Success of the incorporation of silicones with nitrocellulose provides double skin protection in the treatment of bedsores, napkin rash and inflammation from body fluids

Dimethicone 350 BPC and nitrocellulose in new SYL Cream

Most silicone creams hitherto available depend for their skin protective functions solely on the properties of silicones. In Syl Cream these are greatly enhanced by the incorporation of a film-producing plasticising agent, nitrocellulose. Series of tests to determine water-repellent properties have demonstrated the superiority of Syl Cream over other formulations.

This unique silicone and nitrocellulose content provides a protection against aqueous irritants which is not destroyed by washing.

Syl Cream also contains the modern

quaternary ammonium antiseptic benzalkonium chloride, the action of which is to suppress ammonia-producing agents, so the Syl Cream assists healing while it protects.

Indications: Syl Cream is indicated in the following conditions:—

Bedsore; inflammation from body fluids (colostomy, ileostomy, napkin rash, pruritus due to urine leakage, diarrhoea, etc.); soreness from perspiration between the legs or under the breasts; eczematous skin eruptions, and to protect the skin around varicose ulcers; occupational dermatoses, and

to protect the hands against detergents, soaps, etc.; allergic dermatoses (contact dermatitis, sensitivity to antibiotics, local anaesthetics, etc.).

Syl Cream Active Constituents: Dimethic. 350 BPC 10.0%, Benzalk. Chlor. Soln. BP 0.02%, Nitrocellulose 1.5%.

Presentation: 60 g. tubes at 3/1 and 500 g. jars at 20/- at basic N.H.S. prices plus P.T.

season

Upjohn

Whatever the allergen, 'broad-spectrum' Depo-Medrone suppresses all phases of the inflammatory response to provide the pronounced and sustained relief that can make the allergy patient's summer symptom-free.

With one injection (2 cc.) given at the beginning of the season when symptoms appear, "80 per cent of cases are clear of symptoms for the season."¹ The dramatic quality of relief afforded by Depo-Medrone is borne out by such patient comments as "I feel completely normal – as if it were Winter," "I have even been able to cut the grass," "Better than any tablet or spray I have ever had." These were typical of comments from a study in which the majority of the patients obtained virtually complete relief for the duration of the hay fever season.²

Supplied: 40 mg./cc. methylprednisolone acetate in 1 cc., 2 cc. and 5 cc. vials.

VARICOSITY ?

She'll willingly take your advice if it means wearing fashionable Burson Lightweights

A woman's psychological need for fashion often makes her reluctant to accept your advice to wear elastic stockings. Burson Lightweights have been specially created to provide the answer.

Undetectable in wear, they are truly acceptable to the most **fashion-conscious woman**—yet are **completely effective in relieving the pain and discomfort of a mild varicose condition** and are approved by the N.H.S.

Made of alternating strands of strong, supple elastic with strands of sheer nylon, Burson Lightweights combine strength and resilience with stretch in **both** directions. Horizontal stretch eases the pressure of distended veins; vertical stretch aids the natural flow of blood

back to the heart. Available under N.H.S. (on the EC 10 form) in six normal stocking sizes scientifically adjusted to fit all leg shapes, they come in a pleasing shade.

Thus, in specifying Burson Lightweights when prescribing for mild varicosity, you will ensure your patient's relief from discomfort—whilst preserving her confidence and femininity.

Pain knuckles under to NapsalgesicTM

Napsalgesic extends the effective analgesic range of aspirin therapy.

Aspirin in a readily-dispersable form to minimise gastric irritation is combined with dextropropoxyphene, whose pain-killing properties have been so effectively demonstrated in 'Distalgesic'.

In long-term treatment your patient will obtain relief without suffering the adverse effects of high aspirin dosage or the constipation and respiratory depression evident with many alternative analgesic drugs.

Napsalgesic tablets each contain 50 mg dextropropoxyphene napsylate with 500 mg aspirin.

True value of long-term antihypertensive therapy emerges from 5-year study

A unique clinical trial* from a well-known British teaching hospital evaluated the long-term effects of reducing high blood pressure in more than 200 hypertensive patients, many of whom were treated for over 5 years with only one drug—

Ismelin®

The following important findings emerged from this balanced and comprehensive report.

Dramatic improvement in prognosis

"The outstanding feature among these results is of course the 5-year mortality of only 8 per cent—although scarcely less remarkable is the fact that all of the 11 patients who presented originally with malignant hypertension are still alive."

Increased efficacy with long-term usage

"Over the whole series an average of 83 per cent were at least moderately controlled and over 60 per cent showed excellent or good control, but it is of interest that the standard of control improved very strikingly among patients treated in excess of 4 years with only 5 per cent of failures in these groups."

* Angiology, 1967, 18: 705.

Minimal interference with normal routine

"The surviving patients present on the whole a fairly happy picture, for the great majority are leading unrestricted lives, free from hypertensive headache. Very few are troubled by their treatment and none have abandoned it. . . . Side effects were not troublesome and diarrhoea was readily controlled by codeine phosphate."

two complementary anti-hypertensive agents—but 'single tablet' convenience

Hydromet

Methyldopa BP and hydrochlorothiazide BP ®

For many hypertensive patients, 'Hydromet' is often the most suitable treatment. 'Hydromet' contains both methyldopa and hydrochlorothiazide, a combination already widely used in this country for the severer grades of hypertension. Note the substantial advantages which 'Hydromet' can bring to your patients:

- the convenience of a single tablet
- 'Hydromet' usually makes a satisfactory control of blood pressure possible on a lower dosage of methyldopa
- in some severe and resistant cases, 'Hydromet' can produce a greater antihypertensive response than methyldopa alone
- the diuretic action of hydrochlorothiazide is useful when hypertension is complicated by heart failure and oedema
- symptomatic postural hypotension is much less frequent than it is with other powerful antihypertensive agents

Available as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and 15 mg hydrochlorothiazide BP. Detailed information is available to physicians on request.

Mixogen

Appreciating the limited role of sedatives and tranquillizers in what is essentially a metabolic disturbance, physicians are turning increasingly to the treatment that masters the immediate symptoms of depression and irritability and acts at a fundamental level as prophylaxis against the long-term consequences of ovarian-pituitary imbalance.

'Today when the average woman can expect to reach her threescore years and ten, it would seem unrealistic to deny hormone treatment, which not only alleviates all the troublesome and antisocial symptoms of the menopausal and postmenopausal phases but is also a prophylactic measure against osteoporosis, senile vaginitis, hypertension, and coronary heart disease, to mention but a few hazards of oestrogen depletion.'

The arguments against the use of plain oestrogen therapy – endometrial bleeding and nausea – are countered when Mixogen is used.

'Perhaps the best way of avoiding oestrogenic bleeding is to use one of the oestrogen-testosterone combinations, of which the original – Mixogen – is the best.'²

In angina pectoris Inderal is the only drug which protects the heart from the oxygen-wasting effects of emotion and effort

The results are: increased effort tolerance and a new concept in long-term relief

The action of Inderal is unique: where other treatments attempt either to improve blood flow by dilating the arteries, or simply to sedate the patient, Inderal, through adrenergic beta-receptor blockade, protects the heart from the action of adrenaline. There is a slowing of the heart rate and a reduction in the oxygen needs of the myocardium.

This represents a new concept of long-term relief of angina, rather

than just a treatment of the condition as and when it arises.

Inderal is unique in another way. It is the only treatment consistently proved in double-blind clinical trials. Trials have, in fact, produced an 80% success figure, with more pain-free days and increased effort tolerance. They also show that Inderal (unlike other forms of angina therapy) is of considerable value in very severe cases of angina.

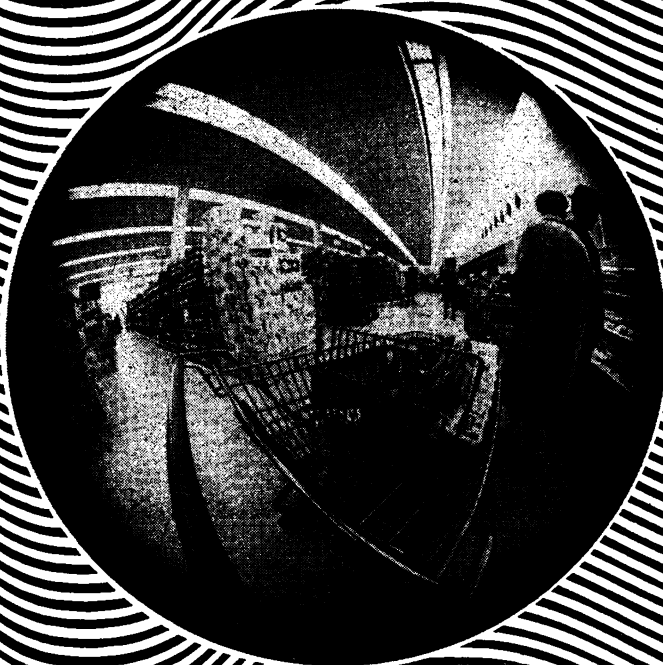

We shall be pleased to send you complete information on Inderal. Please write to us.

Plus Alphosyl psoriasis curiae praescribitur quam quidquid aliud medicamentum.

It's the truth. Alphosyl is the most widely prescribed product used specifically for the treatment of psoriasis. Alphosyl Lubricating Cream is the newer form of Alphosyl, clinically proven for psoriasis—especially in the intertriginous areas.

In these areas where dry, scaly lesions cause constant friction and continuous

irritation, Alphosyl Lubricating Cream not only removes scales and crusts, but enhances lubrication of the skin folds to lessen irritation. It has proved effective even in resistant cases.

Alphosyl therapy (either Lotion or Cream) can now be adjusted to fit the patient's individual needs... or preference.

‘I think I need a tonic, doctor...’

...can be a
symptom, too

The plaintive cry for a tonic frequently heard in the surgery may be an expression of unsuspected faulty protein metabolism. The weakness, lassitude, lack of energy and interest in the debilitated patient points to a negative nitrogen balance which may be rapidly corrected by the administration of Anabolex. After as little as a week's treatment with this drug the patient feels better, eats better and gains weight.

Anabolex can safely be given to patients of whatever age and of both sexes; given in therapeutic doses it is virtually non-virilizing. The only known contra-indications are prostatic carcinoma and pregnancy.

Medihaler

makes the most of a minute dose

In the management of the asthmatic attack *Medihaler* opens airways in only seconds, quickly gives major relief—with only a minute dose. Why does a puff from *Medihaler* have such far-reaching effects? The medication is delivered direct to its site of action in the lungs in the form of a dry spray of particles whose size is determined during manufacture. By this premicronisation, over 85 per cent, by weight, of the particles are delivered at the optimum size for inhalation therapy: small enough to penetrate deep into the finer air passages; heavy enough to remain there during exhalation. With only a minute dose, *Medihaler* gives the rapid and profound relief that is the foremost need of the patient fighting for breath.

Medihaler-iso Forte

contains a suspension of Isoprenaline Sulphate B.P. 20 mg./ml. and delivers 0.4 mg. per dose.

Medihaler-iso

contains a suspension of Isoprenaline Sulphate B.P. 4 mg./ml. and delivers 0.08 mg. per dose.

Dosage

Each puff from *Medihaler* delivers a measured dose. One to three puffs should be sufficient to provide relief in most cases. It should not be necessary for the patient to take further treatment for at least thirty minutes, or more than eight treatments a day.

Children

Medihaler should be administered to children only under the supervision of a responsible adult.

Caution

Isoprenaline is well tolerated by most patients. However, it should be used with caution in the presence of impaired cardiac function, hyperthyroidism and severe hypertension. Isoprenaline is a highly effective agent. The smallest dosage of it which provides relief should not be exceeded.

Basic NHS prices

Medihaler-iso Forte, 17/-; *Medihaler-iso*, 14/4. 400-dose complete unit.

The potential severity of staphylococcal septicaemia demands prompt antibacterial therapy—often well before sensitivity reports become available. FUCIDIN is rapidly and easily absorbed, and gives serum levels which are bactericidal against almost all pathogenic staphylococcal strains; FUCIDIN exhibits remarkable ability to reach the nidus of infection despite poverty of blood supply or presence of pus. For early control of these dangerous infections FUCIDIN has proved a reliable and

Peritrate is a coronary vasodilator; animal experiments have shown that its action is most marked in the coronary circulation. Fourteen years of clinical use, taking in hundreds of thousands of patients, have confirmed the outstanding value of Peritrate in angina. It is now recognised that Peritrate SA—a sustained action tablet giving up to 12 hours' vasodilatation from each dose—can form the basis of a long-term prophylactic regime, in conjunction with advice on diet, exercise and general health care.

The invisible wedge
that helps
correct flat feet...

Do you recommend an external wedge? Those outside wedges soon wear away, and very often the child is made to feel self-conscious because his shoes look different from other children's. They also disturb the plane of forepart and heel. Surely it's more logical to have a wedge built in between the inner and outer sole where it remains invisible and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem. Information from Mr. C. James, Fitting Consultant, Start-rite Shoes Ltd., Crome Road, Norwich, NOR 60A.

BAD LEGS?

Tired heavy aching legs

Before 'bad legs'
become an ugly
problem—
PAROVEN®

All the early symptoms of venous insufficiency—tired, heavy, aching legs, skin disorders, and night cramps—respond to PAROVEN therapy. [1-3]

PAROVEN, containing trihydroxyethylrutoside, reduces the increased capillary permeability which "is at the bottom of the majority of the complications of varicose disorders". [4]

Indications

Conditions associated with lower limb venous insufficiency.

Tired, heavy, aching legs. Night cramps. Skin disorders.

Superficial thrombophlebitis.

Varicose states.

Dosage

1 tablet 3 or 4 times a day.

Maintenance dosage [as little as one tablet a day] may be adjusted to patients' needs.

Packages

Tablets of 250 mg. hydroxyethylrutosides [not less than 45% troxerutin]. Tins of 20-100 tablets.

BRITISH HEART FOUNDATION AND AMERICAN HEART ASSOCIATION

RESEARCH FELLOWSHIPS

The British Heart Foundation invites applications for Research Fellowships for cardiological research in the United States in the academic year 1969/70. Fellowships are open to graduates in medicine or science who are British subjects, resident in the United Kingdom, who have had several years postgraduate experience in research.

The applicant is expected to have made provisional arrangements with some institution in the U.S.A. before submitting an application.

Further particulars and forms of application may be obtained from the Administrative Medical Director, British Heart Foundation, Tavistock House North, Tavistock Square, London W.C.1, to whom completed forms should be returned not later than August 31, 1968. (H.8059)

HAEMOPHILIA RESEARCH

The Oxford Haemophilia Centre, in conjunction with the Wessex Regional Hospital Board, and the Lord Mayor Treloar Trust, wish to appoint a medically qualified Research Fellow with an interest in haematology or clinical medicine to investigate various aspects of treatment of haemophilia. The work should provide material for M.D. thesis. The appointment is for an initial period of one year, renewable thereafter by mutual arrangement. Previous haematological experience would be an advantage, but is not essential as training in necessary technique will be given at the Oxford Haemophilia Centre from which the research will be directed. For approximately 37 weeks in the year (i.e., during the school terms) the work will be at the Lord Mayor Treloar College where over 40 haemophilia cases reside. Laboratory facilities during term will be provided at the Lord Mayor Treloar Hospital, Alton, Hants, under the supervision of Dr. S. Shaw. Clinical responsibility for the patients will be shared between appropriate Consultants at Alton and the Oxford Haemophilia Centre.

Furnished accommodation, married or single, with central heating, is offered at the College, free of charge; and living allowance for periods in Oxford. There will be a travelling allowance, and an annual allowance. Alton will ensure adequate free-time and clerical assistance. Salary will be that for Senior Registrar grade, within the range £1,950 to £2,550, and the appointment in accordance with the terms and conditions of service of hospital medical and dental staff (England and Wales).

Applications, with details of experience, qualifications, etc., and the names of two referees, should be sent to Dr. Rosemary Biggs, Oxford Haemophilia Centre, Churchill Hospital, Oxford (from whom further particulars of the post can be obtained), by June 10, 1968. (29495)

THE MONROE CLINIC**MONROE, WISCONSIN, U.S.A.**

The continued growth and expansion of our all-specialist group has created an outstanding opportunity for new men to join us at this time. We are looking for Specialists in Internal Medicine (General Medicine), Neurology, Ophthalmology, E.N.T., Orthopaedic Surgery and Urology.

Candidates should have enough experience to be eligible for board Specialty Examination. A minimum of four years postgraduate training is required. A Subspecialty in Internal Medicine would be advantageous, but is not essential. Candidates must pass their E.C.F.M.G. Examination. They must be willing to serve one year in an apprenticeship capacity as a requirement for Wisconsin licensure.

The Monroe Clinic has a specialist staff of 40 Physicians. It was formed in 1936. It has excellent physical facilities. No financial investment is required. An attractive retirement plan for the doctors is being formulated.

Monroe is a rural area, located in Southern Wisconsin. Major cities are within easy travel distance. O'Hare International Airport is only two hours away. Flights to England take only nine hours from O'Hare.

Your income, with our group, will be above average for the United States. It will be discussed with you at the time of interview, or by mail.

A member of our Staff will be in London between June 24, 1968, and July 4, 1968. Personal interviews will be conducted in complete confidence at that time in London.

Interested Physicians should write to the Department of Administration at The Monroe Clinic, Monroe, Wisconsin 53566. They should also leave their address and phone numbers with Box OV.510, B.M.J., so our representative can contact them.

'Anxiety is frequently intermingled with depression ...'

Clin. Trials J., 1965, 2, 317 (Nov)

When symptoms of anxiety and depression co-exist, the anxiety is usually easy to recognise, but the depressive state is often less obvious.

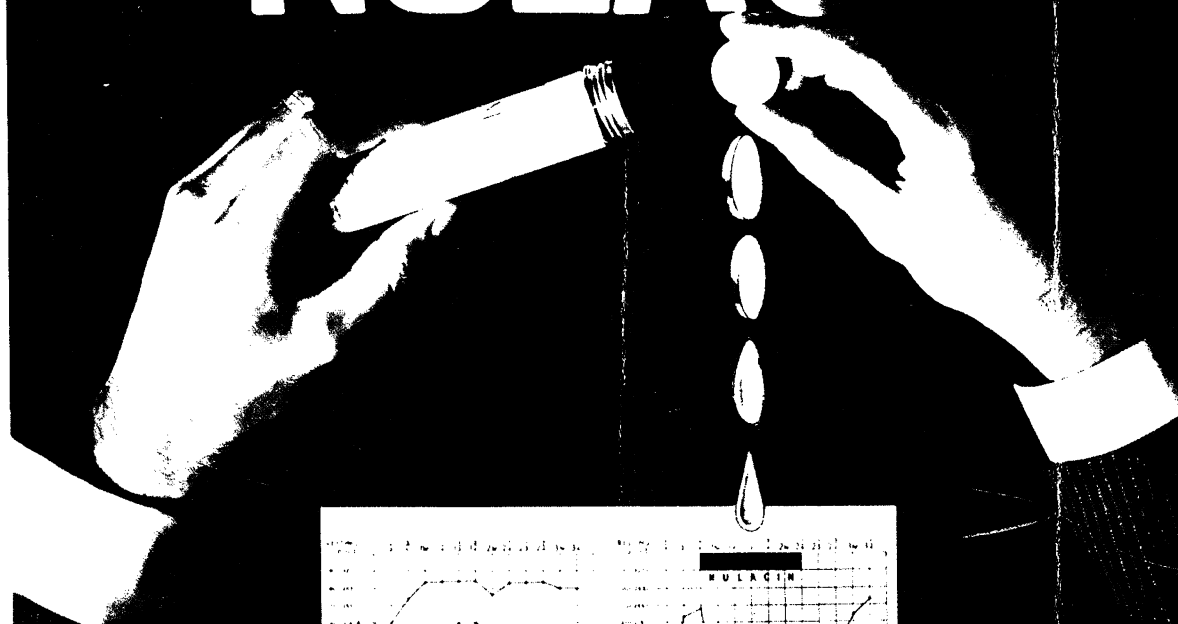

In anxiety-depressive conditions, 'Tryptizol', a well-established antidepressant with an intrinsic tranquillising action, has proved of considerable value. In many cases, the patient becomes calmer, mood is lifted, and sleep and appetite improve.

TRYPTIZOL

Amitriptyline hydrochloride BP

SAFE SIMPLE EFFECTIVE NULACIN

EFFECTIVE, because Nulacin achieves *continuous* neutralisation of hyperacidity. As peptic ulcers arise and recur only in the presence of free acid, Nulacin not only relieves symptoms but is the ideal long-term medical treatment.

SIMPLE, because Nulacin is specially designed to dissolve slowly in the mouth and produce a continuous intragastric milk-alkali drip in the ambulant patient. One tablet provides up to 30 minutes' relief from excess acid.

SAFE, because clinical experience has shown that Nulacin produces no electrolyte disturbances and can be used in *all* patients with peptic ulcers.

NULACIN is a unique combination of whole milk protein and fats with dextrans, maltose and suitable antacids and provides *economical*, long-term medical treatment for peptic ulcer.
