Third Olympic triumph for

'Streptotriad'

Selected for the British Team for the third successive time: this is the outstanding record of 'Streptotriad'.

"Other teams had an appreciable amount of diarrhoea, but no cases occurred in the U.K. teams." *Br. med. J.*, 4, 653, 1967.

"The measures taken against gastro-enteritis were completely successful . . . None of the athletes suffered any ill-effect from taking 'Streptotriad', nor suffered any effect on performance." *Report of Medical Research Project into Effects of Altitude in Mexico City in 1965*, British Olympic Association, London, 1966.

Protection for all who may eat strange foods in strange places, 'Streptotriad' is supplied as tablets, each containing Streptomycin (as Sulphate B.P.) 65 mg., Sulphadiazine B.P. 100 mg., Sulphadimidine B.P. 100 mg. and Sulphathiazole B.P.C. 100 mg.

Depronal SA is a sustained action analgesic that relieves pain for 8-12 hours at a time. It contains the analgesic dextropropoxyphene in a special sustained release mechanism that is independent of variations in gastro-intestinal motility, enzyme activity and pH. Just two capsules of Depronal SA (one every 8-12 hours) can keep your patient free from discomfort through a whole night's sleep and the following day's activity.

Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be given after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).
Pripsen can be mixed with milk or water.

An aid to oral hygiene

Maintenance of oral hygiene during the post-operative period, especially among geriatric patients, is obviously essential. But at the same time this can prove to be somewhat time-consuming for the nursing staff.

However, recent experience in a London hospital has shown that the patient can help to provide his own nursing care, with the minimum of effort.

This experience covers patients who are fed intravenously and post-operative cases who find normal eating and drinking difficult. These patients often exhibit signs of mouth infection very quickly, and treatment for this can often cause considerable discomfort.

A more pleasant treatment is possible in many cases, for it has been found that giving the patient chewing gum promotes salivary gland activity. Patients are encouraged to chew gum at two-hourly periods, and this treatment frequently allays the symptoms and produces a considerable improvement in the condition of the tongue and mucosa. Quite striking results have been noted after carrying out this treatment for a 24-hour period.

FOLIC ACID DEFICIENCY and ANAEMIA OF PREGNANCY

Introducing

FOLEX-350

CONTAINING FOLIC ACID 350 MICROGRAMS IN EACH TABLET

DOSE

ONE TABLET DAILY THROUGHOUT PREGNANCY

It is now known beyond doubt that megaloblastic anaemia of pregnancy is caused by deficiency of folic acid.

From the very excellent results obtained over the years by the prophylactic use of folic acid and iron given orally from the beginning of pregnancy it is becoming more and more generally accepted that anaemia of pregnancy can be prevented. The question of the optimum dose of folic acid has not been easy to establish but recent work* suggests that not less than 300 mcg. and not more than 400 mcg. daily can be considered adequate.

In the light of this knowledge Folex-350 containing 350 mcg. of folic acid and 300 mg. of ferrous gluconate has been introduced.

AIM FOR THE BAD'UNS WITH 'ILOSONE'

With 'Ilosone', your aim is effective and selective. Killing off the pathogenic bacteria, allowing the normal gut flora to pursue their useful life.

The real 'bad 'uns', of course, are Gram positive cocci, causing most of the infections you see every day. Against these infections 'Ilosone' is much more active than, for example, the tetracyclines and it will not discolour teeth or deposit in bone. Nor is 'Ilosone' likely to cause diarrhoea or gastro-intestinal upset—disadvantages which the tetracyclines share with the broad spectrum penicillins.

Effective. Selective. Use 'Ilosone' when you go gunning for bad 'uns—in acute tonsillitis or acute bronchitis or any common bacterial infection of the upper respiratory tract. *Haemophilus influenzae*? Yes, 'Ilosone' deals with this 'bad 'un' too!

In angina pectoris Inderal is the only drug which protects the heart from the oxygen-wasting effects of emotion and effort

The results are: increased effort tolerance and a new concept in long-term relief

The action of Inderal is unique: where other treatments attempt either to improve blood flow by dilating the arteries, or simply to sedate the patient, Inderal, through adrenergic beta-receptor blockade, protects the heart from the action of adrenaline. There is a slowing of the heart rate and a reduction in the oxygen needs of the myocardium.

This represents a new concept of long-term relief of angina, rather

than just a treatment of the condition as and when it arises.

Inderal is unique in another way. It is the only treatment consistently proved in double-blind clinical trials. Trials have, in fact, produced an 80% success figure, with more pain-free days and increased effort tolerance. They also show that Inderal (unlike other forms of angina therapy) is of considerable value in very severe cases of angina.

We shall be pleased to send you complete information on Inderal.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

**To lessen the fear of mutilation . . .
arrange for Prosthesis before mastectomy**

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen—for women, men, children—you will find Spencer Supports demonstrably superior.

bethanidine sulphate

A recent 2½-year study¹ has confirmed that 'Esbatal' (bethanidine sulphate) provides a more acceptable form of therapy for the patient than other antihypertensive drugs in current use. Control of blood pressure was achieved with 'Esbatal' in about three-quarters of the hypertensive patients treated—and side-effects were rare.¹ In comparing 'Esbatal' with guanethidine and methyldopa the authors considered that 'Esbatal' was to be preferred for beginning treatment in any new hypertensive patient.¹ Better acceptance of 'Esbatal' by the patient, again compared with guanethidine and methyldopa, was also demonstrated in another trial where 'Esbatal' scored the highest rating for patient preference.²

In the treatment of psoriasis, triacetoxanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin. It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages — it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol — 1,8,9-triacetoxanthracene — has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

Pharmaceutical Journal (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency . . . It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable."

British Medical Journal (1966) 2, 993

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxanthracene without any adverse reaction occurring"

British Medical Journal (1967) 1, 682

"After three weeks treatment with triacetoxanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

British Journal of Dermatology (1967) 79, 491

Best for British women

New Feminor 21—Specially formulated for efficient conception control

The dose of oestrogen required for consistent inhibition of ovulation shows individual and racial differences. For British women the best results have been obtained with 0.1 mg.* Feminor 21 is thus the ideal formulation for them. To inhibit ovulation it employs 0.1 mg of an oestrogen (mestranol) alone for the first sixteen days—with the addition of a progestogen

(norethynodrel) for the last five days to establish a normal, secretory endometrium. Because the total amount of hormone taken is limited to that necessary for effective inhibition of ovulation there is minimum physiological disturbance. The sequential dosage establishes a very regular menstrual cycle with a marked reduction in side effects such as breakthrough bleeding, breast discomfort and weight gain. The 21-tablet regimen is simple to follow, and the new cosmetic-type pack is designed for ease and convenience.

Feminor 21 is presented in packs con-

taining three months supply. A pack containing one month's supply is also available. Each monthly course consists of 21 tablets: 16 pink tablets containing mestranol 0.1 mg, 5 white tablets containing mestranol 0.1 mg, norethynodrel 2.5 mg.

Basic NHS Cost: 15/- three month pack, (5/10d one month pack).

Methyldopa BP and hydrochlorothiazide BP ®

For many hypertensive patients, 'Hydromet' is often the most suitable treatment. 'Hydromet' contains both methyldopa and hydrochlorothiazide, a combination already widely used in this country for the severer grades of hypertension. Note the substantial advantages which 'Hydromet' can bring to your patients:

- the convenience of a single tablet
- 'Hydromet' usually makes a satisfactory control of blood pressure possible on a lower dosage of methyldopa
- in some severe and resistant cases, 'Hydromet' can produce a greater antihypertensive response than methyldopa alone
- the diuretic action of hydrochlorothiazide is useful when hypertension is complicated by heart failure and oedema
- symptomatic postural hypotension is much less frequent than it is with other powerful antihypertensive agents

Available as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and 15 mg hydrochlorothiazide BP. Detailed information is available to physicians on request.

Operative Surgery

Second Edition in preparation

Under the General Editorship of **CHARLES ROB, M.C., M.D., M.Chir., F.R.C.S.,**
and **RODNEY SMITH, M.S., F.R.C.S.**

Butterworths are proud to announce that a new and completely up-to-date edition of **OPERATIVE SURGERY** will commence publication in September. When it was first published, this work was a major and revolutionary venture. As the *British Journal of Surgery* said, "This is an outstanding work on operative surgery; it is novel, practical, and portrays all that is best in British operative technique. It is a production of which British surgery may well be proud." Now, however, this second edition will be welcomed as a trusted and practical work of reference, both comprehensive and authoritative.

The editors have re-examined every chapter. Outdated techniques, operations and instruments have been deleted and replaced by current practice. The second edition is almost twice the size of the first.

Practical demonstration is the keynote of **OPERATIVE SURGERY**. Each stage of all operations in current practice is presented in pictorial form so that the surgeon is able to see at a glance exactly what should be done and when, without having to wade through a lengthy description. Necessary text matter is of course included and all articles contain full notes on pre- and post-operative care.

OPERATIVE SURGERY is not only available in full sets of fourteen volumes; the first six volumes are also available as an individual set, subtitled 'General Surgery'. Full details of special pre-publication prices and a 28-page illustrated brochure are available on request.

FAST RELIEF FROM DISCOMFORT— SUSTAINED ACTION

PRODEXIN TABLETS WORK FAST to relieve the sharp and sudden pain of dyspepsia; relief begins within two minutes of placing the tablet on the tongue.

PRODEXIN TABLETS WORK STEADILY to relieve prolonged recurring pain in peptic ulceration or pregnancy heartburn. The antacid action of aluminium glycinate lasts for several hours and it has high buffering capacity, holding the pH of the gastric contents within the desirable 3 to 5 range.

The small, pleasant tasting Prodexin tablet can either be dissolved slowly in the mouth to simulate drip therapy or chewed for extra-rapid relief.

No significant side-effects have been encountered.

PRACTICES

(Executive Councils)

For vacancies (except those in Scotland) apply on Form E.C.16A, obtainable from the Executive Council. Mark envelopes "Vacancy."

CITY OF LINCOLN MEDICAL PRACTICE VACANCY

The Executive Council for the City of Lincoln invites applications for appointment to a single-handed medical practice of 2,100 patients. The vacancy will occur on August 31, 1968. The list is comprised of approximately 2,000 patients who reside within the city and 100 who reside in the adjacent county area. The area of the City of Lincoln has been continuously designated for three years and payments to qualifying doctors are therefore available. Surgery accommodation located in separate premises which are in no way connected with the practitioner's residential accommodation will be available to buy or rent. Applications on E.C.16A, obtainable from this Council, must reach the Executive Council for the City of Lincoln, 27 Tentercroft Street, Lincoln, by not later than Thursday, June 27, 1968. (H.8344)

SOUTHPORT, LANCs

Applications are invited for a practice vacancy which will occur on September 3, 1968. "Open" area. List at present 3,168 including 45 patients in the Lancashire county area. Modern residential and surgery premises understood to be available for purchase.

Applications, on Form E.C.16A, to reach the Clerk, Southport Executive Council, 38 Houghton Street, Southport, not later than first post on Tuesday, June 25, 1968. (H.8394)

MEDICALLY QUALIFIED RESEARCH SCIENTIST

In the late 1950s Beecham Research Laboratories isolated the penicillin molecule thus making possible the development of the semi-synthetic penicillins. Each year since then the areas of research interest have widened and expenditure has increased.

Organizationally there has recently been a change of emphasis and more and more new projects are being handled by multi-disciplined research teams. This has created the need for a medical practitioner to advise and service these teams from an early stage.

No age limits are set and the emphasis will be on a doctor of intellectual weight and fertile imagination. He must have had some research experience and be able to demonstrate that he has both the personality to stimulate and co-operate successfully with other scientists and the curiosity to extend his knowledge in diverse areas of pharmaceutical interest. It may be possible for the person appointed to develop his own research interests for part of his time.

An attractive starting salary will be offered; profit sharing, non-contributory pension and life assurance schemes substantially enhance its value. The research establishment is in an attractive country area in Surrey.

Please write to: The Personnel Controller, Beecham Pharmaceutical Division, Beecham House, Great West Road, Brentford, Middlesex.

ROYAL GWENT HOSPITAL
Newport (Recognized F.R.C.S.)

Applications are invited for **THREE SENIOR HOUSE OFFICERS** in the accident and emergency department vacant on August 1. The department is in the charge of a full-time Consultant Surgeon as five S.H.O.s and all emergency cases are admitted through the department, which is responsible for initial resuscitation. The department is equipped with apparatus for cardiac monitoring, positive pressure ventilation, blood gas analysis, and blood volume computation with radioactive isotopes, as well as x-ray image intensifiers and a Berman F.B. locator. The hospital has 428 beds, is the base hospital for the group and therefore has a large volume of acute cases in all specialties. It is being extensively re-developed by a major capital building programme. A new intensive care unit will be in operation soon. There is a close connection with the teaching hospital at Cardiff, 10 miles to the west, and there is an extensive postgraduate education programme with a very good library. A new postgraduate centre is about to be built which will enhance further the facilities at present available. The appointment gives ample opportunity to the holder to avail himself of these facilities. The successful candidate will be expected to be resident on the nights on which he is on first call, which will on average be one night in five. If non-resident every assistance will be given to find suitable accommodation. There is a certain amount of married accommodation available in the control of the Hospital Management Committee. Applications, giving full particulars, and names and addresses of two referees, to Group Secretary, 64 Cardiff Road, Newport, Mon. (20500)

APPOINTMENTS

Applicants should state name, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given. Canvassing disqualifies (Statutory Instrument, 1966, No. 569).

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

HOUSE OFFICERS: Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year; £1,200 per annum for posts held during the second year; £1,300 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £150 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

SENIOR HOUSE OFFICERS: £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years. Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

REGISTRARS: £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRARS: £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANTS: £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

CONSULTANTS: £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885.

Deductions of £350 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

Doctors with satisfactory training will not be excluded from consideration for appointment to consultant posts on the grounds that they have spent little or no time as senior registrars.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff. Memoranda on the following subjects of particular interest have been issued by the Ministry of Health: Standard of Residential Accommodation, Telephone Charges, Removal Allowances, Study Leave.

Further details may be obtained from the Hospital Secretary, or B.M.A. members may obtain summaries of the Memoranda or explanatory handouts from the Secretary, British Medical Association. (August, 1967)

ST. ANDREW'S HOSPITAL NORTHAMPTON

President:
Lieutenant-Colonel J. Chandos-Pole, O.B.E.
Medical Director:
James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illness. The fees range from twenty guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A recreation and occupation centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court and a library with an adjoining reading room.

WANTAGE HOUSE
This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. Charges for treatment at St. Andrew's are allowable for benefit to British United Provident Association and Private Patients Plan subscribers. For terms and further particulars apply to the Medical Director (Telephone No. 34354 Northampton), who can be seen in London by appointment.
