

# Respiratory tract infections— **Penbritin** **Territory**

Penbritin is being used increasingly in the treatment of urinary tract infections because it

- kills rather than inhibits the main causative organisms,
- is active in renal tissue as well as in urine,
- has the safety of penicillin,
- offers a choice of presentations.

Penbritin's value in the treatment of urinary tract infection is confirmed by 8 years' published evidence which reveals a success rate of more than 80% in acute infections.

At the recommended dosage of 500 mg. three times a day Penbritin achieves high blood and urine levels and can attack and eradicate pathogens in all parts of the urinary tract. Having the safety of traditional penicillins, it may confidently be prescribed for children, for expectant mothers and even for patients with impaired renal function. Furthermore, Penbritin is available in a complete range of presentations: 500 mg. and 250 mg. capsules, syrups of 125 mg. and 250 mg./5 ml. strengths, 125 mg. paediatric tablets and three strengths of injectable.

**Adult Dosage:** 500 mg. three times daily.

**Contra-indication:** Penicillin allergy.

**Side-effects:** As with other penicillins.

# WHAT'S BEHIND THE MOUNTING CLINICAL EVIDENCE FOR INTAL CO?

## ...a happier life for the asthmatic

Reduced chest tightness, cough, sputum production, reduced incidence of acute asthmatic attacks, and improved exercise tolerance—all factors which make for a happier and more normal life—these are the benefits that INTAL COMPOUND brings to many asthmatic patients.

Essentially a prophylactic, INTAL COMPOUND is based on disodium cromoglycate—a drug that differs in mode of action from bronchodilators, corticosteroids, and antihistamines. As well as providing both objective and subjective improvement, INTAL COMPOUND often allows significant reduction in bronchodilator and steroid dosages.

INTAL COMPOUND — Supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in a powder form, together with an inert carrier). For use in a special insufflator — SPINHALER.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1 2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3 4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

## CORTROSYN DEPOT- for anti-inflammatory therapy with reduced risk and increased control

Cortrosyn Depot, the synthetic successor to natural A.C.T.H., is a suspension of tetracosactrin adsorbed on a zinc hydroxide carrier for *measured* duration of activity. Tetracosactrin is a synthetic polypeptide comprising the first 24 amino acids of natural human A.C.T.H.

### **Advantages over corticosteroids**

Normal functioning of body's defences against toxins, stress, shock and allergies.  
No difficulty in withdrawing treatment.  
No risk of adrenal suppression.  
Less gastric irritation.  
Minimal catabolism  
No stunting of growth in children.

### **Advantages over natural A.C.T.H.**

*Consistent* potency.  
Fewer hypersensitivity reactions.  
The dosage can be accurately expressed in mg. instead of units.

### **Convenient multi-dose presentation**

Cortrosyn Depot is available in :  
1 mg/2ml. vials and 2 mg/2 ml. vials.  
Multi-dose presentation gives great flexibility of administration.

# Neo-NaClex-K

for easier management  
of all grades  
of hypertension

Effective in all grades of hypertension

In mild hypertension, bendrofluazide (the white layer of Neo-NaClex-K Tablets) lowers the blood pressure by an average of 10 to 15 mm Hg. In moderate or severe hypertension, Neo-NaClex-K may be given in conjunction with other more potent drugs to enable the dosage and side effects of the latter to be substantially reduced. In addition to bendrofluazide, each Neo-NaClex-K Tablet contains a potassium supplement (the pink layer of the tablet) that is normally adequate to compensate for any potassium loss that may occur with prolonged thiazide treatment. Embedded in protective material, the potassium is released very slowly so that no great concentration is reached at any one time. The possibility of causing gastric irritation or small bowel ulceration is therefore minimised.

Once-daily dosage

The usual dosage is one to three tablets once daily, making therapy easier for the hypertensive patient.

High level of safety

The antihypertensive effect of Neo-NaClex-K is smooth and sustained – side effects are uncommon and postural hypotension does not normally occur.

For your detailed reading  
Neo-NaClex-K

#### Description

Neo-NaClex-K is a film-coated two-layer tablet containing the thiazide drug bendrofluazide in the white layer and potassium chloride in the pink layer. The potassium chloride crystals are embedded in protective material which is designed to release potassium chloride gradually, so minimising gastro-intestinal irritation. Potassium taken in this form is well absorbed.

#### Indications

Essential hypertension. Neo-NaClex-K may be used alone, or in conjunction with other antihypertensive drugs, when either the dosage of the latter can be reduced, or full doses can be used to control resistant cases which do not respond satisfactorily to either drug alone. When Neo-NaClex-K is used alone, the fall in blood pressure may range from 20 to 40 mm Hg systolic and from 10 to 30 mm diastolic.

#### Administration and dosage

The usual dosage of bendrofluazide is 5 to 7.5 mg (2 to 3 tablets) daily, but a few patients need only 2.5 mg, while others need 10 mg (4 tablets). Larger doses do not give a correspondingly greater therapeutic effect. When Neo-NaClex-K is used as a supplementary drug, the dosage of the other antihypertensive drug is normally gradually reduced as the Neo-NaClex-K takes effect.

#### Side effects and precautions

Neo-NaClex-K is a relatively safe drug and side effects of treatment are uncommon.

Mild anorexia or indigestion is rare and can be avoided or reduced by taking the dose during or immediately after a meal. Symptoms and signs which might indicate ulceration or obstruction of the small bowel in patients taking tablets or capsules containing potassium salts are indications for stopping treatment with such preparations immediately. These complications are usually associated with enteric coated preparations, and are unlikely to occur with Neo-NaClex-K, which is designed to release potassium chloride slowly.

Skin reactions have been reported in a few patients and blood dyscrasias have occurred rarely. Diabetes mellitus with glycosuria, and raised serum uric acid levels (with or without gout), may occur in some patients, especially in those who are susceptible to these disorders.

#### Contra-indication

Renal insufficiency complicated by hyperkalaemia.

#### Presentation

Neo-NaClex-K Tablets each contain 2.5 mg bendrofluazide and 630 mg potassium chloride, providing 330 mg elemental potassium (8.4 mEq) bottles of 100 and 500 tablets.

**MEDICAL DEPARTMENT  
BRITISH RAIL**

The Eastern Region of British Rail require a full-time Doctor to give a medical service to the staff in the York area. Salary is within the B.M.A. scales for Industrial Medical Officers depending upon age, experience, etc.

Benefits include generous leave, free and privilege rail travel and sick pay arrangements. Contributory Superannuation Fund.

Candidates who should have a good clinical background with experience in industrial medicine an advantage, should supply full details including age, qualifications and experience to:—

**Dr. R. Fraser MacKenzie,**  
Regional Medical Officer,  
British Railways,  
Eastern Region,  
York.

**NATIONAL COAL BOARD  
MEDICAL SERVICE**

Applications are invited for posts of Deputy Area Medical Officers in the South Wales coalfields. The Medical Service provides comprehensive medical care in relation to their work for all members of the coal industry. It is also responsible for the health of employees in the ancillary industries, e.g. Bricks, Patent Fuels and Chemicals, which are increasing in number and diversity. Clinical and epidemiological investigation is actively encouraged—also liaison with the Institute of Occupational Medicine in Edinburgh.

Experience in occupational medicine is desirable but not essential; training will be given and facilities for taking the Diploma in Industrial Health provided. The likely trend of manpower has been and is taken into account in recruitment to the Medical Service. For those who wish to make the Board's Medical Service their permanent career, there are now excellent prospects of promotion to more senior posts. Alternatively, several years in this industry with its diversity of environmental hazards should provide successful candidates with a sound basic training in occupational medicine.

Starting salaries according to age and experience will fall within the range £2,550-£4,050—this range will be the subject of review in the coming months.

Please write, giving personal details and brief outline of qualifications and experience to:

**The Staff Manager/Secretary,**  
National Coal Board,  
East Wales Area,  
Ystrad Fawr,  
Ystrad Mynach,  
Hengoed,  
Glam.

**WORKS  
MEDICAL OFFICER**

Imperial Chemical Industries Limited, H.O.C. Division, Wilton Works, near Middlesbrough, Teesside, invite applications for a full-time Works Medical Officer.

The successful applicant will be responsible to the Division Medical Officer and will undertake the normal duties of an Industrial Medical Officer. He will work in a modern Medical Centre which contains the latest equipment for basic and ancillary services.

Salary will be commensurate with age and experience, but not less than that recommended by the British Medical Association for full-time Medical Officers in industry.

Experience in any of the following would be an advantage: General Practice; Casualty Work; The Services; Industrial Medicine and/or D.P.H., D.I.H., or other post-graduate qualifications.

Application forms, together with further particulars, may be obtained from:—

**Mr. A. F. Shepherd,**  
Staff Manager,  
Imperial Chemical Industries Limited,  
Heavy Organic Chemicals Division,  
Organic House,  
P.O. Box No. 2,  
BILLINGHAM, Teesside. (16994)

**Air Corporation Joint Medical Service****Industrial  
Medical Officer**

The Air Corporations Joint Medical Service provides a comprehensive Occupational Health Service for B.E.A. and B.O.A.C. and includes groups dealing with Industrial Medicine, Aviation Medicine and the care of Overseas Staff. Due to a promotion there is a vacancy for an Industrial Medical Officer based at London (Heathrow) Airport. This appointment will be of interest to a doctor with previous experience in occupational health, looking for a more responsible post, or alternatively to a younger person wishing to make a career in occupational health in a modern and progressive organisation with good career prospects.

Possession of the D.I.H. and D.P.H. is desirable, but not essential.

The preferred age range is from 27 to 40 years, although candidates outside this range would be considered.

All candidates must be medically registered in the U.K.

The salary will be within the B.M.A. Industrial Medical Officer scale and the starting point will be fixed according to age, qualifications and experience.

There are opportunities for overseas holiday air travel and there is an excellent contributory pension scheme.

Applicants should write, giving details of age, experience and qualifications to:—

**KING EDWARD VII HOSPITAL  
MIDHURST, SUSSEX.****AMENDED NOTICE  
RESIDENT PHYSICIAN SUPERINTENDENT**

Applications are invited for the appointment of Resident Physician Superintendent at Midhurst which will become vacant during the next few months.

The work of the Hospital is becoming diversified but it is likely that an important place will continue to be given to all aspects of diseases of the chest, both medical and surgical.

Preparations are being made for the establishment of an Institute for Research into cardio-respiratory diseases. The new Institute will be administered independently but beds in the Hospital will be allotted for the work of the Institute and a close liaison will be established between the Staffs of both Units.

The duties of the Physician Superintendent at the Hospital will be those of a Consultant Physician with some administrative responsibilities and he will be required to facilitate the necessary liaison between the Hospital and the Institute.

The commencing salary will be in the range of a full time Consultant in the National Health Service up to £7,625. The post will be superannuated and National Health Service superannuation entitlement is transferable. A house can be provided.

Applicants should preferably be Fellows or Members of the Royal Colleges of Physicians.

Applications should be sent to the Secretary of the Hospital at Midhurst, from whom further information is available, to reach him not later than 20 May, 1970. H8196-32-1

## ASSISTANT MEDICAL DIRECTOR

PFIZER ASIA—HONG KONG

This position will be of prime interest to outstanding young members of the medical profession who are seeking an International career.

#### The Company

Pfizer International is a world-wide organisation which is prominent in the pharmaceutical, agricultural, veterinary, fine chemicals, consumer and cosmetic industries. In Asia, Pfizer operations extend from Japan through Australia and New Zealand to India and Pakistan, and are administered from a Management Centre in Hong Kong.

#### The job

Through recent promotions, this Management Centre now seeks an Assistant Medical Director who will report to the Medical Director for Pfizer Asia. The appointee will be involved in all medical activities but his main responsibility will be the co-ordination and evaluation of clinical trials programmes in Pfizer locations in Asia. For most cases the working relationship will be through Country Medical Directors. Pfizer medical staff work closely with the marketing groups and considerable job interest is gained through medical service activities. This position requires travel both within Asia and on occasions to Europe and the U.S.A.

#### Applicants

Applicants should have as minimum qualifications an M.B. degree or its equivalent. Initial preference will be shown towards those with experience in clinical research, drug trial methodology or teaching. Final selection will place considerable emphasis on the applicant's managerial potential and ability to assimilate into a commercial enterprise. We anticipate that the successful applicant will be in his 30's.

#### Conditions

Emoluments will reflect responsibility level and will include attractive overseas allowances. Company car. Pension and insurance benefits are liberal. Home leave of 4 weeks per annum. Education assistance for children. Relocation costs paid. Exceptional opportunities for advancement.

Applications will be received in the strictest confidence. They should include personal details such as family status, age and nationality, educational record and work experience and current salary level. It would also be of assistance to know approximate availability and details of experience in Internal Medicine, Clinical Research Psychiatry, Tropical Medicine or Teaching.

# Trends in Clinical Pathology

Essays in Honour of Gordon Signy

This book is no pious collection of personal tributes but a survey of the old and the new disciplines in clinical pathology since the second world war—research in atherosclerosis and ischaemic heart disease, progress in medical virology, microbiology and cytology, the impact of antibiotics on medical bacteriology, chemical pathology and also molecular defence, haematology in mid-century, including haemostasis and blood transfusion. The place of fibrin in the story of hyalin is another modern study, so also is that on automation. The outlook on some members of the family Enterobacteriaceae is changing, and the 'old' forensic medicine is indeed new. And those pathologists working in the under-developed countries are not forgotten. The contributors are internationally renowned.

# ASTHMA.YOUR CHOICE:

**STEROIDS:** the vicious circle of substitution therapy

**SYNACTHEN DEPOT:** adrenal stimulation

Synacthen Depot stimulates the patient's adrenal glands, thereby increasing the secretion of cortisol, androgens, and other adrenal hormones. The incidence and severity of the usual steroid side effects are much reduced, and there are no withdrawal problems. Synacthen Depot is more physiological than steroid drugs, so it is a more logical choice in asthma.

**SYNACTHEN<sup>®</sup> DEPOT**  
a more  
physiological form of  
therapy than  
steroids

Synacthen Depot is tetracosactrin zinc phosphate complex.

Ampoules containing 1mg in 1ml.

Basic NHS price 10 amps: 160s 0d. Multidose vials
