

Just anxiety... or depression as well?

'Anxiety is frequently intermingled with depression ...'
Clin. Trials J., 1965, 2, 317 (Nov)

When symptoms of anxiety and depression co-exist, the anxiety is usually easy to recognise, but the depressive state is often less obvious.

In anxiety-depressive conditions, 'Tryptizol', a well-established antidepressant with an intrinsic tranquillising action, has proved of considerable value. In many cases, the patient becomes calmer, mood is lifted, and sleep and appetite improve.

When treating respiratory
tract infections

BE SPECIFIC ILOSONE IS.

'Ilosone' specifically destroys the pathogens in tonsillitis, acute bronchitis, streptococcal pharyngitis, otitis media, and bacterial pneumonia.

'Ilosone' causes minimal interference with the natural gut flora, thus diarrhoea or gastrointestinal upset is rare.

In addition to its high activity against gram-positive cocci, 'Ilosone' is also active against *H. influenzae*, and *Mycoplasma pneumoniae*. The clinical response is rapid, and the chance of relapse is small.

The range of presentations is such that 'Ilosone' can be prescribed for the whole family.

This eradicates Trichomonas

Magmilor (nifuratel) is a powerful systemic trichomonocide. Systemic therapy is essential if the organisms which have invaded the Skene's tubules and Bartholin's glands are to be eliminated—virtually impossible by topical means. Systemic therapy also provides a simple method of treating the male consort.

This eliminates Trichomonas, Candida and Bacteria too!

Magmilor is also effective topically in the vagina against Candida, bacteria and free-swimming Trichomonas. Concurrent treatment with Magmilor pessaries therefore provides immediate broad-spectrum coverage against all types of infective vaginitis. This ensures rapid symptomatic relief with minimum delay in starting treatment—and avoids the danger of monilial overgrowth.

This is the complete package treatment for Vulvo-vaginitis and Leucorrhoea

21 oral tablets and ten pessaries—in a single pack—eliminate infection from all affected parts in the female.

To prevent re-infection there is a special 21 tablet course of treatment for the male partner.

Female Treatment (21 oral tablets; 10 pessaries) **R_x** as Magmilor treatment pack.

Male Treatment (21 tablets) **R_x** as Magmilor tablets x 21.

Each Magmilor tablet contains 200 mg. nifuratel.

Each Magmilor pessary contains 250 mg. nifuratel.

When you prescribe elastic stockings

Scholl make sure the patient wears them

Scholl know as well as you do just how much women hate the idea of elastic hosiery. And that though they'll often take the prescription, they don't always wear the stockings.

So Scholl make their elastic hosiery attractive by making the stockings as un-detectable as possible. They conform to all the specifications of the Drug Tariff and they give the patient all the support and comfort you want her to have. But they look nicer than ordinary elastic stockings. Feel lighter. So that your patient doesn't feel embarrassed by them. And instead of leaving them in the drawer, she wears them.

Scholl 'Soft Grip'

for conditions requiring 'Elastic Yarn Standard Weight'.

Worn *under* normal sheer nylons, Soft Grip are almost invisible. They are made in double-expansion mesh with two-way elasticity to provide firm, even support *around* the leg with plenty of comfortable 'give' lengthwise.

Scholl 'Nylastik'

for cases needing 'Lightweight Elastic Yarn Stockings'.

Nylastik are worn instead of nylons, and, on the leg, appear almost indistinguishable from an ordinary 30 denier stretch stocking.

SOLPRIN**

He sees no reason to change from Solprin because, like many doctors, he knows that Solprin still maintains its reputation as the most acceptable form of aspirin. He knows that salicylate therapy is still the first choice treatment for rheumatoid arthritis, and that the aspirin in Solprin is an extremely soluble form to minimise the risk of gastric irritation - a point of particular importance when high doses are used.

A recent report from a London teaching hospital demonstrated the anti-inflammatory effect of salicylate in high dosage for the treatment of rheumatoid arthritis, and comparisons were made with prednisone and paracetamol. Both prednisone and high doses of salicylate produced measurable reduction in joint size, but parace-

amol did not do so. The authors state,

"It is suggested that high dosage of salicylate, unlike low dosage, has a clinically measurable anti-inflammatory effect. If suppression of inflammation is desirable in rheumatoid arthritis high dosage of salicylate is indicated..."

SAFETY

The very small amount of inhalant often necessary to relieve an attack is important. Therapeutically, this is of benefit to the patient in avoiding any side-effects which might be brought about by taking too frequently a full measured dose. Overdosage with the Rybarvin Inhaler is virtually impossible.

ECONOMY

Economically the very low cost of treatment by Rybarvin, 1500 average doses ($\frac{1}{2}$ minute) for 8s. 4d. (1 oz. bottle) i.e. 1/15d. per dose, must be of interest to both patient and doctor.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

How would you like to get out of bed 3 or 4 times on a cold night-

In dealing with urinary frequency in the elderly the physician faces two problems. Such patients may often feel a need to micturate when urine volume is quite small or a fraction of the bladder's capacity: Cetiprin helps the doctor to control this need by blocking the innervation and increasing bladder capacity. The second problem is more intractable and requires the breaking of the established *habit* of frequent urination. In such cases the physician expects no immediate marked response, and persists with treatment for at least 14 to 21 days. Cetiprin, time and the doctor's tolerance are all needed to overcome urinary frequency.

The alert physician recognizes that frequency is more than a distressing condition *per se*. He sees in it a common cause of

interrupted sleep and consequent impaired physique, and of lower morale — further conditions making in-roads into his already precious time. He sees — and prescribes CETIPRIN®.

Dosage: For nightly tenesmus in the adult and geriatric patient two tablets at bedtime. In chronic cases it is advisable to start with 3-4 tablets at bedtime and reduce the dose when control is established.

Contraindications:
Gastric retention;
glaucoma; large residual
urine retention.

obesity

Slimcea Bread can help in the treatment of obesity.

An average person eats 40 ounces of bread a week: 8 slices each day. The difficulty of 'cutting out bread' is therefore obvious. To the psychological difficulties of giving up a food that is eaten at almost every meal is added the practical problems of finding sensible and sensibly priced alternatives to the protein, vitamins and minerals thus lost. Apart from supplying over 400 calories each day it is a vital source of protein, vitamin B1, niacin, calcium and iron (amounting to 20% of the average total intake).

The answer is not to give up bread but to eat as many slices of Slimcea as were formerly eaten of ordinary bread. Assuming no other changes, an average overweight person by merely changing to Slimcea would be better off by 11½ lbs. of body weight in a year. In addition it will help to avoid the use of appetite suppressants, with their risk of dependency.

Slimcea Bread...

Lower calorific value per slice.

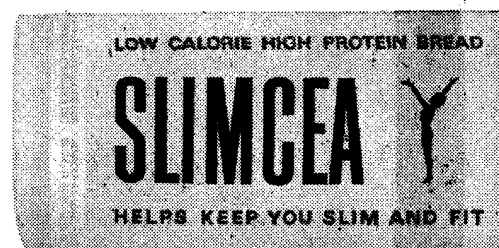

Slimcea has only 35 calories per slice against 51 calories per slice of equal volume of ordinary bread: a reduction of 31%. This is a real contribution to weight control since bread is eaten by volume rather than by weight.

Higher protein value per slice.

1.9 grms of protein per slice against 1.7 grms per slice of ordinary bread: a 12% increase.

Delicious, Fresh Taste.

Slimcea is real bread and is therefore no hardship as part of a long term diet (available in both white and brown).

Embarrassment is short-lived with Synalar

Inflammatory dermatoses frequently respond to Synalar in 24-48 hours

Low concentration, optimal skin penetration, prolonged action.

Speed of action. Low concentrations of Synalar achieve optimal skin penetration, frequently with therapeutic response in 24-48 hours. This rapid action greatly reduces the incidence of scratching. The speedy restoration of the epidermal barrier lessens the risk of secondary bacterial infection.

Efficacy. Synalar has a 95% success rate in inflammatory dermatoses and in pruritic and allergic conditions of

the skin. It has often been successful in difficult skin conditions which, previously, had been unresponsive to other steroid preparations.

Range. The complete flexibility of the Synalar range makes the selection of treatment, according to the type and severity of the condition, a simple one. Synalar is available in cream, ointment, lotion and aerosol form, for the initial treatment of severe

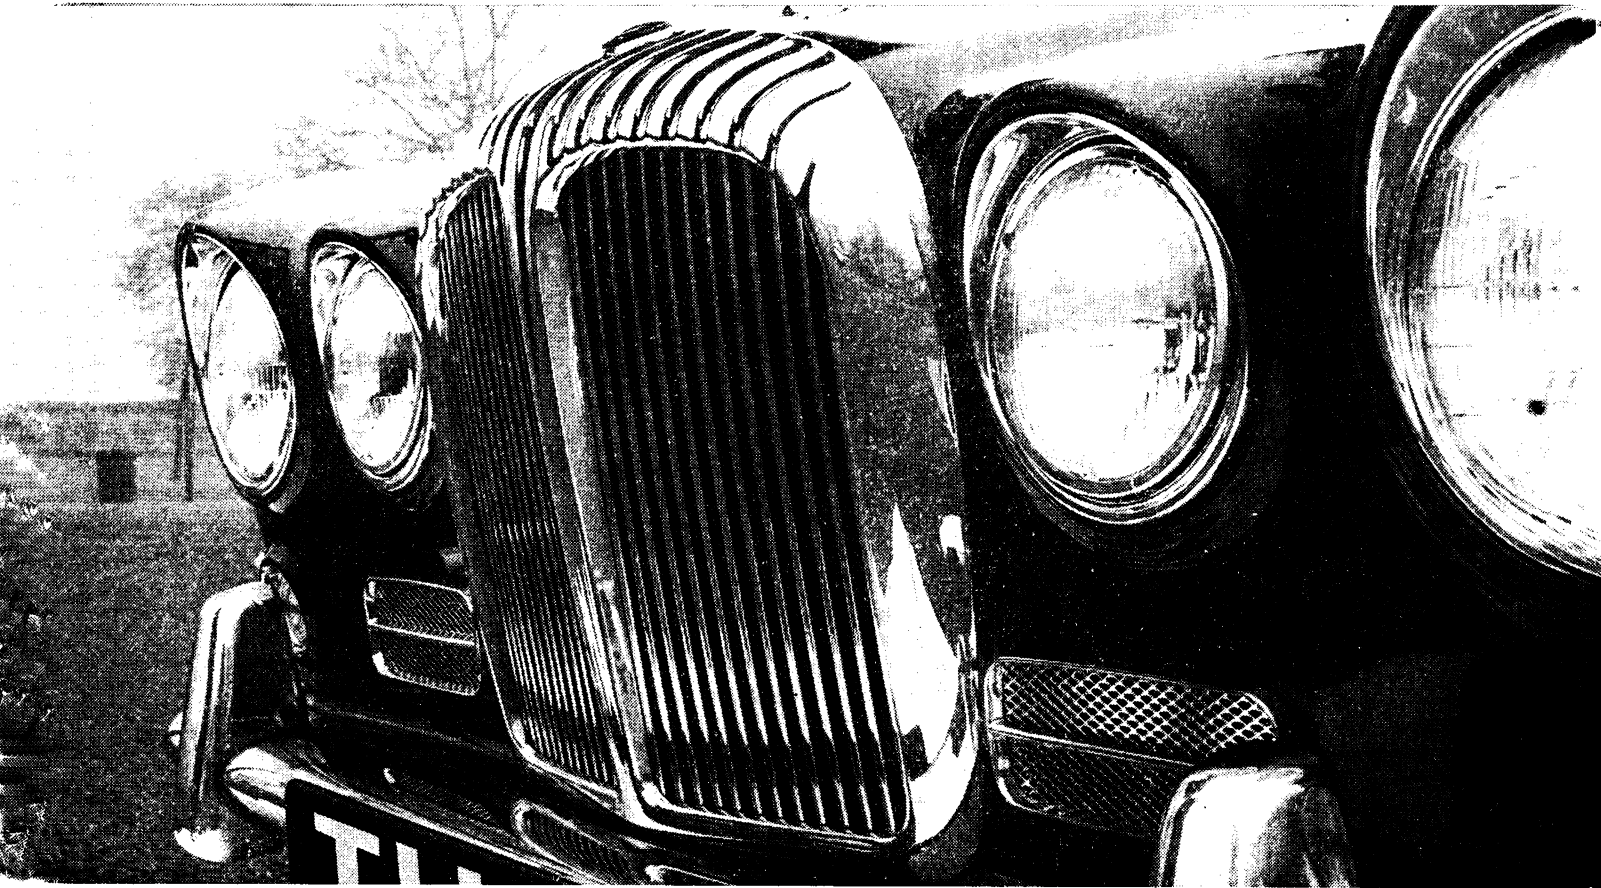

cases; for maintenance therapy and less severe dermatoses, Synandone is available as cream, ointment and lotion.

Anugesic-HC

Cream and Suppositories
for haemorrhoids

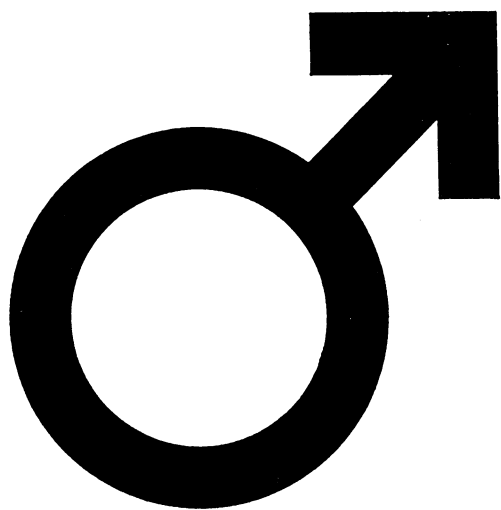

sense—not sensitivity

Anugesic-HC is a sensible new formula for the treatment of haemorrhoids. It contains a steroid and a local analgesic together with well-established astringent and emollient agents. The analgesic in Anugesic-HC is pramoxine hydrochloride. Unlike other local analgesics, sensitivity is not a problem with this compound. Thus Anugesic-HC offers broadly-based relief of symptoms without the hazard of sensitization.

Anugesic-HC the formula

Sustanon makes a man a man again

in body and in mind

When gonadal activity is inadequate the young or middle-aged male may demonstrate diminished genital structure, and response, to the point of impotence. Understandably the repercussions reach far beyond the purely physical – often playing havoc with the patient's psyche, marriage and career.

Every physician knows how complex is diagnosis of the condition, with the patient frequently hiding the facts not only from his doctor but *from himself*. Even when the diagnosis is established, therapy is not straightforward and many factors must be considered. Nevertheless with Sustanon a clear, early and sustained response may occur at all levels, physical, mental, and emotional.

Sustanon is preferable to testosterone propionate as of course no single testosterone ester provides both lengthy activity and rapid onset of action. This Sustanon does. Its prolonged activity is such that only an occasional injection is needed to maintain the required therapeutic level.

Sustanon '100'

2 weeks' activity – contains 100mg testosterone per ml:

Testosterone Propionate B.P. 20mg
Testosterone Phenylpropionate B.P. 40mg
Testosterone Isocaproate 40mg

Sustanon '250'

4 weeks' activity – contains 250mg testosterone per ml:

Testosterone Propionate B.P. 30mg
Testosterone Phenylpropionate B.P. 60mg
Testosterone Isocaproate 60mg
Testosterone Decanoate 100mg

Packs: Boxes of 3 ampoules of 1 ml in either strength.
Single 1 ml Orgaject disposable syringes in either strength.
Contraindication: in males, carcinoma of the prostate.

'Aldomet' + hydrochlorothiazide HYDROMET ✓

two complementary antihypertensive agents in one tablet

'Hydromet' is available as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and 15 mg hydrochlorothiazide BP.

Detailed information is available to physicians on request. 'Hydromet' and 'Aldomet' are registered trademarks.

Merck Sharp & Dohme Limited
Hoddesdon, Hertfordshire
Telephone, Hoddesdon 67123

For many hypertensive patients, 'Hydromet' may be the most convenient treatment. 'Hydromet' contains both methyldopa and hydrochlorothiazide, a combination already widely used in this country for the severer grades of hypertension. 'Hydromet' offers the patient these advantages:

- the convenience of a single tablet
- satisfactory control of blood pressure usually possible on a lower dosage of methyldopa
- in some severe and resistant cases, a greater antihypertensive response than with methyldopa alone
- the diuretic action of hydrochlorothiazide, of additional value when hypertension is complicated by heart failure and oedema

We'll help you feel at home abroad.

We have a couple of helpful schemes for people who want to take a car abroad.

If you're about to leave Britain you can take a 'tax-free' Ford with you. And, before you go, you can run it in this country for up to 6 months. So with this in mind, we rustled up our personal Export Scheme.

But if you're coming home temporarily, you can also buy a Ford free of purchase tax. Provided you've been away at least a year. And

you return abroad again within 12 months. In this case use our Visit Europe Scheme.

Both schemes mean that Ford's personal service doesn't stop at Dover. We'll arrange to ship your car anywhere in the world. And wherever you go, you'll find a Ford service depot. But if you do get stuck, we'll fly a spare part out specially.

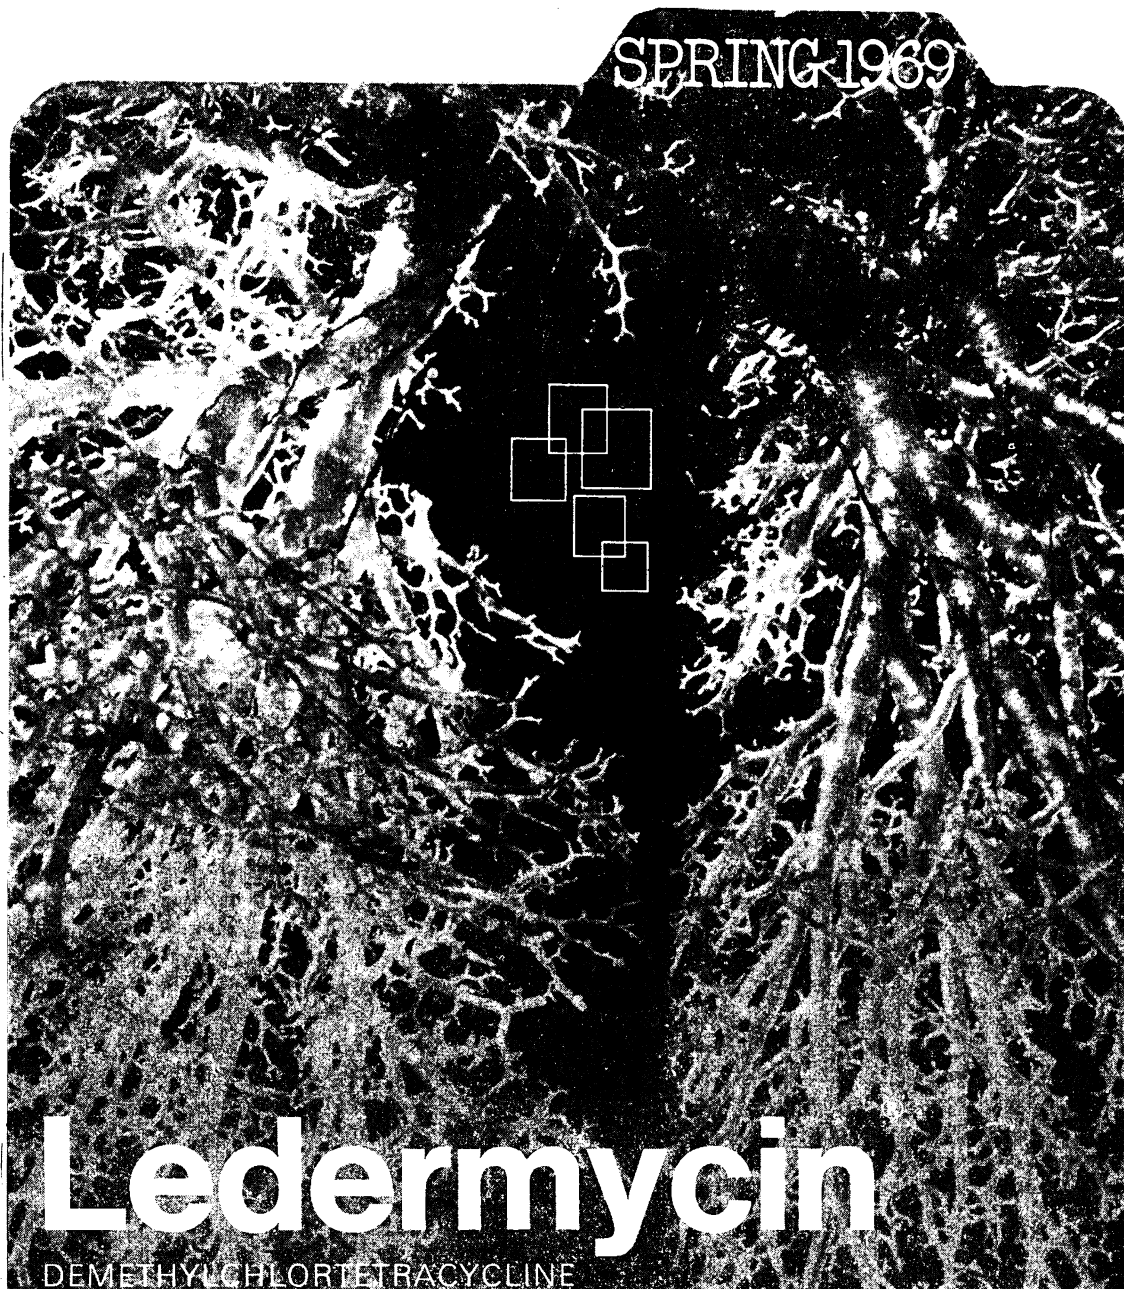

So, although you're abroad, it won't seem all that far from home.

For Information about the Ford Visit Europe or Personal Export Schemes, contact your local Ford dealer. Or write to the Showroom Manager, Ford Motor Company Ltd., 88 Regent Street, London W1.

by a comfortable margin. In a recent report of a comparative trial* involving three antihypertensive agents satisfactory control of blood pressure was obtained with each drug.

With 'Esbatal' for instance, a standing diastolic pressure of 100 mm. Hg or less was achieved in 75% of cases. The authors pointed out that

'Esbatal', guanethidine and methyldopa are probably similar in their ability to control blood pressure. *It was found, however, that 'Esbatal' produced fewer uncomfortable side-effects and was preferred by more patients than were the other agents. In contrast to the other drugs, all the patients on 'Esbatal' were able to complete the course of treatment.*

Cytotoxic Drugs in the Treatment of Cancer

EVELYN BOESEN and WALTER DAVIS

212 pages.

44 illustrations

60s. net

In the last two decades the development of chemotherapeutic agents has provided an additional choice of therapy for the treatment of cancer.

These so called cytotoxic agents, however, are damaging not only to tumour cells but also to normal tissues. Their use must therefore be undertaken only with informed caution.

In this new book the chemical and biochemical background of these drugs is explained in order to put the potential and limitations of each drug into perspective. The indications for the use of each drug and its side effects are described and as much detail as is feasible is given of actual regimes of drug administration. It is hoped that this book will prove helpful to all those who seek guidance on the use of cytotoxic drugs.

Diagnosis in Orthopaedics

By Leon Gillis, MBE, MCH, FRCS

This book presents an important aspect of a difficult subject in such a way as to be extremely helpful to G.P.s, orthopaedic surgeons and general surgeons.

1969 368 pages illustrated £6 10s.

Modern Trends in Gynaecology

—4

Edited by R. J. Kellar, CBE, FRCS, FRCP, FRCOG

This is the first book on Gynaecology to have appeared in the "Modern Trends" series in the last six years and, since the new developments in this time have been many, the coverage for this volume is of necessity considerable. Many of the subjects chosen are on ground common to both Gynaecology and Obstetrics and, coming as they do from such authoritative sources, cover the newest aspects in the field—clinical, pathological, and biochemical.

1969 280 pages illustrated 64s.

Modern Trends in Obstetrics—4

Edited by R. J. Kellar, CBE, FRCS, FRCP, FRCOG

This new book in the series covers a wide range of topics, mostly of a clinical nature, indicating the extent to which the application of newer knowledge in the fields of anatomy, physiology and biochemistry has been successful in improving clinical understanding and practice.

1969 328 pages illustrated 75s.

Pediatrics*

14th Edition

Edited by L. Emmett Holt, Jnr, MD, Austin McIntosh, MD, and Henry L. Barnett, MD

All the contributors to this well-known work are leading authorities in their fields being Professors, Associate Professors, and Directors of Departments. Particular attention is given to two very important developments in the field: the growing trend towards specialization within pediatrics and the increased complexity in the organization of child health services.

Immunohematology*

By Chester M. Zmijewski, Ph.D

In this book, the author provides a foundation in the immunology of blood group antigens and antibodies in order to give the reader, researchers and clinicians, a basic understanding of the properties of the blood.

1969 300 pages illustrated £6 10s.

Clinical Aspects of Operable Heart Disease*

By Donald R. Kahn, Ruth H. Strang, MD, and William S. Wilson, MD

This volume is based on the experience gained from the performance of over 2,000 open heart operations at the University of Michigan Medical Center, and proves to be the most informative and thorough survey available on the background and treatment processes for heart disorders requiring surgical correction.

1969 372 pages illustrated £7 5s.

How do General Practitioners spend their time?

Do Appointment Systems Work—and How do Patients use them?

What Type of Work Can a General Practice Nurse do?

The New General Practice answers these and many other questions. The book contains 22 articles published in the *B.M.J.* in the last two years, many of them describing pioneering work in the field of general practice. In his Introduction to the book Lord Platt says "Those who have already reorganized and reformed their practices will read this book with interest as they will be able to compare their own ideas with those of others, sometimes learning, sometimes having the satisfaction of knowing better."

THE NEW GENERAL PRACTICE

"... this book will be widely read by general practitioners and will, no doubt, be passed from partner to partner and principal to staff in many practices. . . . What is more important, however, is that the book should be read by others outside general practice, particularly those who teach."

Brit. med. J. (1968), 4, 173.

"Many of these articles are important and aspirants to membership of the College might be expected to be aware of them. . . ." "... most useful to those who wish to know more about how best a general practice may be organized."

J. roy. Coll. gen. Practit. (1968), 16, 406.

"It is well to restate at this moment, as this paperback does, what we should, and could, and have aimed for in the past as in the present, in order to achieve proper general practice doctoring as applicable in the second half of the twentieth century."

Update (1968), 1, 63.

"Provides a valuable account of the experiences of methods by which another country tackles its problems of organization of health services. It is recommended to everyone interested in the problems of medical care available to all."

Swedish Medical Journal (1968), 65, 3661.

**BRITISH POSTGRADUATE MEDICAL FEDERATION
(University of London)****CLINICAL NEUROPHYSIOLOGY**

A Postgraduate Course in Clinical Neurophysiology will be held under the Department of Health's Senior Postgraduate Educational Secondment Scheme at the Institute of Psychiatry in the Autumn of 1969. The course will be held in association with the Royal College of Physicians of London, where certain of the lectures will take place. It will be directed primarily to Senior Registrars and Consultants requiring knowledge and experience in clinical neurophysiology either as part of their specialist training or because a widening of their interests or duties as Consultants makes such knowledge necessary.

The course coverage will include electrophysiological and data processing techniques utilized in clinical and research studies of the function of the central and peripheral nervous systems (including E.E.G.) and the skeletal musculature (including E.M.G.). Opportunity for practical experience will be available in the laboratories of the Department of Clinical Neurophysiology of the Bethlem Royal and Maudsley Hospital, and visits to clinical and research laboratories in the Institute of Psychiatry and elsewhere are planned.

The course will last for 12 weeks and will begin on Monday, September 29, 1969, and end on Friday, December 19, 1969. The fee for the course will be £80.

This course is approved under the Department of Health's Senior Postgraduate Educational Secondment Scheme for Senior Registrars and Consultants which offers paid study leave, expenses, course fees and the cost of locum tenens.

COMMERCIAL APPOINTMENTS

Wellcome

HEAD OF DEPARTMENT Preventive Medicine and Public Health

This appointment provides an unusual opportunity for a medical practitioner with public health experience to organise and develop a Public Health and Preventive Medicine Section within the Group Marketing Division of the Wellcome Foundation. He will be responsible for the development of markets for biological products used in the prevention and treatment of communicable diseases in both temperate and tropical countries. Based in London, he will undertake occasional journeys to overseas companies and establish close liaison with health authorities in the United Kingdom and abroad.

Candidates should hold the DPH or DTM & H or be prepared to obtain one with financial help from the company. Practical experience in public health communicable disease problems in Britain is essential. Similar experience overseas or experience in the pharmaceutical industry would be helpful.

A good salary and attractive conditions of service are offered, and a company car will be provided.

For further information, please write, quoting AM.31, to the Senior Personnel Officer, Group Personnel Division, **The Wellcome Foundation Limited**, 183 Euston Road, London, N.W.1.

COMMERCIAL APPOINTMENTS

M&L MANAGEMENT SELECTION

Please state briefly, in writing, how each requirement is met. Nothing will be disclosed, unless you give permission after a confidential interview.

Ethical Pharmaceuticals

Medical Advisers

London area

The client company is the British subsidiary of a fast growing international group. It has in fact outpaced its parent in the rate of growth, and is recognized as one of the most dynamic in the British pharmaceuticals industry, both in expansion of established products and in the development of new ones. A recently concluded production and marketing agreement with a well known continental company enhances the company's potential still more. All this necessitates the augmenting of the medical advisory staff. The men appointed will work in close touch with product and clinical research doctors (new up-to-date laboratory facilities are in course of construction); they will be responsible for the initiation and control of clinical trials at hospitals and university centres, for giving guidance to the profession on the application of the company's products, for marketing support in medical literature and representative training, and for maintaining contact with relevant professional bodies.

Applications are invited from British registered doctors, preferably with some industry experience, in their late twenties or early thirties. Specialization is not called for but emphasis in medical experience is desirable. Fluency in French or German is an advantage. Salary will be not less than £3,500 for men not experienced in the industry, and will be negotiable above that according to experience; contributory pension; car; relocation expenses. Please write to L. V. Taylor, quoting AM. 42060.

**WORLD HEALTH ORGANIZATION AND
COUNCIL OF EUROPE FELLOWSHIPS**
1970

A small number of fellowships for study
abroad will be awarded in 1970 by the
World Health Organization and the Council
of Europe. These are available to registered
medical practitioners, dental practitioners,
state registered nurses and other professional
personnel engaged in the health services,
medical education, or medical research in
the United Kingdom.

The fellowships are awarded normally for
periods of two weeks to one month. Only
in exceptional cases can periods longer than
this be considered. In each case the fellows
are given a monthly allowance of approxi-
mately £90 to £100 per month (the amount
varying with the country or countries
visited) together with all travelling expenses.

Applicants should be of at least five years
standing in their profession and able to
assess critically their visits and studies
abroad so as to utilize the experience for
the benefit of the health services of the
United Kingdom. They will be expected to
continue in the health services of the United
Kingdom for at least three years after hold-
ing a fellowship.

Application forms for fellowships to be
taken up in 1970 may be obtained:
(a) By those resident in Scotland from:
The Secretary, Scottish Home and Health
Department, St. Andrew's House, Edinburgh 1.

(b) By those resident in Northern Ireland from:
The Secretary, Ministry of Health and
Social Service, Dundonald House, Upper
Newtownards Road, Belfast 4.

(c) By others from: The Secretary, Room
DS09, Department of Health and Social
Security, Alexander Fleming House, Elephant
and Castle, London S.E.1.

Envelopes should be marked "W.H.O. and
Council of Europe Fellowships." Applica-
tions must be received not later than May 23,
1969. (16912)

Ferrograd[®] C

for all iron deficiency anaemias

You'll automatically ensure depleted body stores are replenished simply by continuing treatment and your patients will very rarely complain of side effects after the once-daily, before-food dosage.

As the haemoglobin level approaches normal during treatment with iron salts alone, absorption tends to decrease even though iron stores remain depleted. With high dose vitamin C, as in Ferrograd C, absorption of iron continues at a higher rate after Hb levels are normal so that the body stores are replenished.

Each Ferrograd C tablet contains the exsiccated equivalent of 525 mg ferrous sulphate BP (\equiv 105 mg Fe) in a Gradumet[®] and 500 mg vitamin C as sodium ascorbate.

Ferrograd C

Once-daily ferrous sulphate with high dose vitamin C
for maximum absorption and replacement of iron stores

Betnovate C-Cream

Presentation
Betnovate-C Cream (0.1% betamethasone as 17-valerate plus 3% clioquinol) in 15, 30 and 100 gram tubes.
Also available:— Betnovate-C Ointment; Betnovate and Betnovate-N Creams, Ointments and Lotions; Betnovate-N Tulle; Betnovate Scalp Application and Betnovate Rectal Ointment.

Indications
All steroid-responsive dermatoses, particularly those complicated by mild fungal or bacterial infection.

Application
Apply a small quantity once or twice daily.

Adverse reactions
Betnovate preparations are usually

tolerated well but if signs of hypersensitivity appear, application should be stopped immediately. As with all topical corticosteroids, if Betnovate is used with occlusive dressings on extensive areas, or for prolonged periods, the possibility of systemic absorption should be considered. Absorption is more likely in infants and children, and may occur even in the absence of occlusion.

Betnovate is a Glaxo trade mark
