

# Why Penbritin<sup>Regd.</sup> is so powerful against bronchitis

Because many organisms can cause the different types of bronchitis, it is imperative to use an antibiotic which is active against all of them . . . for in General Practice treatment often has to begin before the causative organism can be identified. Penbritin's activity covers all penicillin-sensitive organisms, and Gram-negative organisms as well. Penbritin is bactericidal. Unlike most other broad-spectrum antibiotics which merely inhibit bacterial growth, Penbritin kills bacteria. This is an advantage in the treatment of any patient—and virtually essential when treating children, the old and others whose natural defences are inadequate.

Penbritin has the safety of a penicillin. It is free from dangerous or permanent side-effects\* . . . of special interest in the treatment of children.

Penbritin's broad spectrum, bactericidal action and comparative safety, endorsed by many world references, establish it as a powerful force against bronchitis.

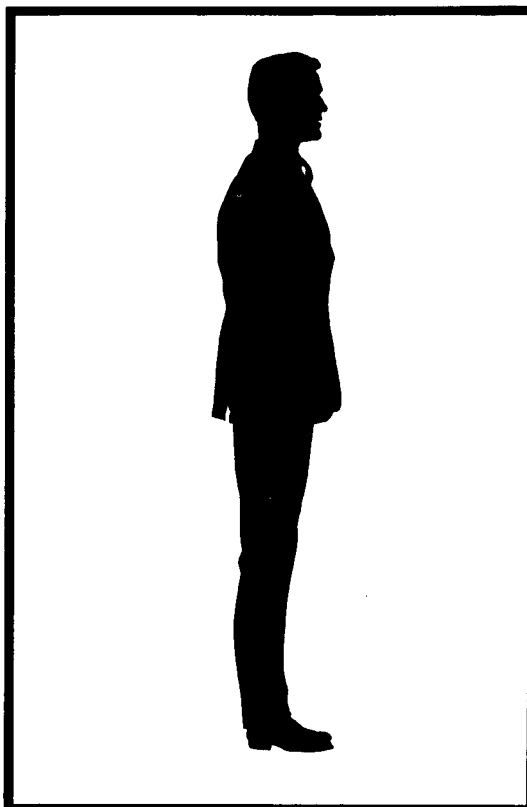

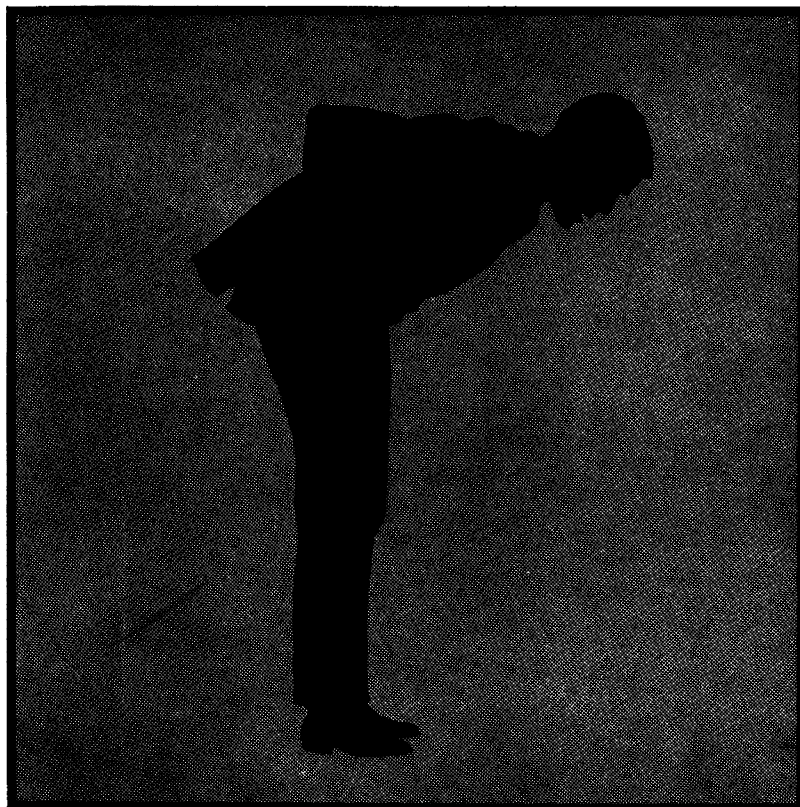

Penbritin is also highly effective in other respiratory tract infections including: Sinusitis · Pharyngitis · Laryngitis · Tonsillitis · Pneumonia.

# the two 'vital statistics' of Tenuate

## Efficacy

Recent double-blind placebo controlled trials confirm the effectiveness of Tenuate in helping patients to lose weight.

"The 37 patients in the drug-treated group who completed at least 11 weeks of study lost an average of 11.3 lb . . . the ten controls, in contrast, gained an average of 0.6 lb."<sup>1</sup>

"During an antiobesity trial lasting an average of 6.4 weeks, patients in the diethylpropion hydrochloride (Tenuate) group lost an average of 7.3 lbs. compared with an average total weight loss in the control group of 0.1 pound."<sup>2</sup>

## Acceptability

The acceptability of Tenuate, as shown by freedom from troublesome side effects has also been confirmed in double-blind studies.

"No cardiovascular side effects were reported in this series of patients."<sup>\*2</sup>

<sup>\*</sup>Patients with angina pectoris.

"There was no significant difference between the frequency of side effects reported by those receiving placebo and those receiving diethylpropion hydrochloride."<sup>1</sup>

These papers on controlled studies were published recently, and are representative of the continuing stream of reports which confirm the efficacy and acceptability of Tenuate to help patients keep to a weight reducing diet.

You can be confident that today's prescription for Tenuate is backed by a tremendous wealth of experience, controlled assessment and approval.

# INTAL COMPOUND

## the new prophylactic approach to the management of allergic asthma.

INTAL\*, disodium cromoglycate, is a new compound which reduces the asthmatic response to allergen exposure in sensitised individuals.

It is not a bronchodilator, antihistamine or corticosteroid.

The new drug is administered by inhalation and presented as single dose capsules, SPINCAP\* capsules, for use in a specially designed inhaler the SPINHALER\* insufflator.

Clinical benefits are reflected as: Reduced incidence and severity of acute attacks □ Improved exercise tolerance □ Reduced chest tightness and wheeze □ Reduced cough and sputum production.

The therapeutic management is eased by: Reduced use of bronchodilators □ Reduced requirement for corticosteroids □ Low toxicity and wide safety margin.

Each SPINCAP contains 20 mg. Disodium cromoglycate and 0.1 mg. Isoprenaline Sulphate B.P. to form INTAL COMPOUND\*.

**Note:** Isoprenaline sulphate is included within the formulation to offset the transient mild bronchospasm that occurs in some subjects on inhalation of a dry powder.

## *for Sacro-iliac strain* *a narrow belt alone is not enough . . .*

That is why Spencer Designers incorporate an easily adjustable pelvic binder (see inset below) inside each Spencer created for Sacro-iliac strain.

A narrow belt alone will not provide adequate continuous immobilization of the sacro-iliac joints, because such a belt will *not* stay in place. With ordinary body movements, any narrow belt alone will ride up and dig in at the back, thus causing faulty posture that increases the disability. That is why every Spencer Sacro-iliac Support is a "belt within a support" designed to the necessary heights and lengths to bridge the lumbar curve and correlate abdominal and back support. Thus improvement in posture—essential to relief in sacro-iliac strain—is attained and maintained.

Every Spencer—for abdomen, back, breasts—is individually designed, cut and made for each patient.

## In angina pectoris Inderal is the only drug which protects the heart from the oxygen-wasting effects of emotion and effort

The results are: increased effort tolerance and a new concept in long-term relief

The action of Inderal is unique: where other treatments attempt either to improve blood flow by dilating the arteries, or simply to sedate the patient, Inderal, through adrenergic beta-receptor blockade, protects the heart from the action of adrenaline. There is a slowing of the heart rate and a reduction in the oxygen needs of the myocardium.

This represents a new concept of long-term relief of angina, rather

than just a treatment of the condition as and when it arises.

Inderal is unique in another way. It is the only treatment consistently proved in double-blind clinical trials. Trials have, in fact, produced an 80% success figure, with more pain-free days and increased effort tolerance. They also show that Inderal (unlike other forms of angina therapy) is of considerable value in very severe cases of angina.

We shall be pleased to send you complete information on Inderal. Please write to us.

# Cotazym B

re-establishes normal digestion in...

Biliary disorders, in common with hepatitis, gastro-intestinal surgery or infection, and senility can lead to digestive dysfunction, malabsorption and indigestion.

In such cases, the patient will often mistakenly resort to self-medication with antacids. Your own diagnosis of enzyme deficiency will normally suggest replacement therapy—but it is important that this dietary reinforcement should be as complete as possible, as it is with Cotazym B. Its content of lipase, trypsin, amylase, cellulase and oxbile extract usually re-establishes normal digestion in the patient who complains of abdominal discomfort, flatulence, distension and nausea.

Unlike pancreatic preparations which are standardized on amylase and trypsin activity, the pancrélipase in Cotazym B is standardized on lipase. A daily dose of six Cotazym B tablets provides sufficient lipase, trypsin, amylase and cellulase to digest 50 gm. fat, 100 gm. protein, 250 gm. starch and 480 mg. cellulose.

# OPILON

## selectively improves blood flow in the skin

Strain-gauge plethysmography is one of several techniques for evaluating blood flow in limbs. These tracings were produced using this technique: the steepness of the slopes of the tracing is representative of blood volume. In this instance the patient suffered

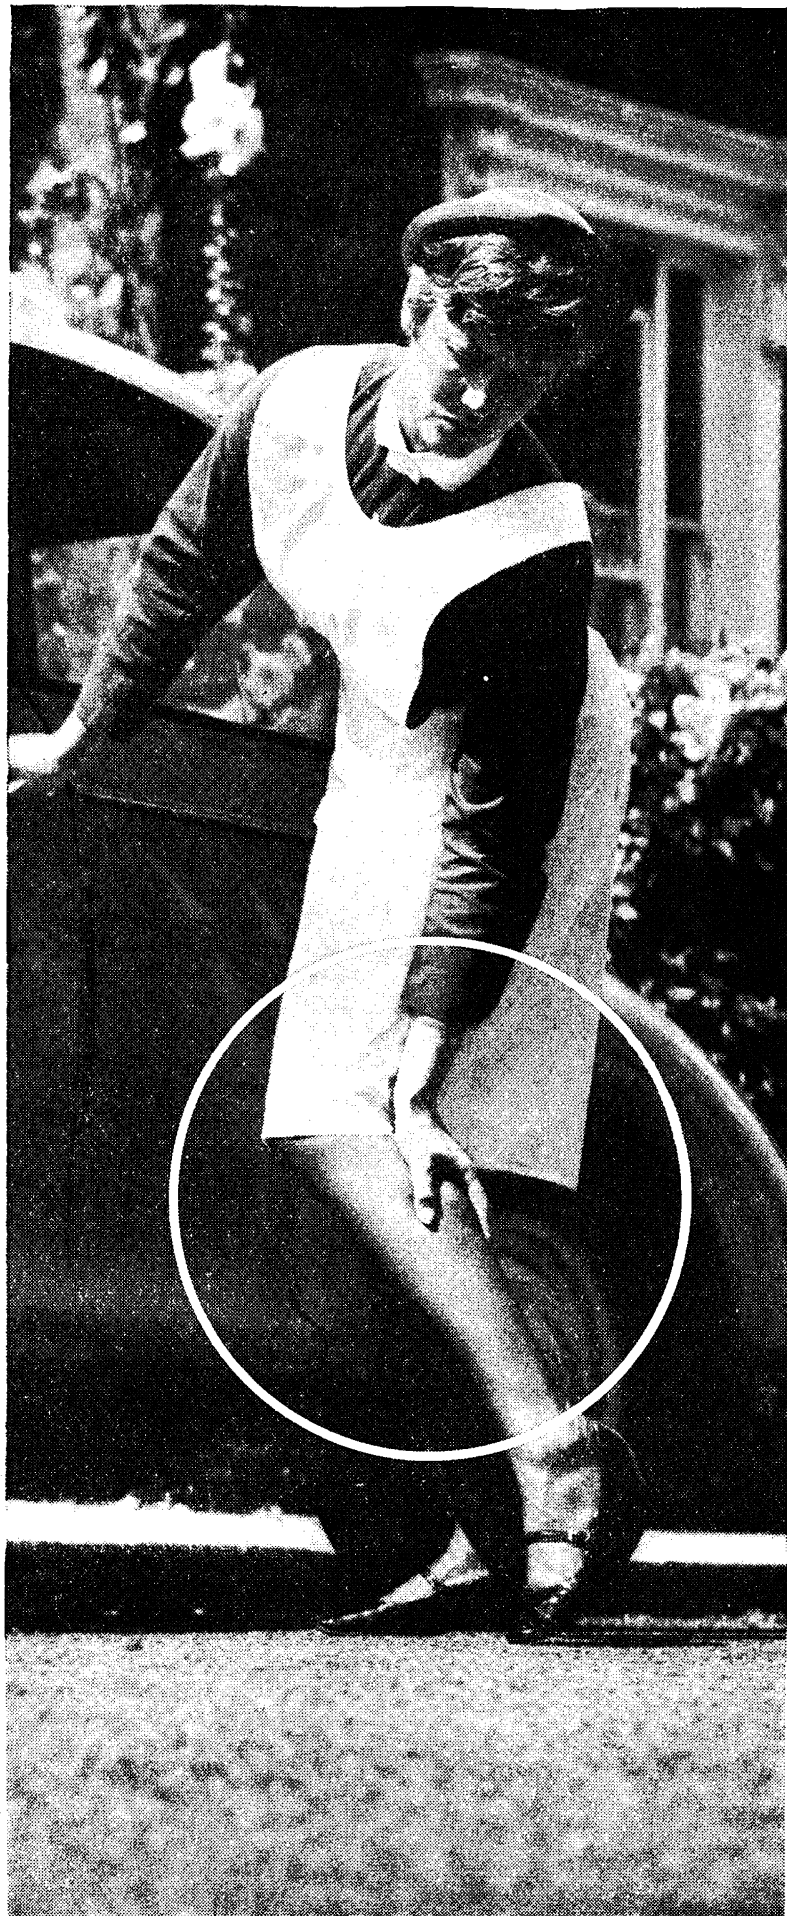

from Raynaud's phenomenon in both hands. The tracing above shows blood flow in the finger before treatment, and that below after treatment with OPILON (thymoxamine). The dramatic increase in blood flow is as much as fifteen times.

Opilon is a specific alpha adrenergic blocking agent and its action is confined almost entirely to the periphery. Clinical evidence such as that described above, shows its beneficial influence on blood flow in the skin and superficial tissues. Opilon is not related to the nicotinic acid derivatives and unlike the beta adrenergic drugs, such as isoxuprine, does not affect cardiac rhythm.

Opilon is indicated where peripheral ischaemia is evident, such as Raynaud's phenomenon, chilblains, Ménière's syndrome, acrocyanosis and excessively cold hands and feet. Opilon may also be used to maintain nutrition of the skin, important in many occlusive peripheral disorders.

Tablets of 40 mg thymoxamine in bottles of 50 and 250.

## Mixogen

Appreciating the limited role of sedatives and tranquillizers in what is essentially a metabolic disturbance, physicians are turning increasingly to the treatment that masters the immediate symptoms of depression and irritability and acts at a fundamental level as prophylaxis against the long-term consequences of ovarian-pituitary imbalance.

'Today when the average woman can expect to reach her threescore years and ten, it would seem unrealistic to deny hormone treatment, which not only alleviates all the troublesome and antisocial symptoms of the menopausal and postmenopausal phases but is also a prophylactic measure against osteoporosis, senile vaginitis, hypertension, and coronary heart disease, to mention but a few hazards of oestrogen depletion.'

The arguments against the use of plain oestrogen therapy – endometrial bleeding and nausea – are countered when Mixogen is used.

'Perhaps the best way of avoiding oestrogenic bleeding is to use one of the oestrogen-testosterone combinations, of which the original – Mixogen – is the best.'<sup>2</sup>

# Vasogen Silicone

## —for skin protection in cases of bedsores, napkin rash cracked skin, itching and other skin disorders

Vasogen Silicone has high water repellent properties and protects the skin from irritants induced or aggravated by contact with aqueous liquids, body fluids and exudations. It is effective also in the treatment of sore buttocks, excoriation, plaster sores, maceration, some conditions of eczema and can be used after colostomy. Vasogen Silicone is easy to apply and is almost invisible on the skin. It provides an acceptable protective barrier that is maintained effectively for lengthy periods.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1,2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3,4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

#### NATIONAL HEALTH SERVICE

#### EXECUTIVE COUNCIL FOR

#### LIVERPOOL

#### NETHERLEY

#### (TYPE D INITIAL PRACTICE

#### ALLOWANCE)

Applications are invited to commence practice with group practice prospects in this area of rapid housing development on the outskirts of Liverpool.

It is anticipated that between 15,000 and 20,000 persons will be accommodated on the estate.

Building has commenced on one part of the estate and will proceed by stages to completion by the end of 1971. Arrangements will be made for temporary surgery accommodation for the use of the first doctor on the new estate.

Preliminary arrangements have also been made for a group building adjacent to local authority services. But no firm decision has yet been taken as to whether or not the building will be administered as a group practice building or as a health centre.

The vacancy attracts a special Type D allowance for a doctor with the necessary qualities and experience. The experience expected is normally about ten years as a qualified doctor, of which two years have been in hospital appointments and five in a busy general practice in the United Kingdom. Interested applicants are advised to read E.C.N. 631.

Further particulars may be obtained from the Clerk, Liverpool Executive Council, 36 Princes Road, Liverpool 8, to whom applications, on form E.C.16A, should be sent and to arrive not later than May 25, 1968. (H.7695)

### NUFFIELD TRAVELLING FELLOW- SHIPS FOR GENERAL PRACTITIONERS OF THE UNITED KINGDOM

As part of its programme for the advancement of health, the Nuffield Foundation, in co-operation with the College of General Practitioners, is prepared, in 1968, to award to men and women of the United Kingdom:

Three Fellowships (each for a period of six consecutive months) to enable general medical practitioners of outstanding ability, preferably between the ages of 35 and 45, to undertake approved study overseas in July to December, 1969, in some subject of importance to general practice. The value of the Fellowship award will cover for the Fellow (and for his wife) tourist return travel by air and other fares at tourist rates, together with an adequate subsistence allowance, and provision for the cost of employing an approved Assistant during his absence.

Applications for these awards must be received by the Nuffield Foundation not later than October 1, 1968. The conditions of the Fellowships and application forms may be obtained from the Director, the Nuffield Foundation, Nuffield Lodge, Regent's Park, London N.W.1. (H.7381)

### THE MATHILDA AND TERENCE KENNEDY INSTITUTE OF RHEUMATOLOGY London W.6

**HEAD OF IMMUNOLOGY**  
The Management Committee invite applications, from graduates in science or medicine, for the position of Head of Division of Immunology within the Institute.

The Institute, opened in 1966 within the grounds of the West London Hospital, already has fully staffed divisions of biochemistry, cellular biology and experimental pathology, and a clinical research division based on the clinical services of the West London Hospital, which comprises approximately 20 beds together with out-patient facilities. The Institute is permanently endowed by the Mathilda and Terence Kennedy Charitable Trust and the Arthritis and Rheumatism Council. The present staff of the building is 50; ultimately not less than 100 persons will be accommodated. Existing equipment includes cold work rooms, electron microscope laboratory, high-speed centrifuges and all facilities needed for contemporary immunology. A redesigned animal house with isolation, isotope and breeding rooms is now in use.

Applicants should possess wide experience of research in an immunological field and show evidence of ability to direct a research group and to supervise research students. The Head of the Immunology Division will be granted a wide measure of academic freedom in building up his/her research programmes but he/she should be prepared to collaborate in work already under way on experimental arthritis, immunofluorescence, analysis of muscle, isotope probes for the measurement of the inflammatory reaction and tissue culture.

The position is a permanent appointment, with a salary appropriate to that of reader in a university department and both teaching and clinical diagnostic work can be arranged. Contribution to F.S.S.U. is obligatory.

Further particulars from the Secretary, Kennedy Institute of Rheumatology, Bury Gardens, London W.6, to whom applications should be addressed by May 31, 1968. (H.7839)

THE LANCET

five patients. 10 ml. of blood was taken for serum-iron determination from the fasting patient who then took three tablets of 'Ferromyn S' (ferrous-succinate/succinic-acid mixture). Serum-iron levels were repeated 3 hours later. An increase of 100  $\mu$ g. per 100 ml. or more in the serum-iron indicates normal iron absorption. The iron tablets used in the test can be the preparation selected for treatment of the patient; but lately we have given all patients ferromyn S, since in our experience this has been the most effective oral iron tablet. We feel that iron malabsorption is certainly present if it occurs when ferromyn S is used. It is also better for comparison with other patients and for comparison with later tests in the same patients if a standard test is evolved. The test can be repeated with 800 mg. ascorbic acid taken orally at the same time and in addition to the iron. This test was used in

Lancet 1967, 1,1297

# Why Ferromyn-S is more effective than other oral iron treatments.

The double radio isotope technique for measuring absorption of substances in the body\* eliminates the wide range of variables present in the normal clinical trial. Applications of this technique in experiments to determine the efficacy of common iron salts led to the discovery that Free Succinic Acid actively promotes the absorption of iron. When added in its optimum ratio an increase of 30% or more can be expected.

## What is the value of 30% greater absorption?

It is now widely accepted that the incidence of side effects associated with oral iron therapy is in direct ratio to the dosage of elemental iron. Ferromyn-S (Ferrous Succinate & Free Succinic Acid) contains less elemental iron than the conventional iron tablet but, because of the higher absorption, gives a better Haemoglobin response. At the same time, this combination of low iron

dosage and greater absorption significantly reduces the incidence of side effects encountered with the common iron salts. Ferromyn-S, therefore provides a high efficiency therapy at a cost of less than 2d. per day.

Full information is available on request.

# **Triptafen-DA**

TRADE MARK

## **for depression and anxiety**

***amitriptyline hydrochloride-perphenazine  
combined antidepressant and tranquilliser***

In a retrospective study of 113 patients with depression the response rate was over 95 per cent for Triptafen-DA therapy and 65 per cent for amitriptyline therapy.

*(Brit. J. Psychiat., 1967, 113, 201)*

In a double-blind controlled trial in 129 patients with depression, improvement occurred in 79 per cent of patients treated with Triptafen-DA and in 30 per cent of patients treated with placebo.

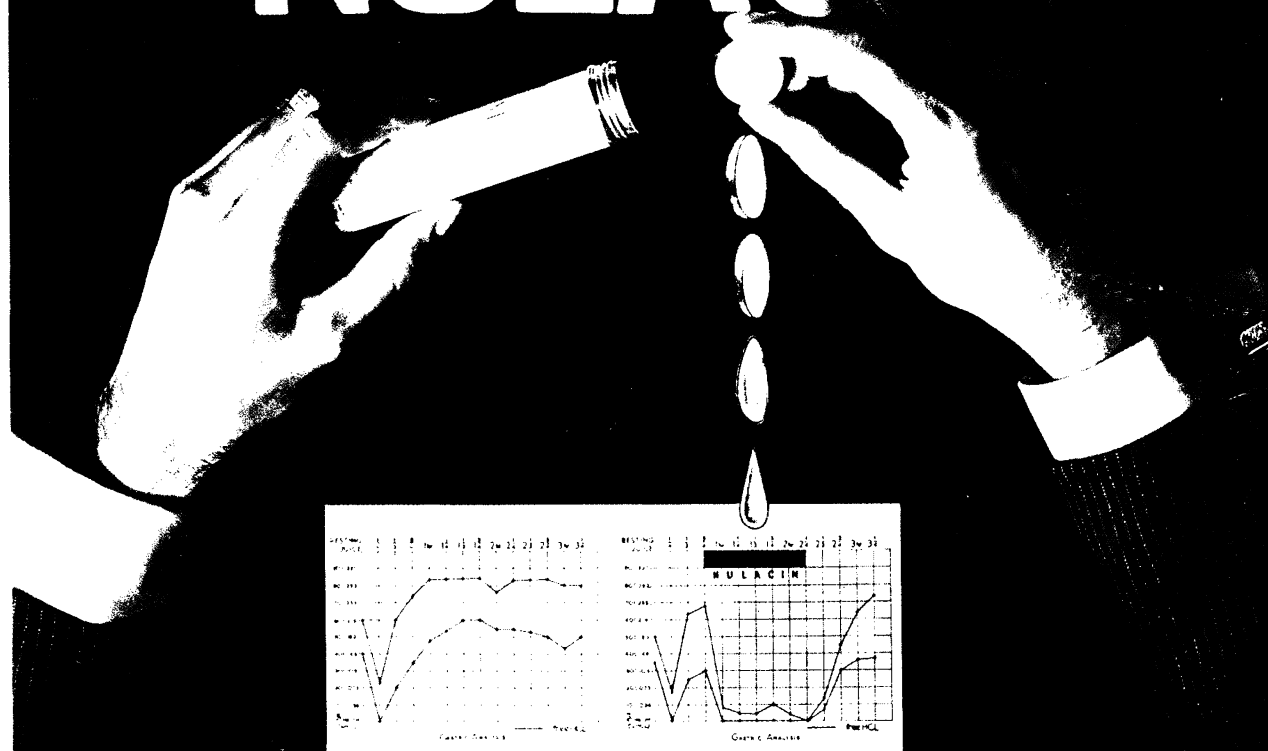

*(Brit. J. Psychiat., 1967, 113, 195)*

Each Triptafen-DA Tablet contains amitriptyline hydrochloride BP 25 mg and perphenazine BP 2 mg; in containers of 50 and 500. Each 2 teaspoonfuls (10 ml) of Triptafen-DA Suspension contain 37.5 mg amitriptyline embonate (equivalent to 25 mg amitriptyline hydrochloride BP) and 2 mg perphenazine BP; in bottles of 142 ml and 500 ml. Full information available on request.

Triptafen is a trade mark of **ALLEN & HANBURYS LIMITED LONDON E2**

# SAFE SIMPLE EFFECTIVE NULACIN

**EFFECTIVE**, because Nulacin achieves *continuous neutralisation* of hyperacidity. As peptic ulcers arise and recur only in the presence of free acid, Nulacin not only relieves symptoms but is the ideal long-term medical treatment.

**SIMPLE**, because Nulacin is specially designed to dissolve slowly in the mouth and produce a continuous intragastric milk-alkali drip in the ambulant patient. One tablet provides up to 30 minutes' relief from excess acid.

**SAFE**, because clinical experience has shown that Nulacin produces no electrolyte disturbances and can be used in *all* patients with peptic ulcers.

NULACIN is a unique combination of whole milk protein and fats with dextrans, maltose and suitable antacids and provides *economical*, long-term medical treatment for peptic ulcer.
