## Best for British women

### New Feminor 21—Specially formulated for efficient conception control

The dose of oestrogen required for consistent inhibition of ovulation shows individual and racial differences. For British women the best results have been obtained with 0.1 mg.\* Feminor 21 is thus the ideal formulation for them. To inhibit ovulation it employs 0.1 mg of an oestrogen (mestranol) alone for the first sixteen days—with the addition of a progestogen

(norethynodrel) for the last five days to establish a normal, secretory endometrium. Because the total amount of hormone taken is limited to that necessary for effective inhibition of ovulation there is minimum physiological disturbance. The sequential dosage establishes a very regular menstrual cycle with a marked reduction in side effects such as breakthrough bleeding, breast discomfort and weight gain. The 21-tablet regimen is simple to follow, and the new cosmetic-type pack is designed for ease and convenience.

Feminor 21 is presented in packs con-

taining three months supply. A pack containing one month's supply is also available. Each monthly course consists of 21 tablets: 16 pink tablets containing mestranol 0.1 mg, 5 white tablets containing mestranol 0.1 mg, norethynodrel 2.5 mg.

Basic NHS Cost: 15/- three month pack, (5/10d one month pack).

# Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be given after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).  
*Pripsen can be mixed with milk or water.*

Well, things may look a little different from Charlie's end.

To him, childhood probably seems like a long, dark, tunnel with no end in sight. And the kind of childhood Charlie has should tell you something about the sort of man he's going to be.

There are lots of kids around like Charlie. (Last year we helped 90,000). Chances are they'll grow up to follow the example their parents are setting right now, unless somebody does something about it. That's one of our reasons for being—we try to break the mould.

We got to Charlie in time. He knows his parents' way isn't the only one. (So do they—now.) Please help us help the other 89,999.

# VARICOSITY?

## She'll willingly take your advice if it means wearing fashionable Burson Lightweights

A woman's psychological need for fashion often makes her reluctant to accept your advice to wear elastic stockings. Burson Lightweights have been specially created to provide the answer.

Undetectable in wear, they are truly acceptable to the most fashion-conscious woman—yet are completely effective in relieving the pain and discomfort of a mild varicose condition and are approved by the N.H.S.

Made of alternating strands of strong, supple elastic with strands of sheer nylon, Burson Lightweights combine strength and resilience with stretch in **both** directions. Horizontal stretch eases the pressure of distended veins; vertical stretch aids the natural flow of blood

back to the heart. Available under N.H.S. (on the EC 10 form) in six normal stocking sizes scientifically adjusted to fit all leg shapes, they come in a pleasing shade.

Thus, in specifying Burson Lightweights when prescribing for mild varicosity, you will ensure your patient's relief from discomfort—whilst preserving her confidence and femininity.

# BALANCED ANTACID TREATMENT

## Plus anti-flatulent properties

By its dual action, Diovol restores gastric acid balance, quickly dispels flatus and relieves the pain and discomfort of gastric distension. The silicone defoaming agent infiltrates the mucoid bubbles in the stomach, causes them to burst and release the imprisoned gas.

Diovol is NOT, therefore 'just another antacid' but represents a remarkable advance in the therapy of dyspepsia and peptic ulcer, and for the dispersion of wind post-operatively—particularly after abdominal surgery.

**'BANISTYL'**  
the "wide awake"  
antihistaminic

**One tablet three times daily effective  
in most cases**

**Little if any soporific effect**

**Well tolerated by patients of all ages**

'Banistyl' is generally well tolerated at the recommended dosage levels; side-effects are usually of a mild and transient nature. Somnolence is infrequent and generally not marked; when it does occur, it frequently subsides after the first few days of treatment or may be controlled by dosage adjustment. Other side-effects which have been reported and which are usually of little significance include nausea, epigastric pain, vertigo, diarrhoea and headache.

Although there is no evidence to suggest that 'Banistyl' is embryopathic, it is a sound medical principle to avoid, wherever possible, prescribing a new drug during the first three months of pregnancy.

Certain activities, including control of vehicles or machinery, should not be undertaken by a patient starting a course of 'Banistyl' until it is evident that the drug has no soporific or other central nervous system side-effects, or until any such effects have subsided.

'Banistyl' is supplied as tablets containing the equivalent of 20 mg. dimethothiazine (as mesylate).

**Heart Tissue**Assay organism: *Streptococcus hæmolyticus***Lung tissue**Assay organism: *Staphylococcus aureus***Lung tissue**Assay organism: *Diplococcus pneumoniae*

Since antibiotic effectiveness is dependent upon concentration at the site of infection, it is obvious that antibiotic diffusion and tissue penetration are of supreme importance. The accompanying photographs of an experiment in animals demonstrate Lincocin's capacity in this respect.

A healthy dog weighing 9.5 kg. was injected intramuscularly with 25 mg./kg. of lincomycin hydrochloride (base equivalent). After 90 minutes tissue samples were excised and placed on Petri dishes in which the agar had previously been seeded with pathogenic strains of *Staphylococci*, *Streptococci* and *Pneumococci*, respectively. Following incubation these photographs were taken of the plates containing either heart or lung tissue. The clear zones show that within 90 minutes Lincocin had penetrated these tissues in concentrations sufficient to inhibit growth of the pathogenic inocula.

## movement...

"Movement is the foundation of treatment for all relatively minor injuries, and is vital for all major injuries except insofar as it can interfere with the healing of damaged tissues . . . *Norgesic*, by relieving the pain of muscle spasm, allows this movement to take place without discomfort"

*Norgesic* quickly restores movement to painfully stiff muscles and provides rapid relief of pain in a wide range of painful muscular conditions where movement can make an important contribution to recovery. How? By the complementary actions of paracetamol and orphenadrine.

What difference does this make? Orphenadrine provides an action beyond the scope of a simple analgesic – relief of the painful and incapacitating muscle spasm that aggravates pain and delays recovery in most patients with a painful muscular condition<sup>1,2,3,4,5,6,7</sup>.

By both relieving pain and easing painfully stiff muscles *Norgesic* overcomes the limitations of other treatments which – because of their restricted action – seldom relieve pain fully, and do little to hasten recovery<sup>1</sup>.

Recovery is hastened with *Norgesic*. Of 251 patients with painful muscular conditions, nearly nine out of every ten recovered or were improved in only five days with *Norgesic*<sup>1</sup>. Six days was the average treatment time in another successful trial<sup>1</sup>, on 478 patients, where again nearly nine out of every ten gained uniformly good or fair relief of pain.

... the foundation of treatment

**Norgesic** "...should prove to be a most valuable drug in general practice where it is essential to avoid undue immobilization with its consequent loss of work"<sup>1</sup>

<sup>1</sup> *Brit. J. Clin. Pract.* (1967) 21:37. <sup>2</sup> *Medical Digest* (1965) 11:61. <sup>3</sup> *Practitioner* (1963) 191:660. <sup>4</sup> *Amer. Med. Each tablet contains Orphenadrine Citrate B.P.C. 35 mg. and Paracetamol B.P. 450 mg. Dosage is two tablets three times daily. Side-effects: within the recommended dosage, undesirable side-effects are uncommon. Dry mouth, nausea, blurring of vision, dizziness, restlessness or drowsiness may however occur in some patients susceptible to the parasympatholytic action of orphenadrine. These symptoms disappear rapidly following reduction of dosage or withdrawal of treatment. Contraindications to *Norgesic* result from the parasympatholytic

type action of orphenadrine. *Norgesic* should not be given to patients with glaucoma, urinary retention (e.g. in prostatic hypertrophy or bladder neck obstruction) or myasthenia gravis. It should be used with caution in patients with tachycardia.

# footloose and fungus free

That's your athlete's foot patients after they've used Tinaderm (tolnaftate). They like the swift relief it brings from burning, itching and discomfort—often within 48 hours—followed by rapid clearance of lesions. That's because Tinaderm penetrates the lesion to kill the fungus rather than just suppressing the symptoms. There are two economical-to-use Tinaderm preparations—cream and powder. Tinaderm Cream can be safely applied to raw areas and does not sting, stain or have an odour. Tinaderm Powder is particularly useful where perspiration is excessive. It should be sprinkled liberally into footwear, socks and stockings which may act as reservoirs of infection. Good reasons to prescribe Tinaderm—the topical antifungal that usually works even when others fail.

# THE EVIDENCE...

A recent article\* gives a guide to the choice of the appropriate oral contraceptive for the individual patient. The observation is made that potency cannot be inferred from milligram dosage. It is also stated that most of the side-effects experienced with oral contraceptives are related to the oestrogen/progestogen balance of the compound and it classifies Lyndiol 2.5 centrally between the most strongly progestogenic and the most strongly oestrogenic oral contraceptives. It is these facts which constitute the basis of Organon's claim that Lyndiol 2.5 is a truly low-dose oral contraceptive and is a truly well-balanced preparation.

\*'Today's Drugs'.  
Brit.med.J., 1, 690 (1968)

Further support for the suitability of Lyndiol 2.5 in the majority of patients comes from the first randomised double-blind crossover trial conducted on a number of oral contraceptives\*\*. The study, which made detailed comparisons between 4 leading oral contraceptives in 1673 cycles of therapy, and which confirmed that Lyndiol 2.5 has only minimal side-effects, is a further aid to the selection of a suitable oral contraceptive.

In the treatment of psoriasis, triacetoxanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin. It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages — it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol — 1,8,9-triacetoxanthracene — has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

*Pharmaceutical Journal* (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency . . . It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable."

*British Medical Journal* (1966) 2, 993

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxanthracene without any adverse reaction occurring"

*British Medical Journal* (1967) 1, 682

"After three weeks treatment with triacetoxanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

## In angina pectoris Inderal is the only drug which protects the heart from the oxygen-wasting effects of emotion and effort

The results are: increased effort tolerance and a new concept in long-term relief

The action of Inderal is unique: where other treatments attempt either to improve blood flow by dilating the arteries, or simply to sedate the patient, Inderal, through adrenergic beta-receptor blockade, protects the heart from the action of adrenaline. There is a slowing of the heart rate and a reduction in the oxygen needs of the myocardium.

This represents a new concept of long-term relief of angina, rather

than just a treatment of the condition as and when it arises.

Inderal is unique in another way. It is the only treatment consistently proved in double-blind clinical trials. Trials have, in fact, produced an 80% success figure, with more pain-free days and increased effort tolerance. They also show that Inderal (unlike other forms of angina therapy) is of considerable value in very severe cases of angina.

We shall be pleased to send you complete information on Inderal. Please write to us.

### **Theory and Practice of Family Psychiatry**

by John G. Howells  
with edited contributions

This is the first detailed exposition of a new approach to psychiatric treatment, Family Psychiatry. The author describes the theory and practice of his system, whereby the family group replaces the individual as the functional unit in psychiatry. There is an extensive bibliography. The author's dimensional system is illustrated by selected papers from the world literature and welds together the family psychiatrist, the family doctor and the family social worker in a cohesive system of practice.

### NATIONAL HEALTH SERVICE

#### EXECUTIVE COUNCIL FOR

#### LIVERPOOL

#### NETHERLEY

#### (TYPE D INITIAL PRACTICE

#### ALLOWANCE)

Applications are invited to commence practice with group practice prospects in this area of rapid housing development on the outskirts of Liverpool.

This is anticipated to be between 15,000 and 20,000 persons will be accommodated on the estate.

Building has commenced on one part of the estate and will proceed by stages to completion by the end of 1971. Arrangements will be made for temporary surgery accommodation for the use of the first doctor on the new estate.

Preliminary arrangements have also been made for a group building adjacent to local authority services. But no firm decision has yet been taken as to whether or not the building will be administered as a group practice building or as a health centre.

The vacancy attracts a special Type D allowance for a doctor with the necessary qualities and experience. The experience expected is normally about ten years as a qualified doctor, of which two years have been in hospital appointments and five in a busy general practice in the United Kingdom.

Interested applicants are advised to read F.C.N. 631. Further particulars may be obtained from the Clerk, Liverpool Executive Council, 30 Princes Road, Liverpool 8, to whom applications, on form E.C.16A, should be sent and to arrive not later than May 25, 1968. Apply (H.7895)

The department of psychiatry has openings for young physicians, with initiative, in the following courses, effective July 1, 1969. However, for people who would like to submit their applications now, there may be opportunities available before that date.

1. Four-year diploma course—provides basic training in psychiatry to suitable applicants who have completed a general internship. There has been a sizeable increase in the salary offered, which begins at approximately \$5,000 per annum, with yearly increases.

2. Master of Science in Psychiatry—students may major in an approved clinical or laboratory research project. Candidates are required to have finished three years in psychiatry before taking this course.

3. Training in psychoanalysis—recognized by the Canadian Psychoanalytic Society, as leading to graduation as a qualified psychoanalyst, for selected students.

Applications for entry to these courses should be made without delay to the Coordinator of Postgraduate Education, Department of Psychiatry, McGill University, Montreal 2, Quebec. (H.7664)

### EDINBURGH POSTGRADUATE BOARD FOR MEDICINE (The University of Edinburgh, The Royal College of Physicians of Edinburgh, The Royal College of Surgeons of Edinburgh)

The Board announces important changes in the form and duration of certain of its courses:

#### INTERNAL MEDICINE

The course which is held during the spring months will be extended and will last for a period of 18 weeks. It will consist of a series of sequential independent courses covering the major specialties together with additional general subjects, and will be designed for younger graduates and is especially suitable for those who are preparing to specialize in medicine and proceed to a higher diploma.

The fee for the full course is £60.

The first extended course will commence on January 13, 1969.

The course, which is conducted in the autumn term and which lasts for 13 weeks, will continue to be held as in previous years, and in 1969 will commence on September 15.

#### SPECIALIST COURSES IN MEDICINE

To meet the needs of senior doctors of Registrar and Consultant status seeking a revision course and a review of more recent developments in the specialties, short courses have been organized in conjunction with the general course. These will include attendance at the appropriate section of the general course, together with special additional tutorials and demonstrations. The number of students admitted to these specialist courses will be limited to 20. Application may be made for enrolment on the courses individually or in combination.

#### PAEDIATRICS

January 13/24 (2 weeks—Fee £10)

#### ENDOCRINOLOGY AND RENAL DISEASE

January 27/February 14 (3 weeks—Fee £15)

#### RESPIRATORY DISEASE

February 17/28 (2 weeks—Fee £10)

#### CARDIOLOGY

March 3/14 (2 weeks—Fee £10)

#### GASTROENTEROLOGY

March 17/28 (2 weeks—Fee £10)

#### RHEUMATOLOGY

April 8/11 (4 days—Fee £7)

#### HAEMATOLOGY

April 14/18 (1 week—Fee £7)

#### NEUROLOGY

April 28/May 16 (3 weeks—Fee £15)

#### BASIC SCIENCES

The course in the Basic Sciences held annually in the spring term will be extended over a period of 16 weeks but will be comparable in content to that held during the autumn term. The purpose of extending the course is to permit students to have greater time for personal study and reading. The course will be divided into two parts. Part I (6 weeks) will cover the general aspects of Anatomy, Physiology and Pathology; Part II (10 weeks) will deal with more detailed topographical Anatomy and the application of the Basic Sciences to matters of special surgical interest. The whole course is designed for those preparing for the Primary Fellowship examination of the Royal College of Surgeons. For candidates preparing for other examinations the first part of the course may be of particular value and students may enrol for Part I only.

The fee for Part I of the course will be £20, the fee for the whole course being £38.

The course in the autumn will continue in its present form over a period of 13 weeks, commencing in 1969 on September 16.

#### SURGERY

The course in Surgery which has been held during the autumn term for postgraduates preparing for the higher diplomata has been withdrawn. The comparable course in Surgery which is held during the spring will continue as in previous years, commencing in 1969 on February 17.

#### TRENDS IN SURGICAL PROGRESS

An intensive course at advanced level and suited for senior postgraduates of Registrar and Consultant status will be held from November 4 to 29, 1968, designed for those wishing to follow a revision course emphasizing recent developments in the practice of surgery. The course will consist of lectures, demonstrations and discussions, and will cover the recent developments both in general surgery and in the specialties. Visits to special clinics and departments have been arranged to correlate with the material discussed in the course.

The class will be limited to 40.

The fee will be £30.

Further information regarding the above courses may be obtained from the Director of Studies, Edinburgh Postgraduate Board for Medicine, Pfizer Foundation, Hill Square, Edinburgh 8, to whom application for admission should also be made.

## SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

**HOUSE OFFICERS:** Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year; £1,200 per annum for posts held during the second year; £1,300 per annum for posts held during the third and subsequent years, subject to full registration. Deductions of £150 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

**SENIOR HOUSE OFFICERS:** £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years. Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

**REGISTRARS:** £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points, will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

**SENIOR REGISTRARS:** £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANTS:** £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

# MINISTRY OF OVERSEAS DEVELOPMENT

## The Need

### GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

**The Opportunity** Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

**The Advantages** Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained.

**Salaries** Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum.

#### Training Scheme for Recently Qualified Doctors

In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

# SAFE SIMPLE EFFECTIVE NULACIN

**EFFECTIVE**, because Nulacin achieves *continuous* neutralisation of hyperacidity. As peptic ulcers arise and recur only in the presence of free acid, Nulacin not only relieves symptoms but is the ideal long-term medical treatment.

**SIMPLE**, because Nulacin is specially designed to dissolve slowly in the mouth and produce a continuous intragastric milk-alkali drip in the ambulant patient. One tablet provides up to 30 minutes' relief from excess acid.

**SAFE**, because clinical experience has shown that Nulacin produces no electrolyte disturbances and can be used in *all* patients with peptic ulcers.

NULACIN is a unique combination of whole milk protein and fats with dextrans, maltose and suitable antacids and provides *economical*, long-term medical treatment for peptic ulcer.
