OTITIS MEDIA

PENBRITIN

Luckily she can't remember the pain now; can't even recall how she woke screaming in the night. But her parents remember, and they're grateful that you prescribed such effective treatment. They know that you relieved the symptoms; you know you did more than that. Your treatment destroyed the organisms that caused the infection.

Penbritin is the answer – *first time*

In treating Otitis Media, slow or inadequate response can lead to dangerous complications, but Penbritin, with its bactericidal action and broad spectrum of activity, minimises this risk. A broad spectrum of activity is particularly important since the common pathogens in Otitis Media are β -haemolytic streptococci, Dip. pneumoniae, and in young children, H. influenzae. Some antibiotics may inhibit these organisms, but mere *inhibition* is not enough. Penbritin's ability to *kill* these organisms places less reliance on the body's natural defence mechanisms, and contributes to its high clinical success in Otitis Media.^{1,2}

Penbritin provides effective treatment of Otitis Media and the degree of safety characteristic of penicillins, so important when treating children. Additionally, Penbritin Syrup's pleasant taste ensures that children will happily complete the full prescribed course of at least five days' treatment, even after the pain has stopped.

In the treatment of Otitis Media, Penbritin is the answer – first time. And so often the only prescription needed.

Dosage:

Children under 2 years: 62.5-125 mg.
2-10 years: 125-250 mg.
Adults: 250 mg.

All dosages q.d.s. a.c.

In severe infections these doses may be increased or Penbritin given by injection.

Contra-indication: Penicillin allergy.

Side-effects: As with other penicillins.

Availability: Penbritin (ampicillin B.P.)

**ANTIBIOTICS
AND THE INTESTINAL FLORA**

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1 2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

Edited by Professor Dr. Chr. E. Hedinger, Institute d'Anatomy, Pathologique de l'Universite de Lausanne

An international conference on malignant tumours of the thyroid, organized jointly by the "Unio internationalis contra cancrum" (UICC) and the Swiss Cancer League, was held in Lausanne in May 1968. This book contains the full text of the papers read at this conference together with short summaries of the most important points raised in discussion. The six sessions were devoted to the following subject areas: histopathological classifications of malignant tumours of the thyroid; their epidemiology; experimental work on thyroid cancer; functional activity of such tumours; clinical classification of malignant tumours of the thyroid; and finally, their treatment. The papers were contributed by over 60 experts in the field and give a good picture of the present state of research on thyroid cancer.

Edited by W. H. Kirsten, Professor of Pathology and Paediatrics. Advisory Committee of the Cancer Training Grant with Dr. Melvin L. Green, Advisory Committee of The Cancer Training Grant, Dr. R. J. Michael Fry, of the A.E.C. Agonne National Laboratory:

This symposium reviews current concepts and advances in normal and malignant cell growth. It is based on recent data concerning the growth kinetics of bone marrow, liver, gastrointestinal tract, skin and other organs. Cell proliferation of cancerous tissues is compared with normal tissues. The symposium also includes recent findings on the growth rates of some human cancers, including leukemias.

The therapeutic implications of cancerous cell proliferations are discussed. This is an up-to-date survey of growth rates of normal and cancerous cells.

MOST URINARY TRACT INFECTIONS RESPOND TO **BACTRIM* ROCHE**

In the treatment of urinary tract infections a high success rate has been achieved with Bactrim Roche. The usual caution should, however, be observed in prescribing for women of child-bearing age and the drug should not be used during pregnancy.

Bactrim Roche derives its powerful bactericidal activity by virtue of its unique mode of action. It interrupts two sequential stages in a metabolic process essential for the survival of bacteria.

new published comment

SEPTRIN in urinary infections

...“clearly superior to
either of the other treatments”...

(*Brit med J*, 1969, 1, 525.)

‘Septrin’ (trimethoprim and sulphamethoxazole) was compared with ampicillin and sulphadimidine in the treatment of 106 hospitalised patients with urinary infections. The cure rates one week after finishing treatment were: ‘Septrin’ 85 per cent, ampicillin 70 per cent, and sulphadimidine 40 per cent; and after four or five weeks 67, 52 and 15 per cent respectively. (Cure = eradication of original organism from urine.)
Brit med J, 1969, 1, 541.

The editorial which accompanied the publication of these results states that the superior effect of ‘Septrin’ was “... even more appreciable in the re-treatment of patients who had failed on another drug.” It also points out that the urinary tract is one of the largest fields

of usefulness for the new treatment, for very clear reasons:

1. Trimethoprim not only attains therapeutic tissue levels, but is excreted unchanged in high concentration in the urine.
2. All Gram-negative bacilli occurring in the urine, except *Pseudomonas aeruginosa*, are usually highly sensitive to it.
3. Its minimum inhibitory concentration is extremely low, and would do credit to a potent antibiotic.
4. Added to these advantages is the fact that trimethoprim and a sulphonamide, by blocking successive stages in the same metabolic process, exert a strongly synergic effect, and this action is *bactericidal*.

Cetiprin[®]

is altering established habits
of rising at night to pass water

The results of a recent double-blind crossover trial of Cetiprin suggest that "the drug may alter the established habit of rising at night to pass urine."¹

"This trial showed that emepronium bromide (Cetiprin) given in dosage of 150 mgs. on going to bed, effectively diminished nocturnal frequency of micturition in aged women. On the basis of a double-blind crossover trial an important difference emerged between those participants given the placebo before the drug, and those given the drug first. In the first case, there is little effect with the placebo but a moderate effect with the drug. In the latter case, there is a more marked effect with the drug – and this is carried over into the placebo period."²

"Nocturnal frequency of micturition is one of the trials of old age. In a previous paper we have shown it to be present in 64% of the total elderly population (70% of males and 61% of females of 65 years and over)."³

The Dermal range of products

Over the last few years, Dermal Laboratories have developed, tested and introduced a number of successful aids to the treatment of skin diseases. These have all earned the confidence of Consultants, General Practitioners and Dispensing Chemists alike, because they know that the results of Dermal's constant wide ranging research into new treatments are only made available for clinical use after the strictest independent testing. The Dermal products currently available are illustrated below.

Psoriderm Cream. For subacute and chronic psoriasis including the hair bearing areas and flexures. Contains 6% special coal tar plus 0.4% lecithin, and is formulated as a vanishing cream designed for twice-daily application.

Psoriderm Bath Emulsion. A 40% tar treatment beneficial in acute as well as subacute and chronic psoriasis. Emulsified to enable non-staining tar to disperse evenly in the bath.

Exolan Cream. Milder form of Exolan Paste containing 1% Triacetoxanthracene for patients who prefer to use an invisible vanishing cream. Can be used on scalp and hairy regions of the body.

Psoriderm Scalp Lotion. A preliminary shampoo treatment for psoriasis of the scalp which removes excess grease and scale debris. It contains 2.5% of special coal tar.

Prehensol Cream. Treatment for detergent dermatitis of the hands. Contains zinc salicylate and lecithin to restore pH to mild acidity and replace natural skin grease removed by modern alkaline detergents.

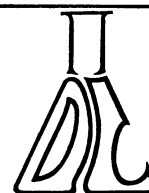

Exolan Pasta. Resolves psoriatic lesions in the same way as Dithranol, without burning and staining. Active constituent: 1.8.9 Triacetoxanthracene 3%. Can safely be applied at home by the patient. Healing is rapid, unlike steroids chances of swift relapse very low.

Callusolve. A new non-caustic treatment for plantar and other warts. Active constituent: Alkyl dimethyl benzyl ammonium halide dibromide, 25%. Can safely be applied by patient; especially suitable for removing multiple and mosaic warts.

Just anxiety... or depression as well?

'Anxiety is frequently intermingled with depression ...'
Clin. Trials J., 1965, 2, 317 (Nov)

When symptoms of anxiety and depression co-exist, the anxiety is usually easy to recognise, but the depressive state is often less obvious.

In anxiety-depressive conditions, 'Tryptizol', a well-established antidepressant with an intrinsic tranquillising action, has proved of considerable value. In many cases, the patient becomes calmer, mood is lifted, and sleep and appetite improve.

Important Announcement

The Use of Myambutol[®] In General Practice

The existing drugs used in the chemotherapy of tuberculosis sometimes prove unsatisfactory as a result either of side effects or the development of resistance. In situations of this kind MYAMBUTOL (ethambutol) is now established as the major alternative drug, and as a result many chest consultants are referring patients back to their General Practitioners with a recommendation to use MYAMBUTOL in conjunction with other anti-tuberculous agents.

In order to acquaint you with this important new drug, Lederle Laboratories are sending full information on the product to every

General Practitioner for reference purposes. Information is also available in the 1968 BNF, pp. 106, 107.

Your attention is particularly drawn to the necessity for careful adjustment of the dosage according to the patient's body-weight, which is essential if undesirable side effects are to be avoided. To assist calculation of MYAMBUTOL dosage, a number of aids have been prepared, details of which will be included with the mailed information. They can be obtained by direct application to Lederle Laboratories or from your Lederle representative.

guanethidine sulphate BP

Dosage

Initial dosage—two 10mg tablets daily. Frequent adjustment is unnecessary during stabilisation; depending on individual assessment, intervals between consultations may be up to one month. Should 20mg daily prove insufficient, increase daily dosage by one 10mg tablet. As the action of Ismelin is gradual and prolonged, allow at least one week before any increase, to observe full effect. The majority of patients will be symptom-free and adequately controlled on 40mg daily or less.

Prescribing notes

Ismelin is contra-indicated in the presence of phaeochromocytoma. Side effects attributable to postural hypotension normally reflect overdosage. Patients should be advised to avoid sudden changes of posture, or violent exertion, and if morning faintness on rising persists, to reduce the daily dosage by one 10mg tablet until the next consultation. If diarrhoea is troublesome, reduce or divide dose, or add $\frac{1}{2}$ gr. codeine phosphate t.d.s. Failure of ejaculation

has been reported and, rarely, exertional dyspnoea, nasal congestion, shivering, muscle weakness, paraesthesiae (due to latent cerebral arterial insufficiency), aggravation of intermittent claudication, and exacerbation of peptic ulcer. In heart failure, any tendency to fluid retention may be increased. As with any antihypertensive, prescribe cautiously for patients with renal failure and urea retention. Allowance should be made for the antagonistic pressor action of some antidepressants (MAOI), appetite suppressants and stimulants of the amphetamine class if administered concurrently.

John Elworthy much prefers his second wife

So does the re-vitalized Mrs. Elworthy herself, her family and her friends.

Taking a new look at the menopause, doctors are questioning the desirability—and even the logic—of suppressing with sedatives and tranquillizers an essentially metabolic condition. Mixogen gives complete mastery of the whole menopausal condition.

They have it on authority that today '... when the average woman can expect to reach her threescore years and ten, it would seem unrealistic to deny hormone treatment, which not only alleviates all the troublesome and antisocial symptoms of the menopausal and postmenopausal phases but is also a prophylactic measure against osteoporosis, senile vaginitis, hypertension, and coronary heart disease, to mention but a few hazards of oestrogen depletion.'¹

Plain oestrogen therapy, which may give endometrial bleeding and nausea, is surpassed by Mixogen.

'Perhaps the best way of avoiding oestrogenic bleeding is to use one of the oestrogen-testosterone combinations, of which the original—*Mixogen*—is the best.'²

introducing medihaler duo

**for prolonged action
rapid relief
insignificant cardiovascular effect...**

With *Medihaler-duo*, Riker makes a further notable contribution to bronchodilator therapy. *Medihaler-duo* enables the physician to make a more positive approach to reversal of airway obstruction in bronchial asthma and chronic bronchitis.

Medihaler-duo takes advantage of the finding that the bronchodilator effect of isoprenaline can be significantly enhanced by the action of phenylephrine. As a result, it is possible to obtain a greater response to treatment than would be experienced from comparable doses of isoprenaline administered alone. Moreover, this enhanced bronchodilator effect is achieved without significant change in pulse rate or blood pressure at recommended dosage. These results have been confirmed in clinical trials^{1,2,3,4,5,6,7}. With *Medihaler-duo*, relief is immediate in onset and often prolonged for three or more hours. Effect on the cardiovascular system has been found to be insignificant even in patients with uncomplicated hypertension.

...in bronchial asthma and chronic bronchitis

Composition *Medihaler-duo* contains a suspension of isoprenaline hydrochloride 8 mg./ml., phenylephrine bitartrate 12 mg./ml. and delivers to the patient a measured dose containing 0.16 mg. isoprenaline hydrochloride and 0.24 mg. phenylephrine bitartrate.

Contra-indications There are no absolute contra-indications, but *Medihaler-duo* should be used with caution in the presence of cardiac disease, hypertension or hyperthyroidism.

Side-effects Overdosage may cause dry mouth, palpitations, or nervousness.

Dosage Each puff from *Medihaler-duo* delivers a measured dose. One to three puffs should be sufficient to provide relief in most cases. It should not be necessary for the patient to take further treatment for at least thirty minutes, or more than eight treatments a day.

Children *Medihaler-duo* should be administered to children only under the supervision of a responsible adult.

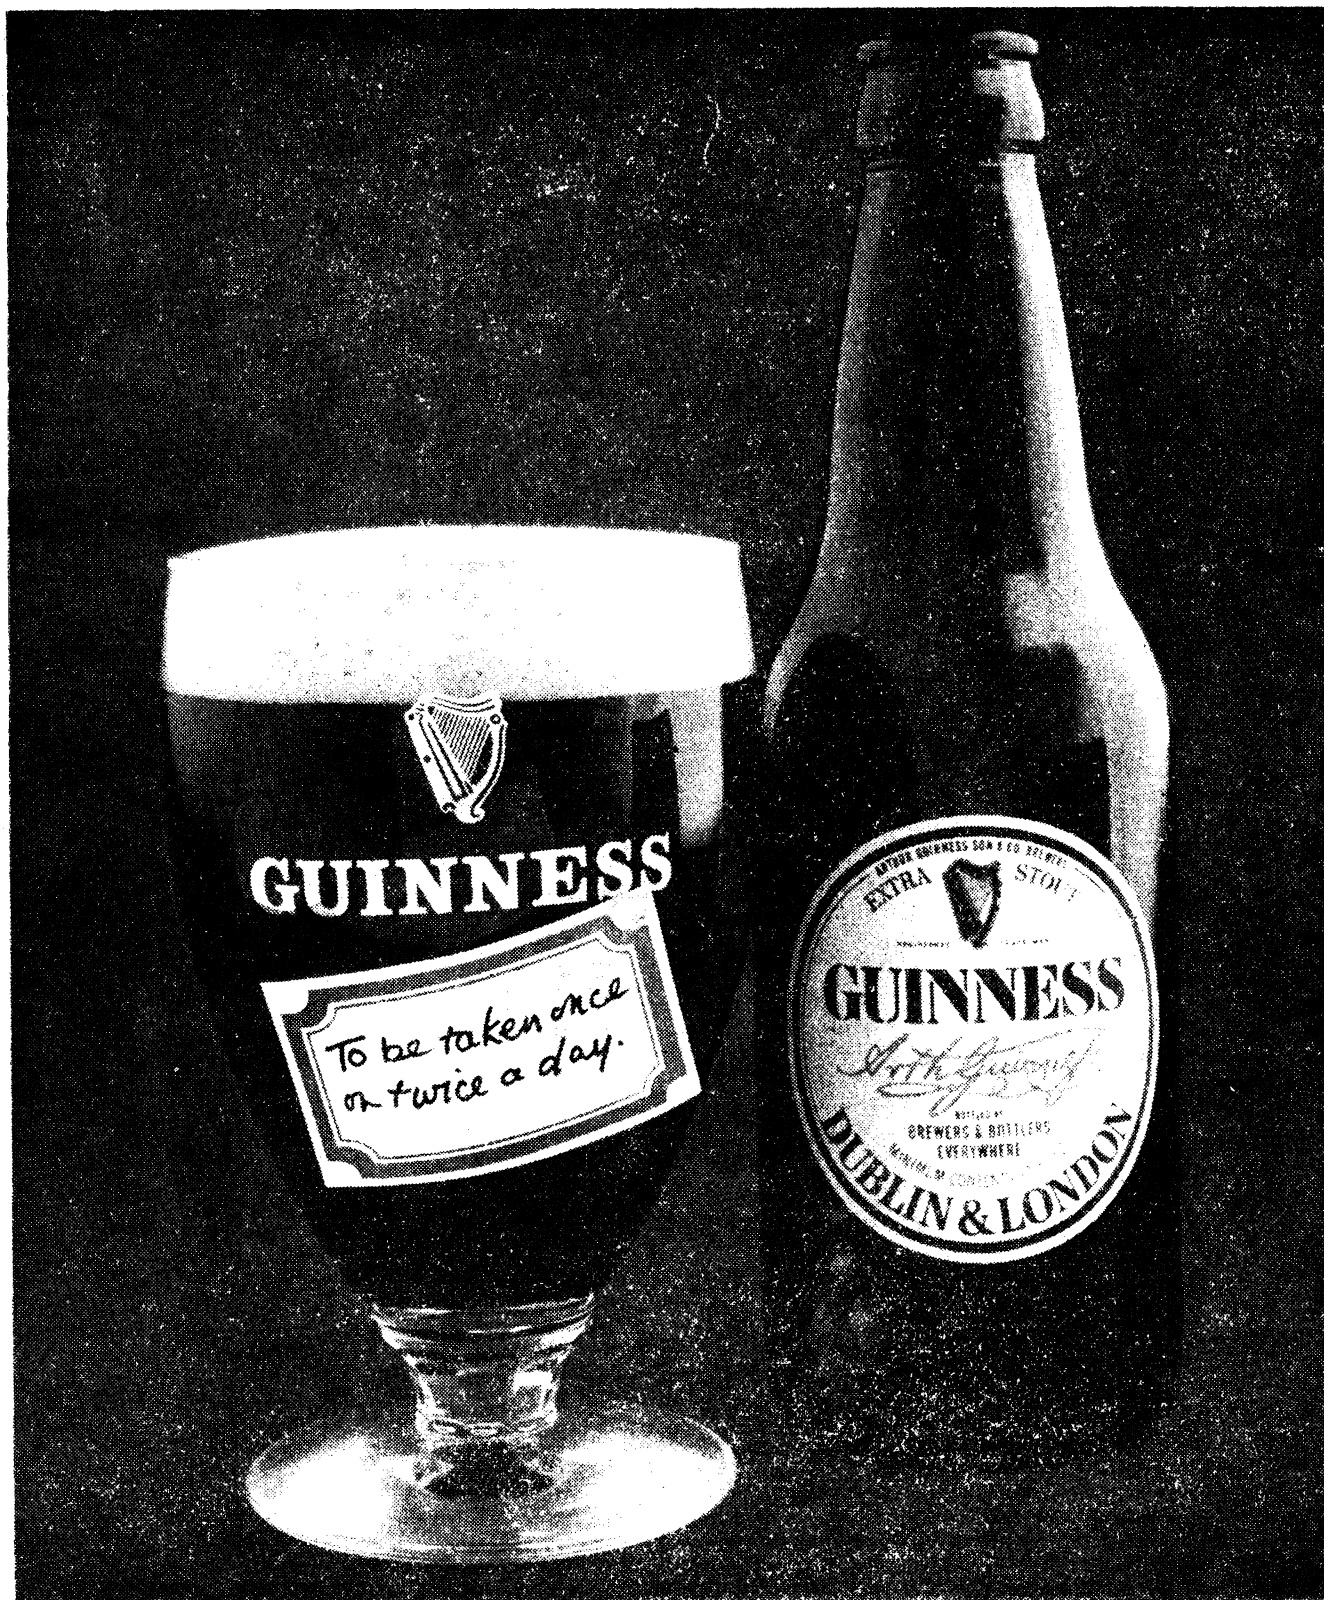

Basic NHS price Standard pack (complete 400-dose unit) 17/- plus Purchase Tax.

Doctors may not actually *prescribe* Guinness, but they recommend it very highly.

Guinness is full of goodness. It nourishes, sustains and aids recovery.

Besides which, it *tastes* marvellous. (Patients enjoy it as much as doctors themselves.)

A Conference on

PRIORITIES IN PROSTHETIC AND ORTHOTIC PRACTICE will be held at the University of Dundee from June 16 to 20, 1969

The Conference will outline and review the various locomotor and functional disabilities including amputation which may require prescription of prosthetic or orthotic devices.

While amputation surgery will receive special consideration, contributors from Continental Europe, North America, and the United Kingdom will represent all relevant surgical, medical and engineering aspects of the programme.

The available devices will be examined and evaluated on a biomechanical basis with contributions on production engineering and commercial aspects. Emphasis will be placed on description and prescription in functional terms.

The Conference is properly multidisciplinary and is intended for general and orthopaedic surgeons, physical medicine specialists, prosthetists, orthotists or orthopaedic technicians, therapists and remedial gymnasts, biomedical engineers and others working in the field including those concerned with manufacturing and supply.

Excellent hostel accommodation is available. Details may be obtained from the Dundee Limb Fitting Centre, 133 Queen Street, Broughty Ferry, Dundee, Scotland. (17745)

Physician with therapeutic/scientific background

Area Medical Director

A young British doctor with a background of therapeutic and scientific medicine now has the opportunity to take up a rewarding career in the pharmaceutical industry. This vacancy is the result of world-wide expansion of a major company which now needs a physician with organising ability to initiate clinical trials in Europe.

This position will entail travel in Europe but will be London-based. A working knowledge of one or more European languages will be a distinct asset though not essential.

Salary will be negotiated and a company car will be provided. Other benefits include a superannuation scheme and good prospects for advancement.

Applications to Box CA. 2104. B.M.J.

Commercial appointments—contd.

Clinical Trial Investigator

The Medical Department of this international ethical pharmaceutical Company requires doctors to join its energetic and expanding clinical investigation team. The applicants must be medically qualified, registered and between 28 and 45 years of age. Previous knowledge of drug evaluation is not necessary but the ability to initiate and organize clinical investigations is essential.

The appointed doctor will, in addition to normal clinical trial responsibilities, specialize in either:

- (a) early evaluation of drugs in clinic, for which he will be encouraged to develop the necessary expertise or
- (b) infant nutrition.

In consequence, an interest in general medicine or paediatrics would be an advantage. The successful applicants would be expected to maintain a permanent clinical attachment.

Career prospects in the pharmaceutical industry are above average. Initial salary will depend mainly on qualifications and experience and the Company operates a non-contributory pension fund and life assurance scheme. A Company car is provided. Conditions of employment are good and would include assistance with removal expenses.

Please apply to:

**Personnel Manager,
John Wyeth and Brother Limited,
Huntercombe Lane South,
Taplow, Maidenhead, Berks.**

(17716)

PHYSICIANS Clinical Research

A large and well-known company with important interests in pharmaceuticals wishes to recruit two qualified Physicians to undertake clinical research as members of its Research Division which has an enviable reputation for its highly professional and ethical approach. Encouragement is given to publish and there are other factors which have all helped to create the atmosphere in which scientific research can flourish. Successful candidates will be involved in various projects from the time that a compound is first considered to the point of commercial availability. For one post the ideal candidate would have a higher medical qualification or experience in the pharmaceutical industry. The starting salary will be negotiated and made sufficiently attractive to represent a distinct promotion. Applications are also invited from medical practitioners with general clinical experience who are interested in making a move into industry. In this case the basic salary and other remuneration will depend on qualifications and experience.

(Ref. B.M.J.)

The identity of candidates will not be revealed to our client without prior permission. Applicants should forward brief details, quoting the reference number, to:

**P.A. Management Consultants Ltd.,
Personnel Services Division,
60a Knightsbridge, London S.W.1.**

(17709)

CLINICAL RESEARCH

Applications are invited from medical practitioners holding a registrable British medical qualification. The successful applicant will have responsibility for the initiation of human pharmacological investigations, and for conducting early clinical studies under the direction of the Head of Clinical Research. Specialization is not called for, but a wide medical experience is desirable. Preference will be given to applicants with some industrial research experience.

Salary will be negotiated and conditions of service include bonus, life assurance and a contributory pension scheme. A Company car will be provided.

Please write in the first instance to the Administration Manager, Riker Laboratories, Research Division, 44 Tewin Road, Welwyn Garden City, Herts.

Geigy

**Geigy (U.K.) Limited
Pharmaceuticals
Division,
Macclesfield**

Medical Adviser

Applications are invited from registered medical practitioners in the 28-35 year age group.

The duties will involve the initiation and follow-up of clinical trials of new and established preparations in close co-operation with Consultants, Research Units, General Practitioners and the Committee on Safety of Drugs, as well as studying adverse reactions to drugs and obtaining detailed case histories where this is indicated.

The Company has a wide range of products, especially for the treatment of psychiatric and rheumatic disorders, and the outcome of current research is opening up new areas of interest.

The work will involve travelling within the UK and occasionally abroad. Clinical work is encouraged. Appreciation of modern trends and ideas in medicine is important and this is aided by attendances at specialist society meetings and conferences.

Previous experience in the Pharmaceutical Industry is unnecessary. The new member will join a team of doctors experienced in this field and initially will be given help and advice in this interesting and expanding branch of medicine which offers wide scope for an excellent career.

Further details of the type of work and duties involved will be sent to interested applicants, and will be discussed in depth with applicants selected for interview.

Salary will be negotiable in accordance with experience and qualifications. Conditions of employment are consistent with the Company's international reputation and include a first class contributory pension scheme, free life assurance and generous financial assistance with re-location expenses in appropriate cases.

Practitioners interested in this appointment are invited to write, quoting Ref. G.18/DT, giving full particulars of age, qualifications and previous experience to:

**The Medical Director,
Geigy (U.K.) Limited,
Pharmaceuticals Division,
Hurdfield Industrial Estate,
Macclesfield, Cheshire.**

HOME OFFICE

INSPECTORS

... under the Cruelty to Animals Act,
1876, which is concerned with
experiments on living animals.

Candidates (men and women aged at least 35) must be fully
registered medical practitioners or Members of the Royal
College of Veterinary Surgeons. They must have a sound
basic knowledge of the comparative aspects of human
and animal medicine and surgery and should normally have
experience in two or more of the following: clinical practice
(human or veterinary), research, laboratory diagnosis,
animal husbandry or the care of laboratory animals, or
administration.

There are about 5 appointments to be made—one in
Cupar, Fife, one in Shrewsbury, and about three in
London. Considerable travelling is involved. The Inspectors
are primarily concerned with ensuring that the terms of
the Act and conditions imposed on licence holders are
being strictly observed. They carry out inspections of
registered premises, advise on applications for licences
or certificates, study all published results of experiments.

Starting salary, which may be above the minimum, will
be within the scale £3,118-£4,280. There is an additional
£125 for posts in Inner London. Non-contributory pension:
promotion prospects.

Fuller details may be obtained by writing to the Civil
Service Commission, 23, Savile Row, London W1X 2AA,

PHYSICIAN-IN-CHIEF OF TEACHING HOSPITAL

The University of Toronto and the Alcoholism and Drug Addiction Research Foundation, invite applications for the post of Physician-in-Chief of the Institute for the Study of Addiction, a University Teaching Hospital of one hundred beds, to be opened in 1970, for the treatment of patients suffering from dependence on alcohol or other drugs. The appointee will have senior academic membership in the Faculty of Medicine.

Candidates should be qualified in one of the special fields of medicine, with experience in teaching and some achievement in research, not necessarily related to drug dependence. Some administrative experience is desirable. The appointment is for full-time service, salary in the neighbourhood of \$30,000 per annum, with fringe benefits, e.g., pension, insurance.

The Physician-in-Charge will be responsible for planning and supervising a programme of treatment, teaching and research. He will be supported by a clinical team from a variety of professions, full-time and part-time, who will have University Faculty rank and will have special training in those facets of medicine necessary for the treatment of addiction and of other illness concurrent in patients admitted with a primary diagnosis of alcoholism or drug dependence.

Laboratory and radiological service will be available supported by standard and special diagnostic equipment. Ample research support will be provided and the professional research staff of the Addiction Research Foundation will offer consultation and collaboration.

The appointment offers a very attractive career to a man who is interested in pioneering in, and will devote his career to, a very important field of medicine, in which many new and important advances are yet to be made.

Applications and related correspondence should be addressed to: Dean A. L. Chute, Faculty of Medicine, University of Toronto, TORONTO, Canada.

UNIVERSITY HOSPITAL OF THE WEST INDIES

CONSULTANT ANAESTHETIST Applications are invited for the post of full-time Consultant Anaesthetist in the division of anaesthesia and intensive care of the University Hospital of the West Indies, Mona, Jamaica.

The University Hospital is a 500-bed teaching hospital where considerable experience is offered in anaesthesia for all the surgical specialties. The division is an autonomous one with its own laboratory, seminar room and offices. A combined recovery/intensive therapy ward is under the supervision of the head of the department. The successful applicant will be expected to share in the undergraduate, postgraduate and residents' teaching programmes. Some previous research experience will be valuable. The position carries with it an honorary lectureship appointment in the University of the West Indies.

The appointment will be on contract normally for three years in the first instance, but a one-year contract could be arranged under special circumstances.

The salary scale attached to the post is—£2,700 by 100-£3,100; £3,400 per year. The point of entry into the salary scale will be determined in the light of the appointee's experience and qualifications. % of salary will be deducted towards the hospital's superannuation scheme, or a gratuity of 10% of salary based on every three months satisfactory service will be paid at the termination of the contract.

Passages will be provided for the successful applicant and his family in accordance with the passage regulations governing contract officers.

Furnished accommodation will be provided for which a rental of 10% of salary will be charged.

Applications, stating full details of qualifications, experience and all relevant data, together with names and addresses of three referees, should be sent not later than May 31, 1969, to the Hospital Manager and Secretary, University Hospital of the West Indies, Mona, Jamaica, West Indies. The successful applicant will be expected to assume duties on August 1, 1969.

Further information may be obtained from Dr. W. D. Wylie, Dean of the Faculty of Anaesthetics, Royal College of Surgeons, London, England. (H.8031)

much better”⁶

Convinced

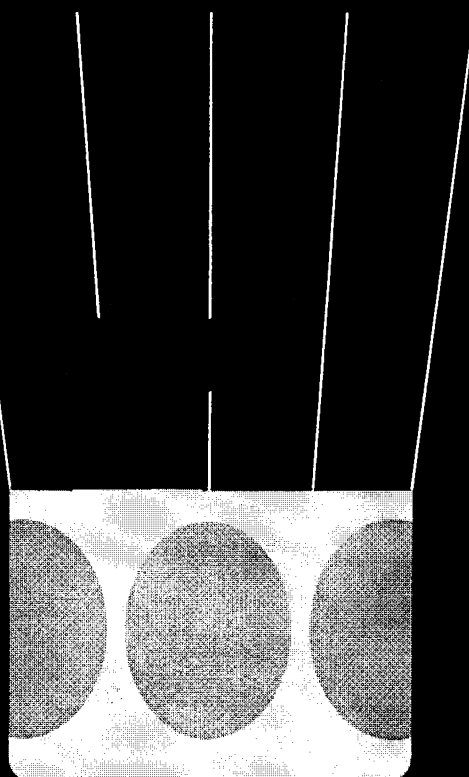

Anginal patients are *convinced* of the improvement brought about in their condition by Synadrin 60. During 12 months treatment they suffered fewer attacks, less pain.

Earlier clinical studies ^{1,2,3,4,5} have been strikingly confirmed by recent British papers.^{6,7}

Try Synadrin 60 in your angina patients.
They can convince *you*.

Synadrin[®] 60

OCTOBER 4—THE PROBLEM. A large weeping ulcer infected with staph. pyogenes and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times.

TWO WEEKS LATER DESLOUGHING. After treatment with Aserbine Cream to the ulcer and Aqueous Ichthol to the surrounding skin, complete desloughing has taken place.

NOVEMBER 14 HEALING. The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

... in varicose ulcers, burns, pressure sores,
trophic ulcers, etc.
... experience has shown that **ASERBINE**
is a true desloughing agent which
does not affect living tissue

Presentation: Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

Method of Application: Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.

Aserbine is prepared from	100 G. cream	500 ml. solution
Malic Acid	0.36%	2.25%
Benzoic Acid	0.024%	0.15%
Salicylic Acid	0.006%	0.0375%
Propylene Glycol	1.7%	40%

(Aserbine Solution is available on request)
