## WITH A WILL!

When you are consulted about bequests for medical work that deserves support, please remember the work of the Imperial Cancer Research Fund. Founded on the initiative of the Royal Colleges of Physicians and Surgeons, the I.C.R.F. is fighting all forms of cancer, including leukaemia, with every weapon of modern science in up-to-date laboratories. It has no official grants and is entirely supported by voluntary contributions. Will you please help—now?

# Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be given after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).

# a striking demonstration of Lincocin penetration

**Heart tissue**  
Assay organism: *Streptococcus haemolyticus*

**Lung tissue**  
Assay organism: *Staphylococcus aureus*

**Lung tissue**  
Assay organism: *Diplococcus pneumoniae*

Since antibiotic effectiveness is dependent upon concentration at the site of infection, it is obvious that antibiotic diffusion and tissue penetration are of supreme importance. The accompanying photographs of an experiment in animals demonstrate Lincocin's capacity in this respect.

A healthy dog weighing 9.5 kg. was injected intramuscularly with 25 mg./kg. of lincomycin hydrochloride (base equivalent). After 90 minutes tissue samples were excised and placed on Petri dishes in which the agar had previously been seeded with pathogenic strains of *Staphylococci*, *Streptococci* and *Pneumococci*, respectively. Following incubation these photographs were taken of the plates containing either heart or lung tissue. The clear zones show that within 90 minutes Lincocin had penetrated these tissues in concentrations sufficient to inhibit growth of the pathogenic inocula.

**Lincocin Capsules:** Each capsule contains lincomycin hydrochloride monohydrate equivalent to 500 mg. lincomycin base, in bottles of 12 and 100.

THE LANCET

five patients. 10 ml. of blood was taken for serum-iron determination from the fasting patient who then took three tablets of 'Ferromyn S' (ferrous-succinate/succinic-acid mixture). Serum-iron levels were repeated 3 hours later. An increase of 100  $\mu$ g. per 100 ml. or more in the serum-iron indicates normal iron absorption. The iron tablets used in the test can be the preparation selected for treatment of the patient; but lately we have given all patients ferromyn S, since in our experience this has been the most effective oral iron tablet. We feel that iron malabsorption is certainly present if it occurs when ferromyn S is used. It is also better for comparison with other patients and for comparison with later tests in the same patients if a standard test is evolved. The test can be repeated with 800 mg. ascorbic acid taken orally at the same time and in addition to the iron. This test was repeated

Lancet 1967, 1,1297

# Why Ferromyn-S is more effective than other oral iron treatments.

The double radio isotope technique for measuring absorption of substances in the body\* eliminates the wide range of variables present in the normal clinical trial. Applications of this technique in experiments to determine the efficacy of common iron salts led to the discovery that Free Succinic Acid actively promotes the absorption of iron. When added in its optimum ratio an increase of 30% or more can be expected.

## What is the value of 30% greater absorption?

It is now widely accepted that the incidence of side effects associated with oral iron therapy is in direct ratio to the dosage of elemental iron. Ferromyn-S (Ferrous Succinate & Free Succinic Acid) contains less elemental iron than the conventional iron tablet but, because of the higher absorption, gives a better Haemoglobin response. At the same time, this combination of low iron

dosage and greater absorption significantly reduces the incidence of side effects encountered with the common iron salts. Ferromyn-S, therefore provides a high efficiency therapy at a cost of less than 2d. per day.

# A statement

## about hypertension and 'Esbatal' (Bethanidine)

---

An authoritative British clinical team found that control of blood pressure was achieved with 'Esbatal' in 73 to 87 per cent of the hypertensive patients they treated. Toxicity was not seen. Side-effects were rare. Tolerance was not a problem. Postural side-effects could usually be overcome by adjusting the dosage, timing of administration or by use of a diuretic.

The team with its wide experience in treating hypertension concluded that 'Esbatal' compares favourably with other established drugs. It comments that 'Esbatal' "has advantages which outweigh relative disadvantages in comparison with guanethidine or methyldopa". The incidence of side-effects, toxic effects and feelings of malaise were less with 'Esbatal' than with these two drugs.

To quote again from the report: "There would now seem to be no case for beginning treatment with guanethidine or methyldopa in any new patient, but either may be useful in any patient in whom treatment with one of the newer preparations is unsatisfactory."

For a full account of the trial which covered 82 patients and extended over  $2\frac{1}{2}$  years see the *British Medical Journal* 2nd December, 1967, pp. 519-521. Full information about 'Esbatal' brand Bethanidine Sulphate is available on request.

# footloose and fungus free

That's your athlete's foot patients after they've used Tinaderm (tolnaftate). They like the swift relief it brings from burning, itching and discomfort—often within 48 hours—followed by rapid clearance of lesions. That's because Tinaderm penetrates the lesion to kill the fungus rather than just suppressing the symptoms. There are two economical-to-use Tinaderm preparations—cream and powder. Tinaderm Cream can be safely applied to raw areas and does not sting, stain or have an odour. Tinaderm Powder is particularly useful where perspiration is excessive. It should be sprinkled liberally into footwear, socks and stockings which may act as reservoirs of infection. Good reasons to prescribe Tinaderm—the topical antifungal that usually works even when others fail.

## In the elderly, the special problems of constipation...

Constipation in the elderly can present special problems of treatment. Weakened abdominal muscles . . . the dangers inherent in straining . . . refusal to co-operate . . . the presence of pain, to which anal fissures or haemorrhoids may contribute . . . the need for enemas and suppositories . . . the risk of faecal impaction, with consequent manual removal . . .

Clinical trials have shown the distinctive value of *Dorbanex* in the treatment of the elderly patient. In a recent trial in a geriatric ward<sup>1</sup>, *Dorbanex* achieved 23% more bowel openings than did standardised senna, and 61% more than miscellaneous laxatives. The stool formation "allowed easy defaecation without an increase in faecal incontinence". Suppositories were needed only five times during 644 patient-days of treatment, and side-effects were negligible and transient.

"*Dorbanex* was readily accepted by all patients, even those with some degree of senile dementia to whom the administration of other medicaments has proved difficult"<sup>2</sup>. In this trial *Dorbanex* achieved an average of more than one bowel opening every day—an increase of more than 50% over the openings achieved by standard aperients. No patient complained of griping, whereas other medicaments had caused several such complaints. No suppositories were needed, and in 360 patient-days of treatment only one manual removal was performed.

*Dorbanex* can simplify management of the patient posing these problems by providing comfortable, reliable and trouble-free evacuation. *Dorbanex* produces a soft but well-formed stool without griping or other unpleasant side-effects, reduces the need for enemas and suppositories, helps to prevent faecal impaction, and makes defaecation easier without increasing faecal incontinence.

## ...have a straightforward solution

Now available in three forms—as capsules and in two strengths of liquid—*Dorbanex* provides in one preparation a balanced treatment for constipation. By softening the stool and stimulating peristalsis, *Dorbanex* prepares the way for pain-free evacuation.

1. *Practitioner* (1966) 196: 702 2. *Brit. Hosp. J. & S. S. Review* (1966) 77: 727

**Composition** *Dorbanex* is available in three forms—as capsules and in two strengths of liquid. **DORBANEX CAPSULES**: each capsule contains 1:8-dihydroxyanthraquinone 25 mg., poloxalkol 200 mg. **DORBANEX LIQUID**: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 25 mg., poloxalkol 200 mg. **DORBANEX FORTE**: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 75 mg., poloxalkol 1000 mg. **Dosage** **DORBANEX CAPSULES**: Adults, one or two capsules. Children, one capsule. **DORBANEX LIQUID**: Adults, one or two teaspoonfuls. Children, half to one teaspoonful, as required. Before or after surgery: two to four teaspoonfuls or two to four capsules. **DORBANEX FORTE**: one teaspoonful, or as directed by the physician. Treatment should be taken

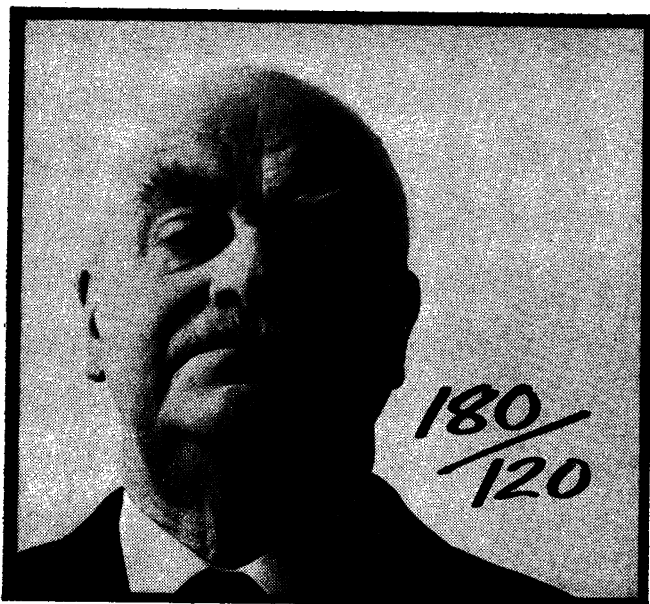

at bedtime. **Contra-indications** In common with other gastro-intestinal evacuants, *Dorbanex* should not be given when acute, painful conditions of the abdomen are present, or the cause of constipation is suspected to be obstruction of the small or large intestine. **Side-effects** Dihydroxyanthraquinone may cause a temporary harmless, pink or red colouring of the urine and, in prolonged use or high dosage, of the mucosa of the large intestine. Doses larger than two teaspoonfuls may cause slight gastro-intestinal discomfort in a few patients. **Basic NHS Prices** *Dorbanex* Capsules: bottles of 30 capsules 8/8; bottles of 300 capsules 78/-; *Dorbanex* Liquid: bottles of 60 ml. 4/-; bottles of 500 ml. 30/-; *Dorbanex* Forte: bottles of 60 ml. 6/-; bottles of 500 ml. 45/-. # True value of long-term antihypertensive therapy emerges from 5-year study

A unique clinical trial\* from a well-known British teaching hospital evaluated the long-term effects of reducing high blood pressure in more than 200 hypertensive patients, many of whom were treated for over 5 years with only one drug—

## Ismelin®

The following important findings emerged from this balanced and comprehensive report.

### Dramatic improvement in prognosis

"The outstanding feature among these results is of course the 5-year mortality of only 8 per cent—although scarcely less remarkable is the fact that all of the 11 patients who presented originally with malignant hypertension are still alive."

### Increased efficacy with long-term usage

"Over the whole series an average of 83 per cent were at least moderately controlled and over 60 per cent showed excellent or good control, but it is of interest that the standard of control improved very strikingly among patients treated in excess of 4 years with only 5 per cent of failures in these groups."

\* *Angiology*, 1967, 18: 705.

### Minimal interference with normal routine

"The surviving patients present on the whole a fairly happy picture, for the great majority are leading unrestricted lives, free from hypertensive headache. Very few are troubled by their treatment and none have abandoned it. . . . Side effects were not troublesome and diarrhoea was readily controlled by codeine phosphate."

## In angina pectoris Inderal is the only drug which protects the heart from the oxygen-wasting effects of emotion and effort

The results are: increased effort tolerance and a new concept in long-term relief

The action of Inderal is unique: where other treatments attempt either to improve blood flow by dilating the arteries, or simply to sedate the patient, Inderal, through adrenergic beta-receptor blockade, protects the heart from the action of adrenaline. There is a slowing of the heart rate and a reduction in the oxygen needs of the myocardium.

This represents a new concept of long-term relief of angina, rather

than just a treatment of the condition as and when it arises.

Inderal is unique in another way. It is the only treatment consistently proved in double-blind clinical trials. Trials have, in fact, produced an 80% success figure, with more pain-free days and increased effort tolerance. They also show that Inderal (unlike other forms of angina therapy) is of considerable value in very severe cases of angina.

We shall be pleased to send you complete information on Inderal. Please write to us.

Isn't it time  
we had a truly  
specific  
peripheral  
vasodilator?

# Opilon

Such peripheral vascular disorders as Raynaud's phenomenon, chilblains, acrocyanosis or excessively cold hands and feet have always been difficult to treat decisively. Now the introduction of OPILON gives the physician specific therapy for such conditions – because OPILON blocks the vasoconstrictor effect of noradrenaline in the arterioles of the skin. Unlike other vasodilators, OPILON does not alter blood flow to skeletal muscle; and because it is solely an alpha-adrenergic receptor blocking agent it cannot directly affect the heart or general circulation. When skin ischaemia is the cause of the complaint, OPILON reliably restores circulation.

OPILON is available as tablets of thymoxamine 40 mg., in bottles of 50 and 250. Basic NHS cost 18/- for 50 tablets, 84/- for 250 tablets. **Dosage:** One 40 mg. tablet four times a day, preferably at 8 a.m., 11 a.m., 2 p.m. and 5 p.m. **Side-effects:** Occasionally mild nausea, diarrhoea, vertigo, headache and facial flushing may be encountered. These are rare, however, and transient. No serious toxic effects have been reported and the development of tolerance has not been observed. **Contra-indications:** None is known. Full information and literature will gladly be sent on request.

# 2 weeks

In the treatment of psoriasis, triacetoxanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin. It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages — it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol — 1,8,9-triacetoxanthracene — has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

*Pharmaceutical Journal* (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency . . . It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable."

*British Medical Journal* (1966) 2, 993

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxanthracene without any adverse reaction occurring"

*British Medical Journal* (1967) 1, 682

"After three weeks treatment with triacetoxanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

*British Journal of Dermatology* (1967) 79, 491

**Psoriasis case history.** Male patient aged 72 years with widespread chronic psoriasis admitted to hospital 18th October, 1966. Exolan Cream prescribed for application twice daily. Psoriasis practically clear; patient discharged 1st November, 1966.

Exolan is the only specific treatment for Psoriasis which has been given an A.2. classification by the Standing Joint Committee on the Classification of Proprietary Preparations.

(A.2.: "A preparation of a single therapeutically active drug which has been shown to the Committee's satisfaction to have an acceptable degree of efficacy in relation to its toxicity and therapeutic indications and which in the light of alternative available preparations can be recommended for use.")

Exolan is entirely a product of British research.

# FOLIC ACID DEFICIENCY and ANAEMIA OF PREGNANCY

*Introducing*

## FOLEX-350

CONTAINING FOLIC ACID 350 MICROGRAMS IN EACH TABLET

DOSE

### ONE TABLET DAILY THROUGHOUT PREGNANCY

It is now known beyond doubt that megaloblastic anaemia of pregnancy is caused by deficiency of folic acid.

From the very excellent results obtained over the years by the prophylactic use of folic acid and iron given orally from the beginning of pregnancy it is becoming more and more generally accepted that anaemia of pregnancy can be prevented. The question of the optimum dose of folic acid has not been easy to establish but recent work\* suggests that not less than 300 mcg. and not more than 400 mcg. daily can be considered adequate.

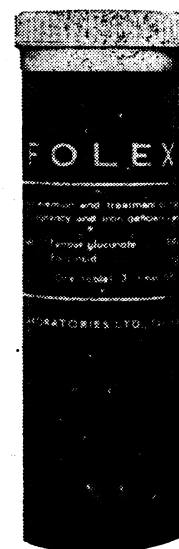

In the light of this knowledge Folex-350 containing 350 mcg. of folic acid and 300 mg. of ferrous gluconate has been introduced.

Not necessarily.

In fact, Michael's story might have been an unpleasant one if the NSPCC hadn't been around.

Handouts won't help people like Michael's parents. (Sending them to prison won't help Michael much, either.) What they need is careful supervision over a long period of time. That's our job—being there in an emergency, at any time of day or night, whenever things go wrong; being there all the time from then on, to make sure things never get that bad again.

We think our way is better for Michael, and that's the important thing.

**ST. PETER'S COLLEGE  
Oxford****MEDICAL RESEARCH FELLOWSHIP**

The governing body of St. Peter's College proposes in the course of Trinity Term 1968 to elect to a Medical Research Fellowship to be held from October 1, 1968, or from such later date as may prove mutually convenient.

The Fellowship, which is being financed by the National Fund for Research into Polio-myelitis and Other Crippling Diseases, is offered for research in Oxford in clinical or pre-clinical medical science, with a preference for the study of neurology. The research should be relevant to the advancement of knowledge of crippling diseases.

The Fellowship will be tenable for a period of three years, but might be renewed for a further period of two years at the discretion of the National Fund. The stipend will be related to National Health Service and/or University salary scales, dependent upon the age and qualifications of the Fellow elected. The Fellow will have a lunching and dining allowance and possibly, if unmarried, rooms in College. He will be required to join the Federated Superannuation Scheme for Universities, unless he is already a member of another approved scheme. He will be encouraged to undertake a limited amount of teaching subject to the approval of the governing body.

Preference will be given to candidates who are under thirty years of age. The candidate should send his application, a statement of his career, a list of his published work, if any, a short statement of his proposed subject of research, and the names of three referees, to the Master, St. Peter's College, Oxford, not later than May 15, 1968. L. Emery from whom further particulars may be obtained. This post would be suitable for a person wishing to work for a higher degree and wishing to specialize in children's pathology. Salary according to qualifications and experience in the range £1,950 to £2,550 with superannuation provision. Applicants, with the names of two referees, to the Secretary, Congenital Anomalies Research Centre of the Department of Child Health, Thornbury Annex, Fulwood Road, Sheffield 10, by April 18, 1968. (17667)

**DOCTORS ABROAD.** Copies of vacancies advertised in the "Journal" can be sent by AIR MAIL. The minimum cost is 3s. per week, which covers up to five separate headings: additional headings 1s. each. Orders for specific grades cannot be accepted. PLEASE ENCLOSE PAYMENT to avoid delay.

**UNIVERSITY OF EDINBURGH  
DEPARTMENT OF ORTHOPAEDIC SURGERY**

Applications are invited for the following posts, which will become vacant in the summer of 1968: (1) SENIOR LECTURER; (2) LECTURER and (3) TEMPORARY LECTURER, initially for one year.

The responsibilities of the Senior Lecturer include undergraduate and post-graduate teaching and its organization. The clinical duties will be variable in proportion to the commitment to research. The Senior Lecturer will have Consultant status at the Royal Infirmary and the Princess Margaret Rose Orthopaedic Hospital, but will share with the Professor clinical responsibility for the service. The total number of beds in the department is over 400, the Consultant teaching staff numbers 10.

The two Lecturers are responsible for the day to day organization of the undergraduate teaching and take a major part in this. They will also be involved and take part in many aspects of the recently established four-year orthopaedic training programme. The clinical duties are those of Senior Registrar to the Professor and Senior Lecturer, and perhaps other members of the Consultant staff. Each Lecturer rotates around the Royal Infirmary where there is trauma, adult orthopaedic out-patients and a major commitment to hand surgery, the Princess Margaret Rose Orthopaedic Hospital with in-patient elective orthopaedics, and the Royal Hospital for Sick Children.

There will be considerable opportunities for research. It is hoped that the Senior Lecturer, and if desired the Lecturers, will spend half their time in research, clinical or laboratory. The Senior Lecturer will have responsibility for supervising and training junior staff in research.

Salary scales—Senior Lecturer, £3,050 to £4,000 per annum; Lecturers, £1,470 to £2,995 per annum, together with superannuation benefit.

Further details of the posts and arrangements for visits may be obtained by writing to Professor J. L. P. James, Clinical Research Unit, Princess Margaret Rose Orthopaedic Hospital, Fairmuir, Edinburgh 10.

Applications, by letter (six copies) giving the names of three referees, should be lodged with the Secretary, University of Edinburgh, Old College, South Bridge, Edinburgh 8, not later than April 15, 1968. (17636)

**THE MATHILDA AND TERENCE  
KENNEDY INSTITUTE OF  
RHEUMATOLOGY  
London W.6**

The Management Committee invite applications, from graduates or medicine, for the position of Head of the Division of Immunology within the Institute.

The Institute, opened in 1966 within the grounds of the West London Hospital, already has fully staffed divisions of biochemistry, cellular biology and experimental pathology, and a clinical research division based on the rheumatology services of the West London Hospital, which comprises approximately 20 beds together with out-patient facilities. The Institute is permanently endowed by the Mathilda and Terence Kennedy Charitable Trust and the Arthritis and Rheumatism Council. The present staff of the building is 50; ultimately not less than 100 persons will be accommodated. Existing equipment includes cold work rooms, electron microscope laboratory, high speed centrifuges and all facilities needed for contemporary immunology. A redesigned animal house with isolation, isotope and breeding rooms will shortly be opened.

Applicants should possess wide experience of research in an immunological field and show evidence of ability to direct a research group and to supervise research students. The Head of the immunology division will be granted a wide measure of academic freedom in building up his/her research programmes but he/she should be prepared to collaborate in work already under way on experimental arthritis, immunofluorescence and analysis of muscle, isotope probes for the measurement of the inflammatory reaction and tissue culture.

The position is a permanent appointment, with a salary appropriate to that of reader in a university department, and both teaching and clinical diagnostic work can be arranged. Contribution to F.S.S.U. is obligatory.

Further particulars from the Secretary, Kennedy Institute of Rheumatology, Bate Gardens, London W.6, to whom applications should be addressed by May 30, 1968. (17758)

The Wellcome Research Laboratories

## VIROLOGISTS

Continued expansion necessitates the recruitment of a medical and a veterinary graduate, or microbiologists with good honours degrees, to assist in the production of viral vaccines and to take part in associated research and development projects. Previous experience of research and laboratory techniques would be an advantage, but recent graduates will be considered.

Successful applicants will have the prospect of permanent careers in a large department with excellent facilities in which research and production programmes covering a wide field of human and veterinary virology are being prosecuted. There is considerable scope for personal initiative, and publication of results is encouraged.

Please write for application form and further details, quoting reference AM.389, to The Senior Personnel Officer, The Wellcome Research Laboratories, Langley Court, Beckenham, Kent, BR3 3BS. (17738)

# MINISTRY OF OVERSEAS DEVELOPMENT

## The Need

### GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

**The Opportunity** Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

**The Advantages** Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained.

**Salaries** Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum.

**Training Scheme for Recently Qualified Doctors** In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

President:  
Lieutenant-Colonel J. Chandos-Pole, O.B.E.  
Medical Director:  
James Harper, M.B., F.R.C.P. (Edin.), D.P.M.  
This private hospital receives patients, both  
male and female, suffering from nervous and  
mental disorders, including alcoholism and  
senile illness. The fees range from two  
guineas per week. Private rooms  
special nurses can be provided, either in  
hospital or in one of the villas in the  
grounds. The hospital is situated in 130  
acres of pleasant grounds which provide all  
recreational facilities. These include a nine-  
hole golf course, sports ground, tennis  
courts, etc. A recreation and occupation  
centre, known as Gloucester House, has been  
opened recently which includes an occupa-  
tional therapy department, a swimming pool,  
a squash court and a library with an adjoining  
reading room.

**WANTAGE HOUSE**  
This is a separate reception unit to which  
patients may be admitted. It is equipped  
for the complete investigation of nervous and  
mental disorders by the most modern  
methods. All forms of treatment are avail-  
able. Charges for treatment at St. Andrew's are  
allowable for benefit to British United Pro-  
vident Association and Private Patients Plan  
subscribers.  
For terms and further particulars apply  
to the Medical Director (Telephone No.  
34354, Northampton), who can be seen in  
London by appointment.

# in staphylococcal infection of the gastro-intestinal tract

**powerful · bactericidal · antistaphylococcal**

The potential severity and the rapidity of staphylococcal enterocolitis demand prompt and specific antibacterial therapy—often well before sensitivity reports become available. FUCIDIN is rapidly and easily absorbed; its unique molecular structure and metabolism lead to biliary concentrations up to 12 times higher than serum levels and bactericidal distribution throughout the alimentary tract. FUCIDIN exhibits remarkable ability to reach the nidus of infection even in the presence of pus, and does not disturb normal bowel flora. For early control of infection FUCIDIN has proved a reliable and economical choice—in over five years of clinical use.
