natural movement denied to the arthritic

For many patients afflicted by arthritic pain at night, 'Indocid' Suppositories can bring about a noticeable improvement. A suppository at bedtime usually results in a better night's sleep, less interrupted by pain and stiffness. These patients find it easier to get started in the morning, and 'Indocid' Capsules can help to keep them more mobile during the afternoon and evening.

Cheap welfare milk ended on April 3rd

Please help make sure that children continue to get all the milk they need

Now that cheap welfare milk has gone,
3½ million families will be affected. Many may cut down
their milk consumption—unless they realise
the importance of milk in their diet.

A daily pint guarantees your child's calcium.
"A daily pint guarantees your child's calcium" is the message the dairy industry is using on posters, television and in the press, to encourage mothers to keep up their milk order. The press advertising also lists the other important milk attributes like this:

One pint of milk contains:

1. Calcium —all that children under five should have each day. Calcium feeds growing bones to make them stronger and thicker, and toughens growing teeth to help them resist decay.
2. Protein —nearly as much as in a quarter-pound of beef steak. Protein gives them the material they need to help build strong bodies and firm muscles.
3. Riboflavine (Vitamin B₂) —all they should have each day. Children must have Riboflavine for proper growth.
4. Vitamin A —over 70% of their daily requirement. It helps maintain good eyesight and a clear skin.
5. Thiamine (Vitamin B₁), Vitamin C and Niacin —in addition, one pint of milk guarantees at least one sixth of their daily requirement of Thiamine, Niacin and Vitamin C.

Figures derived from recommendations of the Health Departments of the United Kingdom.

Free leaflets and posters for your waiting room. Attractive leaflets and posters have been designed to inform mothers about the importance of milk. You can get these free from: Dept. WM, The National Dairy Council, National Dairy Centre, John Princes Street, London, W1M 0AP.

New scheme for free milk

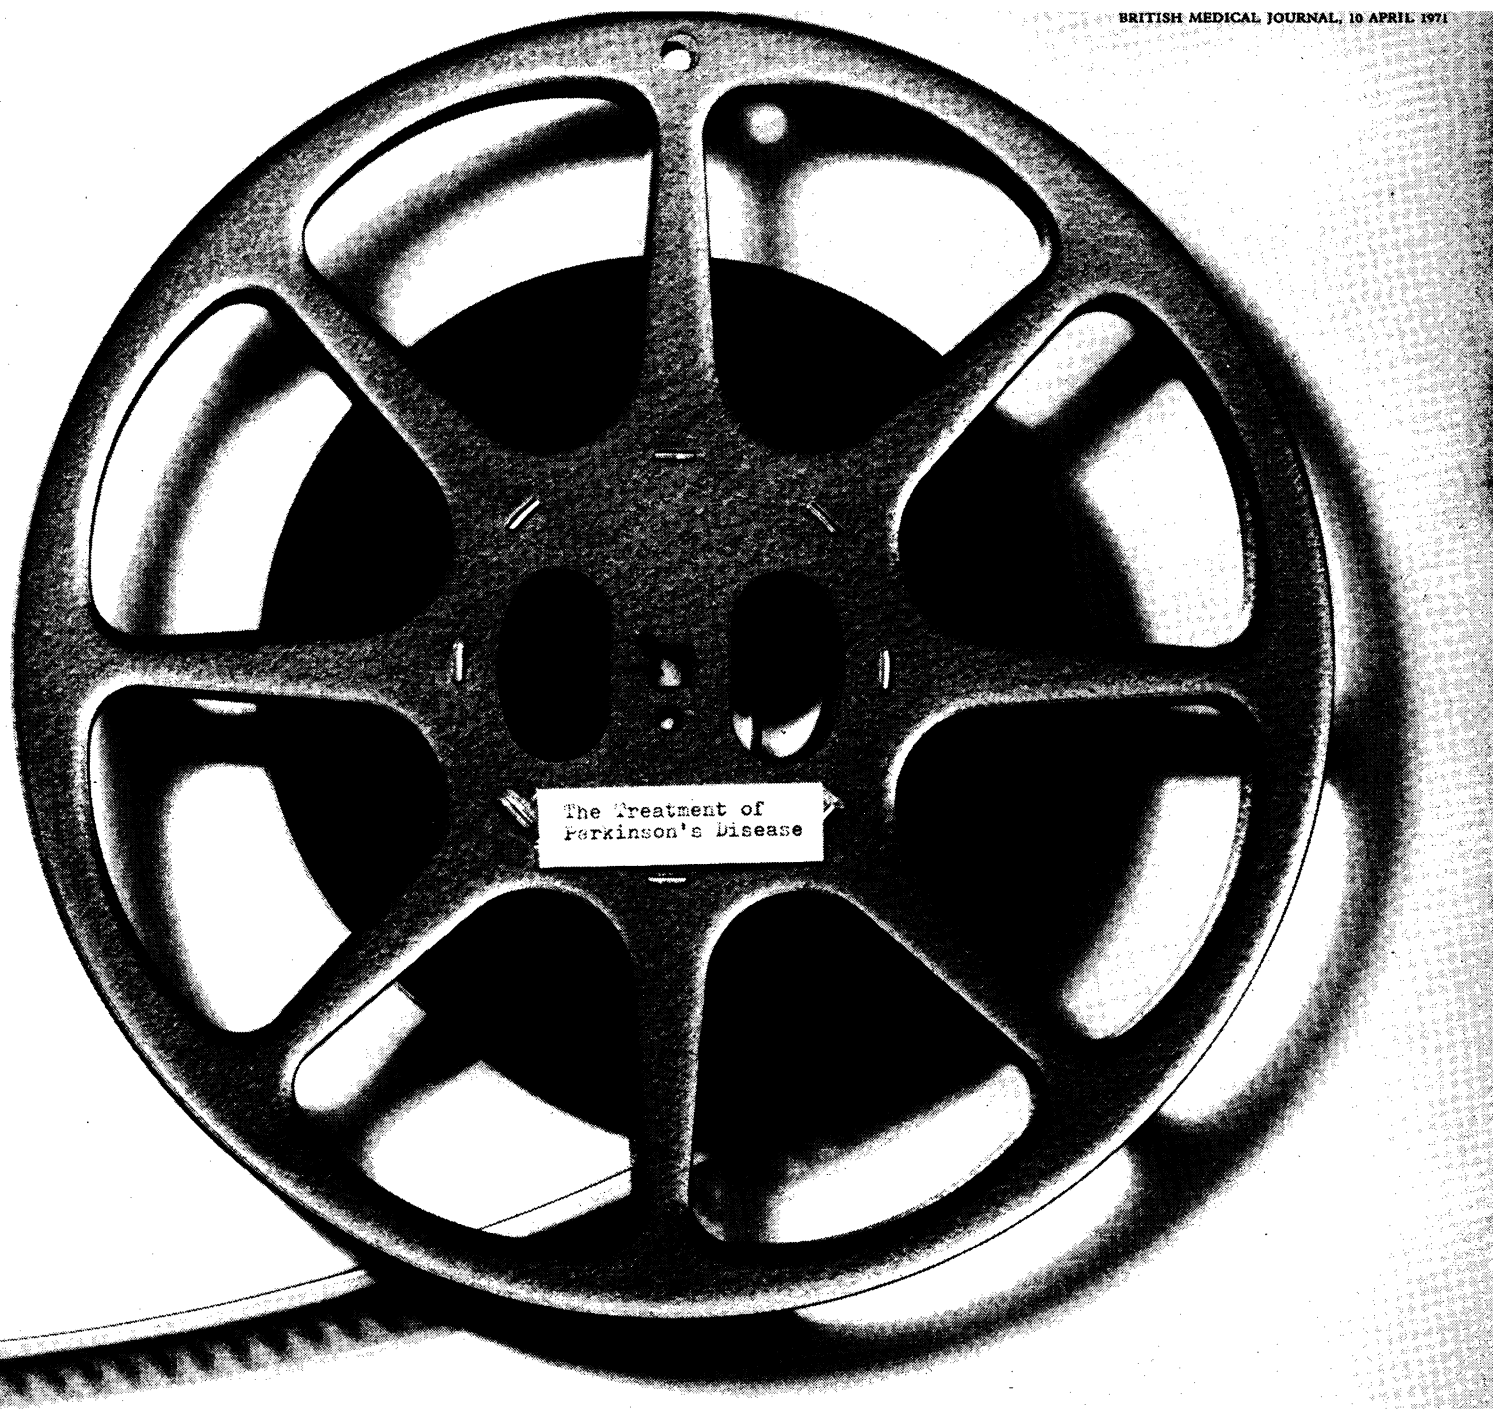

An estimated 150,000 extra families now qualify for *free* milk under the new scheme that began on April 4th—the Government are advertising this from mid-April. Other responsible bodies and individuals should also take every opportunity to inform people about the new scheme, otherwise thousands of needy families may lose their free milk. You can help by advising your patients of their entitlement. Details obtainable from your local Social Security office.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

FOLEX 350

The question of the optimum dose of folic acid has not been easy to establish but recent work* suggests that not less than 300 mcg. and not more than 400 mcg. daily can be considered adequate. In the light of this knowledge Folex-350 containing 350 mcg. of folic acid and 308 mg. of ferrous fumarate (equivalent to 100 mg. elemental iron) has been introduced.

What is the word for emotional distress?

The presenting symptoms? "Can't sleep . . . irritable . . . no appetite . . . tired . . . aches and pains"—consultation after consultation.

The task? To penetrate behind the facade to the underlying condition.

The aim? To make the patient feel better quickly and reveal the problem, without unnecessary consultations.

Tranquillizers or hypnotics may deal with part of this aim, but only part.

Prothiaden can meet all the requirements. It is rapidly effective in both anxiety and depression.

One ingredient, a single-strength capsule means straightforward dosage.

Prothiaden is well tolerated even by the elderly:

Prothiaden can mean trouble-free treatment of anxiety, depression, in fact any manifestation of emotional distress.

Angina Pectoris. There's no need to give up.

There is a stage in the development of angina when the patient is suffering more and more attacks and is consuming an ever increasing amount of trinitrin.

But there is still no need for the patient – or his doctor – to give up.

It is in just this situation that 'Inderal' can be so helpful.

'Inderal' gives the heart continuous protection against the effects of physical or emotional stress.

Because the heart has less unproductive work to perform, it needs less oxygen.

The balance between myocardial oxygen demand and the supply from diseased coronary arteries becomes more favourable.

Attacks are fewer, capacity for exercise is substantially improved and lost confidence is regained.

Even in severe angina there is no need to give up.

There is irrefutable evidence from 21 double-blind trials to show that 'Inderal' helps make life worth living again.

Detailed information, available on request, should be consulted before prescribing.

"... a well-grown boy of six years swallowed 16 tablets (80mg) of nitrazepam [Mogadon]. He was admitted to hospital for observation and slept soundly through the night. He awoke next morning and promptly demanded his breakfast."¹

Now you can sleep easy

Against a background of increasing concern about the danger of barbiturate poisoning (as few as 20 or 30 tablets may prove fatal), the advent of Mogadon must be of considerable importance. Indeed, Mogadon "..... appears to be as nearly as safe as a drug can be."² Even as many as 80 tablets have produced no untoward effects. Moreover, a recent trial in the B.M.J. showed Mogadon comparable in effect to butobarbitone.³ When such a drug exists, should you risk using anything else?

For the control of PAIN

JUST NE TABLET...

Pain is but a symptom, best treated with the lowest effective dose of any medicament

Clinical experience shows that, in fibrositis, dysmenorrhoea, sinusitis, and other commonly encountered conditions of persistent pain, just one tablet of Paramol-118 every four hours provides relief.

By fortifying 500 mg paracetamol with a low dose (10 mg) of dihydrocodeine it is possible to control pain with a minimum daily intake of both drugs: in such low dosage the possibility of side effects is remote.

Needless to say, if necessary, this dosage can be increased to two tablets every four hours – and, even at this higher dosage level, risk of any really undesirable side effect is insignificant.

Costs, too, are kept low: with one tablet every four hours the basic NHS cost of a day's therapy is only about 2p.

six good reasons for prescribing **Bactrim* Roche** for urinary tract infections

Urinary Infections respond outstandingly well to Bactrim Roche, a combination of trimethoprim and a sulphonamide. One such combination was used prophylactically in 25 cases of chronic bacteriuria where the usual treatment (ampicillin, tetracycline or nitrofurantoin) had failed. Although the dose used was very much below the level normally recommended† the treatment controlled 22 (88 per cent) of the group for periods of 6 to 36 months.¹ The combination used in Bactrim Roche (trimethoprim/sulphamethoxazole) achieved a cure rate of 85 per cent one week after treatment ended and 67 per cent after four to five weeks, compared with 70 per cent and 52 per cent for ampicillin.² An editorial in the British Medical Journal commented that the combination "was therefore clearly superior . . . and this superior effect was even more appreciable in the treatment of patients who had failed on another drug."³

from asthmatic attack

BRITISH MEDICAL JOURNAL, 10 APRIL 1971

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports^{1,22} confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school,

exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

is it gout?

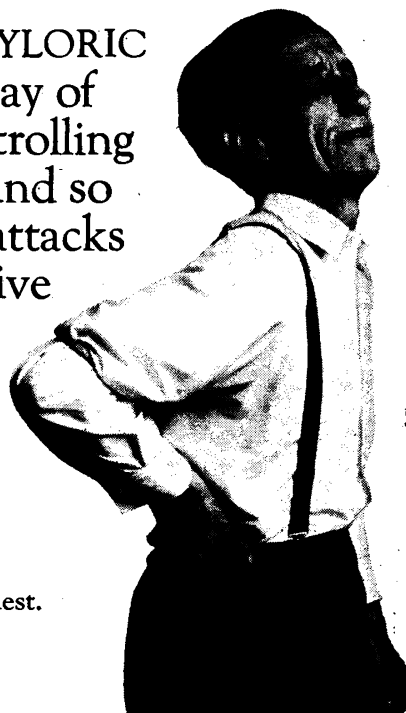

Gout does not always present in the classical manner, with an inflamed big toe. It can present as pain in almost any joint. Colicky pain due to urate stones is sometimes a precursor of gout.

In circumstances like these it is worth remembering gout and having the serum uric acid level checked.

If the diagnosis is gout, ZYLORIC* is there to provide effective prophylactic treatment. ZYLORIC provides the rational way of treating gout by controlling uric acid formation and so preventing the acute attacks and the degenerative changes associated with the history of the disease.

Ponstan will make the next step safer for this arthritic patient

When her condition requires more than just the simple analgesic therapy offered by aspirin, codeine co., or paracetamol, PNSTAN* should be prescribed. PNSTAN is the effective analgesic step for this arthritic patient. Because ESBATAL* meets these criteria it is of special value for the new hypertensive patient

FOR REGIONAL CENTRES

Smaller District Hospitals Treat Renal Failure With The SEFTON Automatic Peritoneal Dialysis Machine

Few can justify the facilities and staff, even assuming the expertise is available, of establishing haemo-dialysis therapy.

A Sefton machine installed by the League of Friends at a smaller district hospital.

Today, many smaller hospitals are increasing their dialysis capacity and are giving relief to the regional centres by P.D. treatment with the Sefton machine. Being automatic, the old time-consuming and tedious repetitive work of P.D. nursing has been removed. This is a nurse-operated machine and no back-up of renal technicians is required.

lack of nursing fuss around the bed. Patients prefer the Sefton way of treatment and nurses learn the simple technique quickly.

The Sefton Automatic P.D. Machine cannot be ignored by those reviewing nursing programmes for efficient deployment of scarce nursing resources—without reducing nursing care.

Fail-Safe Patient Comfort

To know the old manual P.D. procedure is to know the Sefton technique. It follows the same pattern, **even to dispensing the fluid by gravity.** The Sefton machine not only controls inflow, retention period and drainage, it also monitors fluid balance giving warning of any excess of fluid retention or drainage. Patient comfort is assured by the automatic control of fluid temperature and

NEW-SEPTRIN ADULT SUSPENSION

The availability of SEPTRIN* Adult Suspension now brings the most advanced form of antibacterial therapy within the reach of those older children and adults who cannot or will not adhere to a tablet regime.

Each 5 ml of SEPTRIN Adult Suspension contains 80 mg trimethoprim and 400 mg sulphamethoxazole—the same strength as each SEPTRIN Tablet. This scientifically designed combination has a distinctive mode of bactericidal action. By producing a sequential double blockade of bacterial metabolism, SEPTRIN kills a wide range of pathogenic organisms.

*Trade Mark.

SEPTRIN Adult Suspension is available in bottles of 100 ml.

Also available: SEPTRIN Tablets, SEPTRIN Paediatric Tablets, and SEPTRIN Paediatric Suspension, containing trimethoprim and sulphamethoxazole. Full information is available on request.

WE DON'T OFFER the earth - only a few score square miles of Cornish countryside, an old grey town, the finest beach in the County, and a comfortable income.

Four young partners seek a successor to their retiring Senior Partner. We believe that good surroundings, good company, and good organisation can still beat the National Health Service and make medicine a satisfying profession. We feel we have provided ourselves with all the usual amenities and the Regional Hospital. We are having kindly provided us with an Obstetric Unit, we would prefer someone qualified for the obstetric list. His wife must not wish to take a part in the running of the practice as we have a more than adequate staff. We are pioneers in the use of a domiciliary Nursing Sister, (not to be confused with a District Nurse!). If you wish to be on duty more than one evening per week and more weeks on than off, our practice is not for you.

We shall be glad to forward fuller details of our firm to all those who care to write to Box 3208. BMJ 6-1

GENERAL PRACTICE TRAINING POSTS

BRO MORGANNWG HOSPITAL MANAGEMENT COMMITTEE of the Welsh National School of Medicine and Welsh Vocational Training Scheme for General Practice

The Bro Morgannwg Hospital Management Committee in association with the Welsh National School of Medicine, invite applications for a new three year rotating hospital and general practitioner vocational training scheme consisting of two years in hospital at Bridgend General Hospital, Bridgend, Glamorgan and one year in general practice. The hospital appointments commencing in the S.H.O. grade will consist of: (1) Six months in Geriatrics/General Medicine, (2) Six months in Accident and Emergency Surgery, (3) Six months in General Practice, (4) Six months in Obstetrics and Gynaecology, (5) Six months in Paediatrics, (6) Six months in General Practice.

During each of these hospital appointments special arrangements will be made for experience in Otorhinolaryngology, Ophthalmology, Psychiatry, Dermatology, and other subjects relevant to general practice. The general practice appointments will be held in practices in the same area as the hospital appointments, and will include day release to attend the vocational training course organised by the General Practice Unit at the Welsh National School of Medicine, in Cardiff.

The obstetric appointment fulfils the requirements of the D.Obst. R.C.O.G. and completion of the course should fit the applicant to take the examination for membership of the Royal College of General Practitioners and will entitle the holder after entering General Practice to the special vocational training allowance.

Applications giving full particulars and the names and addresses of two referees to be submitted to the Group Secretary, "Garthmor", Old Road, Neath, within fourteen days. (44338) 11

UNITED NORWICH HOSPITALS Vocational Training Scheme for General Practitioners

To commence 1st August, 1971, the scheme of General Professional Training is in accordance with the recommendations of the Royal Commission on Medical Education 1965-68.

There is a rotation of four S.H.O. posts over two years through in-patient departments as follows: Obstetrics, six months; General Medicine and Dermatology, six months; Paediatrics, three months; Geriatrics, three months; Accidents and Emergency, three months; and a period of three months during which the S.H.O. will (a) act as locum for his colleagues holidays, and (b) undertake study of a subject of his particular interest. Over the two year period, one half-day per week will be allocated for attendance at specialist clinics, e.g. Rheumatology, Psychiatry, Ophthalmology, etc., and to give opportunity to visit general practices in the area.

Modern married accommodation is provided during the two years of hospital appointments.

A third year will be spent as a trainee in one or more general practices in the area.

During the three year period, General Practitioners will organise a programme of evening tutorials with meetings and seminars on Human Behaviour and Social Medicine, with a variety of psychology topics. There will also be an intensive course on practice organisation and methods early in the trainee year.

Further information can be obtained on request from the Secretary, Norfolk & Norwich Institute for Medical Education, Norfolk & Norwich Hospital, Norwich, Norfolk, NR 53A.

The hospital may be visited and General Practitioner teachers may be met. Requests should be addressed to the Secretary, Norfolk & Norwich Hospital, Norwich, Norfolk, NR 53A.

Applications with full particulars and the names of two referees should be sent to the Group Secretary, Norwich, Lowestoft, and Great Yarmouth Hospital Management Committee, St. Stephen's Road, Norwich, by 1st May, 1971.

Provisional interviews will be held on Wednesday 19th May, 1971, from 2.00 p.m. (44338) 11

BOARD OF MANAGEMENT FOR GLASGOW WESTERN AND GARTNAVEL HOSPITALS General Practice Training Posts

VOCATIONAL TRAINING PROGRAMME FOR GENERAL PRACTICE

A scheme run in association with the Royal College of General Practitioners will begin on 1st August, 1971. The training covers a period of three years after full registration. Eighteen months will be based on hospital posts at S.H.O. level and normal salary scales will apply. The posts will be in general medicine and geriatrics, obstetrics, paediatrics and psychiatry. A further six months will be spent in studying the wider application of community care and preventive medicine to general practice, followed by a year in general practice at registrar grade, with day release to the departments of dermatology, ophthalmology and otolaryngology, and an elective period. The posts in medicine are at present at Knightswood Hospital, and will be transferred to the new Gartnavel General Hospital due to open in late 1972. Applications are now invited for two posts in medicine beginning on 1st August 1971. Doctors who have already completed six months obstetrics are also invited to apply.

Further enquiries may be made to the Group Medical Superintendent, Western Infirmary, Glasgow, W.1, and applications in writing, accompanied by the names and addresses of two referees, should be made to the Group Medical Superintendent within one month from the date of this advertisement. Clinical Advisor

Dept. of Clinical Research

£3,000-£3,500 + car

Syntex Pharmaceuticals Ltd, is the U.K. subsidiary of the internationally based Syntex Corporation, world leaders in steroid research and development.

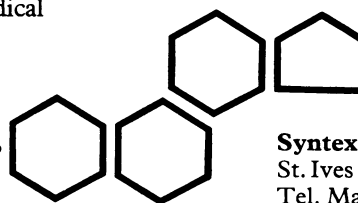

The successful applicant is likely to be aged under 35 and will possess a lively and enquiring mind. A record of personal research achievement or previous experience of the pharmaceutical industry would be useful but is not essential.

Rapid expansion of our research programme into new fields of interest has created the need for a further clinical advisor who will assist our Associate Medical Director, Dr. Miriam Moore-Robinson, with initiating, progressing and analysing clinical trials on existing and future products. This will involve liaison with clinicians and consultants in the U.K. and overseas and will provide an exciting opportunity to become involved in new methods on the frontiers of medical research.

The salary offered is negotiable according to qualifications and experience but will be in the range £3,000 to £3,500; a company car is provided. Additional benefits include non-contributory pension and life assurance schemes. In the first instance please apply to:

Applications are invited from registered medical practitioners, preferably with postgraduate (research) experience.

NOTICES

WORLD HEALTH ORGANISATION AND COUNCIL OF EUROPE FELLOWSHIPS 1972

A small number of fellowships for study abroad will be awarded in 1972 by the World Health Organisation and the Council of Europe. These are available to registered medical practitioners, dental practitioners, state registered nurses and other professional personnel engaged in the health services, medical education, or medical research in the United Kingdom.

The fellowships are awarded normally for periods of two weeks to one month. **Only in exceptional cases can periods longer than this be considered.** In each case the fellows are given a monthly allowance of approximately £110 per month, (the amount varying with the country or countries visited) together with all travelling expenses.

Applicants should be of at least five years standing in their profession and able to assess critically their visits and studies abroad so as to utilise the experience for the benefit of the health services of the United Kingdom. They will be expected to continue in the health services of the United Kingdom for at least three years after holding a fellowship.

Application forms for fellowships to be taken up in 1972 may be obtained:

- By those resident in Scotland from:*
The Secretary, Scottish Home and Health Department, St. Andrew's House, Edinburgh 1.
- By those resident in Wales:*
The Secretary, Y Swyddfa Gymreig, Welsh Office, Health Department, Cathays Park, Cardiff CF1 3NQ.
- By those resident in Northern Ireland from:*
The Secretary, Ministry of Health and Social Services, Dundonald House, Upper Newtownards Road, Belfast 4.
- By others from:*
The Secretary, Room B102, Department of Health and Social Security, Alexander Fleming House, Elephant and Castle, London, S.E.1.

Envelopes should be marked "W.H.O. and Council of Europe Fellowships".

The completed application forms should be returned to the office from which it was obtained not later than Saturday, May 22nd, 1971.

ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director: James Harper M.B., F.R.C.P. (Edin), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer-stay patients and geriatric patients. The hospital's amenities include Gloucester House, which comprises an Occupational Therapy department, a swimming pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from £31.50 per week, and subscribers to private medical insurance schemes such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges.

Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel. Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London, W.1. 99

Fucidin[®]

specific antistaphylococcal therapy

given orally or by intravenous infusion . . .

- quickly achieves high, sustained, blood levels
- produces bactericidal tissue and fluid concentrations against most strains of staphylococcus
- penetrates even avascular sites (bone, necrotic tissue, and pus)
- acts specifically against staphylococci including multiple antibiotic-resistant strains
- causes no known pattern of toxicity

Fucidin capsules: 250 mg sodium fusidate BP, in bottles of 36 and 250.

Fucidin suspension: each 5 ml contains 250 mg of fusidic acid, in bottles of 50 ml.

Fucidin for intravenous infusion: in packs of two ampoules one of which contains 580 mg diethanolamine fusidate BPC as a dry powder (equivalent to 500 mg sodium fusidate BP) and the other 50 ml sterile phosphate-citrate buffer.
