SOLPRIN**

He sees no reason to change from Solprin because, like many doctors, he knows that Solprin still maintains its reputation as the most acceptable form of aspirin. He knows that salicylate therapy is still the first choice treatment for rheumatoid arthritis, and that the aspirin in Solprin is an extremely soluble form to minimise the risk of gastric irritation — a point of particular importance when high doses are used.

A recent report from a London teaching hospital demonstrated the anti-inflammatory effect of salicylate in high dosage for the treatment of rheumatoid arthritis, and comparisons were made with prednisone and paracetamol. Both prednisone and high doses of salicylate produced measurable reduction in joint size, but paracet-

amol did not do so. The authors state,

"It is suggested that high dosage of salicylate, unlike low dosage, has a clinically measurable anti-inflammatory effect. If suppression of inflammation is desirable in rheumatoid arthritis high dosage of salicylate is indicated..."

Women Doctors

Thinking of returning to practise?

Hospital work can offer you special advantages.

You may not have been in active practice for a while for family or other reasons. You may be thinking of taking up professional work again, either now or within a year or so.

The hospital service can offer you very real advantages besides providing refresher training for doctors intending to take up or return to hospital posts. Hospitals realise that women doctors with personal or family commitments will wish to undertake part-time rather than full-time work, and will try their best to arrange this. Some hospitals can provide married accommodation and day-care for young children.

If you are interested, now or for the future, please write to the Senior Administrative Medical Officer at the Regional Hospital Board, who would like to know what sort of work you would like to do and your qualifications. You can get the address from the Secretary of your local hospital.

SAFE

EFFECTIVE TREATMENT FOR BRONCHIAL SPASM

SAFETY The very small amount of inhalant often necessary to relieve an attack is important. Therapeutically, this is of benefit to the patient in avoiding any side-effects which might be brought about by taking too frequently a full measured dose. Overdosage with the Rybarvin Inhaler is virtually impossible.

ECONOMY Economically the very low cost of treatment by Rybarvin, 1500 average doses ($\frac{1}{2}$ minute) for 8s. 4d. (1 oz. bottle) i.e. 1/15d. per dose, must be of interest to both patient and doctor.

Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be given after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

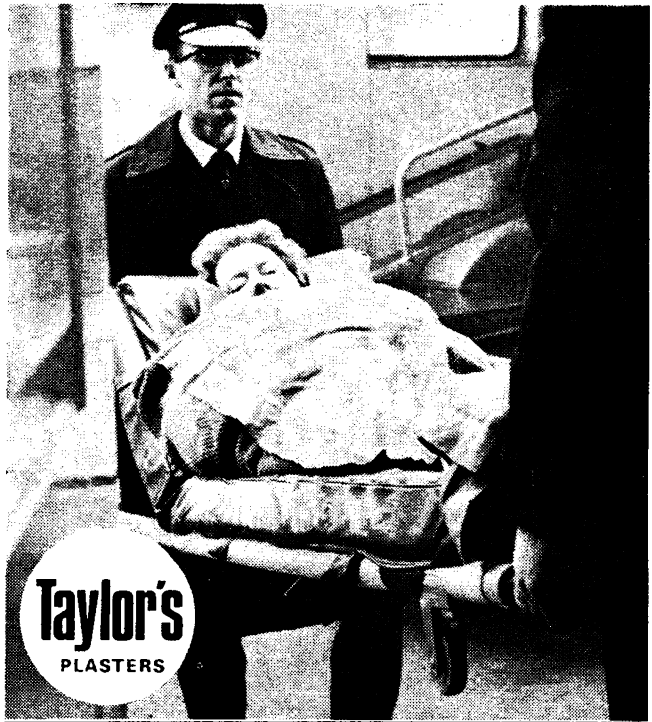

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).
Pripsen can be mixed with milk or water.

WHAT'S BEHIND THE MOUNTING CLINICAL EVIDENCE FOR INTAL CO?

...a happier life for the

Reduced chest tightness, cough, sputum production, reduced incidence of acute asthmatic attacks, and improved exercise tolerance—all factors which make for a happier and more normal life—these are the benefits that INTAL COMPOUND brings to many asthmatic patients.

Essentially a prophylactic, INTAL COMPOUND is based on disodium cromoglycate—a drug that differs in mode of action from bronchodilators, corticosteroids, and antihistamines. As well as providing both objective and subjective improvement, INTAL COMPOUND often allows significant reduction in bronchodilator and steroid dosages.

In a period of just over a year since its introduction, numerous clinical reports have demonstrated the efficacy of disodium cromoglycate in the prophylactic management of allergic bronchial asthma.

‘... some patients, particularly young, clearly allergic subjects, respond dramatically to the drug ...’ *Medicine Today, Brit med J*, 1968, **3**, 172

‘In the case of patients with seasonal asthma, it is reasonable to prescribe it for the duration of the time during which they are usually subject to asthma. Patients who are allergic to grass pollens have a two or three months’ season lasting from May to July.’ *Current Medicine and Drugs*, 1968, **9**, 3

‘The number of doses (of bronchodilators) inhaled was reduced from an average of 30 a patient during the placebo period to 13 during the active period.’ *Brit med J*, 1968, **2**, 340

‘A significant reduction in steroid requirements as well as other forms of routine therapy was observed during treatment with disodium cromoglycate.’ *Practitioner*, 1968, **201**, 915

Neobacrin Tulle the complete wound dressing

Neobacrin Tulle is the complete wound dressing. It is impregnated with neomycin and bacitracin – the antibiotics of choice for topical application (BNF 1968). These antibiotics give high bactericidal activity against a very wide range of gram-positive and gram-negative organisms. Because there are two antibiotics present, there is little opportunity for resistance to develop.

The dressing itself promotes healing without adhering to granulating surfaces and will not tear off new skin when removed.

And it is one of the least expensive tulle preparations available.

That's why all minor dermal injuries respond to the protection of Neobacrin Tulle.

Safe. Simple. Economical.

Ventolin INHALER

(Salbutamol)

Trade Mark

A different class of bronchodilator

MORE SELECTIVE · LONGER ACTING · MORE EFFECTIVE

A NEW STANDARD IN BRONCHODILATOR THERAPY

Previously available β -adrenergic stimulants such as isoprenaline and orciprenaline act on the β_1 receptors of heart muscle as well as on the β_2 receptors of bronchial muscle. Consequently, undesirable increases in heart rate and pulse pressure sometimes occur when these drugs are used to produce bronchodilatation.

Ventolin is different : first because it is highly selective in its action, affecting primarily β_2 receptors : second, because it is more effective than existing bronchodilators : and third, because it is longer-acting.

MORE EFFECTIVE

Clinical trials have shown that Ventolin Inhaler is a more effective bronchodilator than isoprenaline or orciprenaline when given by inhalation.

LONGER ACTING

Ventolin is unusually long-acting, its effect persisting for at least four hours. By contrast, isoprenaline, even in large doses, has a characteristically intense but transient effect. In another study using whole-body plethysmography, inhalation of 100 μ g of Ventolin produced an almost immediate maximal increase in airway conductance which was sustained for four to six hours.

MORE SELECTIVE

No side effects have been reported with therapeutic doses of Ventolin Inhaler. In studies comparing Ventolin with isoprenaline, a major difference found was that Ventolin did not stimulate the heart or affect the blood pressure, even after inhalation of a relatively large dose.

MORE ACCEPTABLE TO PATIENTS

Patients expressed a marked preference for Ventolin Inhaler in double-blind studies comparing Ventolin with aerosols containing isoprenaline or orciprenaline.

SAFETY IN USE

Past experience suggests that misuse of aerosol bronchodilators by asthmatic patients may lead to dangerous effects on the heart or give a false sense of security to patients with incipient status asthmaticus. Ventolin Inhaler has no effect on the heart in therapeutic dosage and has a long duration of action. Both these properties provide additional margins of safety : the lack of cardiac effects should reduce any likelihood of deaths due to ventricular fibrillation and the long duration of action makes it possible for patients to realise in time if the drug is becoming less effective. Because an effective treatment with Ventolin Inhaler should last for at least four hours, patients have been advised to consult their doctor immediately if the effect lasts for less than three hours, so enabling the doctor to take timely action.

Taking a new look at the menopause, doctors are questioning the desirability—and even the logic—of suppressing with sedatives and tranquillizers an essentially metabolic condition.

Mixogen gives complete mastery of the whole menopausal condition.

They have it on authority that today '... when the average woman can expect to reach her threescore years and ten, it would seem unrealistic to deny hormone treatment, which not only alleviates all the troublesome and antisocial symptoms of the menopausal and postmenopausal phases but is also a prophylactic measure against osteoporosis, senile vaginitis, hypertension, and coronary heart disease, to mention but a few hazards of oestrogen depletion.'¹

Plain oestrogen therapy, which may give endometrial bleeding and nausea, is surpassed by Mixogen.

'Perhaps the best way of avoiding oestrogenic bleeding is to use one of the oestrogen-testosterone combinations, of which the original—*Mixogen*—is the best.'²

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1, 2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3, 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

Release the arthritic patient with BRUFEN

The arthritic patient is imprisoned by the pain and disability of his condition – as well as by limitations of the drugs used in its treatment. Brufen is an antirheumatic agent designed to bring the arthritic patient a new measure of freedom from these constraints. Pain and stiffness are relieved, joint size reduced, pressure tolerance increased, grip strength improved and the range of pain-free movement extended. In achieving these benefits Brufen appears to be singularly free from serious side-effects. Brufen (ibuprofen) is a non-steroidal compound which exhibits the high level of anti-inflammatory, analgesic and antipyretic activity necessary for effective treatment of rheumatoid arthritis, osteo-arthritis and allied conditions. At the same time Brufen is so well tolerated that it may be taken on waking to relieve morning stiffness. Brufen is an achievement of British research. Supplied as tablets of 200 mg. ibuprofen.

GENERAL PRACTICE

VOCATIONAL TRAINING FOR GENERAL
PRACTICE IN IPSWICH

Vocational training for general practice is about to be implemented in Ipswich. The scheme will commence on 1 August 1969, when eight posts will be offered. There may be no other opportunity to enter the scheme; and in any case, the next intake would not be before 1 August 1971. Early application is therefore essential.

Two years of rotating appointments, all commencing on 1 August 1969 in the Ipswich Hospitals, will be followed by one year attached to local general practices with approved trainers.

During the hospital period, each doctor will hold the following appointments, all of which will provide extensive clinical experience and will involve the clinical responsibility of a senior house officer.

- 6 months—general medicine
- 6 months—obstetrics and gynaecology
- 3 months—paediatrics
- 3 months—geriatrics
- 3 months—casualty

These posts are in every sense service posts and are not supernumerary. Each doctor will have one month free to do an elective post and will have two months' holiday during the two years.

The teaching of psychological skills required of the family physician will be a particular feature of the scheme. Weekly seminars, led by doctors skilled in psychodynamic and psychosomatic medicine, will offer training in psychiatry and in the relevant areas of sociology and psychology.

Personal contact with the general practitioners involved in the teaching programme will be maintained throughout the hospital period by each trainee being allocated a general practitioner sponsor or tutor, to whom he can turn at any time; and experience in general practice will be included on four occasions, for a week at a time, during these two years.

The hospital posts will be at S.H.O. level. Standard S.H.O. rates of remuneration will apply in the first two years with a considerable increase in the third year.

Accommodation will be available for married or single applicants during their hospital appointments, and will be arranged for the third year in general practice.

This is a unique pilot scheme in the field of vocational training for general practice, offering an exceptional opportunity to doctors who wish to prepare themselves for the general practice of the future, on the lines of the Todd report and the recommendation of the G.M.S.C. Being a pioneer scheme, its evaluation will be important, and this is being done in close collaboration with the University of Manchester.

Applications for a place in this scheme are invited now, and further inquiries will be welcome. They should be addressed to Dr. Ian Tait, Project Tutor, Postgraduate Medical Centre, Ipswich & East Suffolk Hospital, Anglesea Road, Ipswich. (H.8571)

ALVELEY, SHROPSHIRE

Applications are invited for a small list vacancy in the South Shropshire village of Alveley.

This is a growing community approximately midway between Bridgnorth and Kidderminster, but is not expected to exceed 2,000, and has never had a resident doctor. Suitable for elderly doctor desiring a more leisurely practice, or a younger doctor who could practice in partnership with neighbouring practice.

Further information and Forms E.C.16A from The Clerk, Salop Executive Council, 39 Abbey Foregate, Shrewsbury. Applications to be received by June 30, 1969. (H.8581)

COTTINGHAM (EAST RIDING)

Applications are invited for an urban vacancy due to retirement on September 30, 1969. Open area. List approximately 2,400 (including 300 in the Kingston-upon-Hull area). Residence not available but separate surgery premises may be available on rental. Applications on Form E.C.16A to be received by the Clerk, East Riding Executive Council, 65 Toll Gavel, Beverley, E. Yorks., not later than July 2, 1969. (H.8582)

CROWLEY (ISLE OF AXHOLME)
LINCOLNSHIRE

Applications invited for rural vacancy due to resignation of a single-handed practitioner. Area of practice classified "restricted." List approximately 2,293, of which 518 are dispensing. The surgery only, which forms part of the Doctor's residence may be available. A health centre is planned for this area.

Successful candidate will be required to take over as soon as possible.

Further details and application forms E.C.16A may be obtained from the Clerk, Lincolnshire (Lindsey) Executive Council, 17 Tentercroft Street, Lincoln. Applications to be received by June 30, 1969. (H.8617)

EARL SOHAM
(EAST SUFFOLK)

Applications are invited for a rural vacancy, "restricted" area, due to resignation on September 30, 1969. List at present 1,367 of which 1,345 are dispensing. Combined surgery and residential accommodation may be available for purchase. Apply on form E.C.16A by June 24, 1969, to the undersigned, from whom further details may be obtained.

Fellowships in Health Education

The Health Education Council is awarding two Fellowships, each of two years' duration, for the coming academic year. This will allow successful applicants to obtain a formal research-based training in health education prior to permanent employment with the Council. Subject to acceptance of the appointed persons by the University Authorities, these Fellowships will be held at the University of Manchester and the training will be based upon the Department of Social and Preventive Medicine. Candidates will be required to give an assurance of their intention to pursue a career in health education; they will spend two years at the university during which time they will be expected to obtain the Master of Science degree.

The Health Education Council has been set up by the Government to develop and promote health education activities in England, Wales and Northern Ireland.

The Fellowships are open to all residents in the United Kingdom who have a good honours degree in the biological, behavioural, medical or dental sciences. Successful applicants will be employed from the beginning by the Council on a salary scale of £1,055 to £1,265 per annum depending upon experience. On completion of the M.Sc., Fellows will normally proceed to a permanent appointment with the Council in the appropriate career grade with an increase in salary.

Allen & Hanburys Limited

HEAD OF
MEDICAL SERVICES

This is the senior medical appointment in the Company and is based with the Research Division at Ware, Hertfordshire.

The most important purpose of the position is the assessment of new medicines in man, so it is essential that candidates should be able to collaborate both with scientists in the Company and with clinical investigators at all levels. The person appointed will direct the activities of a team of Medical Advisers, be responsible for trials in human volunteers and have an important advisory role in connection with the medical aspects of research policy and marketing. At present our research is primarily concerned with the respiratory, cardiovascular and central nervous systems.

The successful applicant will be a physician who either holds a hospital appointment of at least Senior Registrar level, or has appropriate experience in the pharmaceutical industry. The general conditions of employment are excellent and are those of Glaxo Group Ltd., of which we are a member company. The initial salary will be negotiated and a car provided. Please write in the first instance, quoting reference AM.102, to the Personnel Manager, Allen & Hanburys Ltd., London E.2.

MINISTRY OF OVERSEAS DEVELOPMENT

The Need

GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

The Opportunity Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

The Advantages Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained.

Salaries Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1,650 to £2,900 per annum.

Training Scheme for Recently Qualified Doctors

In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

PSYCHIATRIC REGISTRARS FOR NEW ZEALAND

Several vacancies exist in New Zealand for young doctors wishing to begin a career in psychiatry. Successful applicants will be posted either at Oakley, Kingscliff, or Mangere Hospitals (all in Auckland) or to Sunny-side Hospital in Christchurch, or to Cherry Farm Hospital near Dunedin. There are medical schools in Auckland and Dunedin, and in N.Z. \$12 per annum including fuel and electricity. Fares will be paid for successful applicants and their families in return for a bond of three years' service.

Inquiries should be addressed airmail to the Director, Division of Mental Health, P.O. Box 1312, Wellington, New Zealand. Interviews may subsequently be arranged in London. (18862)

PSYCHIATRISTS FOR NEW ZEALAND

A number of vacancies exist for psychiatrists in the Division of Mental Health of the Health Department of New Zealand.

Particular opportunities include:

General Hospital Psychiatric Units:

New 40-bed units currently being built at general hospitals in Palmerston North and Invercargill and will be expected to operate as community mental health centres.

Child Psychiatrist:

At the Child Health Clinic in Christchurch.

Forensic Psychiatrist:

Lake Alice Hospital, in addition to 300 general psychiatry beds, contains the National Unit for Maximum Security Patients and needs another psychiatrist with interest in both general and forensic work.

Paediatricians Interested in Mental Deficiency:

There are vacancies for paediatricians in mental deficiency hospitals. It is expected that appointees will direct research as well as supervising physical care.

Psychiatric Hospitals:

There are several vacancies at hospitals dealing with the full range of psychiatric in-patients and out-patients—especially at Porirua Hospital, near Wellington; Tokanui Hospital, near Hamilton; and Cherry Farm Hospital, near Dunedin.

For all the above posts, the specialist scale ranges from N.Z.\$6,020 with automatic progression to N.Z.\$8,100 (approximately N.Z.\$2,137=£1). There would be later opportunity for promotion to higher graded posts as vacancies occur. Applicants must hold a D.P.M. or equivalent and be eligible for registration with the New Zealand Medical Council and should have been medically qualified for at least 8 years with 5 years' experience in psychiatry. Appointees will commence on salaries approximately N.Z.\$2,000 higher than the minimum of N.Z.\$6,020 for each additional year. Applicants with slightly less than 5 years' psychiatric experience will be considered but would remain on N.Z.\$6,020 until they have completed 6 years' experience.

Housing is provided for all hospital posts. The present rental is N.Z.\$312 a year including fuel and electricity. Fares will be paid for successful applicants and their families, conditional on a bond for three years' service. Inquiries, naming two referees, should be addressed airmail to the Director, Division of Mental Health, P.O. Box 501, Wellington, New Zealand. Interviews may subsequently be arranged in London. (18863)

QUEENS UNIVERSITY—PSYCHIATRY

The department of psychiatry, Queen's University (Professor T. J. Boag, Head of the Department) at Kingston, Ontario, offers comprehensive modern training in the specialty of psychiatry to those graduated from an approved medical school and having completed a year of internship. The programme is accredited by the Royal College of Physicians and Surgeons of Canada, to whose certification examinations it leads. A basic two years of training in general psychiatry (in-patients and out-patients), mental hospital psychiatry and basic child psychiatry. The following years permit a choice of further training in such fields as general, administrative, and child psychiatry, student mental health, alcoholism and addictions, research, psychiatric teaching, etc. A comprehensive array of clinical and research facilities, conferences, seminars, and workshops, a favourable student-to-teacher ratio, and an active interest in the philosophy of teaching and learning, make this a dynamic and stimulating programme.

Residency (registrars) stipends range from £2,440 to £3,680. An additional bursary of £600 per annum (tax free) is also available to most residents. Some residents will be accepted into the career programme of the Ontario Mental Hospital Service at a stipend of approximately £4,400. Teaching, research and travelling fellowships are offered, ranging up to £4,000 per annum.

The academic year commences July 1, but vacancies may arise, enabling applicants to enter the programme at other agreed-upon dates.

Interested applicants should contact Dr. W. E. Powles, Director of Postgraduate Education, Department of Psychiatry, Queen's University, Kingston, Ontario, Canada. (H.8629)

WAIKATO HOSPITAL BOARD**PHYSICIAN**

Tokoroa Hospital, New Zealand

Applications are invited from suitably qualified medical officers registrable in New Zealand for the above position which will be a full-time appointment or alternatively a substantially full-time appointment. The position is of Specialist status and applicants should have been qualified for not less than eight years, and have five years' experience in their specialty and hold an appropriate higher qualification.

The salary will be in the scale \$6,020 to \$8,100, the actual commencing salary to be determined by the Director-General of Health having regard to the applicant's previous experience and qualifications. If the appointee is not whole-time, a proportionate amount of the whole-time salary will be paid.

Tokoroa is a new 60-bed general hospital which is expected to open at the beginning of August of this year. In addition, there is an obstetric annexe of 22 beds.

Tokoroa General Hospital has been planned so as to be capable of a ready expansion to 120 general beds when required. It is desirable that the Physician, Tokoroa Hospital, takes up his appointment as soon as possible.

For a whole-time appointee, assistance may be available with regard to transport expenses of the appointee and his family whilst taking up the position and it is hoped that some assistance with housing will be possible.

Enquiries regarding this position should be directed to the Superintendent-in-Chief, Waikato Hospital, Private Bag, Hamilton. Conditions of appointment and official application form may be available from the Secretary, Waikato Hospital Board, P.O. Box 934, Hamilton, New Zealand, with whom applications close on July 12, 1969. (H.8561)

ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director: James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an occupational therapy department, swimming-pool, a squash court and library, while in the grounds there are tennis courts, a nine hole golf course, etc.

Fees range from 25 guineas per week, and charges for treatment at St. Andrew's Hospital are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

Further particulars can be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel.: Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London W.1.

Just anxiety... or depression as well?

'Anxiety is frequently intermingled with depression ...'
Clin. Trials J., 1965,2,317 (Nov)

When symptoms of anxiety and depression co-exist, the anxiety is usually easy to recognise, but the depressive state is often less obvious.

In anxiety-depressive conditions, 'Tryptizol', a well-established antidepressant with an intrinsic tranquillising action, has proved of considerable value.

In many cases, the patient becomes calmer, mood is lifted, and sleep and appetite improve.
