suppositories in arthritis? Yes...

'Indocid'

Indomethacin

®

Suppositories

**to treat rheumatoid
arthritis and
osteoarthritis
at night**

'Indocid' Suppositories provide for most patients:

- rapid relief of pain—the patient can move more easily in bed
- long-lasting relief of pain—from bedtime, quite often till the following afternoon
- a better night's sleep—hypnotics are frequently unnecessary
- less stiffness in the morning—the patient can usually start his routine with greater mobility

Of course, the capsules are the more widely used form of 'Indocid'—nevertheless, "... those taking their ['Indocid'] capsules religiously every day will sometimes complain that they still have their 'early morning' stiffness in the affected joints. It is here that I think the Indocid suppository inserted at night will usually be of great value . . ."

"... even the most cynical patients will quite often ask for a repeat prescription, to have in reserve for future use."

WHAT'S BEHIND THE MOUNTING CLINICAL EVIDENCE FOR INTAL CO?

...a happier life for the asthmatic

Reduced chest tightness, cough, sputum production, reduced incidence of acute asthmatic attacks, and improved exercise tolerance—all factors which make for a happier and more normal life—these are the benefits that INTAL COMPOUND brings to many asthmatic patients.

Essentially a prophylactic, INTAL COMPOUND is based on disodium cromoglycate—a drug that differs in mode of action from bronchodilators, corticosteroids, and antihistamines. As well as providing both objective and subjective improvement, INTAL COMPOUND often allows significant reduction in bronchodilator and steroid dosages.

INTAL COMPOUND — Supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in a powder form, together with an inert carrier). For use in a special insufflator — SPINHALER.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1 2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

FOLIC ACID DEFICIENCY and ANAEMIA OF PREGNANCY

FOLEX-350

CONTAINING FOLIC ACID 350 MICROGRAMS WITH
FERROUS FUMARATE 308 MILLIGRAMS IN EACH TABLET

DOSE

ONE TABLET DAILY THROUGHOUT PREGNANCY

It is now known beyond doubt that megaloblastic anaemia of pregnancy is caused by deficiency of folic acid.

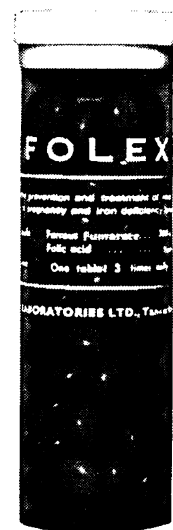

From the very excellent results obtained over the years by the prophylactic use of folic acid and iron given orally from the beginning of pregnancy it is becoming more and more generally accepted that anaemia of pregnancy can be prevented. The question of the optimum dose of folic acid has not been easy to establish but recent work* suggests that not less than 300 mcg. and not more than 400 mcg. daily can be considered adequate.

In the light of this knowledge Folex-350 containing 350 mcg. of folic acid and 308 mg. of ferrous fumarate has been introduced.

*Ref. *B.M.J.* No. 5529. p. 158.

COMPOSITION

Ferrous fumarate 308 mg.
Folic acid 350 mcg.

FOLEX

The original Folex containing a therapeutic dose of folic acid (folic acid 5 mg. and ferrous gluconate 300 mg.) will remain available for the treatment of confirmed cases of megaloblastic anaemia and

for those practitioners who might prefer to rely on the larger dose of folic acid which for several years has been given prophylactically with such excellent results.

Wherever gout strikes— **Zyloric*** protects

With ZYLORIC, serum uric acid levels are reduced and kept within normal limits, urate deposition in the joints regress and acute attacks of gout become less frequent or disappear.

ZYLORIC acts by limiting the formation of uric acid from its metabolic precursors. Uricosuric agents, in contrast, do not limit the production of uric acid, they increase the flow of urates through the kidney.

With ZYLORIC less uric acid passes through the kidney which is protected from the effects of urate deposition and urate nephropathy (kidney damage is a cause of death in 25 per cent of patients with chronic gout).†

Diabinese

is unlikely to make
diabetic patients gain weight

- After meals, release of insulin to the serum increased.
- Significant increases above basal levels – facilitated by Diabinese – occurred only after meals when rising glucose levels were present to challenge the beta cell mechanism.
- Despite the fact that Diabinese was given on the morning of the fasting day, insulin production did not appreciably exceed basal levels. Thus there was little or no likelihood of fat being deposited as a result of treatment with Diabinese.

Septin—an advance on the antibiotics

For bronchodilatation without cardiac stimulation prescribe Ventolin INHALER

Ventolin is more selective

"... inhaled salbutamol (Ventolin) in a dose of 400 μ g produced no detectable change in the heart rate or blood pressure. Isoprenaline 200 μ g on the other hand, had a marked effect on both. Inhaled orciprenaline 2400 μ g had effects intermediate between those of salbutamol and isoprenaline".

Brit. J. Dis. Chest (1969) 63, 165.

Ventolin is more effective

"In asthmatic patients 200 μ g of salbutamol (Ventolin) by inhalation was significantly more effective than 1500 μ g of orciprenaline sulphate in improving ventilatory function".

Brit. J. Dis. Chest (1969) 63, 165.

Ventolin is longer acting

"The bronchodilatation produced by salbutamol (Ventolin) was much more prolonged than that produced by isoprenaline, and was well sustained for three hours. Even at five hours after salbutamol the mean FEV₁ was still 26% above the control value, as compared with figures of 8% for isoprenaline, 19% for orciprenaline and 6% for placebo".

Brit. med. J. (1969) 2, 287.

Ventolin is more acceptable to patients

In a clinical assessment comparing Ventolin with orciprenaline, 25 of the 37 patients preferred Ventolin, 5 preferred orciprenaline and 7 had no preference.

new single daily dosage

During the 15 years since tolbutamide was introduced, the search for improved oral anti-diabetic agents has continued. The investigation of more than 8,000 sulphonylurea compounds showed Euglucon to be the most potent yet best tolerated oral anti-diabetic agent so far available.

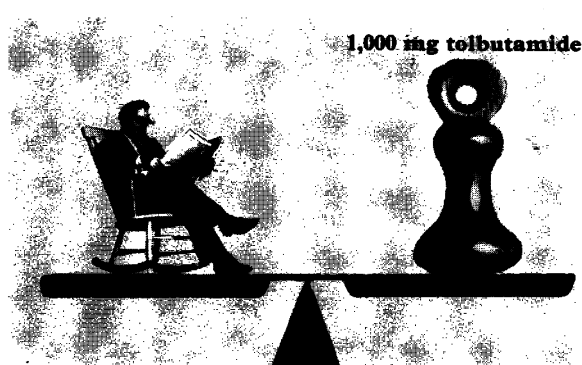

International clinical experience with more than 5,000 patients has shown that the majority of maturity-onset diabetics can be effectively controlled on a daily dosage of 10 mg or less of Euglucon, usually in a single administration. At the same time, Euglucon is well tolerated even in prolonged therapeutic dosage, being in this respect at least comparable to tolbutamide. Because of its potency, Euglucon may be suitable for the management of patients who have failed to respond to other oral anti-diabetic agents.

new power in control of maturity

oral hypoglycaemic agent

Effect of an oral glucose load on mean blood-glucose in four healthy adults before and 15 hours after 5 mg. glibenclamide.

First British publication on Euglucon

Euglucon has been made the subject of extensive clinical trials in this country. The first published report* reviews full metabolic studies carried out with healthy adults and diabetic patients. It also describes the results of a clinical trial involving 135 patients with maturity-onset diabetes. The trial included both new and old patients and treatment was continued for up to 7 months.

In their conclusions, the authors state:

"Glibenclamide was found to be an effective agent for the treatment of maturity-onset diabetes and compared favourably in this trial with other sulphonylureas. The potency of the drug was such that some patients could be maintained on as little as 2.5 mg glibenclamide compared with 500 mg chlorpropamide. No gastro-intestinal or other side-effects were observed in patients treated with the drug over 7 months."

Sustanon makes a man a man again

in body and in mind

When gonadal activity is inadequate the young or middle-aged male may demonstrate diminished genital structure, and response, to the point of impotence. Understandably the repercussions reach far beyond the purely physical – often playing havoc with the patient's psyche, marriage and career.

Every physician knows how complex is diagnosis of the condition, with the patient frequently hiding the facts not only from his doctor but *from himself*. Even when the diagnosis is established, therapy is not straightforward and many factors must be considered. Nevertheless with Sustanon a clear, early and sustained response may occur at all levels, physical, mental, and emotional.

Sustanon is preferable to testosterone propionate as of course no single testosterone ester provides both lengthy activity and rapid onset of action. This Sustanon does. Its prolonged activity is such that only an occasional injection is needed to maintain the required therapeutic level.

Sustanon '100'

2 weeks' activity – contains 100mg testosterone per ml:

Testosterone Propionate B.P. 20mg
Testosterone Phenylpropionate B.P. 40mg
Testosterone Isocaproate 40mg

Sustanon '250'

4 weeks' activity – contains 250mg testosterone per ml:

Testosterone Propionate B.P. 30mg
Testosterone Phenylpropionate B.P. 60mg
Testosterone Isocaproate 60mg
Testosterone Decanoate 100mg

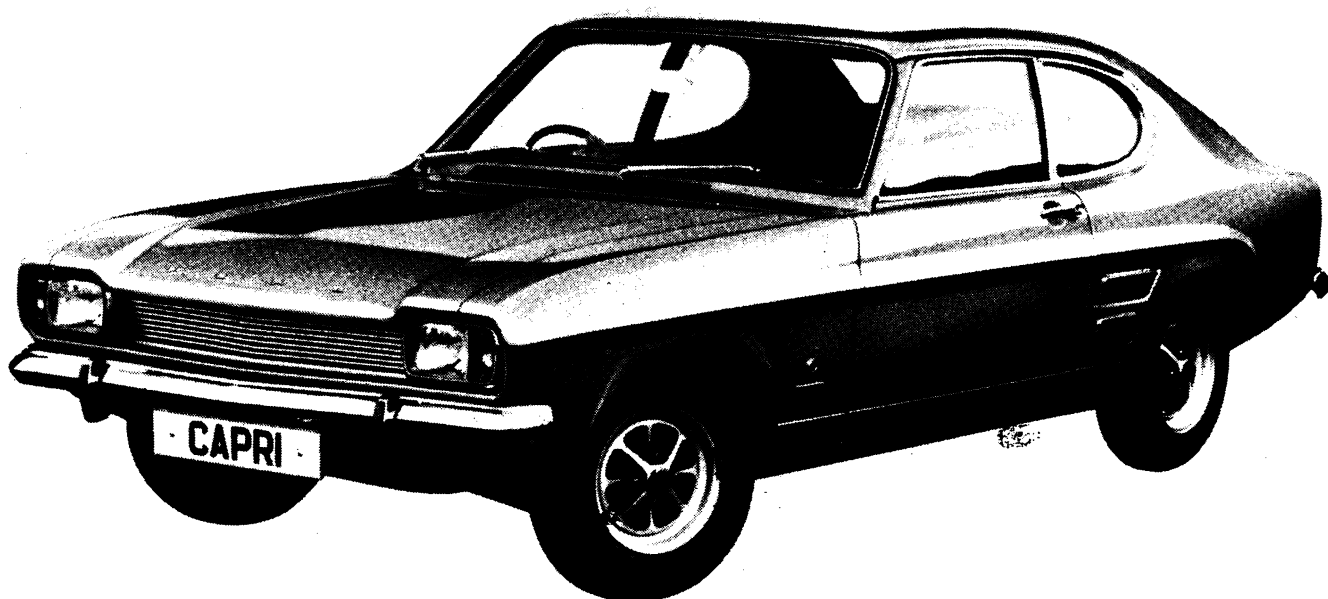

Packs: Boxes of 3 ampoules of 1 ml in either strength.

We'll help you feel at home abroad.

We have a couple of helpful schemes for people who want to take a car abroad.

If you're about to leave Britain you can take a 'tax-free' Ford with you. And, before you go, you can run it in this country for up to 6 months. So with this in mind, we rustled up our personal Export Scheme.

But if you're coming home temporarily, you can also buy a Ford free of purchase tax. Provided you've been away at least a year. And

you return abroad again within 12 months. In this case use our Visit Europe Scheme.

Both schemes mean that Ford's personal service doesn't stop at Dover. We'll arrange to ship your car anywhere in the world. And wherever you go, you'll find a Ford service depot.

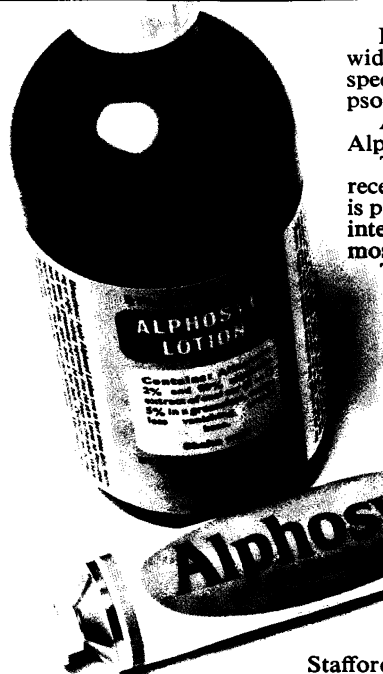

So, although you're abroad, it won't seem all that far from home.

Ford leads the way.

For information about the Ford Visit Europe or Personal Export Schemes, contact your local Ford dealer. Or write to the Showroom Manager, Dept. 17, Ford Motor Company Ltd., 88 Regent Street, London W1R 6AR.

DF 118

The facts

- * DF 118 is as effective orally as it is by injection.
- * In spite of its power to relieve severe pain, DF 118 has *no* sedative or hypnotic effects. The patient remains alert, and able to cope with everyday life.
- * In the recommended dosage, DF 118 causes little or no respiratory depression.
- * DF 118 has shown, in its twelve years' clinical use, a very low addiction potential.
- * DF 118 is economical. The basic NHS cost of 25 tablets (dispensed from containers of 500) is 3/7d.

In cases of severe and intractable pain, where simple analgesics are ineffective, there are strong reasons for the oral administration of DF 118. Particular indications include:

Sciatica	Osteoarthritis
Chronic rheumatoid arthritis	Arthritis of the spine
Peripheral vascular disease	Post-herpetic neuralgia
Paget's disease	Malignant disease

REGIONAL POSTGRADUATE INSTITUTE FOR MEDICINE AND DENTISTRY NEWCASTLE UPON TYNE

VOCAATIONAL TRAINING FOR GENERAL PRACTICE IN NEWCASTLE AND SURROUNDING AREAS

Applications are invited from recently qualified medical graduates for a three year course of vocational training for general practice. There are vacancies for a course beginning in July 1970, based on Newcastle and under the auspices of the Regional Postgraduate Institute for Medicine and Dentistry, which will consist of three stages: (1) a six month appointment in a teaching general practice; (2) two years of hospital appointments in four of the following specialties: paediatrics, medicine, obstetrics, psychiatry, emergency medicine and a combined post in E.N.T., Eyes and Dermatology; (3) a six-month appointment in general practice.

Throughout the course regular group seminars and visits of observation will be held. The scheme, which corresponds with the recommendations of the Royal Commission on Medical Education, will provide comprehensive training for general practice and appropriate experience for those wishing to take the examinations for membership of the R.C.G.P. or the D.C.H. or the D.R.C.O.G. The course also meets the requirements for the payment of vocational training allowance in general practice.

Salary will be on the Trainee Assistant and Senior House Officer scale (£1570-£1790 p.a. with car allowance during general practice experience. These scales are under review.)

Further details are available from the Administrative Assistant, Regional Postgraduate Institute for Medicine and Dentistry, The Medical School, The University, Newcastle upon Tyne, NE1 7RU (16416)

THAMESMEAD HEALTH PROJECT

An integrated health service embracing all three branches of the N.H.S. is being planned for the new boroughs of Thamesmead with the communities of Bexley and Greenwich by a joint committee comprising all the statutory bodies concerned and Guy's Hospital Medical and Dental School. 60,000 people will live at Thamesmead when the development is completed in the 1980's and the present plan provides for two health centres, one to include diagnostic and out-patient facilities. The other, expected to be ready by the end of 1971, will provide care for the 10,000 people who will move in over the next two years. Meantime a purpose-built temporary centre is in operation. The first principal appointed also heads the Department of General Practice at Guy's Hospital Medical School. Applications are now invited for the second vacancy of

GENERAL PRACTITIONER

and part-time SENIOR LECTURER/LECTURER

The successful applicant will be expected to build up a list of about 2,000 patients and will work in partnership with the first principal. He may have the opportunity for some hospital and local authority work. In addition he will hold part-time post in the Department of General Practice at Guy's Hospital Medical School in either the lecturer or senior lecturer grade, according to qualifications and experience. He will play a prominent part in developing the medical services to residents on Thamesmead and in teaching and research. Remuneration will be derived in part from N.H.S. and in part from academic funds. Further information may be obtained from Dr. Peter Higgins, Health Centre, Thamesmead, London, S.E.2, to whom all applications should be addressed. (6-1)

Assistant Medical Director for Leo Laboratories Limited

Leo Laboratories has in the last year achieved one of the highest growth rates in the British pharmaceutical industry. This has been based almost entirely on products of original research developed at our laboratories in Copenhagen. The medical department in the British subsidiary has, however, a great deal of autonomy in advancing further investigation of these compounds, including clinical pharmacology, experimental microbiology, the use of radioisotopes, as well as clinical trials. Current research in particular is directed at antibiotics, diuretics and the human plasminogen-activator, urokinase.

Applications are invited for the above post from registered doctors, preferably under the age of 40. Previous experience in the industry would be an asset, but is not essential. What is far more important is a critical approach, a sound knowledge of medicine, including preferably hospital experience up to registrar grade, and the ability to work with doctors at all levels in the profession. A higher qualification or experience in pharmacology, physiology or a major clinical specialty would be a further recommendation.

Salary is negotiable but would not be less than £3,500 per annum. A company car would be provided as well as help with removal expenses. The company also operates a life assurance and a non-contributory pension scheme.

Please write or telephone for further information to:

Medical Director, Leo Laboratories Ltd.,
Hayes Gate House, 27 Uxbridge Road,
HAYES, Middlesex.
Telephone No.: 01-573 6224.

COMMERCIAL APPOINTMENTS

SMITH & NEPHEW PHARMACEUTICALS LTD.
SMITH & NEPHEW RESEARCH LTD.

Assistant physician

The Medical Department serving the two Companies is entering into a phase of planned expansion and has now reached one of the stages of recruiting a further physician. Applications are now invited for the new vacancy.

Great emphasis is placed on the scientific basis of the work of the Department and candidates for this vacancy will require to have a scientific degree, such as a pre-clinical B.Sc., or be able to provide other evidence of familiarity with scientific method as well as a registerable medical qualification. Although the work mainly centres on the development of new drugs, the human aspects of adhesives and plastics technology and other research areas play a part.

Attendance at appropriate meetings and the submission of material for publication will be encouraged. Career prospects in the Industry are good. Travel, some of which may be abroad, will be necessary.

Candidates may be men or women — it is unlikely that anyone over 35 will be appointed. The salary, which will be negotiated, will be attractive and will depend on qualifications and ability. Previous experience in the Pharmaceutical Industry is unnecessary. Conditions of service are above average and a car will be provided.

Applications, in writing, including a curriculum vitae, should be addressed to:

The Medical Director
SMITH & NEPHEW PHARMACEUTICALS LTD.
Bessemer Road, Welwyn Garden City, Herts.

Members of the Smith & Nephew Associated Companies.

Director of Clinical Investigation

This is a senior appointment within the Medical Department of this well-known pharmaceutical company and involves responsibility for initiation, organisation and development of clinical trials on new or existing products.

It requires a wide knowledge of clinical medicine and a medical graduate with previous experience of the industry, probably at present holding a responsible appointment, is the candidate we are seeking. He will be required to travel fairly extensively within the United Kingdom and at times overseas. The ability to project his personality and discuss in depth with clinicians aspects of the company's products and to lecture on them would be added advantages.

The company has diversified interests and international associations, and recent development within the global structure of the company offers prospects for real career advancement. The position will be based at Eastleigh and conditions of employment are first-class. Fringe benefits include a company car and free pension and life assurance. Reasonable re-location expenses will be met. The generous salary commensurate with the candidate's experience and ability is negotiable.

Please reply in confidence to:

The Medical Director,
William R. Warner and Company Limited,
Eastleigh, Hampshire.

UNIVERSITY OF OXFORD Departmental Demonstratorship in Physiology

It is proposed to appoint a Departmental Demonstrator in Physiology at a stipend of £1,515 (non-medical) or £1,548 (if medically qualified) depending on previous experience, with F.S.S.U. It is hoped that the person appointed will be able to take up office not later than October 1, 1970.

The demonstrator will be required to engage in advanced study or research, and to co-operate in the teaching and administrative work of the Laboratory of Physiology, in both term and vacation, under the direction of the head of the laboratory.

The demonstratorship may be held jointly with a College Fellowship. The attention of applicants is drawn to the advertisement for a Fellow in Physiology at Magdalen.

Applications (seven copies) including a statement of age, qualifications and experience, giving the names of two referees, should be sent to the Waynflete Professor, University Laboratory of Physiology, not later than April 27, 1970. (16340) 14-1

WORLD HEALTH ORGANIZATION AND COUNCIL OF EUROPE FELLOWSHIP 1971

A small number of fellowships for study abroad will be awarded in 1971 by the World Health Organisation and the Council of Europe. These are available to registered medical practitioners, dental practitioners, state registered nurses and other professional personnel engaged in the health services, medical education, or medical research in the United Kingdom.

The fellowships are awarded normally for periods of two weeks to one month. Only in exceptional cases can periods longer than this be considered. In each case the fellows are given a monthly allowance of approximately £100 per month. (the amount varying with the country or countries visited) together with all travelling expenses. Applicants should be of at least five years standing in their profession and able to assess critically their visits and studies abroad so as to utilise the experience for the benefit of the health services of the United Kingdom. They will be expected to continue in the health services of the United Kingdom for at least three years after holding a fellowship.

Application forms for fellowships to be taken up in 1971 may be obtained: (a) By those resident in Scotland from: The Secretary, Scottish Home and Health Department, St. Andrew's House, Edinburgh 1 (b) By those resident in Wales: The Secretary, Y Swyddfa Gymreig, Welsh Office, Health Department, Cathys Park, Cardiff CF1 3NQ. (c) By those resident in Northern Ireland from: The Secretary, Ministry of Health and Social Services, Dundonald House, Upper Newtownards Road, Belfast 4. (d) By others from: The Secretary, Room B102, Department of Health and Social Security, Alexander Fleming House, Elephant and Castle, London S.E.1. Envelopes should be marked "W.H.O. and Council of Europe Fellowships." Applications must be received not later than May 23, 1970. (16453) 14-1

INDUSTRIAL APPOINTMENTS—see also p. xxx

Attention is drawn to the British Medical Association's statement of policy on the Remuneration of Industrial Medical Officers as approved by the Representative Body, which is available on request from the Secretary.

MEDICAL OFFICER Agrochemicals

Applications or enquiries are invited for the full-time appointment of Medical Officer to this Division. Applicants should be medically qualified, with practical experience in industrial medicine and occupational health, probably in the age range of 28-35, and preferably (but not essentially) with a D.I.H.

The appointment is initially based on Chesterford Park Research Station, near Saffron Walden, Essex, 12 miles S. of Cambridge.

The Medical Officer's main responsibility will be for occupational health and safety arrangements throughout the Division's manufacture, research, development distribution and application of crop protection products, comprising a wide range of pesticides and peat-based products for agricultural, horticultural, industrial and domestic use. He will also, as his experience develops, be expected to advise management and departments (especially the Toxicology Department) on medical aspects of pesticide research and manufacturing policies, and on new product safety clearance by Governments, UK and overseas.

The appointment thus offers an interesting combination of occupational medicine and advisory responsibilities in the field of pesticides.

The terms and conditions of the appointment will be by personal negotiation, within the appropriate B.M.A. scales.

Enquiries should be made in the first place, quoting serial number 315, to the

Administrative Officer, Fisons Agrochemical Division, Chesterford Park Research Station, Saffron Walden, Essex. (Telephone Saffron Walden 3542)

INDUSTRIAL MEDICAL OFFICER (Part-time)

Applications are invited from registered medical practitioners preferably between 30 and 50 years of age for a part-time appointment with Birds Eye Foods Limited, Grimsby.

The successful candidate will be required to undertake the health supervision of a large factory and to advise management on problems concerning the health and well-being of the industrial community. The work initially will require not less than four hours and not more than five hours per week of the doctor's time and may well increase in the future. The salary will be in accordance with the B.M.A. scale.

The short list of those invited to attend for interview will be made out from the letters of application. Candidates are therefore asked to give details of their career and experience, including their reasons for wishing to practise industrial medicine. Two persons to whom reference may be made should be included.

Applications should be submitted not later than 30 April 1970 to the Principal Medical Adviser, Unilever Limited, Unilever House, London, E.C.4.

NORTHAMPTONSHIRE COUNTY COUNCIL
HEALTH DEPARTMENT

SENIOR CLINICAL
MEDICAL OFFICER

This is a new post offering a unique opportunity for gaining experience in hospital and community services for the sub-normal, before specializing in psychiatry or qualifying as a community physician of the future.

The successful candidate will spend at least three sessions per week on hospital duties and the remainder of his/her time on community health work.

The appointment is a joint one between the County Council and the Princess Marina Hospital for the Sub-normal (St. Crispin Hospital Management Committee Group), which opens during April 1970, with 200 beds rising ultimately to 550. Candidates may visit the hospital by appointment with the Group Medical Director. The Hospital Clinical Director is Adviser on Sub-normality to the Health Department.

Salary within the scale £2,335-£2,890. In approved cases there is a grant of 50 per cent of the cost of removal expenses not exceeding £50.

Applications giving details of age, qualifications, experience and present appointment, together with the names and addresses of three referees should be sent by April 27 1970, to:

Dr. W. J. McQuillan,
County Medical Officer of Health,
County Hall,
Guildhall Road,
Northampton, NN1 1DX

County Hall,
Northampton.

UNIVERSITY OF QUEENSLAND Australia

PROFESSOR OF ANATOMY

The University invites applications for the Chair of Anatomy. The Department of Anatomy is responsible for the teaching of Anatomy to students in the Faculties of Medicine, Dentistry and Science and to students of Physiotherapy, Occupational Therapy, Speech Therapy and Physical Education.

The curriculum of the medical faculty is under review and the successful applicant would take up the appointment at the beginning of a stimulating period of change and development.

Applicants may be drawn from any of the broad range of disciplines which comprise Anatomy or Human Biology—e.g., Histology, Embryology, Cellular Ultrastructure, Gross Morphology—and must have carried out research in their field.

The successful applicant will be responsible for the organisation of the Department and for the supervision of teaching and research activities.

The salary for a Professor is \$A12,000 per annum. (Salary scales are at present under review.)

The University provides Superannuation similar to F.S.S.U., housing assistance, study leave and travel grants for a permanent appointee of Lecturer status and above.

Additional information and application forms will be supplied upon request to the Secretary-General, Association of Commonwealth Universities (Apts.), 36 Gordon Square, London, W.C.1.

Applications close in London and Brisbane on 15 May 1970. (16321) 61-1

THE UNIVERSITY OF OTAGO and THE OTAGO HOSPITAL BOARD DEPARTMENT OF PSYCHOLOGICAL MEDICINE

Applications are invited for positions as

Lecturer/Senior Lecturer in Psychological Medicine
In the University of Otago, and
Psychiatric Specialist
To the Otago Hospital Board.

The Department of Psychological Medicine is part of the general teaching hospital complex, and consists of a 36-bed inpatient and busy outpatient sections. The clinical services include child and family psychiatry, and in-service hospital consultation with emphasis on a Team Approach. There is considerable commitment to teaching, and undergraduates receive some 250 hours of psychological medicine during their training. Behavioural Science has recently been introduced to the 3rd year curriculum. Extensive use is made of audio-visual aids, such as video-tape, one-way screens, etc. Postgraduate teaching is given during term times. Research is active: one major long-term developmental project and several smaller projects are under way. Interest and/or experience in child psychiatry would be considered an advantage for one of the vacant positions.

The salary scale prescribed under the Regulations for a Specialist is \$6,525-\$8,810, by nine automatic annual increments. The regulations also provide for progression beyond the maximum automatic rate of \$8,810 per annum in three steps to \$10,225 in cases of exceptional responsibility or of exceptional merit. Salary Scales, Conditions of Employment, etc., are currently under review.

Travelling expenses for successful applicants and families will be paid in accordance with the information contained in the conditions of appointment which together with a form of application may be obtained from the Secretary to the Board. Further particulars can be obtained by writing to the recently appointed Head of the Department, Professor Basil James.

Applications, stating age, qualifications and experience, together with Health and Chest Certificates and the names and addresses of two referees, will be received by the undersigned until Monday, 25 May 1970.

D. C. J. PEARCE, Secretary.

Otago Hospital Board,
P.O. Box 946, Dunedin, Otago, New Zealand.

ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director
James Harper, M.B., F.R.C.P. (Edin.), D.P.M.
St. Andrew's Hospital is a private psy-
chiatric hospital situated in 130 acres of
parkland in the county of Northampton.
In general, patients are admitted to Wards
House, a reception unit in the grounds
which is equipped for the investigation and
treatment of all forms of mental and nervous
illness. In addition, there is accommodation
mainly in private rooms, both in the main
hospital and in various villas, for longer
stay patients and geriatric patients.
The hospital's amenities include Gloucester
House, which comprises an occupational
therapy department, a swimming-pool, a
squash court and library, while in the
grounds there are tennis courts, a nine-hole
golf course, etc.
Fees range from 25 guineas per week, and
subscribers to private medical insurance
schemes, such as British United Provident
Association and Private Patients Plan, may
claim benefit in respect of these charges.
Further particulars may be obtained from
the Medical Director, St. Andrew's Hospital,
Northampton (Tel.: Northampton 34354),
who can be seen in consultation by appoint-
ment, either at the hospital or at 55 Har-
rington Street, London W.1. 67-13

IMPORTANT INFORMATION

Drug-induced Parkinsonism during the treatment of severe mental illness

Severe mental illness . . . probably you treat it with phenothiazines as a matter of course. But occasionally these excellent drugs produce side effects akin to the symptoms of Parkinsonism. Side effects such as rigidity, tremor, fidgeting, difficulty in walking. To combat these side effects:

Artane[®]

BENZHEXOL

You are probably familiar with Artane as the reliable standard drug for the treatment of Parkinson's disease. *It is just as effective in the control of drug-induced Parkinsonism.* And it is far less expensive than other such drugs—an important point in co-prescribing.

In the treatment of Dermatitis Fucidin[®] 'H' Ointment fills a definite need

Fucidin H Ointment offers the antipruritic anti-inflammatory action of hydrocortisone combined with the rapid bactericidal action of Fucidin, minimising the risks of the adverse effects of the more potent steroids and the considerable risk of sensitisation caused by many topical antibiotics.

Fucidin H Ointment: Sodium fusidate B.P. 2%; hydrocortisone acetate B.P. 1% in a neutral ointment base. Available in tubes containing 10G & 25G.
