This electrocardiograph (Cambridge TRANSRITE 4) can be used anywhere

*because it's self-contained and powered
by torch batteries*

- The Cambridge Transrite 4 can be used in any situation in any climate.
- No problems with mains voltages or types of plug.
- It uses U2-type batteries, available all over the world.
- Batteries can be changed in about three seconds.
- With just one set of batteries, up to 200 sets of recordings can be made.
- Unlike other electrocardiographs, this one lets the operator check the incoming signal before recording starts. Saving batteries. Saving chart too.

Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be repeated after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

BACTRIM* ROCHE DRAPSULES†

**a smoothly acceptable
first attack on many infections,
particularly in the urinary
and respiratory tracts**

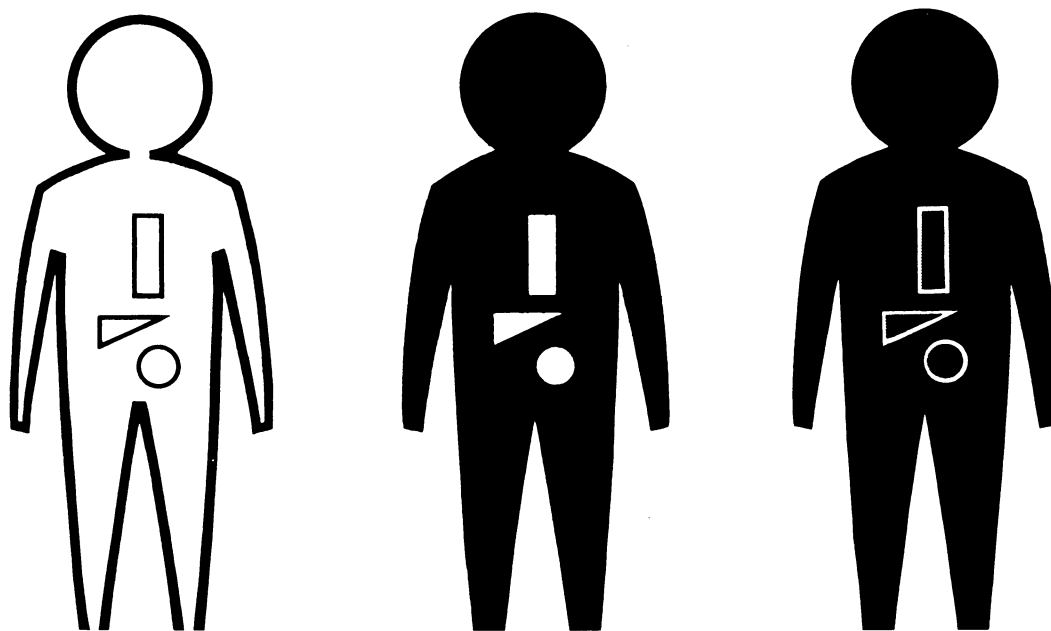

The Bactrim Roche Drapsule is a new presentation consisting of a sugar-coated tablet in a capsule-shaped form. It is designed for ease of swallowing and also for high patient acceptability and simple identification. Because of its bactericidal action, Bactrim Roche is valuable in the treatment of many infections. In the treatment of urinary tract infections, for example, a high success rate has been achieved. The usual caution should, however, be observed in prescribing for women of child-bearing age and the drug should not be given during pregnancy. In addition to the capsule-shaped Bactrim Roche tablets, there are also Bactrim Roche tablets and Bactrim Roche tablets.

Ferrograd[®] C

for all iron deficiency anaemias

You'll automatically ensure depleted body stores are replenished simply by continuing treatment and your patients will very rarely complain of side effects after the once-daily, before-food dosage.

As the haemoglobin level approaches normal during treatment with iron salts alone, absorption tends to decrease even though iron stores remain depleted. With high dose vitamin C, as in Ferrograd C, absorption of iron continues at a higher rate after Hb levels are normal so that the body stores are replenished.

Each Ferrograd C tablet contains the exsiccated equivalent of 525 mg ferrous sulphate BP (\equiv 105 mg Fe) in a Gradumet[®] and 500 mg vitamin C as sodium ascorbate.

RONICOL*TIMESPAN*

gives day-long relief
from symptoms due to 'poor peripheral circulation'

Microphotograph of the bulbar conjunctiva in a man aged 65 with peripheral vascular disease.

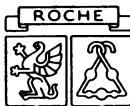

The same area two hours after a single Ronicol Timespan tablet, showing marked vasodilation.

Ronicol Timespan presents a powerful vasodilator (β -pyridyl carbinol) in a long-acting tablet form which rapidly produces sustained vasodilation. Because the action is prolonged, peripheral vascular diseases can be treated with a convenient, twice-daily dosage schedule.

Ronicol Timespan is indicated for:

- peripheral vascular diseases giving rise to 'poor peripheral circulation'
- intermittent claudication
- cramps, including night cramps
- vasospasms such as Raynaud's phenomenon, acrocyanosis and other ischaemic conditions of the limbs.

*Ronicol is the registered trade mark applied to pharmaceutical preparations containing β -pyridyl carbinol, the alcohol corresponding to nicotinic acid. Timespan is the registered trade mark applied to long-acting dosage forms.

ACCENT ON SAFETY

Broxil is one of the safest antibiotics ; it can be given with confidence to children for the treatment of Tonsillitis, Pharyngitis, Otitis Media and Strep. Throat since there is no risk of tooth staining, deposition in bone or any of the other hazards associated with certain types of antibiotic therapy in the young.

Broxil Syrup eradicates the infection by its bactericidal action and reduces the risk of relapse or reinfection.

Broxil Syrup has an appealing fruit flavour—so children, in particular, are more likely to complete the prescribed course of treatment.

INDICATIONS. Tonsillitis, Pharyngitis, Otitis Media, Strep. Throats, Acute Bronchitis, and infections due to sensitive organisms where a syrup preparation is more acceptable than tablets or capsules.

AVAILABILITY. Syrup 125 mg./5 ml. in 100 ml. and 60 ml. bottles. Tablets (125 and 250 mg.) and capsules (250 mg.) are also available.

DOSAGE. Children: 62.5—125 mg. ($\frac{1}{2}$ —1 teaspoonful) four times daily, $\frac{1}{2}$ hour before meals. Adults: 125—250 mg. (1—2 teaspoonsful) four times daily, $\frac{1}{2}$ hour before meals.

In severe infections the dosage may be safely increased.

CONTRA-INDICATION.

Penicillin allergy.

SIDE-EFFECTS.

Side-effects are typical of oral penicillins, being rare and mild in nature.

FOLIC ACID DEFICIENCY and ANAEMIA OF PREGNANCY

FOLEX-350

CONTAINING FOLIC ACID 350 MICROGRAMS WITH
FERROUS FUMARATE 308 MILLIGRAMS IN EACH TABLET

DOSE

ONE TABLET DAILY THROUGHOUT PREGNANCY

It is now known beyond doubt that megaloblastic anaemia of pregnancy is caused by deficiency of folic acid.

From the very excellent results obtained over the years by the prophylactic use of folic acid and iron given orally from the beginning of pregnancy it is becoming more and more generally accepted that anaemia of pregnancy can be prevented. The question of the optimum dose of folic acid has not been easy to establish but recent work* suggests that not less than 300 mcg. and not more than 400 mcg. daily can be considered adequate.

In the light of this knowledge Folex-350 containing 350 mcg. of folic acid and 308 mg. of ferrous gluconate has been introduced.

SEPTRIN in urinary infections

...“clearly superior to
either of the other treatments”...

(*Brit med J*, 1969, 1, 525.)

‘Septrin’ (trimethoprim and sulphamethoxazole) was compared with ampicillin and sulphadimidine in the treatment of 106 hospitalised patients with urinary infections. The cure rates one week after finishing treatment were: ‘Septrin’ 85 per cent, ampicillin 70 per cent, and sulphadimidine 40 per cent; and after four or five weeks 67, 52 and 15 per cent respectively. (Cure = eradication of original organism from urine.)
Brit med J, 1969, 1, 541.

The editorial which accompanied the publication of these results states that the superior effect of ‘Septrin’ was “... even more appreciable in the re-treatment of patients who had failed on another drug.” It also points out that the urinary tract is one of the largest fields

of usefulness for the new treatment, for very clear reasons:

1. Trimethoprim not only attains therapeutic tissue levels, but is excreted unchanged in high concentration in the urine.
2. All Gram-negative bacilli occurring in the urine, except *Pseudomonas aeruginosa*, are usually highly sensitive to it.
3. Its minimum inhibitory concentration is extremely low, and would do credit to a potent antibiotic.
4. Added to these advantages is the fact that trimethoprim and a sulphonamide, by blocking successive stages in the same metabolic process, exert a strongly synergic effect, and this action is *bactericidal*.

Senokot restores natural rhythm to the constipated colon

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

From dispensing packs, the basic NHS cost of a teaspoonful of granules or two tablets is about a halfpenny; thus treatment with Senokot is very economical.

In addition to granules and tablets, there is now a syrup presentation – a highly acceptable form, specially suited to the needs of children and elderly patients.

Tablets: 50, 100 and 200. Granules (chocolate flavoured): 56 and 170 grammes. Syrup: 150 millilitre bottle.

why so many hypertensive patients do well on Aldomet[®]

Methyldopa BP

- 'Aldomet' offers smooth and even control of blood pressure when the dosage has been established.
- 'Aldomet' usually reduces lying as well as standing blood pressure.
- 'Aldomet' causes much less postural hypotension than other powerful antihypertensive agents.
- 'Aldomet' rarely causes exertional hypotension.
- The dosage of 'Aldomet' is simple, flexible and easily established.

Supplied as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and, for emergency use, as an injection. Detailed information is available to physicians on request.

In a trial comparing three antihypertensive agents, it was shown that, '...in the patients who could take adequate doses methyldopa provided the best control of blood pressure, with the lowest levels of blood pressure when the patient was supine.'

'Saluric'® can help in the premenstrual syndrome

Women suffering from premenstrual tension with oedema cannot avoid the tiresome and inevitable signs and symptoms of this common condition, which may last for 7 to 10 days every month, prior to the menses. Because many of the distressing symptoms may be directly related to fluid retention, effective diuresis usually brings prompt relief.

'Saluric' can relieve swelling of the ankles, breast engorgement, and fullness of the abdomen. It may well help to alleviate the concomitant irritability and nervousness. 'Saluric' has been proved by 10 years of clinical experience to be a dependable diuretic which can be used for those few days every month to control premenstrual tension with oedema.

Each tablet of 'Saluric' contains 500 mg chlorothiazide BP. Detailed information is available to physicians on request.

Release the arthritic patient with BRUFEN

The arthritic patient is imprisoned by the pain and disability of his condition – as well as by limitations of the drugs used in its treatment. Brufen is an antirheumatic agent designed to bring the arthritic patient a new measure of freedom from these constraints. Pain and stiffness are relieved, joint size reduced, pressure tolerance increased, grip strength improved and the range of pain-free movement extended. In achieving these benefits Brufen appears to be singularly free from serious side-effects. Brufen (ibuprofen) is a non-steroidal compound which exhibits the high level of anti-inflammatory, analgesic and antipyretic activity necessary for effective treatment of rheumatoid arthritis, osteo-arthritis and allied conditions. At the same time Brufen is so well tolerated that it may be taken on waking to relieve morning stiffness. Brufen is an achievement of British research. Supplied as tablets of 200 mg. ibuprofen.

An aid to oral hygiene

Maintenance of oral hygiene during the post-operative period, especially among geriatric patients, is obviously essential. But at the same time this can prove to be somewhat time-consuming for the nursing staff.

However, recent experience in a London hospital has shown that the patient can help to provide his own nursing care, with the minimum of effort.

This experience covers patients who are fed intravenously and post-operative cases who find normal eating and drinking difficult. These patients often exhibit signs of mouth infection very quickly, and treatment for this can often cause considerable discomfort.

A more pleasant treatment is possible in many cases, for it has been found that giving the patient chewing gum promotes salivary gland activity. Patients are encouraged to chew gum at two-hourly periods, and this treatment frequently allays the symptoms and produces a considerable improvement in the condition of the tongue and mucosa. Quite striking results have been noted after carrying out this treatment for a 24-hour period.

Are doctors immortal?

Some patients seem to think that doctors never die. Or become ill. Or have accidents.

But as a doctor you know that your chances of falling sick, or breaking a leg tomorrow are the same as everyone else's. And the effect on your life and family is much graver.

Your practice, for instance, must be kept going. So your income plunges overnight. And your life becomes stifled by financial worries: how to keep your family, meet school fees, pay the mortgage. To a sick man worry is a poisonous enemy.

That's why it's so wise to insure against sickness or early death. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sickness Society.

You know that one day you may need this insurance. So write today. Together we'll find the policy which will work hardest for you.

Do it now.

Folic Acid Deficiency in Pregnancy

It is now established that the body stores of folic acid decrease throughout pregnancy and may lead to megaloblastic anaemia, a common complication in the third trimester.^{1,2}

In addition to routine oral iron therapy, it is recommended that prophylactic administration of folic acid should be started in the early stages of pregnancy, preferably incorporated with the iron in a single tablet.³

PLESMET F.A. Tablets provide this facility in the most appropriate dosage combination and present advantages in convenience for the patient, together with economy both in dosage and cost of prescribing.

VACANCIES FOR MEDICAL GRADUATES INTERESTED IN THE ADMINISTRATION OF RESEARCH

The Medical Research Council invites applications from medical graduates with not less than five years' postgraduate experience and preferably under the age of 38 years, who are interested in administrative aspects of research, for vacancies in the medical division of their headquarters office.

The Council, which is the main Government agency responsible for the promotion of medical research, receives a Parliamentary grant-in-aid of approximately £16-million annually, and sponsors an extensive programme of research, both at home and abroad, in its own establishments and at many hospitals, universities, and other institutions.

The day-to-day work of the headquarters medical staff is concerned in the main with the administration of matters relating to the Council's own research establishments and to its various schemes, such as research grants, fellowships, and training awards, for the support of research in universities, hospitals, and other institutions. The effective execution of these duties involves maintaining a close liaison with members of the Council's scientific staff and others active in medical research, taking part in committee and conference activities, and assisting, as required, in work in the field of Parliamentary affairs, public relations, and publications.

Applicants should be interested in administration and in the opportunity of keeping in touch with the latest developments in medicine and the biological sciences. The present salary scale in the age range 28 to 40 is £2,611 to £3,903, rising subsequently to £4,405 per annum with provisions for superannuation. The appointment will be to the Council's established staff, subject to satisfactory completion of a probationary period of two years.

Applicants are invited to send, in confidence, full details of age, education, qualifications, career to date, and present salary, together with the names and addresses of two professional referees, to Mr. G. A. Smith, Medical Research Council, 20 Park Crescent, London W.1, quoting reference E 2/427, on or before June 6, 1969. (29693)

women), aged at least 28, for four posts in Edinburgh.

DUTIES: The medical staff is concerned with all aspects of public
health policy and medical administration of the National Health Service.
This includes long-term planning and research. The vacancies offer op-
portunities for investigational work associated with the Department's
Research and Intelligence Unit. One post (A) has duties particularly
related to EPIDEMIOLOGY and environmental health. The second
post (B) is primarily concerned with developments in DRUGS AND
THERAPEUTICS and with advice about chemicals in food. The third
and fourth posts (C) are concerned with MEDICAL ADMINISTRATION
and developments in medical care in hospitals and the community health
services outside, including scientific developments which have reached the
stage of more general application in medical care.

QUALIFICATIONS: For (A) experience in public health medical
administration, social medicine, or epidemiological research would be an
advantage. For (B) experience in pharmacology, toxicology, clinical ther-
apeutics, or allied subjects would be an advantage. For posts (C) experience
in hospital service administration, public health medical administration,
social medicine or the development of medical care services would be an
advantage. A good clinical background is desirable for all posts.

A different class of bronchodilator

MORE SELECTIVE • LONGER ACTING • MORE EFFECTIVE

A NEW STANDARD IN BRONCHODILATOR THERAPY

Previously available β -adrenergic stimulants such as isoprenaline and orciprenaline act on the β_1 receptors of heart muscle as well as on the β_2 receptors of bronchial muscle. Consequently, undesirable increases in heart rate and pulse pressure sometimes occur when these drugs are used to produce bronchodilatation.

Ventolin is different: first because it is highly selective in its action, affecting primarily β_2 receptors: second, because it is more effective than existing bronchodilators: and third, because it is longer-acting.

MORE EFFECTIVE

Double-blind studies have shown that Ventolin Inhaler is more effective than isoprenaline and orciprenaline in the treatment of bronchospasm.

LONGER ACTING

Double-blind studies have shown that Ventolin Inhaler has a longer duration of action than isoprenaline and orciprenaline. This means that a single dose of Ventolin Inhaler can provide relief for up to 12 hours, whereas isoprenaline and orciprenaline require more frequent dosing.

MORE SELECTIVE

Double-blind studies have shown that Ventolin Inhaler is more selective than isoprenaline and orciprenaline. It does not stimulate the heart or increase pulse pressure, even after inhalation of 12 puffs of the drug.

MORE ACCEPTABLE TO PATIENTS

Patients expressed a marked preference for Ventolin Inhaler in double-blind studies comparing Ventolin Inhaler with isoprenaline or orciprenaline.

SAFETY IN USE

Past experience suggests that misuse of all oral bronchodilators by asthmatic patients may lead to dangerous effects on the heart or give a false sense of security to patients with incipient status asthmaticus. Ventolin Inhaler has no effect on the heart in therapeutic dosage and has a long duration of action. Both these properties provide additional margins of safety: the lack of cardiac effects should reduce any likelihood of deaths due to ventricular fibrillation and the long duration of action makes it possible for patients to realise in time if the drug is becoming less effective. Because an effective treatment with Ventolin Inhaler should last for at least four hours, patients have been advised to consult their doctor immediately if the effect lasts for less than three hours, so enabling the doctor to take timely action.

When you prescribe elastic stockings

Scholl make sure the patient wears them

Scholl know as well as you do just how much women hate the idea of elastic hosiery. And that though they'll often take the prescription, they don't always wear the stockings.

So Scholl make their elastic hosiery attractive by making the stockings as un-detectable as possible. They conform to all the specifications of the Drug Tariff and they give the patient all the support and comfort you want her to have. But they look nicer than ordinary elastic stockings. Feel lighter. So that your patient doesn't feel embarrassed by them. And instead of leaving them in the drawer, she wears them.

Scholl 'Soft Grip' for conditions requiring 'Elastic Yarn Standard Weight'.

Worn *under* normal sheer nylons, Soft Grip are almost invisible. They are made in double-expansion mesh with two-way elasticity to provide firm, even support *around* the leg with plenty of comfortable 'give' lengthwise.

Scholl 'Nylastik' for cases needing 'Lightweight Elastic Yarn Stockings'.

Nylastik are worn instead of nylons, and, on the leg, appear almost indistinguishable from an ordinary 30 denier stretch stocking.

AUSTRALIA—REPATRIATION GENERAL HOSPITAL PERTH, WESTERN AUSTRALIA

Applications are invited from registered medical practitioners, with appropriate postgraduate qualifications, for appointment to two posts of **SPECIALIST IN PATHOLOGY** at the Repatriation General Hospital, Hollywood, Perth, Western Australia.

The 500-bed hospital is located within easy reach of the city of Perth proper and is only 1½ miles from the University of Western Australia, which has a medical teaching school. Wards comprise, General Surgery, General Medicine, Ophthalmology, Otorhinolaryngology, Urology, Dermatology, Chest and Psychiatry, and Surgical and General Medical wards are provided for a limited number of female patients. In the main, patients are veterans of the two world wars and more recent campaigns.

In an endeavour to develop the Pathology service, it is expected that within the next two years a new 11,000 square feet Pathology Department will be completed.

A salary range on appointment will be determined within the limits \$8,638–\$11,458. Commencing salary will be within the determined range and will be dependent on experience since gaining postgraduate qualifications. One appointee will be given Senior status and will be responsible for co-ordinating work within the specialty and advising top-level medical and executive management on matters relating to the practice of the Specialty.

Subject to medical fitness, the successful applicants will be permanently appointed to the Commonwealth Service and will be eligible to contribute to a Superannuation scheme. Appointees will also receive generous recreation, sick and long service leave entitlements. On completion of a bond of service for three years, the appointees' and dependants' first-class fares to Perth will be paid by the Commonwealth and some assistance may also be given towards removal of effects to Perth. The Department will arrange initial accommodation and in the case of married appointees, a reasonable "settling-in" allowance may be paid, for a limited period, depending on particular circumstances.

Applications, in writing, including details of name, age, qualifications and experience should be forwarded to: The Public Service Board Representative, Canberra House, 10-16 Maltravers Street, The Strand, London W.C.2. (29630)

**ST. ANDREW'S HOSPITAL
NORTHAMPTON**

Medical Director: James Harper, M.B., F.R.C.P.(Edin.), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an occupational therapy department, swimming-pool, a squash court and library, while in the grounds there are tennis courts, a nine hole golf course, etc.

Fees range from 25 guineas per week, and charges for treatment at St. Andrew's Hospital are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

Further particulars can be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel.: Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London W.1.

Now there's a complete range of Betnovate haemorrhoidal preparations for the treatment of external and internal haemorrhoids, anal fissure, peri-anal eczema and mild proctitis.

New Betnovate Compound Suppositories and Betnovate Rectal Ointment both contain betamethasone 17-valerate—the most successful topical corticosteroid. Not only does Betnovate achieve a faster and more complete clearance in relatively responsive conditions, but also it often succeeds when other topical steroids fail. ^{1, 2, 3}
