

Ventolin INHALER

(Salbutamol)

Trade Mark

A different class of bronchodilator

MORE SELECTIVE · LONGER ACTING · MORE EFFECTIVE

A NEW STANDARD IN BRONCHODILATOR THERAPY

Previously available β -adrenergic stimulants such as isoprenaline and orciprenaline act on the β_1 receptors of heart muscle as well as on the β_2 receptors of bronchial muscle. Consequently, undesirable increases in heart rate and pulse pressure sometimes occur when these drugs are used to produce bronchodilatation.

Ventolin is different : first because it is highly selective in its action, affecting primarily β_2 receptors : second, because it is more effective than existing bronchodilators : and third, because it is longer-acting.

MORE EFFECTIVE

Clinical trials have shown that Ventolin Inhaler is a more effective bronchodilator than isoprenaline or orciprenaline when given by inhalation.

LONGER ACTING

Ventolin is unusually long-acting, its effect persisting for at least four hours. By contrast, isoprenaline, even in large doses, has a characteristically intense but transient effect. In another study using whole-body plethysmography, inhalation of 100 μ g of Ventolin produced an almost immediate maximal increase in airway conductance which was sustained for four to six hours.

MORE SELECTIVE

No side effects have been reported with therapeutic doses of Ventolin Inhaler. In studies comparing Ventolin with isoprenaline, a major difference found was that Ventolin did not stimulate the heart or affect the blood pressure, even after inhalation of a relatively large dose.

MORE ACCEPTABLE TO PATIENTS

Patients expressed a marked preference for Ventolin Inhaler in double-blind studies comparing Ventolin with aerosols containing isoprenaline or orciprenaline.

SAFETY IN USE

Past experience suggests that misuse of aerosol bronchodilators by asthmatic patients may lead to dangerous effects on the heart or give a false sense of security to patients with incipient status asthmaticus. Ventolin Inhaler has no effect on the heart in therapeutic dosage and has a long duration of action. Both these properties provide additional margins of safety : the lack of cardiac effects should reduce any likelihood of deaths due to ventricular fibrillation and the long duration of action makes it possible for patients to realise in time if the drug is becoming less effective. Because an effective treatment with Ventolin Inhaler should last for at least four hours, patients have been advised to consult their doctor immediately if the effect lasts for less than three hours, so enabling the doctor to take timely action.

in depression

grounds for optimism

For the depressed patient, optimism about the chances of recovery begins with the first visit to the physician who shows an interest in his case. This optimism can be built upon with the aid of modern antidepressant drugs, enabling the physician to help his patient to a more speedy recovery.

In this respect, 'Concordin' often brings an initial elevation of mood within a week — the patient soon has grounds for greater optimism.

'Concordin' is available as tablets in two strengths:
'Concordin'-10 as white, film-coated tablets (marked 'C10') containing 10 mg protriptyline hydrochloride, in bottles of 100 and 500;
'Concordin'-5 as salmon-red, film-coated tablets (marked 'C5') containing 5 mg protriptyline hydrochloride, in bottles of 100 and 500.

'Concordin' offers many depressed patients these advantages:

- speed of action — improvement often starts within a week
- virtual freedom from sedative activity — the patient on 'Concordin' can continue with normal activities since drowsiness is rare
- no dietary restrictions — 'Concordin' is not a MAOI and so the patient can enjoy full freedom in choice of food

FIGHT CANCER

WITH A WILL!

When you are consulted about bequests for medical work that deserves support, please remember the work of the Imperial Cancer Research Fund. Founded on the initiative of the Royal Colleges of Physicians and Surgeons, the I.C.R.F. is fighting all forms of cancer, including leukaemia, with every weapon of modern science in up-to-date laboratories. It has no official grants and is entirely supported by voluntary contributions. Will you please help—now?

How to word your Will

Release the arthritic patient with BRUFEN

The arthritic patient is imprisoned by the pain and disability of his condition – as well as by limitations of the drugs used in its treatment. Brufen is an antirheumatic agent designed to bring the arthritic patient a new measure of freedom from these constraints. Pain and stiffness are relieved, joint size reduced, pressure tolerance increased, grip strength improved and the range of pain-free movement extended. In achieving these benefits Brufen appears to be singularly free from serious side-effects. Brufen (ibuprofen) is a non-steroidal compound which exhibits the high level of anti-inflammatory, analgesic and antipyretic activity necessary for effective treatment of rheumatoid arthritis, osteo-arthritis and allied conditions. At the same time Brufen is so well tolerated that it may be taken on waking to relieve morning stiffness. Brufen is an achievement of British research. Supplied as tablets of 200 mg. ibuprofen.

Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be repeated after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).
Pripsen can be mixed with milk or water.

introducing medihaler duo

**for prolonged action
rapid relief
insignificant cardiovascular effect...**

With *Medihaler-duo*, Riker makes a further notable contribution to bronchodilator therapy. *Medihaler-duo* enables the physician to make a more positive approach to reversal of airway obstruction in bronchial asthma and chronic bronchitis.

Medihaler-duo takes advantage of the finding that the bronchodilator effect of isoprenaline can be significantly enhanced by the action of phenylephrine. As a result, it is possible to obtain a greater response to treatment than would be experienced from comparable doses of isoprenaline administered alone. Moreover, this enhanced bronchodilator effect is achieved without significant change in pulse rate or blood pressure at recommended dosage. These results have been confirmed in clinical trials ^{1,2,3,4,5,6,7}. With *Medihaler-duo*, relief is immediate in onset and often prolonged for three or more hours. Effect on the cardiovascular system has been found to be insignificant even in patients with uncomplicated hypertension.

...in bronchial asthma and chronic bronchitis

Composition *Medihaler-duo* contains a suspension of isoprenaline hydrochloride 8 mg./ml., phenylephrine bitartrate 12 mg./ml. and delivers to the patient a measured dose containing 0.16 mg. isoprenaline hydrochloride and 0.24 mg. phenylephrine bitartrate.

Contra-indications There are no absolute contra-indications, but *Medihaler-duo* should be used with caution in the presence of cardiac disease, hypertension or hyperthyroidism.

Side-effects Overdosage may cause dry mouth, palpitations, or nervousness.

Dosage Each puff from *Medihaler-duo* delivers a measured dose. One to three puffs should be sufficient to provide relief in most cases. It should not be necessary for the patient to take further treatment for at least thirty minutes, or more than eight treatments a day.

Children *Medihaler-duo* should be administered to children only under the supervision of a responsible adult.

The Dermal range of products

Over the last few years, Dermal Laboratories have developed, tested and introduced a number of successful aids to the treatment of skin diseases. These have all earned the confidence of Consultants, General Practitioners and Dispensing Chemists alike, because they know that the results of Dermal's constant wide ranging research into new treatments are only made available for clinical use after the strictest independent testing. The Dermal products currently available are illustrated below.

Psoriderm Cream. For subacute and chronic psoriasis including the hair bearing areas and flexures. Contains 6% special coal tar plus 0.4% lecithin, and is formulated as a vanishing cream designed for twice-daily application.

Psoriderm Bath Emulsion. A 40% tar treatment beneficial in acute as well as subacute and chronic psoriasis. Emulsified to enable non-staining tar to disperse evenly in the bath.

Exolan Cream. Milder form of Exolan Paste containing 1% Triacetoxanthracene for patients who prefer to use an invisible vanishing cream. Can be used on scalp and hairy regions of the body.

Psoriderm Scalp Lotion. A preliminary shampoo treatment for psoriasis of the scalp which removes excess grease and scale debris. It contains 2.5% of special coal tar.

Prehensol Cream. Treatment for detergent dermatitis of the hands. Contains zinc salicylate and lecithin to restore pH to mild acidity and replace natural skin grease removed by modern alkaline detergents.

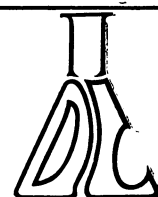

Exolan Paste. Resolves psoriatic lesions in the same way as Dithranol, without burning and staining. Active constituent; 1.8.9 Triacetoxanthracene 3%. Can safely be applied at home by the patient. Healing is rapid, unlike steroids chances of swift relapse very low.

Callusolve. A new non-caustic treatment for plantar and other warts. Active constituent: Alkyl dimethyl benzyl ammonium halide dibromide, 25%. Can safely be applied by patient; especially suitable for removing multiple and mosaic warts.

Ismelin[®] meets your standards

guanethidine sulphate BP

Dosage

Initial dosage—two 10mg tablets daily. Frequent adjustment is unnecessary during stabilisation; depending on individual assessment, intervals between consultations may be up to one month. Should 20mg daily prove insufficient, increase daily dosage by one 10mg tablet. As the action of Ismelin is gradual and prolonged, allow at least one week before any increase, to observe full effect. The majority of patients will be symptom-free and adequately controlled on 40mg daily or less.

Prescribing notes

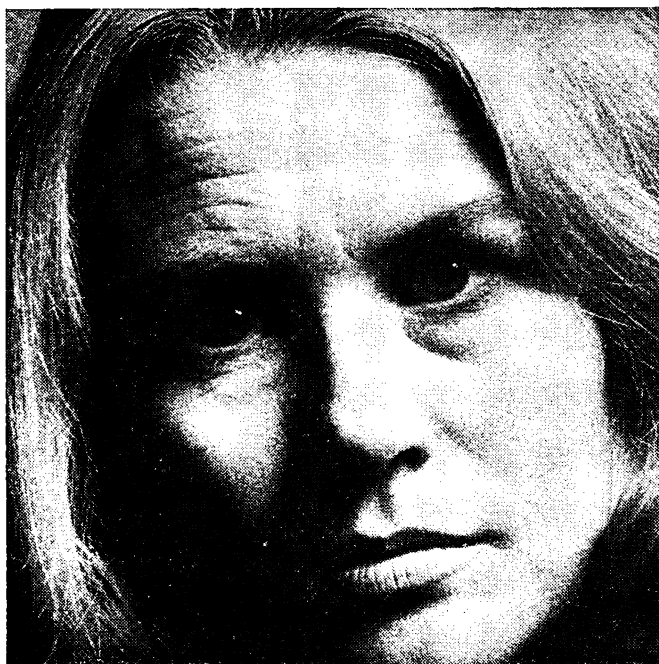

Ismelin is contra-indicated in the presence of phaeochromocytoma. Side effects attributable to postural hypotension normally reflect overdosage. Patients should be advised to avoid sudden changes of posture, or violent exertion, and if morning faintness on rising persists, to reduce the daily dosage by one 10mg tablet until the next consultation. If diarrhoea is troublesome, reduce or divide dose, or add $\frac{1}{2}$ gr. codeine phosphate t.d.s. Failure of ejaculation

has been reported and, rarely, exertional dyspnoea, nasal congestion, shivering, muscle weakness, paraesthesiae (due to latent cerebral arterial insufficiency), aggravation of intermittent claudication, and exacerbation of peptic ulcer. In heart failure, any tendency to fluid retention may be increased. As with any antihypertensive, prescribe cautiously for patients with renal failure and urea retention. Allowance should be made for the antagonistic pressor action of some antidepressants (MAOI), appetite suppressants and stimulants of the amphetamine class if administered concurrently.

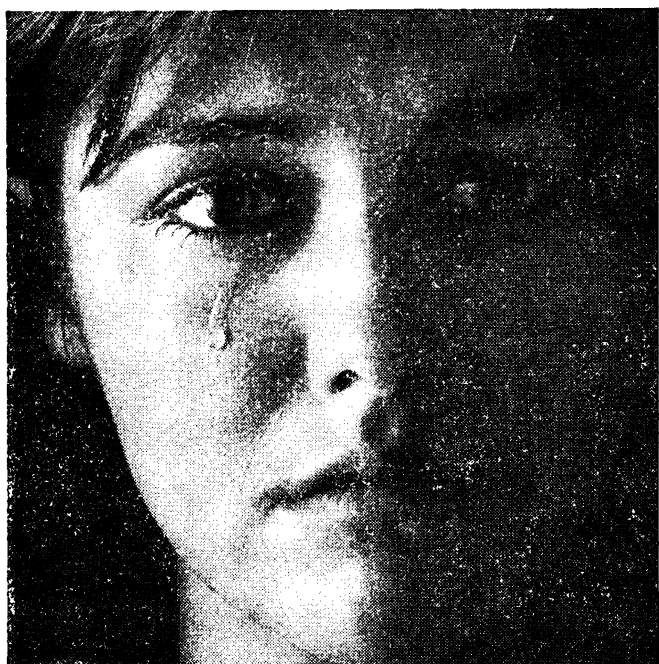

10 and 25mg tablets guanethidine sulphate BP, in 100's and 500's. Basic NHS price 100 x 10mg: 27s. 8d. Also ampoules for i.m. injection 10mg in 1ml. Basic NHS price 6 amps: 17s. 4d.

INDUSTRIAL APPOINTMENTS—see also pp. xxxi and xxxii**INDUSTRIAL
MEDICAL OFFICER**

Dow is a world-wide chemical company with sales approaching £600 million and an outstanding record of growth.

The European Division directs an extensive marketing/sales organization throughout Europe from its headquarters in Zurich.

The British company has modern sales offices in London, Manchester and Birmingham, with production plants at King's Lynn and Barry. King's Lynn itself is an active, pleasant market town and port, close to the Norfolk Broads and holiday beaches. A growing industrial centre, it offers economic housing, good schools, shopping and recreational facilities. King's Lynn is approximately 40 miles from Cambridge and is 2½ hours by train from London.

Our plant at King's Lynn employs nearly 300 people and has been rapidly expanded in recent years.

We require a part-time Industrial Doctor who will be based at our King's Lynn plant and form part of our Management team.

Our requirements can be met in a number of ways, examples of which are set out below, but it is quite probable that prospective candidates may suggest alternatives that would be equally acceptable to the company. They may be:

- recently qualified men who have a strong pull towards industrial medicine and who may wish to pursue independent research into toxicological or related fields. Such men should preferably be willing to train for occupational medicine and have a minimum of three years' post registration experience.
- experienced industrial doctors (or General Practitioners with experience of industrial medicine) with, ideally, a diploma in Occupational Health.

The job will be to provide a complete industrial medical service for the King's Lynn plant supported by a full-time Industrial Nurse. This will include devising precautionary procedures for the handling of toxic products, pre-employment medical examinations, and contributing to Management decision-making from an environmental health viewpoint.

It is envisaged that this job will grow as our operations expand in the UK and specifically there will be the opportunity for the man of ambition to contribute towards the evolution of medical procedure and practices within the European organization of the Dow Chemical Company. The Medical Officer will have functional links with the local and European Industrial Hygiene, Safety and Medical teams, and considerable scope exists for strengthening these inter-relationships.

The terms and conditions of employment for this position will fully meet the recommendations of the B.M.A. Please apply in writing, quoting reference AM 28, to

A course of advanced study covering one calendar year will be held in the Division of Steroid Endocrinology (Director: Dr. S. R. Stutch) from October 1969 to September 1970

leading to the degree of Master of Science in Steroid Endocrinology. The course is intended for graduates in chemistry, biochemistry, and the biological sciences including medicine, and will provide theoretical and practical knowledge of steroid endocrinology as a basis for clinical biochemistry, and medical, pharmaceutical and agricultural research. The course consists of lectures, tutorials, demonstrations and practical laboratory work, and a research exercise on which a dissertation will be presented. Examinations will be held in September. The Medical Research Council may consider applications for support of suitable students for this course.

Applications, giving the names of two referees, should be made as soon as possible, and in any case not later than May 21, 1969. Application forms and particulars can be obtained from Professor G. H. Laith, Department of Chemical Pathology, The Medical School, Leeds LS2 9NL. (16781)

Clinical Research

Sandoz forms a large International group of companies which currently invests more than £15,000,000 annually in research in pharmaceuticals, chemicals and dyestuffs. In the field of pharmaceuticals, the success of Sandoz during the past 50 years can be directly attributed to this policy of basic research.

Due to the expansion of the Clinical Research Department, two new posts have been created for British registered Medical Practitioners. Both positions are based in London, however one appointment calls for general medical experience whilst the other calls for experience in psychiatry. Previous experience of research, or of the pharmaceutical industry would be an advantage but is not essential.

The successful candidates will be offered an excellent and progressive salary together with pension, life insurance, company car scheme and other benefits.

Applications, marked "In Confidence" should be sent to,

The Research Manager,
Sandoz Products Limited,
Sandoz House,
23, Great Castle Street,
London, W1N 8AE.

REGISTRAR IN PSYCHIATRY

The hospital is situated within the London Borough of Croydon and is half an hour's rail journey from Central London. It is run on the "Firms" system and the successful candidate would have the opportunity of taking part in all aspects of clinical psychiatry. There are links with London teaching hospitals. Postgraduate training is undertaken in conjunction with the Bethlem Royal and Maudsley Hospital. Special concessions can be obtained for attendance at courses at the Institute of Psychiatry. Registrars expected to take the D.P.M. and regular teaching seminars are held for them. A regional postgraduate tutor in psychiatry for Part II of the D.P.M. organises training courses at a special teaching unit near the hospital.

Out-patient clinics are held at various general hospitals at which registrars assist in treatment. In addition there is an in-patient unit and a day centre at an associated general hospital in which the successful candidate may have to take his share of duty. There is good liaison with the staff of local authorities and ample opportunity for experience in community care.

Post may be non-resident or, if required, a small furnished flat is available for a married person or single quarters are available for either a man or woman.

Application forms obtainable from and returnable to the Group Secretary by April 18, 1969. Candidates may visit the hospital by appointment. (28301)

MINISTRY OF OVERSEAS DEVELOPMENT

The Need

GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

The Opportunity Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

The Advantages Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained.

Salaries Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1,650 to £2,900 per annum.

Training Scheme for Recently Qualified Doctors

In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

MEDICAL
PRACTITIONERS

There are vacancies for Medical Practitioners on the mines of the Anglo American Corporation group in Southern Africa.

Advantages of employment, either short-term or on a career basis, with the Corporation's medical service include:

Well-equipped Hospitals: Hospitals vary in size—the largest has over 900 beds—and cater for employees of the group's widespread mining and industrial interests. They are well equipped and have ancillary services.

Salaries: Salaries are attractive and commensurate with qualifications and experience and the responsibilities of the positions.

Benefits: Unfurnished houses with pleasant gardens are provided at nominal rentals; generous leave regulations; sporting and recreational amenities on a comprehensive scale are available.

Interesting Work: Doctors have the opportunity to practice a high standard of general medicine and surgery and gain valuable experience in the management of trauma. The larger hospitals of the group have specialists on their staffs on either a full-time or part-time basis. The broad fields of industrial medicine and community health are also an integral part of this service.

Please write in confidence, giving fullest details, to:—

ST. ANDREW'S HOSPITAL,
NORTHAMPTON

Medical Director: James Harper, M.D., F.R.C.P.(Edin.), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an occupational therapy department, Swimming-pool, a squash court and library, while in the grounds there are tennis courts, a nine hole golf course, etc.

Fees range from 25 guineas per week and charges for treatment at St. Andrew's Hospital are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

Further particulars can be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel.: Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London W.1.

in staphylococcal septicaemia

powerful · bactericidal · antistaphylococcal

The potential severity of staphylococcal septicaemia demands prompt antibacterial therapy—often well before sensitivity reports become available. FUCIDIN is rapidly and easily absorbed, and gives serum levels which are bactericidal against almost all pathogenic staphylococcal strains; FUCIDIN exhibits remarkable ability to reach the nidus of infection despite poverty of blood supply or presence of pus. For early control of these dangerous infections FUCIDIN has proved a reliable and

economical choice—in over five years of clinical use. For full literature and prescribing information please write to the Medical Information Department.
