OTITIS MEDIA

Treatment

PENBRITIN

Luckily she can't remember the pain now; can't even recall how she woke screaming in the night. But her parents remember, and they're grateful that you prescribed such effective treatment. They know that you relieved the symptoms; you know you did more than that. Your treatment destroyed the organisms that caused the infection.

Penbritin is the answer – *first time*

In treating Otitis Media, slow or inadequate response can lead to dangerous complications, but Penbritin, with its bactericidal action and broad spectrum of activity, minimises this risk. A broad spectrum of activity is particularly important since the common pathogens in Otitis Media are β -haemolytic streptococci, Dip. pneumoniae, and in young children, H. influenzae. Some antibiotics may inhibit these organisms, but mere *inhibition* is not enough. Penbritin's ability to *kill* these organisms places less reliance on the body's natural defence mechanisms, and contributes to its high clinical success in Otitis Media.^{1, 2}

Penbritin provides effective treatment of Otitis Media and the degree of safety characteristic of penicillins, so important when treating children. Additionally, Penbritin Syrup's pleasant taste ensures that children will happily complete the full prescribed course of at least five days' treatment, even after the pain has stopped.

In the treatment of Otitis Media, Penbritin is the answer – *first time*. And so often the only prescription needed.

Dosage:

Children under 2 years: 62.5-125 mg.
2-10 years: 125-250 mg.
Adults: 250 mg.

Ferrograd[®] C

for all iron deficiency anaemias

You'll automatically ensure depleted body stores are replenished simply by continuing treatment and your patients will very rarely complain of side effects after the once-daily, before-food dosage.

As the haemoglobin level approaches normal during treatment with iron salts alone, absorption tends to decrease even though iron stores remain depleted. With high dose vitamin C, as in Ferrograd C, absorption of iron continues at a higher rate after Hb levels are normal so that the body stores are replenished.

Each Ferrograd C tablet contains the exsiccated equivalent of 525 mg ferrous sulphate BP (\equiv 105 mg Fe) in a Gradumet[®] and 500 mg vitamin C as sodium ascorbate.

A different class of bronchodilator

MORE SELECTIVE · LONGER ACTING · MORE EFFECTIVE

A NEW STANDARD IN BRONCHODILATOR THERAPY

Previously available β -adrenergic stimulants such as isoprenaline and orciprenaline act on the β_1 receptors of heart muscle as well as on the β_2 receptors of bronchial muscle. Consequently, undesirable increases in heart rate and pulse pressure sometimes occur when these drugs are used to produce bronchodilatation.

Ventolin is different: first because it is highly selective in its action, affecting primarily β_2 receptors: second, because it is more effective than existing bronchodilators: and third, because it is longer-acting.

MORE EFFECTIVE

Clinical trials have shown that Ventolin Inhaler is a more effective bronchodilator than isoprenaline or orciprenaline when given by inhalation.

MORE SELECTIVE

Cardiac effects have been reported with therapeutic doses of Ventolin Inhaler. In studies comparing Ventolin with isoprenaline, a major difference found was that Ventolin did not stimulate the heart or effect rise in blood pressure even after inhalation of a relatively large dose.

MORE ACCEPTABLE TO PATIENTS

Patients expressed a marked preference for Ventolin Inhaler in double-blind studies comparing Ventolin with aerosols containing isoprenaline or orciprenaline.

MORE ACCEPTABLE TO PATIENTS

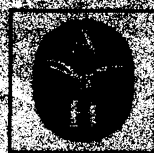

Patients expressed a marked preference for Ventolin Inhaler in double-blind studies comparing Ventolin with aerosols containing isoprenaline or orciprenaline.

SAFETY IN USE

Past experience suggests that misuse of aerosol bronchodilators by asthmatic patients may lead to dangerous effects on the heart or give a false sense of security to patients with incipient status asthmaticus. Ventolin Inhaler has no effect on the heart in therapeutic dosage and has a long duration of action. Both these properties provide additional margins of safety: the lack of cardiac effects should reduce any likelihood of deaths due to ventricular fibrillation and the long duration of action makes it possible for patients to realise in time if the drug is becoming less effective. Because an effective treatment with Ventolin Inhaler should last for at least four hours, patients have been advised to consult their doctor immediately if the effect lasts for less than three hours, so enabling the doctor to take timely action.

SEPTTRIN in urinary infections

...“clearly superior to
either of the other treatments”...

(*Brit med J.* 1969, 1, 525.)

‘Septrin’ (trimethoprim and sulphamethoxazole) was compared with ampicillin and sulphadimidine in the treatment of 106 hospitalised patients with urinary infections. The cure rates one week after finishing treatment were: ‘Septrin’ 85 per cent, ampicillin 70 per cent, and sulphadimidine 40 per cent; and after four or five weeks 67, 52 and 15 per cent respectively. (Cure = eradication of original organism from urine.)
Brit med J. 1969, 1, 541.

The editorial which accompanied the publication of these results states that the superior effect of ‘Septrin’ was “... even more appreciable in the re-treatment of patients who had failed on another drug.” It also points out that the urinary tract is one of the largest fields

of usefulness for the new treatment, for very clear reasons:

1. Trimethoprim not only attains therapeutic tissue levels, but is excreted unchanged in high concentration in the urine.
2. All Gram-negative bacilli occurring in the urine, except *Pseudomonas aeruginosa*, are usually highly sensitive to it.
3. Its minimum inhibitory concentration is extremely low, and would do credit to a potent antibiotic.
4. Added to these advantages is the fact that trimethoprim and a sulphonamide, by blocking successive stages in the same metabolic process, exert a strongly synergic effect, and this action is *bactericidal*.

Cetiprin[®]

is altering established habits
of rising at night to pass water

The results of a recent double-blind crossover trial of Cetiprin suggest that "the drug may alter the established habit of rising at night to pass urine."¹

"This trial showed that emepronium bromide (Cetiprin) given in dosage of 150 mgs. on going to bed, effectively diminished nocturnal frequency of micturition in aged women. On the basis of a double-blind crossover trial an important difference emerged between those participants given the placebo before the drug, and those given the drug first. In the first case, there is little effect with the placebo but a moderate effect with the drug. In the latter case, there is a more marked effect with the drug – and this is carried over into the placebo period."²

"Nocturnal frequency of micturition is one of the trials of old age. In a previous paper we have shown it to be present in 64% of the total elderly population (70% of males and 61% of females of 65 years and over)."³

Footloose and fungus-free

Athlete's foot patients prefer Tinaderm because it is pleasant to use, soothing and it usually works. Tinaderm (1% tolnaftate) swiftly relieves burning, itching and discomfort – often within 48 hours – followed by rapid clearance of lesions. Tolnaftate is not a keratolytic agent, but applied topically, it penetrates lesions to kill the fungus. Thus there is no excessive scaling to cause soreness and spread infection. Tinaderm Cream is gentle and soothing even when applied to raw areas. Tinaderm Powder has a special value where perspiration is a problem, and when sprinkled into all footwear, can help to clear up any reservoirs of infection. In athlete's foot, Tinaderm gives swift relief – even in resistant cases.

Unique tablet for safer management of hypertension — **Neo-NaClex-K**

Neo-NaClex-K is a unique bendrofluazide/potassium chloride tablet for use in all grades of hypertension. The white layer contains 2.5 mg bendrofluazide which lowers the blood pressure in mild hypertension by an average of 10 to 15 mm Hg and maintains this fall on a low dosage. In the treatment of hypertension, Neo-NaClex-K may be used as the sole antihypertensive agent or may be given in conjunction with other more potent drugs to enable the dosage and side-effects of the latter to be reduced substantially. The coloured layer of each Neo-NaClex-K tablet contains 630 mg potassium chloride which is released slowly, thus minimising the danger of gastric irritation or small bowel ulceration.

New, adsorbed **Triple Antigen** gives fewer systemic reactions, better protection

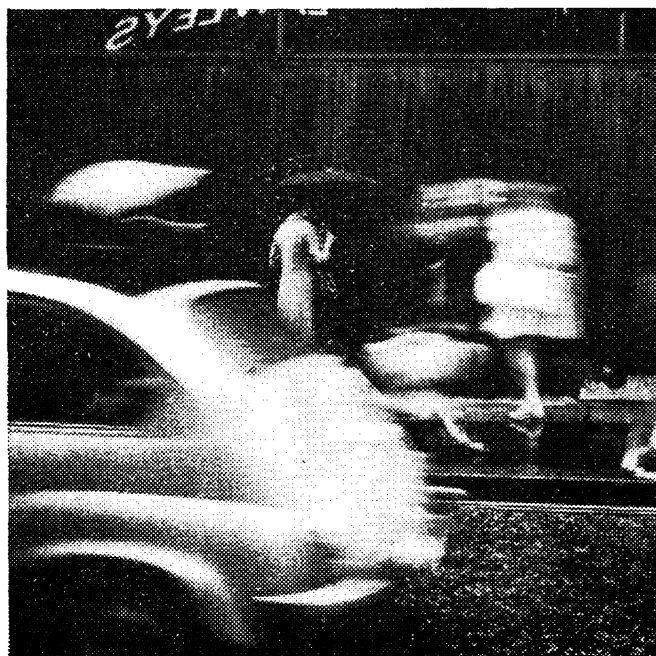

Triple Antigen (Diphtheria, Tetanus and Pertussis Vaccine Glaxo) is now adsorbed on aluminium hydroxide to lower the incidence and severity of systemic side effects. The mineral adjuvant increases the immunological effectiveness of the pertussis and tetanus components while reducing the incidence of generalised reactions.¹ In a comparison with plain vaccine the incidence of systemic side effects was 26% in children receiving adsorbed vaccine against 55% in those receiving plain vaccine.² Adsorbed preparations produce a superior result as a consequence of a local tissue reaction to the mineral carrier, sometimes resulting in the formation of a nodule which very occasionally may develop into a sterile cyst. These local effects can be reduced by injecting the vaccine deeply into the muscle. New adsorbed Triple Antigen brings the vaccination schedule up to date.

Glaxo brief

A morning's surgery brings a lot of **Crystapen G** patients

How many patients needing antibiotics do you see in a morning? Whatever the number, there is a strong case for using penicillin, the drug of choice in so many common infections. An established penicillin in a modern form is Crystapen G (penicillin G) — one you can rely on in the treatment of strep. throats for example.¹ Crystapen G is as effective clinically as the more expensive penicillin V.²

All Crystapen G 250 mg and 125 mg tablets are printed with their name and strength, are film-coated and easy to swallow. Alternatively, specify Crystapen G Syrup — 250 mg/5 ml for adults, 125 mg/5 ml for children. Each bottle (100 ml) gives five days' therapy at normal dosage. When your patients need oral penicillin you can rely on Crystapen G.

Crystapen G Syrup 250 mg/5 ml bottles of 100 ml

The simple way to write 250 mg oxytetracycline— **Clinimycin**

When you specify Clinimycin your intention is unmistakable. You want to give oxytetracycline 250 mg tablets which are identified, tasteless, small enough for children to swallow and inexpensive. With every tablet clearly labelled Clinimycin, dispensing and administration become safer and easier. When you want to prescribe oxytetracycline 250 mg tablets, you need say no more than Clinimycin.

**GENERAL PRACTICE
TRAINING POSTS****NORTHERN REGIONAL HOSPITAL
BOARD, Scotland**

The Northern Regional Hospital Board (Scotland) invites applications for a post under the combined training scheme in hospital and general practice. The trainee's time during the two years' tenure of the post is divided equally between hospital work and general practice.

The post is non-resident. The salary range is £1,550 to £1,950 per annum, with placing on the scale determined by previous experience and an increment of £100 in the second year (under review).

Candidates should apply by June 16, 1969, on forms obtainable from the Senior Administrative Medical Officer, Northern Regional Hospital Board, Reay House, 17 Old Edinburgh Road, Inverness, by whom further particulars will be supplied on request. (H.8290)

**SOUTHERN GENERAL HOSPITAL
Glasgow S.W.1****SPECIAL VOCATIONAL TRAINING
FOR GENERAL PRACTICE**

A new scheme of vocational training for general practice based on the Southern General Hospital, Glasgow, will commence on August 1, 1969. The scheme will be run in association with the Royal College of General Practitioners.

Two posts will be offered in August and February of each year for doctors who have completed their pre-registration appointments. The first eighteen months will be spent in hospital departments of midwifery and gynaecology and medicine (general, paediatric, geriatric and psychological) followed by six months of community medicine and a year in general practice, during which there will be further experience in special hospital departments.

The hospital posts will be at Senior House Officer level and normal salary scales will apply; thereafter the usual Trainee General Practitioner remuneration will be paid. This training will qualify holders of these posts for the additional payment for vocational training for principals in general practice.

On August 1, 1969, there will be an opportunity, in initiating the scheme, for applications from two doctors who have already completed six months' hospital appointment in midwifery and gynaecology.

Further enquiries may be made to the Medical Superintendent, Southern General Hospital, Glasgow S.W.1, and applications in writing and accompanied by the names and addresses of two referees, should be made to the Medical Superintendent not later than three weeks from the date of this advertisement. (18477)

MSL MANAGEMENT SELECTION

Please state briefly, in writing, how each requirement is met. Nothing will be disclosed, unless you give permission after a confidential interview.

Clinical Research

ethical pharmaceuticals

U.K. and Europe

The company is a leading international pharmaceutical company whose rapid European growth has been stimulated by an impressive record of new product development. The importance of clinical research and of the thorough evaluation of potential new drugs is recognized in the establishment of a separate Research & Development Division, which has its own statistical unit and close links with hospitals and universities. The Division organizes and controls clinical trials of new drugs, often undertaking collaborative research with clinicians; its doctors are concerned with the development and application of drugs throughout Europe; and it deals with the Dunlop Committee and similar European regulatory bodies. A new unit with attendant analytical laboratories will be operational by the end of 1969, allowing scope for clinical pharmacological studies. Publication and presentation of research findings together with attendance at local and international symposia, is encouraged.

Suitable candidates will be British registered doctors, probably 27 to 35, of Registrar status, with interest and preferably some experience in experimental work; men and women are equally acceptable. Alternatively, they may be in the pharmaceutical industry and be seeking a position with more research responsibility. Starting salaries will be at least £3,500, and can be higher for doctors already in the industry or with special clinical trial experience; a company car is provided, relocation expenses will be paid, and other benefits are good. The Division is London based, but there may be the opportunity for an interested candidate to work in the North of England or in Scandinavia. Please write to R. A. Owen quoting AM.21036.

offers a

CAREER IN MEDICAL ADMINISTRATION

An Assistant Senior Medical Officer is required to assist the Board's Senior Administrative Medical Officer in the medical administration of the hospital and specialist services of the region. The work is largely concerned with aspects of the organization and planning of the hospital services in the Region which, with the expansion in the building programme, are in the process of redevelopment.

For direct appointment to this grade, previous administrative experience, preferably in the hospital or public health service, is desirable.

Alternatively the Board is prepared to make a trainee appointment in the Medical Officer grade for a probationary period of one year during which suitability for promotion to the Assistant Senior Medical Officer grade will be assessed.

Candidates for the trainee appointment need not have had any previous experience in medical administration. This affords an excellent opportunity for a young doctor to test his/her aptitude in the field of medical administration where there are good career prospects.

Salary scales:

Medical Officer: £2,280 at age 29 or less, rising to £2,530 at age 33 by £75 (4) by £80 (2) to £2,990 per annum.**Assistant Senior Medical Officer:** £3,000 by £115 (3) to £120 (3) to £3,705 per annum.

Application forms and further particulars obtainable from: Secretary, North-East Metropolitan Regional Hospital Board, 40 Eastbourne Terrace, London W.2. Closing date for receipt of applications: June 20, 1969. (Please quote Ref. 783.)

Medical Officer/Physician £5,000 p.a.

Mulfura, one of the RST Group of Companies on the Copperbelt of Zambia invites applications for the above post from medical practitioners with adequate experience and a higher qualification in medicine, notably membership.

The Company's medical services cater for a population approximating 50,000 and centre round two well equipped hospitals with a total of 430 beds. The present establishment of medical officers is 12, including those with higher qualifications. An additional medical officer is now required who will serve primarily as a Consultant Physician. In common with the other medical officers employed, his duties will include a certain amount of general medical work which in this instance will be minimal. In addition, a limited amount of student nurse teaching will be involved, associated with a training school for registered nurses which is to be established at the larger hospital.

Employment will be on a 4 years' contract renewable by agreement, starting salary will depend on experience and qualifications but total annual emoluments will not be less than the equivalent of £5,000. Leave will accrue at 55 days per annum and a car is provided for professional use.

Additional benefits include paid return passages for applicant and family, baggage allowance, furnished house at sub-economical rental, free life assurance, children's education allowance up to the equivalent of £500 per child with two holiday fares per annum.

At 4,000 ft. A.S.L., the Copperbelt enjoys an ideal climate with sunshine all year round. Excellent facilities exist for practically all sports and leisure activities including television.

Career opportunities in Canada

Canada's growth and development currently provides opportunities in many professions and occupations and Canada rewards ambition and hard work with one of the highest living standards in the world.

Life is good in this young, progressive country... especially for the family. Primary and secondary education is mostly free and through university scholarships, bursaries and interest-free loans, Canada offers opportunities for advanced education to deserving students lacking financial means.

You, and your family will be protected, too, by a social welfare programme — family allowances, hospital and unemployment insurance and retirement pension.

Above all, Canada offers scope — for you and your children; space and opportunity to be what you want to be; the chance to find the right way of life in a friendly and hospitable land. And, Canada is only six hours away by plane — six days by sea.

ROYAL PERTH HOSPITAL Western Australia

DIAGNOSTIC RADIOLOGIST

Applications are invited for the post of Diagnostic Radiologist. Applicants must possess a postgraduate qualification in radiology.

Royal Perth Hospital (916 beds), is the main teaching hospital associated with the University of Western Australia and several regional specialist units are included within it. The department is a large one, undertaking a wide range of investigations. A knowledge of angiography and neuro-radiology will be an advantage. The duties include medical student teaching and Registrar training.

The Radiologist will work in co-operation with the Head of the Department, the Assistant Radiologist and a number of Visiting Radiologists. A Departmental Trust Fund will provide financial assistance with research and postgraduate study.

Salary: Will be on a sessional basis, based on eight-tenths of full-time salary, plus 15% in lieu of superannuation and long service leave rights, within the range of \$A7,631 (\$3,547 Stg.) to \$A9,485 (\$4,409 Stg.), commencing rate depending on qualification and experience. The appointee will receive full rights of private practice within the hospital, in return for an undertaking not to practise outside the hospital.

Other conditions of service include annual leave and sick leave. A memorandum of information regarding the department and the hospital, including full details of terms of service, is available upon request. **Transport Expenses:** Minimum first-class sea passage will be provided for successful applicant and family (under 16 years of age), together with an allowance of up to £230 Stg. for the cost of removal of personal effects (excluding furniture and motor vehicle) subject to a bond to remain in the hospital's service for a period of three years.

Further information concerning Royal Perth Hospital and the State of Western Australia may be obtained from the Agent General for Western Australia, Western Australia House, 115 Strand, London W.C.2.

Applications addressed to the undersigned, should include date of birth, qualifications, experience, present post held, previous appointments, a list of publications, the names and addresses of three referees and a recent photograph attached, close on June 30, 1969.—V. F. Driscoll, Administrator. (H.8223)

ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director: James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer stay patients and geriatric patients. The hospital's amenities include Gloucester House, which comprises an occupational therapy department, swimming-pool, a squash court and library, while in the grounds there are tennis courts, a nine hole golf course, etc.

Fees range from 25 guineas per week, and charges for treatment at St. Andrew's Hospital are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

Further particulars can be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel.: Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London W.1.

the best iron is useless

(unless it's taken)

'The co-operation of patients on a once-daily dosage of iron (Ferro-Gradumet) was significantly better than those taking a thrice-daily preparation.'[†]

Each Ferro-Gradumet contains the exsiccated equivalent of 525 mg ferrous sulphate BP (\equiv 105 mg Fe) in a Gradumet for maximum absorption with minimum gastric upset: *the right iron, in the right form, at the right dosage.*

Ferro-Gradumet[®]

is taken once daily before food

OCTOBER 4—THE PROBLEM. A large weeping ulcer infected with staph. pyogenes and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times.

TWO WEEKS LATER—DESLOUGHING. After treatment with Aserbine Cream to the ulcer and Aqueous Ichthylol to the surrounding skin, complete desloughing has taken place.

NOVEMBER 14—HEALING. The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

When the presence of slough delays healing...

... in varicose ulcers, burns, pressure sores, trophic ulcers, etc.

... experience has shown that ASERBINE is a true desloughing agent which does not affect living tissue

Presentation: Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

Method of Application: Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.

Aserbine is prepared from	100 G. cream	500 ml. solution
