

THE SIXTIES

It is ten years since Librium* became available. Ten anxious years of aggravation and demonstration, Cuba and Vietnam, assassination and devaluation, Biafra and Czechoslovakia. Ten turbulent years in which the world-wide climate of anxiety and aggression has given Librium—with its specific calming action and its remarkable safety margin—a unique and still growing role in helping mankind meet the challenge of a changing world.

Road Accidents and the Family Doctor

Road accidents are now acknowledged to be one of the major epidemics of our time. It has been estimated that as many as a quarter of accident deaths could be saved by skilled treatment at the site of the accident, and recently doctors in Britain and abroad have been playing an increasingly active part in this. This booklet, which reprints a series of articles which appeared in the *B.M.J.* last autumn, contains contributions on organization and medical equipment, the management of soft-tissue injuries, resuscitation, fractures of the spine, and extrication of persons trapped in a vehicle. The introduction is written by Mr. Norman Capener, Chairman of the Medical Commission on Accident Prevention.

Roche Medical Information Service | **Larodopa**

We are pleased to announce that supplies of Larodopa*, our brand of L-Dopa, are now available - but only on a limited basis.

For the present, our total supply has been allocated to the Department of Health, who have themselves nominated through the Senior Administrative Medical Officer in each region, those consultants who should receive supplies of Larodopa. General practitioners wishing to refer patients for Larodopa treatment should contact the Senior Administrative Medical Officer of the Regional Hospital Board in their area, who will advise them as to the centres in their area where supplies of Larodopa are available.

At the present time supplies of Larodopa continue to be limited, but we are developing our production capacity as quickly as possible.

*Larodopa is the trade mark for Roche preparations containing L(-)- β (3,4-Dihydroxyphenyl)-alanine.

Roche Medical Information Service | **Larodopa**

Larodopa is the result of Roche's involvement in the investigation and development of L-Dopa from the very beginning. In order to expand the field of knowledge concerning the use of Larodopa in Parkinsonism, it is planned to maintain a special Roche Medical Information Service to help doctors on the subject.

We shall endeavour to keep you up-to-date with all developments concerning the use of Larodopa, since even at this stage patients in your practice may be started on treatment by a local consultant. If this happens and you require additional information, please do not hesitate to let us know.

You can write for information to the address below, or phone the Roche Medical Information Service/Larodopa direct on 01-935 5566.

Now—effective treatment for many enuretic patients

Many cases of enuresis without organic involvement respond favourably to 'Tryptizol', the well-known antidepressant with tranquillising properties. Most enuretics responding to

'Tryptizol' begin to do so in the first few days of treatment and the tendency is for increasing improvement as therapy is continued. In one trial on 74 enuretic children, a recovery rate of 72.9% was reported.*

BRUFEN new freedom for the arthritic

(ibuprofen)

Brufen is a highly effective anti-rheumatic agent with a remarkable freedom from side-effects. Its value in the treatment of arthritic disease is now well established and the benefits of Brufen are well known to thousands of arthritic patients. Experience in hospitals and general practice clearly shows that, in arthritic conditions, Brufen relieves pain and stiffness, reduces swelling, improves joint flexion and extends

the pain-free walking distance. To the arthritic patient, Brufen brings the new freedom of a progressive improvement in functional capacity.

Brufen tablets each contain 200mg. of ibuprofen, the first anti-rheumatic compound to be evolved entirely by British research.

Halt at the flashing light

Flashing lights and visual disturbances, classically early warnings of migraine, are signals for arresting all manifestations of an attack – at onset.

MIGRIL* acts in the minutes between initial warning and the otherwise inevitable full-blown attack.

As well as containing an effective dose of ergotamine (2 mg in each tablet), enhanced by caffeine, MIGRIL contains the anti-emetic, cyclizine. Nausea and vomiting, due to migraine itself or to ergotamine, are very effectively relieved.

MIGRIL, taken at the first warning of an attack, provides a specific treatment that the patient will learn to rely on. Full information is available on request.

Any advance is worthwhile

...and that is why Akineton is well worth considering in the treatment of Parkinsonism. It represents a worthwhile advance in the treatment of a distressing condition - and offers significant benefits to the patient. For instance, Akineton controls rigidity and evidence suggests that the effectiveness of the optimal dosage does not diminish, even over a number of years. Akineton restores salivation to normal in as many as 95 per cent of patients. Hyperkinesia, dyskinesia, akathisia - all these can be effectively controlled by Akineton. Tremor is alleviated - and in some cases controlled completely. The parenteral form of Akineton offers something more. The results in severe tremor and rigidity are spectacular, relief has been achieved in as little as five minutes. Akineton has been equally successful in dystonic and bulbar symptoms. Both oral and parenteral forms are well tolerated, and very well documented. Full information is available on request.

in cerebral ischaemia duvadilan helps arteries to help themselves

When cerebral arteries begin to lose their elasticity through sclerosis and atheroma, or vascular tone gives way to vasospasm, impaired blood flow may give rise to symptoms like dizziness, headache, forgetfulness, disorientation and irritability.

Although little can be done for an artery which has completely sclerotized, treatment with

DUVADILAN in the early stage of the disease can delay the further deterioration of the clinical condition and reduce the number of ischaemic attacks.^{1,2,7}

DUVADILAN (isoxsuprine hydrochloride) has a unique mode of action.^{1,3,4,5,6} It stimulates the β receptors of vascular smooth muscle which relieves vasospasm^{2,9} and simultaneously blocks the α receptors to prevent rebound vasoconstriction^{4,5,8} which can be a problem with some vasodilators.

DUVADILAN fully exploits collateral vessels threatened by spasm and any remaining elasticity in a partially sclerotized artery, increasing the supply of oxygen and nourishment to

starved tissues before they become irreversibly damaged.

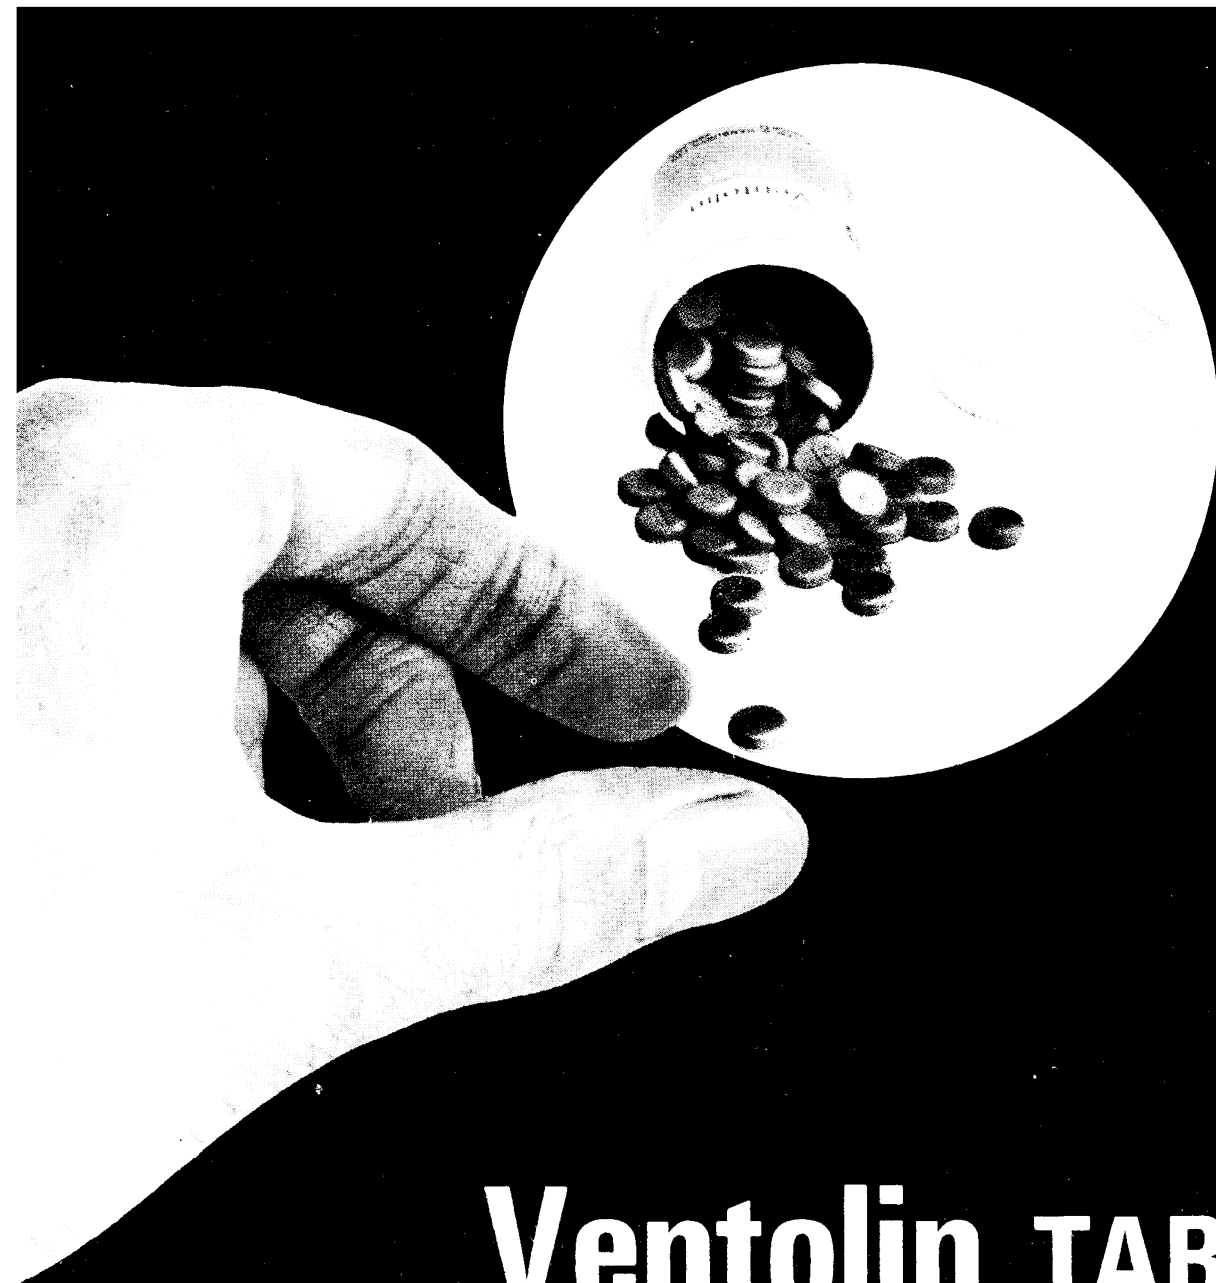

It is important that patients should be kept on DUVADILAN for at least 6 weeks to allow time for clinical improvement to become apparent.

mental block

Symptoms like forgetfulness, disorientation, loss of concentration, dizziness and confusion are often the first signs of cerebral ischaemia which, left untreated, can lead to irreversible brain damage.

Clinical evidence shows that early administration of DUVADILAN (isoxsuprine hydrochloride) can arrest and delay the further advance of the condition and reduce the number of ischaemic attacks.^{1,2,7}

Its unique action^{1,3,4,5,6} dramatically increases cerebral circulation by relaxing vasospasm^{2,9} and reducing arteriole tone. DUVADILAN fully exploits collateral vessels threatened by spasm and any remaining elasticity in a partially sclerosed artery, and can increase oxygen and nourishment supplies to near normal so that mental function and alertness are gradually restored.

Clear reasons for using Septrin

Abstracted from a Leading Article in the *British Medical Journal*².

- ☐ Trimethoprim not only attains therapeutic tissue levels, but is excreted unchanged in high concentration in the urine.
- ☐ All Gram-negative bacilli occurring in the urine, except *Pseudomonas aeruginosa*, are usually highly sensitive to it.
- ☐ Its minimum inhibitory concentration is extremely low.
- ☐ Trimethoprim and a sulphonamide, by blocking successive stages in the same bacterial metabolic process, exert a strong synergic effect, and this action is bactericidal.

When you are ill we can foot the bills.

When you are ill your earnings soon stop. Your outgoings won't.

Rent, mortgages, family housekeeping, staff wages and school fees still have to be paid.

Medical Sickness can take this worry off your shoulders with a sickness and accident insurance policy. Then when you can't work because of illness or accident we can start paying you an agreed sum each month during your incapacity. And we'll go on paying either until you're fit enough to get back to work or until normal retirement age, whichever is earlier. And we can't cancel the policy because of long or frequent claims.

If you have not yet got around to ensuring that we can foot the bills when you're ill write to us today quoting reference number 5012. You will be surprised how little this essential cover will cost.

Trends in Clinical Pathology

Essays in Honour of Gordon Signy

This volume of essays has been collected by a group of friends of Gordon Signy, led by Professor John Stafford, to celebrate his Jubilee as Editor of the Journal of Clinical Pathology.

It is no pious collection of personal tributes but a survey of the old and the new disciplines in clinical pathology since the second world war—research in atherosclerosis and ischaemic heart disease, progress in medical virology, microbiology and cytology, the impact of antibiotics on medical bacteriology, chemical pathology and also molecular defence, haematology in mid-century, including haemostasis and blood transfusion. The place of fibrin in the story of hyalin is another modern study, so also is that on automation. The outlook on some members of the family Enterobacteriaceae is changing, and the 'old' forensic medicine is indeed new. And those pathologists working in the under-developed countries are not forgotten. The contributors are internationally renowned.

Senokot restores natural rhythm to the constipated colon

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, it is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

From the dispensing packs, the basic NHS cost of a spoonful of granules or two tablets is about a halfpenny.

Granules: 56, 170 and 900 grammes.

In the treatment of ischaemia due to intermittent claudication, cerebral arteriosclerosis and vasospastic disorders, Bradilan® has achieved excellent results. Because Bradilan employs tetranicotinoylfructose, the molecule of which is gradually hydrolysed in the intestine, release is smooth and even – with no peaks or troughs. Consequently, efficient and prolonged vasodilation is maintained, with less risk of over dilation in flush areas. For the same reason, headaches are a rare occurrence. Bradilan acts directly on vessel walls and is especially indicated when ischaemia is due to vasospasm. Ideally, treatment should be continued for at least 12 weeks so that progress can be realistically evaluated.

GENERAL PRACTICE TRAINING POSTS

UNIVERSITY OF
NEWCASTLE UPON TYNE

VOCATIONAL TRAINING FOR
GENERAL PRACTICE

A 3-year training programme is beginning in July in Teesside Hospitals with attachment to several nationally known practices interested in education and research.

A feature of the course will be the weekly seminar when trainers and trainees will meet, covering a comprehensive training syllabus. The trainees will spend 6 months in general practice followed by 4 of the following: Medicine, Paediatrics, Obstetrics, Casualty, psychiatry, combined E.N.T., Skins & Eyes. Finally there will be a further 6 months experience in general practice.

The scheme is under the aegis of Newcastle University and is part of a research project supported by the Department of Health and Social Security. The posts offer suitable training for D.C.H., D.R.C.O.G. and M.R.C.G.P. The scheme will appeal to young doctors interested in research, teaching and organization of general practice.

Applications to Dr. Andrew Smith, Lecturer in General Practice, Postgraduate Centre, West Lane Hospital, Middlesbrough, with the names of two referees. (18733) 11

OIL INDUSTRY MEDICAL SOCIETY, TRIPOLI, LIBYA

THREE MEDICAL OFFICERS

WITH EXPERIENCE IN THE FOLLOWING SPECIALITIES:

1. DIAGNOSTIC RADIOLOGY
2. PSYCHIATRY
3. OPHTHALMOLOGY

Due to rapid expansion of its services in Tripoli, the Oil Industry Medical Society requires three additional medical officers. The successful candidates will work in the Society's well equipped modern Hospital which is currently being expanded to include 40 beds, and which provides out-patient and in-patient care for the employees and dependants of approximately 50 companies engaged in the oil industry.

They will be responsible for the care of patients within their own specialities in addition to general and routine work (including pre-employment and periodic medical examinations of employees and their dependants) and maintaining a 24-hour duty roster with the existing Doctors on the Staff.

QUALIFICATIONS:

Possession of a higher qualification is preferable for all three posts and the minimum acceptable standard will be two years' experience in Registrar grade in the speciality concerned. One of the successful applicants must also have experience of overseas Hospital administration, preferably in the oil industry.

SALARY:

Salary, inclusive of allowances will be payable in Libyan pounds within scales equivalent to sterling £6,400—£7,350 for Doctors with a higher qualification and between £6,000—£7,000 for those without post graduate qualifications.

Libyan Income Tax is currently approximately 11% of gross earnings. Furnished accommodation for married or single employees will be provided at a reasonable rental, personal effects may be shipped to Libya at Society expense and paid home leave is provided annually, with free return air passage for employees and families. There is generous provision for educational assistance for children.

Interviews will be held in London in July and successful candidates will be offered initial contracts of two years, renewable by mutual agreement.

Please write with details of qualifications, experience, age and present salary to B. R. Allen, Mobil Oil Company Limited, 54/60 Victoria Street, London, S.W.1. (32849) 61-1

The Retreat, York For the Treatment of Psychiatric Illnesses

This Private Registered Nursing Home at York of 275 beds, established in 1792, is managed by members of the Religious Society of Friends (Quakers).

It combines psychological and physical investigations and modern forms of treatment for patients suffering from psychiatric illnesses, including drug dependence, and has a separate unit for the assessment and treatment of psycho-geriatric conditions. There are also facilities for long-stay patients.

The Hospital is surrounded by 42 acres of its own grounds and is within easy walking distance of the City centre. In recent years, the Hospital has been modernised throughout. A new spacious occupational therapy centre provides a wide range of creative activities.

British United Provident Association and Private Patients Plan assist their members who become patients at The Retreat within the range of their published benefits.

For terms and further particulars, apply to Dr. John E. O'N. Gillespie, MA., MD., FRCP., FRCPi., DPM., Medical Director, The Retreat, York, YO1 5BN. Telephone: York 54551 (STD 0904).

First choice in hypertension and oedema

cyclopentiazide 0.25mg KCl 600mg

Only 'Navidrex K' contains 'Slow-K'

'Navidrex K' provides the essential potassium supplement 'Slow-K' to guard against potassium depletion in long-term treatment.

Ideal daytime diuretic action

A single morning dose with the ideal diuretic action of 12 hours' duration avoids nocturnal diuresis and enables the patient to get a sound night's sleep. Diuresis is gently effective—not drastic.

Continuous antihypertensive effect

'Navidrex K' has an antihypertensive effect which, on once daily dosage, is virtually continuous. It is particularly suitable for baseline therapy in mild to moderate hypertension.

Full information on request
Containers of 100 and 500
Basic NHS price 100 : 9s 4d

'Navidrex K' tablets are designed to avoid the risks of gastrointestinal irritation. However, symptoms or signs which might indicate ulceration or obstruction of the small bowel in patients taking tablets or capsules containing potassium salts are indications for stopping treatment with such preparations immediately.

'Navidrex K' and 'Slow-K' are trademarks
