Third Olympic triumph for

'Streptotriad'

Selected for the British Team for the third successive time: this is the outstanding record of 'Streptotriad'.

"Other teams had an appreciable amount of diarrhoea, but no cases occurred in the U.K. teams." *Br. med. J.*, 4, 653, 1967.

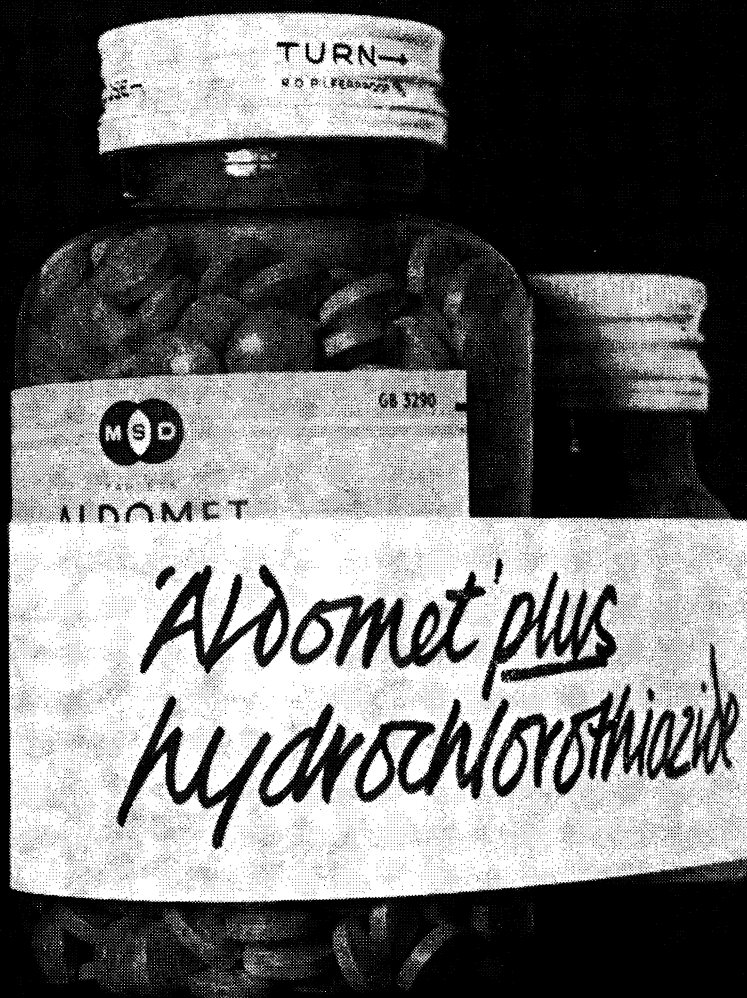

"The measures taken against gastro-enteritis were completely successful . . . None of the athletes suffered any ill-effect from taking 'Streptotriad', nor suffered any effect on performance." *Report of Medical Research Project into Effects of Altitude in Mexico City in 1965*, British Olympic Association, London, 1966.

Protection for all who may eat strange foods in strange places, 'Streptotriad' is supplied as tablets, each containing Streptomycin (as Sulphate B.P.) 65 mg., Sulphadiazine B.P. 100 mg., Sulphadimidine B.P. 100 mg. and Sulphathiazole B.P.C. 100 mg.

two complementary anti-hypertensive agents—but 'single tablet' convenience

Hydromet

Methyldopa BP and hydrochlorothiazide BP ®

For many hypertensive patients, 'Hydromet' is often the most suitable treatment. 'Hydromet' contains both methyldopa and hydrochlorothiazide, a combination already widely used in this country for the severer grades of hypertension. Note the substantial advantages which 'Hydromet' can bring to your patients:

- the convenience of a single tablet
- 'Hydromet' usually makes a satisfactory control of blood pressure possible on a lower dosage of methyldopa
- in some severe and resistant cases, 'Hydromet' can produce a greater antihypertensive response than methyldopa alone
- the diuretic action of hydrochlorothiazide is useful when hypertension is complicated by heart failure and oedema
- symptomatic postural hypotension is much less frequent than it is with other powerful antihypertensive agents

Available as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and 15 mg hydrochlorothiazide BP. Detailed information is available to physicians on request.

private treatment today

In this space BUPA reports from time to time on matters which may be of interest to those concerned with private treatment in this country. BUPA's own interest is clear and declared; we believe a strong private sector in medicine to be an essential corollary to a successful public sector. Alone among the provident associations, we are sponsoring (through Nuffield Nursing Homes Trust) the creation of new and expanded facilities for private treatment.

BUPA'S Twenty-First Anniversary

It is now twenty-one years since, in April 1947, a number of small provident associations amalgamated to form a company limited by guarantee called the British United Provident Association.

During its first year, BUPA's membership totalled only 38,000 and even the most optimistic of the Association's founder members could hardly have foreseen the dramatic growth in membership that was to take place over the next two decades.

In 1956 membership exceeded 250,000—ten times that of five years before. Today there are 638,000 subscribers to BUPA and, including dependants, the total number of people protected by the Association has reached almost 1½ million—a rate that shows quite clearly the value that so many people place on private treatment.

BUPA Forms New Company

BUPA has formed a Company—BUPA Nursing Services Ltd.—to operate a nursing agency. BUPA, alone of provident associations, has already taken action—through its associate organisation Nuffield Nursing Homes Trust—to provide accommodation for private patients, and this latest venture is designed to ensure an adequate supply of fully trained nursing staff both for private hospitals and nursing homes and for nursing private patients at home.

In order to fulfil this function BUPA Nursing Services Ltd. has acquired the old-established Home, Colonial and Overseas Nurses Association, which is one of the largest nursing agencies in London and places staff in hospitals and nursing homes throughout Britain and overseas. Mrs. B. M. Moor, S.R.N., C.M.B.I., O.N.D., who has owned the Home, Colonial and Overseas Nurses' Association since 1958, and is responsible for its rapid growth in recent years, will continue in charge of BUPA Nursing Services Ltd. as Director of Nurses. The new Company will work in close liaison with BUPA branch offices throughout the country and with Nuffield Nursing Homes Trust.

International Conference on Voluntary Health Insurance

E. D. Roberts, General Manager of BUPA, left London in April for Sydney, where he attended the 2nd International Conference on Voluntary Health Insurance which took place from April 29 to May 4. The first International Conference, which was held in Dublin in 1966, attracted more than one hundred delegates from thirteen countries, and was a valuable forum at which many items of common interest to non-profit medical schemes were discussed.

Mr. Roberts was a member of the five-man committee which met in London last year to prepare a draft constitution for an International Federation of Voluntary Health Insurance Organizations. This constitution was submitted to the Sydney conference. At present about two hundred million people throughout the world are covered by Voluntary Health Insurance.

Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be given after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).
Pripsen can be mixed with milk or water.

Candida could well be the culprit!

Candida albicans is an increasingly common cause of vaginitis. Against this organism Candeptin has a rapid, specific cidal effect. *In vitro* tests have shown that it inhibits *Candida albicans* more powerfully than either nystatin or amphotericin B. Local application quickly relieves symptoms, resolves infection. Over 90% success rates have been achieved—including characteristically difficult cases as in pregnancy and infections of long standing.

INTAL COMPOUND

the new prophylactic approach to the management of allergic asthma.

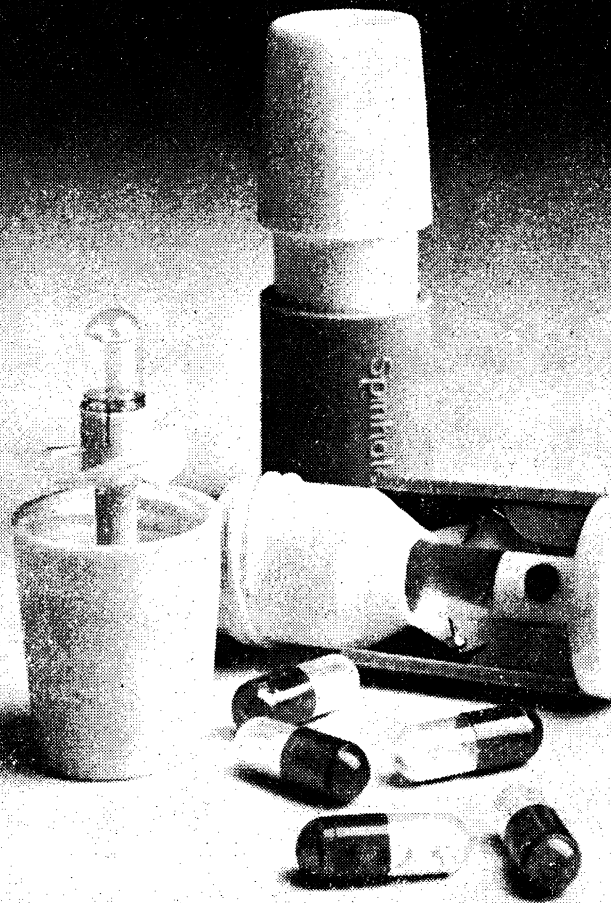

INTAL*, disodium cromoglycate, is a new compound which reduces the asthmatic response to allergen exposure in sensitised individuals.

It is not a bronchodilator, antihistamine or corticosteroid.

The new drug is administered by inhalation and presented as single dose capsules, SPINCAP* capsules, for use in a specially designed inhaler, the SPINHALER* insufflator.

Clinical benefits are reflected as: **Reduced incidence and severity of acute attacks** □ **Improved exercise tolerance** □ **Reduced chest tightness and wheeze** □ **Reduced cough and sputum production.**

The therapeutic management is eased by: **Reduced use of bronchodilators** □ **Reduced requirement for corticosteroids** □ **Low toxicity and wide safety margin.**

Each SPINCAP contains 20 mg. Disodium cromoglycate and 0.1 mg. Isoprenaline Sulphate B.P. to form INTAL COMPOUND*.

Note: Isoprenaline sulphate is included within the formulation to offset the transient mild bronchospasm that occurs in some subjects on inhalation of a dry powder.

Chips for tea?

Not all babies are getting chips for tea—but many *are* growing up on a diet that relies too much on starchy foods.

Yet any mother can give her baby a balanced diet of meats, vegetables, fruits, eggs, fish and cheese, by using Heinz Strained and Junior Foods now available in seventy-five varieties.

In the last year, special breakfast varieties have been introduced. And the fruit varieties are ideal for tea-time use.

For further information about Heinz Strained and Junior Foods, please write to the Food Science Advisory Service, H. J. Heinz Co. Ltd., Hayes Park, Hayes, Middlesex.

AIM FOR THE BAD'UNS WITH 'ILOSONE'

With 'Ilosone', your aim is effective and selective. Killing off the pathogenic bacteria, allowing the normal gut flora to pursue their useful life.

The real 'bad 'uns', of course, are Gram positive cocci, causing most of the infections you see every day. Against these infections 'Ilosone' is much more active than, for example, the tetracyclines and it will not discolour teeth or deposit in bone. Nor is 'Ilosone' likely to cause diarrhoea or gastro-intestinal upset—disadvantages which the tetracyclines share with the broad spectrum penicillins.

Effective. Selective. Use 'Ilosone' when you go gunning for bad 'uns—in acute tonsillitis or acute bronchitis or any common bacterial infection of the upper respiratory tract. *Haemophilus influenzae*? Yes, 'Ilosone' deals with this 'bad 'un' too!

'Pulvules' of 250 mg* and 125 mg*; a pleasant tasting suspension containing 125 mg*/5 ml. *Base equivalent. Full information available on request.

Best for British women

New Feminor 21—Specially formulated for efficient conception control

The dose of oestrogen required for consistent inhibition of ovulation shows individual and racial differences. For British women the best results have been obtained with 0.1 mg.* Feminor 21 is thus the ideal formulation for them. To inhibit ovulation it employs 0.1 mg of an oestrogen (mestranol) alone for the first sixteen days—with the addition of a progestogen

(norethynodrel) for the last five days to establish a normal, secretory endometrium. Because the total amount of hormone taken is limited to that necessary for effective inhibition of ovulation there is minimum physiological disturbance. The sequential dosage establishes a very regular menstrual cycle with a marked reduction in side effects such as breakthrough bleeding, breast discomfort and weight gain. The 21-tablet regimen is simple to follow, and the new cosmetic-type pack is designed for ease and convenience.

Feminor 21 is presented in packs con-

taining three months supply. A pack containing one month's supply is also available. Each monthly course consists of 21 tablets: 16 pink tablets containing mestranol 0.1 mg, 5 white tablets containing mestranol 0.1 mg, norethynodrel 2.5 mg.

Basic NHS Cost: 15/- three month pack, (5/10d one month pack).

By its dual action, Diovol restores gastric acid balance, quickly dispels flatus and relieves the pain and discomfort of gastric distension. The silicone defoaming agent infiltrates the mucoid bubbles in the stomach, causes them to burst and release the imprisoned gas.

Diovol is NOT, therefore 'just another antacid' but represents a remarkable advance in the therapy of dyspepsia and peptic ulcer, and for the dispersion of wind post-operatively—particularly after abdominal surgery.

Steroids orally? Fast relief with the betamethasone in **Betnesol**

Betamethasone as 17-valerate (Betnovate) is well established as a most effective topical steroid. Now Betnesol brings the advantages of a soluble form of betamethasone to systemic steroid therapy. Although betamethasone brings swift relief of inflammatory symptoms, it has a low incidence of side effects. Even during long-term therapy as in rheumatoid arthritis, betamethasone is unlikely to cause oedema and hypertension and has negligible effect on potassium balance.

Normally, corticosteroids are not very soluble. However, Betnesol Tablets when dropped into a glass of water dissolve to form a particle-free drink which is easy to take even during an attack of asthma. The complete solubility of Betnesol ensures maximum efficiency of absorption, the most consistent therapeutic response and no solid steroid particles to irritate the stomach. Betnesol adds solubility to all the other advantages of betamethasone.

Synalar gives fast relief in a wide range of inflammatory dermatoses

Speed. Low concentrations of Synalar achieve optimal skin penetration, frequently with therapeutic response, in 24-48 hours. This rapid action reduces the incidence of scratching. The speedy restoration of the epidermal barrier lessens the risk of secondary bacterial infection.

Efficacy. Synalar has an exceptionally high success rate in inflammatory dermatoses and in pruritic and allergic conditions of the skin. It has often been successful in difficult skin

conditions which, previously, had been unresponsive to other steroid preparations.

Synalar's effective action is maintained for up to 2 weeks after application because of the build-up, in the stratum corneum, of the steroid reservoir.

Range. The complete flexibility of the Synalar range makes the selection of treatment, according to the type and severity of the condition, a simple one: Synalar is available in cream, ointment, lotion and aerosol form,

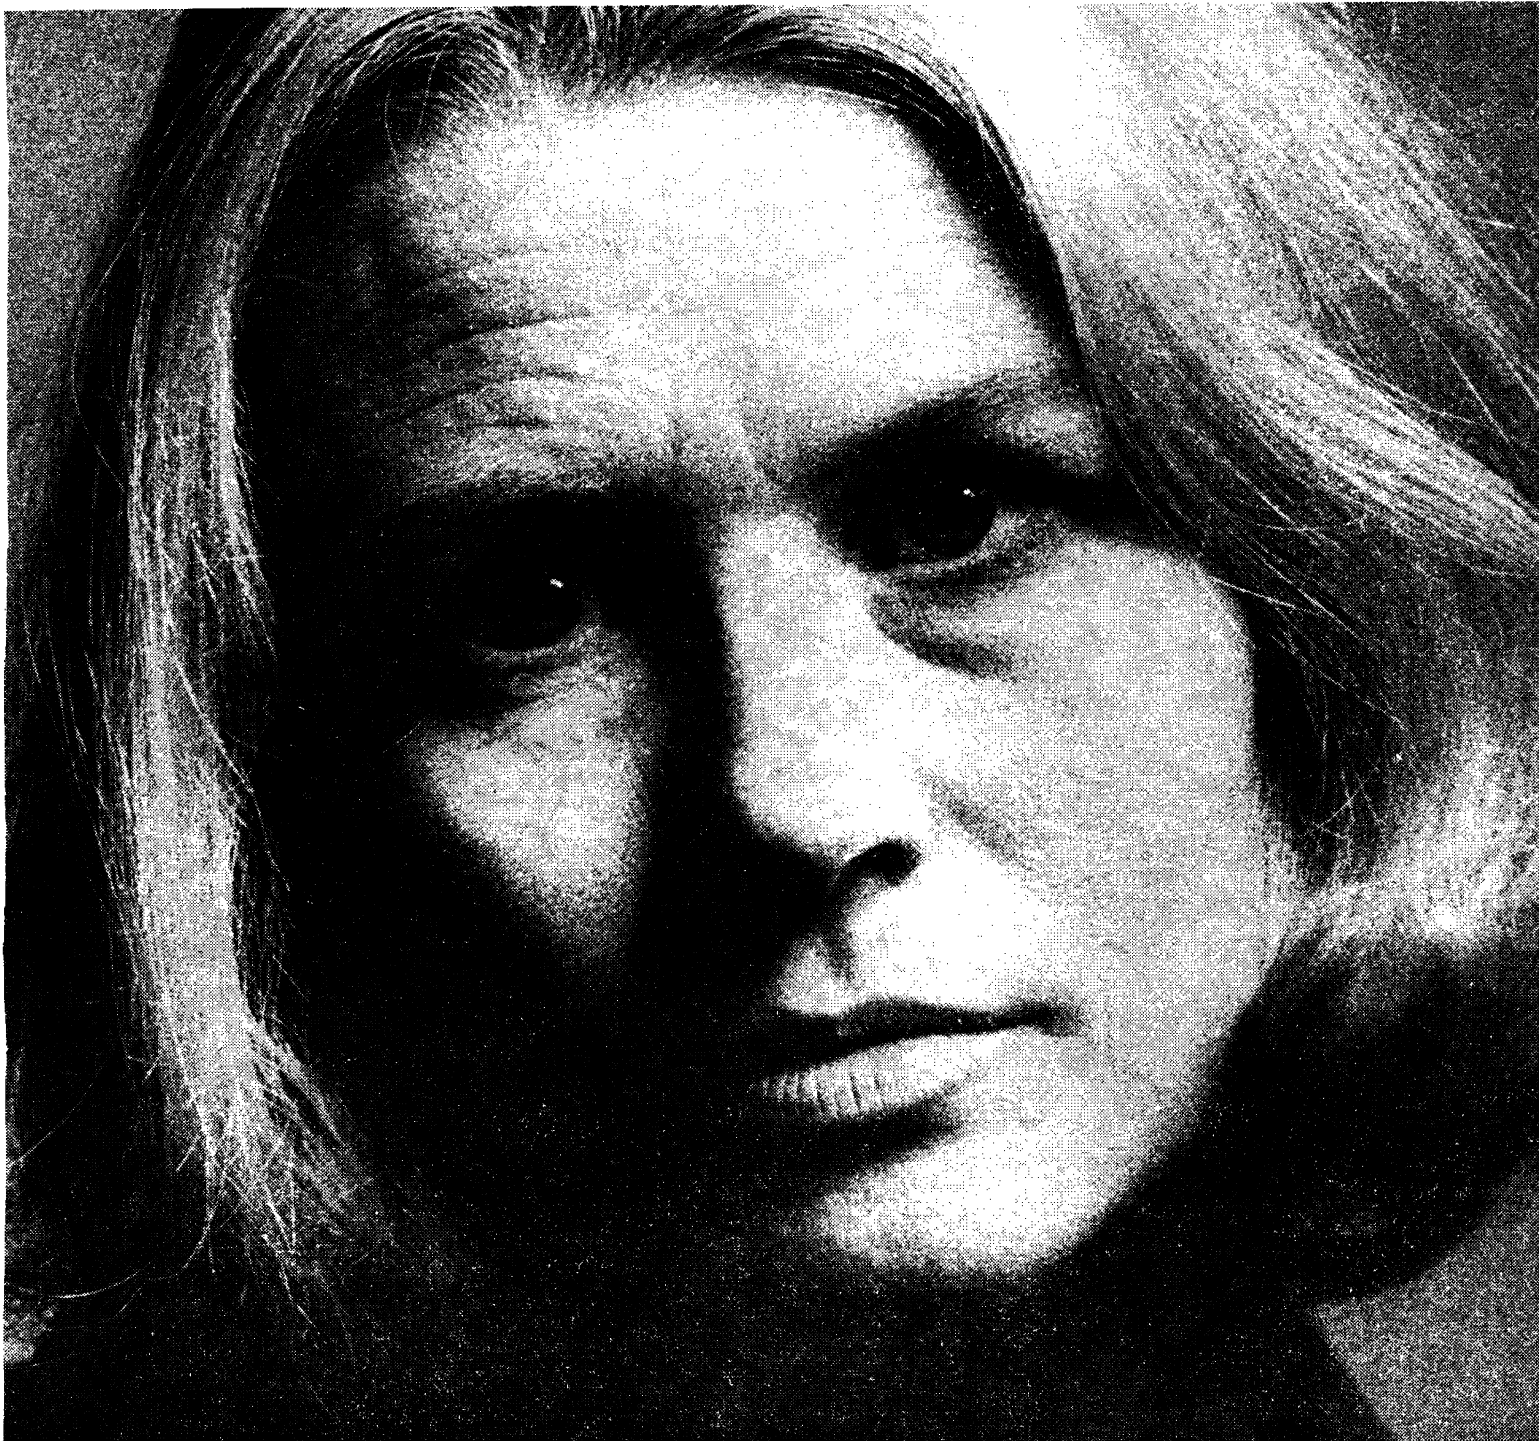

for the initial treatment of severe cases. For maintenance therapy and the less severe dermatoses, Synalar is also available as cream, ointment and lotion.

Bonjela has been shown in formal American trials to bring rapid relief from pain in 90% of all cases of oral ulceration, herpes labialis, gingivitis and denture sores. By rapid relief is meant marked alleviation of pain within 2-3 minutes.

Bonjela also promotes healing whenever the aetiology is partly or wholly

bacterial. Some ulceration originates from endocrinal, viral or fungal causes which may require other forms of treatment.

Even in these cases where a bacterial element is superimposed on the original infection Bonjela will reduce the severity of the infection and rapid relief from pain will be obtained.

Senokot restores natural rhythm to the constipated colon

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

From dispensing packs, the basic NHS cost of a teaspoonful of granules or two tablets is about a halfpenny; thus treatment with Senokot is very economical.

In addition to granules and tablets, there is now a syrup presentation – a highly acceptable form, specially suited to the needs of children and elderly patients.

Tablets: 50, 100 and 200. Granules (chocolate flavoured): 56 and 170 grammes. Syrup: 150 millilitre bottle.

Less income tax and surtax now- more pension later!

Allowing for inflation, a doctor in a General Practice for 35 years may get about half his final income as a pension from the Superannuation Scheme. But is that sufficient to promise a carefree and comfortable retirement?

You could increase your pension by 50%—often more—with one of our Personal Pension Policies. In addition you receive full relief of income tax and surtax on the premiums you invest.

Bonuses declared every three years increase the pension. You are not committed to pay a fixed annual premium. You pay as you like in accordance with your earnings.

Should you die before pension age all payments are returned to your estate plus compound interest at 4%. You may take the pension at any age between 60 and 70.

For full details of these unique policies, specially designed for General Practitioners, write for details quoting ref. No. 001.

controlling hay fever

Extil

more effective than an antihistamine alone

The combination of the potent anti-allergic properties of carbinoxamine with the nasopharyngeal vasoconstrictor properties of pseudoephedrine provides all-round symptomatic control of hay fever and allergic rhinitis. A controlled trial in hay fever and allergic rhinitis (General Practitioner Research Group, 1967) showed that Extil was better, both clinically and statistically, than either of its constituents administered alone.

Reference:

General Practitioner Research Group (1967):
'Combination therapy in hay fever and allergic rhinitis'.
Practitioner, 198, 713-6.

- Relieves running eyes, sneezing, nasal congestion, in 15 to 30 minutes.
- Allows patients to breathe freely.
- Reduces the need for nasal drops and sprays and is effective in areas that cannot be reached by topical applications.
- Less likely to cause drowsiness than most other antihistamines.
- Can be given to children and adults.

Each Extil tablet contains:

Carbinoxamine maleate 6 mg
Pseudoephedrine hydrochloride 60 mg

Each 5 ml of Extil syrup contains:

Carbinoxamine maleate 3 mg
Pseudoephedrine hydrochloride 30 mg

**UNIVERSITY AND
RESEARCH
APPOINTMENTS**

(see also OVERSEA)

HAEMOPHILIA RESEARCH

The Oxford Haemophilia Centre, in conjunction with the Wessex Regional Hospital Board, and the Lord Mayor Trelor Trust, wish to appoint a medically qualified Research Fellow with an interest in haematology or clinical medicine to investigate various aspects of treatment of haemophilia. The work should provide material for a M.D. thesis. The appointment is for an initial period of one year, renewable thereafter by mutual arrangement. Previous haematological experience would be an advantage, but is not essential as training in necessary techniques will be given at the Oxford Haemophilia Centre from which the research will be directed. For approximately 37 weeks in the year (i.e., during the school terms) the work will be at the Lord Mayor Trelor College where over 40 haemophiliacs are resident. Laboratory facilities during term will be provided at the Lord Mayor Trelor Hospital, Alton, Hants, under the supervision of Dr. S. Shaw. Clinical responsibility for the patients will be shared between appropriate Consultants at Alton and the Oxford Haemophilia Centre. The post will ensure adequate free-time and clerical assistance. Salary will be that for Senior Registrar grade, within the range £1,950 to £2,550, and the appointment in accordance with the terms and conditions of service of hospital medical and dental staff (England and Wales).

Applications, with details of experience, qualifications, etc., and the names of two referees, should be sent to Dr. Rosemary Biggs, Oxford Haemophilia Centre, Churchill Hospital, Oxford (from whom further particulars of the post can be obtained), by June 10, 1968. (29495)

UNIVERSITY OF MANCHESTER Faculty of Medicine

A course in public health will commence in October, 1968. It will be a half-time course extending over two academic years and is designed for those who hope to occupy senior management positions in one of the branches of the health services or for others seeking an academic course in the disciplines related to public health and social medicine. The course will usually lead to the Diploma in Public Health but for students who are able to devote the remaining half of the two academic years to research, the option may exist of taking the Degree of Master of Science in the Faculty of Medicine in place of the D.P.H. Students not wishing to pursue a course leading to these higher qualifications may take one or both of two available constituent courses in epidemiology and medical statistics, or behavioural sciences in relation to medicine, each of which occupies one half-day per week for one academic year.

Considerable further detail is available and interested persons should send for information to Professor Alwyn Smith, Department of Social and Preventive Medicine, Clinical Sciences Building, York Place, Manchester 13. (18811)

SCHOLARSHIPS**THE NUFFIELD FOUNDATION
FOOD SAFETY TRAINING
SCHOLARSHIPS**

(Food Toxicology—the biological effects of the chemical and physical treatment of food)

The Nuffield Foundation offers annually up to five scholarships for science graduates, and three scholarships for medical or veterinary graduates, to help advance fundamental research into the human biological effects of the chemical and physical treatment of food. The awards, tenable for periods of up to four years, are intended to provide research experience to Ph.D. level, together with formal training in selected subjects, with special reference to pathology, toxicology, biochemistry, bacteriology or pharmacology. The value of the awards will be fixed according to age, qualifications and experience, and can be supplemented by the amount of fees, marriage and child allowance, and in appropriate cases, research expenses. The scholarships are open to men and women holders of a science, medical or veterinary degree of a U.K. or other Commonwealth university. Applications should be submitted by July 1, 1968. Further particulars and forms of application are available from the Nuffield Foundation, Nuffield Lodge, Regent's Park, London N.W.1. (H.7665)

**WHY
EMIGRATE?**

If you are a registrar or physician of equivalent status you could have a challenging, responsible and well-paid career with Parke-Davis—IN ENGLAND.

Our Medical Services and Clinical Research Departments have vacancies for registered practitioners who graduated at British or Commonwealth medical schools. These appointments offer responsibility and scope for initiative to enterprising young doctors with an interest in modern therapeutics.

MEDICAL ADVISER

This appointment will be filled by a physician who has a particular interest in and good understanding of applied therapeutics. He will be responsible for formulating general medical policy, dealing with correspondence from medical boards and the medical profession, checking the medical accuracy of Company literature and advising Management on the medical aspects of Company products. He will be given the opportunity to initiate clinical trials and will assist in the training of medical representatives.

CLINICAL RESEARCH

For this appointment in our Clinical Investigation Department based at Hounslow a physician is required who has knowledge of and interest in medical statistics. He will be responsible for the initiation, follow-up, statistical evaluation and medical interpretation of clinical trials of experimental drugs at home and overseas. Some travelling to foreign countries (including U.S.A.) will be involved.

A broad clinical background is essential and only those with wide medical interests will be considered. Previous medical research experience is desirable.

Our salaries are competitive and our general conditions of employment compare favourably with those operating in the industry.

Write immediately to:—

MINISTRY OF OVERSEAS DEVELOPMENT

The Need

GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

The Opportunity Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

The Advantages Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained. **Salaries** Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum.

Training Scheme for Recently Qualified Doctors In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

UNIVERSITY OF AUCKLAND

New Zealand

SCHOOL OF MEDICINE

Applications are invited for the following appointments, closing on the dates shown:

SENIOR LECTURESHIPS/LECTURESHIPS IN ANATOMY (TWO): The successful applicants will be expected to assist the Professor of Anatomy in the detailed organisation of the relevant parts of a second year subject—"Mammalian Form and Function," commencing in 1969, and a third year subject—"Regional Anatomy." These subjects form part of a new three year course leading to a B.Sc. in Human Biology, which is a pre-requisite of the three year period of instruction leading to the degrees of Bachelor of Medicine and Surgery in the new Medical School of the University (June 30, 1968).

SENIOR LECTURESHIP IN PHYSIOLOGY: Applicants should preferably be qualified in medicine and should be experienced in the field of general physiology, or in Renal-Endocrine or Neurophysiology. The successful applicant will be expected to make a substantial contribution to the Bachelor of Science course in Human Biology and to take part in its detailed organisation. This course is a new development and will be a pre-requisite to the 3-year period of instruction leading to the degrees of Bachelor of Medicine and Surgery in the new Medical School of the University. He may also be required to assist in instruction during the three years of clinical instruction of the course. (July 15, 1968.)

Salary scales: Commencing salary within the appropriate scale will be determined in accordance with qualifications and experience. In the case of new members of staff coming from overseas, the current practice is to pay salaries from an approved departure date.

Medical salaries are at present under review and an announcement of higher rates is expected shortly. The present salary scales are as follows:

Senior Lecturer—up to a maximum of \$NZ6,000.

Lecturer—up to a maximum of \$NZ5,000. (In normal circumstances, a lecturer whose services have proved satisfactory to the Council may expect in due course to be given the status of a senior lecturer.)

Applicants for a Lectureship should note that it is not necessarily a pre-requisite for appointment that they should already have held the position of assistant lecturer or its equivalent at another university institution.

Travel and other removal expenses are allowed within specified limits. Upon the completion of five years' satisfactory service, return fares on an approved basis to country of origin may be granted to the person appointed and his dependent family provided that such fares are not being met from some other source.

Improved conditions are now in force for candidates holding F.S.S.U. policies.

Further particulars and information as to the method of application should be obtained from the Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London S.W.1.

● Little publicity, much less than it deserves, has been given to the potential of the method (oral contraception) for the production of highly desirable and pleasant side-effects. These would include personal happiness of the patient, presumably from confidence in the future that the method affords; and it is noticeable how this sense of happiness appears to extend to other members of the family. This often results in an altogether better adjusted and more integrated family unit than previously. ●

Clinical Trials Journal, (1968) 5, 143

Ovulen 1mg., the most widely prescribed oral contraceptive in Britain today.

Doctor experience Since Ovulen 1mg. was introduced in 1963 physicians have found it to be not only effective, but extremely well tolerated. More prescriptions are written for Ovulen 1mg. than any other oral contraceptive in Britain.

Clinical experience Clinical research on Ovulen 1mg. has been continuous. It was subjected to clinical trials in over 2,500 women before it was made commercially available; to date more than 16,000 women have been involved in trials totalling more than 190,000 cycles of experience.

Patient experience Millions of women in Britain and overseas are using this low-dose oral contraceptive. One reason is the trouble-free protection it affords—acceptability rates in clinical trials have been as high as 95.4 patients in every 100, over a period of more than four years.

Company experience In the fifteen years since Searle developed the first oral contraceptive the company's products in this field have been accepted by many millions of women.

syrup

why prescribe Broxil syrup?

The first reason is acceptability.

Some patients find it difficult to swallow a tablet or capsule...some just naturally prefer a pleasant, easy-to-take syrup. For these patients there is fruit-flavoured Broxil syrup.

The second reason is High Blood Levels.

Broxil syrup gives *reliable* blood levels, double those of oral penicillin V and five times those of oral penicillin G; which means there is more Broxil at the site of infection – and this is where it matters.

AVAILABILITY: Broxil (phenethicillin as phenethicillin potassium B.P.). Tablets, 125 and 250mg.; Capsules, 125 and 250mg. For children, adults with sore throats, or patients who find difficulty in swallowing tablets or capsules, there is Syrup, fruit-flavoured, in 60ml. bottles. When dispensed, each 5ml. teaspoonful contains 125mg.

DOSAGE: Children 62.5-125mg. and Adults 125-250mg., four times a day.

Prophylactic: Children 62.5-125mg. and Adults 125mg., twice a day.

CONTRA-INDICATIONS: Penicillin allergy.

SIDE EFFECTS: As with other oral penicillins.

Additional information is available on request.

Broxil (regd.) is a product of British research at
Beecham Research Laboratories Brentford, England.

ST. ANDREW'S HOSPITAL
NORTHAMPTON

President:
Lieutenant-Colonel J. Chandos-Pole, O.B.E.
Medical Director:
James Harpur, M.B., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illness. The fees range from twenty guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A recreation and occupation centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court and a library with an adjoining reading room.

WANTAGE HOUSE
This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

Charges for treatment at St. Andrew's are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

For terms and further particulars apply to the Medical Director (Telephone No. 34354 Northampton), who can be seen in London by appointment.

at bay

One Daneral-SA sustained-action tablet can bring relief from the symptoms of all allergic conditions within one hour—relief which lasts for up to 24 hours. The maintenance of steady blood levels from a single daily dose gives continuous relief of symptoms with a reduced incidence of side-effects. Daneral-SA is indicated in allergic conditions, particularly hay fever, vasomotor rhinitis, acute rhinitis, urticaria, allergic dermatoses, pruritus.

Daneral-SA tablets contain 75 mg pheniramine maleate

Also available: Daneral Tablets 50 mg—where a shorter duration of action is required.
