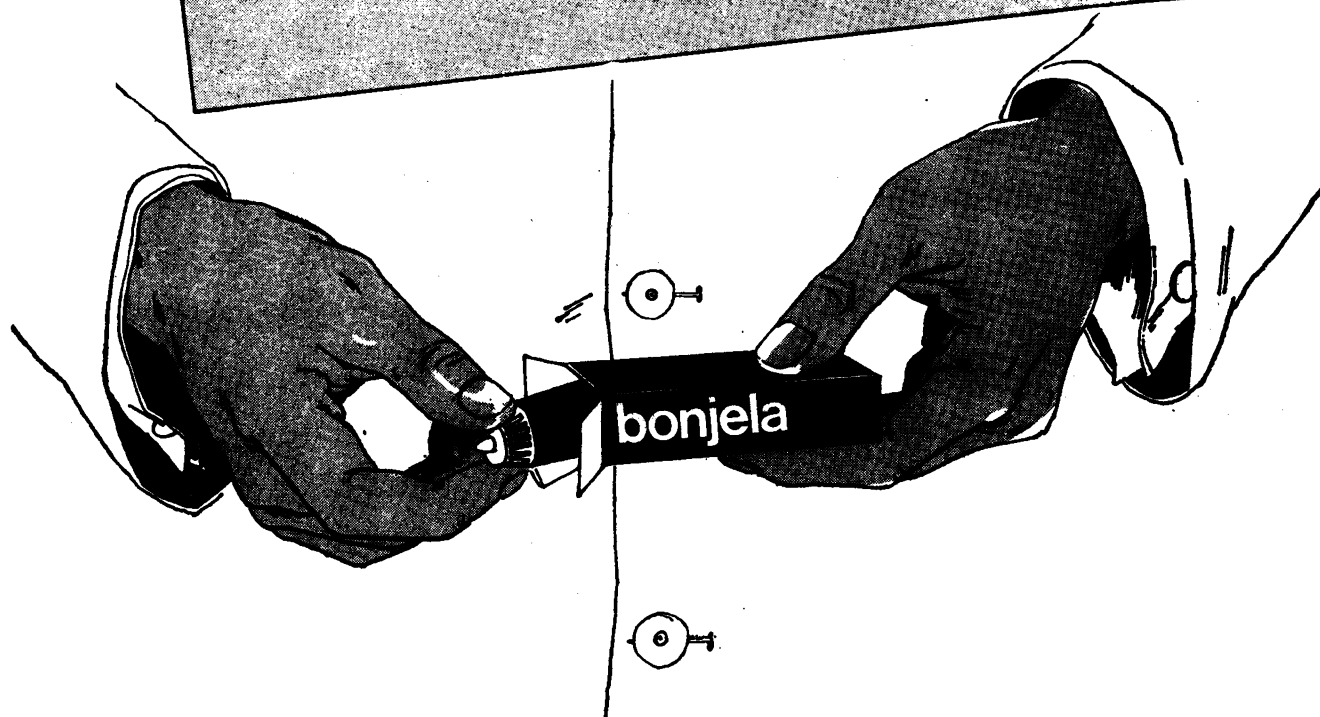

This high rate of response to Bonjela was revealed in American trials. Formal trials apart, an immediate clinical assessment may be made by applying Bonjela to any case of oral ulceration encountered. Pain or tenderness is usually relieved within a few minutes owing to the analgesic properties of choline salicylate and the anaesthetizing action of the alcoholic gel.

## Women at risk

**'... it is important to discover how many women with acute urinary infections are likely to suffer from serious renal disease in later life ...'**

*Lancet (1962), ii, 1246*

The high incidence of urinary tract infection in women is well known. Inadequately treated with simple symptomatic remedies, apparently mild attacks of cystitis or pyelitis in childhood or early adult life may smoulder subclinically

for many years—before reappearing as chronic and intractable pyelonephritis. Eradication of the infecting organisms is therefore essential in the treatment of every urinary tract infection, however mild.

(hetacillin, Bristol)

## the first penicinate

provides

a broad band of continuous activity

### The first penicinate

After world-wide evaluation, Bristol Laboratories introduces a new advanced bactericidal broad-spectrum antibiotic—hetacillin, Versapen.

For the first time, the basic 6-aminopenicillanic acid has been substituted in such a way as to produce a new chemical entity—the first penicinate. In such a drug, the amino nitrogen of 6-APA has been incorporated into a ring structure. Hetacillin is called a penicinate whether in the form of a salt such as the potassium salt or in the form of its free acid. More precisely, a penicinate is a 6-(5 oxo-1-imidazolidinyl) penicillinate.

Initially, Versapen was proved in the laboratory to possess bactericidal activity against a wide range of Gram-positive and Gram-negative organisms while the potential for toxicity remained very low. Now, in the hands of practising physicians, Versapen has been shown to be effective in patients with a wide variety of common infections. The low incidence of side-effects favours Versapen over many other broad-spectrum antibiotics.

### Versapen is clinically outstanding: 93.4% cured or improved

Among more than 1500 patients with infections caused by beta-haemolytic streptococci, the frequently resistant enterococci, *Escherichia coli*, *Diplococcus pneumoniae*, *Proteus mirabilis*, *Haemophilus influenzae* and many other Gram-positive and Gram-negative organisms, clinical results of

oral Versapen therapy were excellent.

Because of the wide range of bacteria involved, these results indicate that Versapen will be useful in almost all types of general and hospital practice.

### Broad-spectrum and bactericidal

The range of antibacterial activity of Versapen is comparable to other broad-spectrum antibiotics, including chloramphenicol and the tetracyclines. But, unlike these essentially bacteriostatic agents, Versapen is bactericidal. Common bacterial invaders are eradicated not just inhibited.

### Well tolerated and rarely causes side-effects

Haematopoietic and hepatic investigations reveal that Versapen is safe: no significant reactions have been reported. Note: Hetacillin shares with the penicillins a potential for producing allergic reactions.

### Extended blood levels

Antibacterial serum levels of Versapen are unusually prolonged. After a 250 mg. dose, bactericidal blood concentrations are preserved up to 6 hours and levels are detectable up to 8 hours. The patient benefits from *constant bactericidal action*. Usual adult dosage is 1 or 2 capsules four times per day. Versapen is best given before or between meals. Presentation: 250 mg. capsules, bottles of 20, 100 and 500.

# Available to all mothers under your care

The booklet "From Milk to Mixed Diet" is a comprehensive guide for mothers to the introduction of mixed feeding.

Written under the supervision of a consultant paediatrician, its 49 pages cover the diet of infants from 7 weeks to 18 months, and deal with the problems that are likely to arise during that time.

It gives advice on the use of the 75 varieties of Heinz Strained and Junior Foods, which are

specially prepared to provide a varied, nutritious diet for infants of this age.

Heinz will be pleased to present a copy of the Heinz booklet "From Milk to Mixed Diet" to each of the mothers under your care.

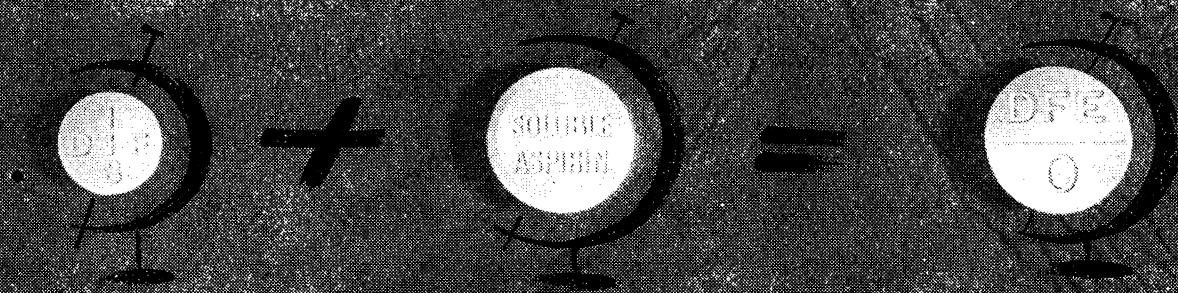

**For details of the nutritive value of Heinz Baby Foods and a specimen copy of the booklet "From Milk to Mixed Diet" please write to: Food Science Advisory Service, H.J. Heinz Co Ltd, Hayes Pk, Hayes, Middx.**

## THE BEST OF BOTH WORLDS

### The powerful analgesic effect of DF 118

Dihydrocodeine bitartrate (DF 118) has been widely used for a number of years as a powerful analgesic—it has no sedative or hypnotic properties.

### The established anti-inflammatory and analgesic effects of soluble aspirin

Despite the introduction of more potent and toxic agents, aspirin still holds its place as the most widely useful drug for the treatment of rheumatic pain. In Onadox-118 aspirin is presented in soluble form to aid rapid absorption and to minimise the risk of gastric intolerance or bleeding.

Detailed information will be supplied on request.

Steroids in asthma?  
**Betnesol**  
the soluble tablets

# Glaxo brief

## Steroids in asthma? **Betnesol** the soluble tablets

When asthma justifies steroid therapy, there is particular advantage in using Betnesol. Its exceptionally high anti-inflammatory activity ensures swift suppression of inflammatory symptoms with the minimal risk of oedema or hypertension and with negligible effect on the potassium balance. The superior potency of betamethasone gives therapeutic effectiveness at very low and economical dosage levels. Dropped into a glass of water, the tablets effervesce and dissolve to form a clear, palatable drink. There is evidence both clinical<sup>1</sup> and in animals<sup>2</sup> that Betnesol is often absorbed more efficiently than the relatively insoluble forms of corticosteroids. Because Betnesol is so well absorbed, it has the most constant therapeutic effect. The absence of solid steroid particles ensures better tolerance with less risk of gastric disturbance.

## Unique tablet for the safer management of hypertension **Neo-NaClex-K**

The treatment of mild hypertension is, of necessity, a life-long procedure and many hypertensives treated with thiazides, particularly the elderly or those with hepatic cirrhosis or heart failure, need continuous supplementary potassium.

Neo-NaClex-K contains bendrofluazide and potassium in a unique two layered combination. The white layer of the tablet contains 2.5 mg of bendrofluazide which is released shortly after the tablet is swallowed—thus providing smooth and sustained control of the blood pressure. The coloured layer of the tablet contains 630 mg potassium chloride as small crystals embedded in a protective matrix. These crystals are released very slowly so that no great concentration of potassium is reached at any one point in the gastro-intestinal tract—therefore minimising the danger of gastric irritation or small bowel ulceration.

## In atopic dermatitis Betnovate value is not only 5d a gram

Betnovate applied once or twice daily has often resolved atopic dermatitis that has resisted treatment with other topical steroids. This is one reason why many doctors prescribe Betnovate routinely for this condition—to relieve the pruritus and clear the lesion more quickly than with any other corticosteroid. Yet the cost of the most effective topical steroid available today<sup>1</sup> is less than 5d a gram. Of equal value in all other steroid-responsive skin disorders, Betnovate is prescribable in a wide variety of presentations formulated to cover specific therapeutic needs.

## New— less frequent maintenance injections in B<sub>12</sub> deficiency

A recent article on the use of hydroxocobalamin (Neo-Cytamen) concluded "From both biological and therapeutic aspect, hydroxocobalamin is preferable to cyanocobalamin and should therefore become the standard preparation for the treatment of vitamin B<sub>12</sub> deficiency."<sup>1</sup> From this report came laboratory evidence that higher and more persistent serum B<sub>12</sub> levels are obtained with hydroxocobalamin. This was confirmed clinically by a study of the maintenance treatment of pernicious anaemia that concluded "1000 µg of hydroxocobalamin every three months should be adequate."<sup>2</sup> A new maintenance dosage scheme

for Neo-Cytamen has recently been introduced (details upon request) in the light of this clinical evidence.

## At last — successful treatment for athlete's foot **Tinaderm**

Although Tinaderm (tolnaftate) has been available for only a few months it has quickly found ready acceptance by doctors. Their patients appreciate the soothing effect, prompt relief of symptoms (often within 24 to 48 hours) and rapid clearance of lesions—often within two to three weeks. Tinaderm penetrates the skin to kill the fungus and does not cause peeling or exfoliation. It may safely be applied directly to raw areas and does not sting, stick or stain. Clearly, therefore, Tinaderm is not 'just another preparation' for athlete's foot. Where others have failed, Tinaderm usually works.

Journal of the Association for the Study of Medical Education

Medical education today is presenting major problems in every country. Great changes are taking place and efforts are being made to discover in what directions still further changes are needed. There is a real need for better communications in medical education between Britain and other countries. These needs are met by a new journal, the *British Journal of Medical Education*. The Journal acts as a medium for interchange of information on medical education—Undergraduate, Postgraduate and Continuing—in the United Kingdom and Overseas. It is the official journal of the Association for the Study of Medical Education (A.S.M.E.). The first issue appeared in December 1966, and the second issue March 1967 has just been published. Subsequent issues will appear quarterly in June and September.

The *British Journal of Medical Education* sets out to fulfil A.S.M.E.'s aim of making more widely known what the British medical schools and postgraduate bodies are doing. Besides printing reports on medical education overseas, the Journal encourages the practical study of medical education, and takes particular interest in the evaluation of methods. It will thus form a useful link between medicine and development in education in other fields.

'Aventyl' comes promptly to the rescue of the patient beset by depressive symptoms. Published reports indicate that 'Aventyl' rapidly relieves black mood, lassitude, loss of appetite and sleep disturbance.

'Aventyl' reassures the doctor, too, because it is exceptionally free from the drawbacks of earlier psychostimulants. The side-effects of 'Aventyl', as reported in three years' widespread use, have rarely been troublesome.

Since the drug is not a MAO inhibitor, dietary supervision is not necessary.

**ADMINISTRATIVE****HEALTH SERVICE JOINT ADVISORY COMMITTEE FOR THE LIVINGSTON AREA**

**PRINCIPAL MEDICAL ADVISER**  
Applications are invited from registered medical practitioners for the newly created post of Principal Medical Adviser to the Health Service Joint Advisory Committee for the Livingston area.

The Committee, which consists of representatives of the Lothians and Peebles Executive Council, Midlothian County Council, West Lothian County Council, the South-Eastern Regional Hospital Board (Scotland), West Lothian (Bangour) Hospitals Board of Management and Livingston Development Corporation, is responsible for advising the constituent bodies on the development and co-ordination of the health services in the Livingston New Town area where it is hoped to achieve a closer integration between the three branches of the National Health Service.

The main element of the post will be that of Administrative Medical Superintendent for the general hospitals of the West Lothian group (including the district general hospital which it is intended to build in the new town), but there will be medical administrative duties on behalf of the Executive Council and the County Councils. The post offers a unique opportunity for a medical administrator to take a leading part in the development of community and hospital health services in a rapidly developing area.

Salary will be on the scale £3,085 by £130 (3) by £135 (3) to £3,880. The post will be permanent and superannuable (N.H.S. Superannuation Scheme), subject to the Whitley Council terms and conditions of service applicable to Medical Superintendents and to three months' notice on either side. Fuller particulars may be obtained from the Secretary to the Advisory Committee, 25 Stafford Street, Edinburgh 3, with whom applications, together with the names of three referees, should be lodged by May 22, 1967. "It should prove a most  
valuable drug in general  
practice where it is  
essential to avoid undue  
immobilization with its consequent  
loss of work"

*British Journal of Clinical Practice, January 1967.*

How effective is *Norgesic* in relieving pain? In a new trial on 478 patients, nearly nine out of every ten gained good or fair relief<sup>1</sup>.

These results are yet more proof that *Norgesic* quickly relieves pain and restores mobility in a large proportion of painful conditions treated in general practice. Average treatment time was six days—comparable with that of another trial where 87 per cent of 251 patients with painful muscular conditions recovered or were improved within five days<sup>2</sup>. In both trials *Norgesic* proved remarkably free of side-effects.

*Norgesic* contains not only the analgesic paracetamol but also orphenadrine citrate to ease painfully stiff muscles. Because muscle pain and stiffness so often aggravates pain, *Norgesic* gives relief extending beyond the scope of simple analgesics<sup>3</sup>. Pain is rapidly eased and the patient contributes to his own recovery through the ability to move freely again<sup>3</sup>.

1. *Brit. J. Clin. Pract.* (1967) 21:37 2. *Practitioner* (1963) 191:660

Each tablet contains Orphenadrine Citrate B.P.C. 35 mg. and Paracetamol B.P. 450 mg. Dosage is two tablets three times daily. Basic NHS prices: 100 tablets 14/4; 500 tablets 70/-.

Orphenadrine is a research development of N.V. Koninklijke Pharmaceutische Fabrieken v/h Brocades-Scheeman & Pharmacia, Amsterdam.

**By relieving local pain and easing stiff and painful muscles, *Norgesic* gives rapid and reliable relief, restores mobility and cuts short the time the patient is out of action.**
